Summary of Changes

This publication contains the following new or updated information. This list includes substantive updates only and is not intended to reflect all changes. Translated versions are not always available for each revision.

Topic	Page
Removed footnote for filtering option, this is no longer available	Throughout
Corrected catalog numbers	Front Cover
Updated catalog number explanation (letter g) as option a is no longer available	7
Corrected catalog numbers from 20F to 20G	37
Updated AC input over-voltage trip and bus over-voltage trip to include frame 10	63
Added 20-750-ENET2P dual-port Ethernet/IP optional module card	191...193
Updated information for 20-COMM-L as option is discontinued	191...193
Removed 1769-SM1 and 20-COMM-R as options are discontinued	191
Added XT feedback and safety option cards and the IMPORTANT statement related to safety card usage	195, 197
Removed 20-750-EMCKDK-1-F10 as option is unavailable	199
Updated transceiver options based EU and UK Ecodesign updates	201
Corrected 200 Hp line reactor catalog numbers	205
Corrected AR table to remove duplicate entries	215

The PowerFlex® 750-Series is a robust family of AC drives that provide ease of use, flexibility, and performance for various industrial applications. PowerFlex 753 drives provide general-purpose control for applications up to 400 Hp and 270 kW. PowerFlex 755 drives provide maximum flexibility and performance up to 2000 Hp and 1500 kW.

Maximize your productivity by taking advantage of these key features that are offered in the PowerFlex 750-Series drives:

- **DeviceLogix™** – Embedded control technology that supports the manipulation of discrete outputs and drive control functions, while using discrete inputs and drive status information on board the drive.
- **Predictive Diagnostics** – Tracks information that affects the life of the drive cooling fans and relay outputs. The drive can also be programmed to monitor the runtime hours for machine or motor bearings.
- **Option Cards** – Each drive has a slot-based architecture. Supported hardware control options are available for both products, to help reduce your inventory and spare parts requirements.
- **Safe Torque Off, Safe Speed Monitor, Integrated Safety - Safe Torque Off, and Integrated Safety Functions Option** – Provides a choice for safety levels depending on your application requirements.
- **Communication** – The PowerFlex 755 drives come with a built-in Ethernet port. Ethernet can easily be added to the PowerFlex 753 drives with a communication module.
- **I/O** – Option cards are available for additional analog and digital I/O. The PowerFlex 753 drives come with built-in I/O that can also be expanded with option cards.
- **Packaging** – Factory and field-installable enclosure options are available to meet most environmental requirements. Options include Open Type and flange mount to support cabinet mount requirements, extra protection wall-mount for harsh environments, and debris hoods and conduit plate kits.
- **Standard Power Structure** – A common power structure is shared to provide the same physical size and power range.

PowerFlex 750-Series Drive Family

This section provides a brief introduction to the different PowerFlex 750-Series drives.

Wall Mount Frames 1...7
IP00/IP20, NEMA/UL Type Open Drive
Includes a DC link choke on all Frames and
internal brake transistor, standard on Frames
1...5, and optional on Frames 6 and 7.

Floor Mount Frames 8...10
IP20, NEMA/UL Type 1 Drive (2500 MCC style cabinet)
Includes a DC link choke, integrated AC line fuses, and roll-out design.
Hood that is shown on top of cabinets is optional. To order the hood, see [page 199](#) for information.

Floor Mount Frames 8...10
IP20, NEMA/UL Type 1 Drive with Options (2500 MCC style cabinet)
Includes a DC link choke, integrated AC line fuses, roll-out design, and
option bay for control/protection devices.

Roll-out Design
(Frame 8 shown)
A roll-out cart is required for Frames 8...10 drives and Frame 9...10 option bay
chassis. The roll-out cart has an adjustable curb height of 0...182 mm (0...7.2 in.)
and curb offset/reach of 0...114 mm (0...4.5 in.).
See [page 200](#) for information to order the roll-out cart.

1	AC Input with Precharge, includes DC Terminals	1...5 8...10
4	DC Input with Precharge	5...10
A	AC Input with Precharge, no DC Terminals	6...8 ⁽¹⁾

(1) The DC Bus Bar kit (20-750-DCBB1-Fx) is available for Frames 6...7 AC input drives that require DC bus terminals.

<i>d</i>		
Enclosure		
Code	Description	Frames
R	IP20, NEMA/UL Type Open, Frame 1	1
F ⁽¹⁾	Flange (NEMA/UL Type 4X/12 back)	2...5
G	IP54, NEMA/UL Type 12	2...7
N ⁽²⁾	IP20/IP00, NEMA/UL Type Open	2...7
B ⁽³⁾	IP20, NEMA/UL Type 1, 600 mm (23.6 in.) Deep, Standard Cabinet Color (RAL 7032)	8...10
J ⁽³⁾	IP54, UL Type 12, 800 mm (31.5 in.) Deep, Standard Cabinet Color (RAL 7032)	8...10
K ⁽³⁾	IP54, NEMA 12, 2500 MCC Style Cabinet and Options w/MCC Power Bus, 800 mm (31.5 in.) Deep, Standard Cabinet Color (RAL 7032)	8...10
L ⁽³⁾	IP20, NEMA/UL Type 1, 800 mm (31.5 in.) Deep, Standard Cabinet Color (RAL 7032)	8...10
P ⁽³⁾	IP20, NEMA/UL Type 1, 2500 MCC Style Cabinet and Options w/MCC Power Bus, 800 mm (31.5 in.) Deep, Standard Cabinet Color (RAL 7032)	8...10
W ⁽³⁾	IP20, NEMA/UL Type 1, 2100 MCC Style Cabinet and Options w/MCC Power Bus, 800 mm (31.5 in.) Deep, CenterLine 2100 Gray (ASA49)	8...10
Y ⁽³⁾	IP54, NEMA 12, 2100 MCC Style Cabinet and Options w/MCC Power Bus, 800 mm (31.5 in.) Deep, CenterLine 2100 Gray (ASA49)	8...10
T	IP00, UL Open Type without Control POD	8...10

(1) For Frames 6...7, a user installed flange kit (20-750-FLNG4-Fx) is available to convert a Code N drive that provides a NEMA/UL Type 4X/12 back.

(2) Frames 2...5 are IP20, Frames 6...7 are IP00.

(3) Available as a drive with options (21G).

(1) Frames 1...5 are IP20, NEMA/UL Type Open. Frames 6...7 are IP00, NEMA/UL Type Open. Frames 1...7 can be converted to IP20, NEMA/UL Type 1 with optional kit (20-750-NEMA1-Fx), where x is the frame size.

(2) The 5th character determines Input Type; "T" = AC input with precharge and DC terminals, and "A" = AC input with precharge and no DC terminals. For DC input drives, see [DRIVES-56001](#), the PowerFlex Common Bus Configuration Selection Guide.

(3) Drive must be programmed to lower voltage to obtain the currents shown in parentheses.

(4) The 12th character determines whether an internal dynamic braking IGBT is included; "A" = Internal dynamic braking transistor installed, and "N" = No internal dynamic braking transistor.

(1) The 5th character determines Input Type; "I" = AC input with precharge and DC terminals, and "A" = AC input with precharge and no DC terminals. For DC input drives, see [DRIVES-56001](#), the PowerFlex Common Bus Configuration Selection Guide.

(2) Drive must be programmed to lower voltage to obtain the currents shown in parentheses.

(3) The 12th character determines whether an internal dynamic braking IGBT is included; "A" = Internal dynamic braking transistor installed, and "N" = No internal dynamic braking transistor.

200...240V AC, Three-phase Drives (Continued)

Note: Frame 6...7 IP00, NEMA Type Open drives can be converted to a flange mount drive (Back/Heatsink: IP66, NEMA/UL Type 4X) with an optional user installed flange kit (kit 20-750-FLNG4-F6 for Frame 6, and kit 20-750-FLNG4-F7 for Frame 7). See page [8](#) for 200...240V, Frame 6...7 IP00, NEMA Type Open drives.

(1) The 5th character determines Input Type; "I" = AC input with precharge and DC terminals, and "A" = AC input with precharge and no DC terminals. For DC input drives, see [DRIVES-56001](#), the PowerFlex Common Bus Configuration Selection Guide.

(2) The 12th character determines whether an internal dynamic braking IGBT is included; "A" = Internal dynamic braking transistor installed, and "N" = No internal dynamic braking transistor.

Flange Mount (Front: IP20, NEMA/UL Type Open; Back/Heatsink: IP66, NEMA/UL Type 4X)

Note: Frame 6...7 IP00, NEMA Type Open drives can be converted to a flange mount drive (Back/Heatsink: IP66, NEMA/UL Type 4X) with an optional user installed flange kit (20-750-FLNG4-F6 for Frame 6, and 20-750-FLNG4-F7 for Frame 7). See page [16](#) for 690V, Frame 6...7 IP00, NEMA Type Open drives.

(1) Frames 3...5 are IP20, NEMA/UL Type Open. Frames 6...7 are IP00, NEMA/UL Type Open. Frames 3...7 can be converted to IP20, NEMA/UL Type 1 with optional kit (20-750-NEMA1-Fx), where x is the frame size of the drive.

(2) The 11th character determines default Filtering and Common Mode Cap jumper configuration; 'J'= Installed, and 'A'= Removed.

(3) The 12th character determines whether an internal dynamic braking IGBT is included; 'A'= Internal dynamic braking transistor installed, and 'N'= No internal dynamic braking transistor.

810V DC Nominal Input - Common Bus Drives (continued)

IMPORTANT At 810V DC, PowerFlex 750-series Frames 3...5 drives cannot be used on the same common DC bus as 810/932V DC PowerFlex 750-series Frames 6...10 drives. For more details, contact your local Rockwell Automation sales office or your Allen-Bradley distributor.

(1) Frames 1...5 are IP20, NEMA/UL Type Open. Frames 6...7 are IP00, NEMA/UL Type Open. Frames 8...10 are IP20, NEMA/UL Type 1. Frames 1...7 can be converted to IP20, NEMA/UL Type 1 with optional kit (20-750-NEMA1-Fx), where x is the frame size of the drive.

(2) Light Duty rating only available on Frame 8...10 drives. Light Duty allows 110% overload for 1 minute, and does not have a 3 second overload rating.

(3) The 5th character determines Input Type; "I" = AC input with precharge and DC terminals, and "A" = AC input with precharge and no DC terminals. For DC input drives, see [DRIVES-SG001](#), the PowerFlex Common Bus Configuration Selection Guide.

(4) The 12th character determines whether an internal dynamic braking IGBT is included; "A" = Internal dynamic braking transistor installed, and "N" = No internal dynamic braking transistor.

(5) The 6th character (designated by an * in this table) determines Enclosure Type and Depth. "B" = IP20, NEMA/UL Type 1, MCC style 600 mm (23.6 in.) deep, and "L" = IP20, NEMA/UL Type 1, MCC style 800 mm (31.5 in.).

(6) A roll-out cart is required with Frame 8...10 drives to assist with power wiring and cabinet mounting. See page [200](#).

(1) Light Duty rating only available on Frame 8...10 drives. Light Duty allows 110% overload for 1 minute, and does not have a 3 second overload rating.

(2) The 5th character determines Input Type; "I" = AC input with precharge and DC terminals, and "A" = AC input with precharge and no DC terminals. For DC input drives, see [DRIVES-56001](#), the PowerFlex Common Bus Configuration Selection Guide.

(3) Also available with internal Brake IGBT (20G1xxxxxxANONNNNN).

(4) A roll-out cart is required with Frame 8...10 drives to assist with power wiring and cabinet mounting. See page [200](#).

380...400V AC, Three-phase Drives (Continued)

Note: Frame 6...7 IP00, NEMA Type Open drives can be converted to a flange mount drive (back/heatsink: IP66, NEMA/UL Type 4X) with an optional user installed flange kit (kit 20-750-FLNG4-F6 for Frame 6, and kit 20-750-FLNG4-F7 for Frame 7). See page 27 for 380...400V, Frame 6...7 IP00, NEMA Type Open drives.

(1) Frames 1...5 are IP20, NEMA/UL Type Open. Frames 6...7 are IP00, NEMA/UL Type Open. Frames 8...10 are IP20, NEMA/UL Type 1. Frames 1...7 can be converted to IP20, NEMA/UL Type 1 with optional kit (20-750-NEMA1-Fx), where x is the frame size of the drive.

(2) Light Duty rating only available on Frame 8...10 drives. Light Duty allows 110% overload for 1 minute, and does not have a 3 second overload rating.

(3) The 5th character determines Input Type; "I" = AC input with precharge and DC terminals, and "A" = AC input with precharge and no DC terminals. For DC input drives, see [DRIVES-56001](#), the PowerFlex Common Bus Configuration Selection Guide.

(4) The 12th character determines whether an internal dynamic braking IGBT is included; "A" = Internal dynamic braking transistor installed, and "N" = No internal dynamic braking transistor.

(5) The 6th character (designated by an * in this table) determines Enclosure Type and Depth. "B" = IP20, NEMA/UL Type 1, MCC style 600 mm (23.6 in.) deep, and "L" = IP20, NEMA/UL Type 1, MCC style 800 mm (31.5 in.).

(6) A roll-out cart is required with Frame 8...10 drives to assist with power wiring and cabinet mounting. See page [200](#).

(1) The 5th character determines Input Type; "I" = AC input with precharge and DC terminals, and "A" = AC input with precharge and no DC terminals. For DC input drives, see [DRIVES-SG001](#), the PowerFlex Common Bus Configuration Selection Guide.

600V AC, Three-phase Drives

Frames 3, 4, and 5 are only 600V AC drives. Frames 6 and 7 are dual-voltage drives, and can be operated at 600V or 690V AC.

IMPORTANT Frames 3, 4, and 5 must not be used in common DC input-sharing applications with Frames 6 or larger drives. For more details, contact your local Rockwell Automation sales office or your Allen-Bradley distributor.

(1) Frames 3...5 are IP20, NEMA/UL Type Open. Frames 6...7 are IP00, NEMA/UL Type Open. Frames 8...10 are IP20, NEMA/UL Type 1. Frames 3...7 can be converted to IP20, NEMA/UL Type 1 with optional kit (20-750-NEMA1-Fx), where x is the frame size of the drive.

(2) Light Duty rating only available on Frame 8...10 drives. Light Duty allows 110% overload for 1 minute, and does not have a 3 second overload rating.

(3) The 5th character determines Input Type; "I" = AC input with precharge and DC terminals, and "A" = AC input with precharge and no DC terminals. For DC input drives, see [DRIVES-SS001](#), the PowerFlex Common Bus Configuration Selection Guide.

(4) The 12th character determines whether an internal dynamic braking IGBT is included; "A" = Internal dynamic braking transistor installed, and "N" = No internal dynamic braking transistor.

(5) The 6th character (designated by an * in this table) determines Enclosure Type and Depth. "B" = IP20, NEMA/UL Type 1, MCC style 600 mm (23.6 in.) deep, and "L" = IP20, NEMA/UL Type 1, MCC style 800 mm (31.5 in.).

(6) A roll-out cart is required with Frame 8...10 drives to assist with power wiring and cabinet mounting. See page [200](#).

600V AC, Three-phase Drives (Continued)

Frames 3, 4, and 5 are only 575...600V AC drives. Frames 6 and 7 are dual-voltage drives, and can be operated at 575...600 V or 660...690V AC.

IMPORTANT Frames 3, 4, and 5 must not be used in common DC input-sharing applications with Frames 6 or larger drives. For more details, contact your local Rockwell Automation sales office or your Allen-Bradley distributor.

IP54, NEMA/UL Type 12

(3) The 12th character determines whether an internal dynamic braking IGBT is included; "A" = Internal dynamic braking transistor installed, and "N" = No internal dynamic braking transistor.

(4) A roll-out cart is required with Frame 8...10 drives to assist with power wiring and cabinet mounting. See page [200](#).

600V AC, Three-phase Drives (Continued)

Frames 3, 4, and 5 are only 600V AC drives. Frames 6 and 7 are dual-voltage drives, and can be operated at 600V or 690V AC.

IMPORTANT

Frames 3, 4, and 5 must not be used in common DC input-sharing applications with Frames 6 or larger drives. For more details, contact your local Rockwell Automation sales office or your Allen-Bradley distributor.

Note: Frame 6...7 IP00, NEMA Type Open drives can be converted to a flange mount drive (back/heatsink: IP66, NEMA/UL Type 4X) with an optional user installed flange kit (kit 20-750-FLNG4-F6 for Frame 6, and kit 20-750-FLNG4-F7 for Frame 7). See page [34](#) for 600V, Frame 6...7 IP00, NEMA Type Open drives.

(1) Frames 6...7 are IP00, NEMA/UL Type Open. Frames 8...10 are IP20, NEMA/UL Type 1. Frames 6...7 can be converted to IP20, NEMA/UL Type 1 with optional kit (20-750-NEMA1-Fx), where x is the frame size.

(2) Light Duty rating only available on Frame 8...10 drives. Light Duty allows 110% overload for 1 minute, and does not have a 3 second overload rating.

(3) The 5th character determines Input Type; "I" = AC input with precharge and DC terminals, and "A" = AC input with precharge and no DC terminals. For DC input drives, see [DRIVES-SG001](#), the PowerFlex Common Bus Configuration Selection Guide.

(4) The 12th character determines whether an internal dynamic braking IGBT is included; "A" = Internal dynamic braking transistor installed, and "N" = No internal dynamic braking transistor.

(5) The 6th character (designated by an * in this table) determines Enclosure Type and Depth. "B" = IP20, NEMA/UL Type 1, MCC style 600 mm (23.6 in.) deep, and "L" = IP20, NEMA/UL Type 1, MCC style 800 mm (31.5 in.).

(6) A roll-out cart is required with Frame 8...10 drives to assist with power wiring and cabinet mounting. See page [200](#).

(1) Light Duty rating only available on Frame 8...10 drives. Light Duty allows 110% overload for 1 minute, and does not have a 3 second overload rating.

(2) The 11th character determines default Filtering and Common Mode Cap jumper configuration. "J" = Installed, "A" = Removed.

(3) The 12th character determines whether an internal dynamic braking IGBT is included; "A" = Internal dynamic braking transistor installed, and "N" = No internal dynamic braking transistor.

(4) The 6th character (designated by an * in this table) determines the enclosure type. Refer to the Enclosure Type table in the [Catalog Number Explanation on page 5](#).

(5) A roll-out cart is required with Frame 8...10 drives to assist with power wiring and cabinet mounting. See page [199](#).

540V DC Nominal Input - Common Bus Drives (continued)

IMPORTANT

Frame 6...7 IP00, NEMA Type Open drives can be converted to a flange mount drive (Back/Heatsink: IP66, NEMA/UL Type 4X) with an optional user installed flange kit (20-750-FLNG4-F6 for Frame 6, and 20-750-FLNG4-F7 for Frame7). See page [40](#) for 540V DC, Frame 6...7 IP00, NEMA Type Open drives.

(1) Frames 1...5 are IP20, NEMA/UL Type Open. Frames 6...7 are IP00, NEMA/UL Type Open. Frames 8...10 are IP20, NEMA/UL Type 1. Frames 1...7 can be converted to IP20, NEMA/UL Type 1 with optional kit (20-750-NEMA1-Fx), where x is the frame size of the drive.

- (2) Light Duty rating only available on Frame 8...10 drives. Light Duty allows 110% overload for 1 minute, and does not have a 3 second overload rating.
- (3) The 12th character determines whether an internal dynamic braking IGBT is included; "A" = Internal dynamic braking transistor installed, and "N" = No internal dynamic braking transistor.
- (4) The 6th character (designated by an * in this table) determines the enclosure type. Refer to the Enclosure Type table in the [Catalog Number Explanation on page 5](#).
- (5) A roll-out cart is required with Frame 8...10 drives to assist with power wiring and cabinet mounting. See page [199](#).

810V DC Nominal Input - Common Bus Drives

IMPORTANT At 810V DC, PowerFlex 750-series Frames 3...5 drives cannot be used on the same common DC bus as 810/932V DC PowerFlex 750-series Frames 6...10 drives. For more details, contact your local Rockwell Automation sales office or your Allen-Bradley distributor.

(1) Frames 3...5 are IP20, NEMA/UL Type Open. Frames 6...7 are IP00, NEMA/UL Type Open. Frames 8...10 are IP20, NEMA/UL Type 1. Frames 3...7 can be converted to IP20, NEMA/UL Type 1 with optional kit (20-750-NEMA1-Fx), where x is the frame size of the drive.

(2) Light Duty rating only available on Frame 8...10 drives. Light Duty allows 110% overload for 1 minute, and does not have a 3 second overload rating.

(3) The 12th character determines whether an internal dynamic braking IGBT is included; "A" = Internal dynamic braking transistor installed, and "N" = No internal dynamic braking transistor.

(4) The 6th character (designated by an * in this table) determines the enclosure type. Refer to the Enclosure Type table in the [Catalog Number Explanation on page 5](#).

(5) A roll-out cart is required with Frame 8...10 drives to assist with power wiring and cabinet mounting. See page [199](#).

810V DC Nominal Input - Common Bus Drives (continued)

IMPORTANT At 810V DC, PowerFlex 750-series Frames 3...5 drives cannot be used on the same common DC bus as 810/932V DC PowerFlex 750-series Frames 6...10 drives. For more details, contact your local Rockwell Automation sales office or your Allen-Bradley distributor.

IP54, NEMA/UL Type 12

(1) Light Duty rating only available on Frame 8...10 drives. Light Duty allows 110% overload for 1 minute, and does not have a 3 second overload rating.

(2) The 12th character determines whether an internal dynamic braking IGBT is included; "A" = Internal dynamic braking transistor installed, and "N" = No internal dynamic braking transistor.

(3) The 6th character (designated by an * in this table) determines the enclosure type. Refer to the Enclosure Type table in the [Catalog Number Explanation on page 5](#).

(4) A roll-out cart is required with Frame 8...10 drives to assist with power wiring and cabinet mounting. See page 199.

Flange Mount (Front: IP20, NEMA/UL Type Open; Back/Heatsink: IP66, NEMA/UL Type 4X)

Tip: Frame 6...7 IP00, NEMA Type Open drives can be converted to a flange mount drive (Back/Heatsink: IP66, NEMA/UL Type 4X) with an optional user installed flange kit (20-750-FLNG4-F6 for Frame 6, and 20-750-FLNG4-F7 for Frame 7). See page 49 for 932V DC, Frame 6...7 IP00, NEMA Type Open drives.

PowerFlex 755 Floor Mount Drives for Open Frame Designs

Floor mount, open frame drives are for applications that require power ranges from 215 kW to 1500kW (250 Hp...2000 Hp) and are contained within an enclosure of your choosing. These drives use the same drive unit(s) as standard IP20 and IP54 product. Open Frame applications can accommodate either AC input or Common Bus DC input systems.

Floor mount, open frame drives can also be horizontally mounted, with derating. See publication [750-IN020](#) for details.

To order an IP00 drive:

1. Using the tables that follow, locate your desired drive output values.
2. Select the Base Drive Catalog Number for your desired output values.
3. Note the Quantity Required.
4. Order the specified quantity (1, 2, or 3) of the Base Drive Catalog Number.
5. See page 130 for option kits and the PowerFlex 755 IP00 NEMA/UL Open Type Drive Installation Instructions, publication [750-IN020](#) for installation details.

(1) The 11th character determines filtering and common mode cap jumper configuration. "J" = Installed, "A" = Removed.

(2) A roll-out cart is required with Frame 8...10 drives to assist with power wiring and cabinet mounting. See page [200](#).

Option kits provide electrical connections, mounting and ventilation provisions along with the control pod and its corresponding cables for PowerFlex 755 Floor Mount Open Frame designs. Other available accessories include the rollout cart and EMC cores. See PowerFlex 755 IP00, NEMA/UL Open Type Drive Frames 8...10, publication [750-IN020](#) for option kit details.

Power Options for PowerFlex 755 Floor Mount, AC Input Drives

Pre-engineered, factory installed options are available with the PowerFlex 755 floor mount drives, which includes disconnects, reactors, contactors, MCC bus and wiring only bays.

To configure a catalog number for a floor-mount drive with options, perform the following steps:

1. Select the base drive catalog number from the tables on pages 108...111. Drive selection is based on the output amps and corresponding system overload(s) required by the application.
2. Select the duty rating. See the Required Options table on page 107 for duty rating details. For example: 21G1ALC460JNONNNNN-**LD**.
3. Select the desired enclosure type as described on pages 108...111. For example: 21G1ALC460JNONNNNN-LD.
4. Select Power Disconnect and/or Wire Only Bay option from the Required Options table on page 107. Add the desired option codes to the end of the base drive catalog number, separating each option code with a dash. For example: 21G1ALC460JNONNNNN-LD-**P3**.
5. If options listed in the Additional Options table on page 107 are required, add the option code(s) to the end of the drive catalog number, separating each code with a dash. For example: 21G1ALC460JNONNNNN-LD-P3-**P11**.

Note: A 600 mm wide cabinet bay is added to the right of the drive cabinet(s) to house the power options. The Wiring Only Bay option (-P14) also adds a 600 mm wide cabinet bay to the right of the drive cabinet(s).

Frame 8 with Power Option Bay

Input power landed on line-side of power disconnect.

Frame 9 with Power Option Bay

Input power landed behind circuit breaker, which is accessed by extracting rollout

Item	Description
1	Power Disconnect: Options -P3 or -P5
2	Contactor: Options -P11 or -P12
3	Reactor: Options -L1, -L2, -L3, or -L4

See Additional Options on page 56.

Required Options

Type	Option		Frame Size	Description
System Overload Duty Cycle ^{(1) (2)}	LD	Light Duty	8...10	100% continuous current, 110% current for 1 minute.
	ND	Normal Duty		100% continuous current, 110% current for 1 minute, 150% for 3 seconds.
	HD	Heavy Duty		100% continuous current, 150% current for 1 minute, 180% for 3 seconds.
Power Disconnect ⁽¹⁾	P3	Input Thermal Magnetic Circuit Breaker	8...10 ⁽³⁾	This option is for disconnecting drive power. An Allen-Bradley 140G Molded Case Circuit Breaker is provided. Frame 8 drives include flange style handle operators that are door interlocking and padlockable. Frame 9 drive circuit breakers are pushbutton actuated with door interlocks and are padlockable.
	P5	Input Non-Fused Molded Case Disconnect Switch	8 Only	This option is for disconnecting drive power. An Allen-Bradley 140G Molded Case Switch is provided. All switches include flange style handle operators that are door interlocking and padlockable. Note: PowerFlex 755 Frame 8 converter modules input fuses installed as standard equipment do not provide branch protection.
Wiring Only Bay	P14	Wiring Only Bay	8...10	This option identifies that an extra bay is provided for wiring the drive. This option extends the drive power bus from the drive bay into the option bay, making field connection options more flexible. No drive input protection is supplied with this option selection. If desired, a power option bay with a disconnect option can be added to the wiring bay. Documentation to reflect input disconnection and protection is customer supplied. See page 130 for more information on power cable entry/exit locations.

(1) Only one option of this type can be selected.

(2) See following selection tables for specific rating information.

(3) Frame 10 ordered via Engineered-To-Order (ETO) process.

Additional Options

Type	Option		Applicable Frame Size	Description
Contactors ⁽¹⁾⁽²⁾	P11	Input Contactor	8 Only	A contactor is provided between the AC line and the drive. The contactor is controlled by customer supplied 120V AC (480V input) or 230V AC (400V input) remote contact closure logic. A terminal block for control is provided for customer use, and is wired to 1 N.O. and 1 N.C. auxiliary contact on the contactor. IMPORTANT The P11 option 'Alternate Contact Circuit' is not intended to be used as a Start/Stop circuit.
	P12	Output Contactor		A contactor is provided between the drive output and the motor. The contactor is controlled by customer supplied 120V AC (480V input) or 230V AC (400V input) remote contact closure logic. A terminal block for control is provided for customer use and is wired to 1 N.O. and 1 N.C. auxiliary contact on the contactor. Note: As an alternative to an output contactor, certain safety applications can be satisfied using the PowerFlex 750-Series Safe Torque Off Option Card (Cat. No. 20-750-S). Safe Torque Off is ideal for safety related applications requiring removal of rotational power to the motor without removing power from the drive. Safe Torque Off functionality offers the benefit of quick start-up after a demand on the safety system and helps reduce wear from repetitive start-up. It also provides safety ratings up to and including SIL3, PLe, and CAT 3.
Reactors ⁽¹⁾⁽³⁾	L1	3% Input Reactor	8...9	Provides an open core drive input line reactor that mounts inside the power bay option enclosure. Typical impedance is 3%.
	L2	3% Output Reactor		Provides an open core drive output load reactor, which mounts inside the power bay option enclosure. Typical impedance is 3%.
	L3	5% Input Reactor	8 Only	Provides an open core drive input line reactor that mounts inside the power bay option enclosure. Typical impedance is 5%.
	L4	5% Output Reactor		Provides an open core drive output load reactor, which mounts inside the power bay option enclosure. Typical impedance is 5%.
MCC Power Bus ⁽¹⁾⁽⁴⁾	P20	1250 Amp Bus	8...10	Provides a 1250 Amp MCC Bus.
	P22	2000 Amp Bus		Provides a 2000 Amp MCC Bus.
	P24	3000 Amp Bus		Provides a 3000 Amp MCC Bus.
Auxiliary Power	X1	Auxiliary Transformer	8 Only	Auxiliary transformer providing 500VA. Available as an option on frame 8, IP20 units. This option is standard on all other cabinet configurations.

(1) Only one option of this type can be selected.

(2) Contactor options are not available for systems with MCC power bus.

(3) To accommodate a larger reactor, an 800 mm deep cabinet must be selected for the following Frame 8 drives; C750, C770, D710, D740 at light duty (LD), and C770 at normal-duty (ND).

(4) MCC bus is connected to the line side of the disconnect, as delivered from the factory.

Enclosure Type Selections

Code	Description
B	600 mm deep, IP20/NEMA 1, standard color (RAL 7032)
L	800 mm deep, IP20/NEMA 1, standard color (RAL 7032)
P	800 mm deep, IP20/NEMA 1, with Motor Control Center (MCC) power bus option, standard color (RAL 7032)
W	800 mm deep, IP20/NEMA 1, with MCC power bus option, CENTERLINE 2100 gray (ASA49)
J	800 mm deep, IP54/NEMA 12, standard color (RAL 7032)
K	800 mm deep, IP54/NEMA 12, with MCC power bus option, standard color (RAL 7032)
Y	800 mm deep, IP54/NEMA 12, with MCC power bus option, CENTERLINE 2100 gray (ASA49)

Connect to a CENTERLINE 2100 Motor Control Center (MCC)

Select the splice kit best suited for your application, determine which drive side that you want to connect.

NOTE: A splice kit contains three splice plates.

PowerFlex 755 CENTERLINE 2100 Splice Kits

A complete installation requires one transition section and one bus bar splicing kit. Splicing kits include all necessary hardware to complete connection of all three-phases.

PowerFlex 755 CENTERLINE® 2100 Splice Kits

Mounting Channel	Busbar Position ⁽¹⁾	Amp Rating	Left-side Kit Cat. No.	Right-side Kit Cat. No.	Frame Sizes

(1) All busbar positions are 20 in. deep.

(2) Hardware is included to install the optional 1.5 in. mounting channel.

PowerFlex 755 Empty Option Bay

This section is for applications with a PowerFlex 755 floor mount drive that need additional cabinet space. These added cabinets provide an elegant packaging option when expanding a PowerFlex 755, frame 8, 9, or 10 lineup. All Empty Option Bay cabinets match the standard color (RAL 7032) of the PowerFlex 755 Floor Mount Drive. Each Empty Option Bay includes a sub-panel. Reference publication For installation details, see publication 750-IN031.

The Right Mount Bus Bar kits listed below can only be installed to the right of a PowerFlex 755 Floor Mount Drive, when facing the front of the drive. If the application requires mounting the Empty Option Bay to the left of the PowerFlex 755 Floor Mount Drive, then the Rear Drive Bus Bar can be installed behind the drive unit(s). Power cabling is landed on the Rear Drive Bus Bars and passed through the cabinet side wall to the Empty Option Bay.

The Option Bay Hardware Kit listed below contains the door handle, an air barrier (for use between cabinets) and a door overlay label. One is required for each option bay.

PowerFlex 755 Empty Option Bay ⁽¹⁾

(1) Contact your local Rockwell Automation sales office or Allen-Bradley distributor for availability.

(2) Only use with 600mm deep cabinet (drive enclosure code B).

(3) Only use with a 800 mm deep cabinet (drive enclosure code J, K, L, P, W or Y).

(4) Hardware kit includes door handle, door overlay label and Formex air barrier (installed between cabinets).

(5) Installed to the right of any PowerFlex 755 floor mount drive except a Frame 8 with disconnect (-P3 or -P5 option).

Certifications and Specifications

This section provides information for certifications and specifications.

Certifications

	(1) Category II (Isolation Transformer Level) - Typically two levels of isolation or protection from outdoor power lines. Category III (most common) Distribution Level Inside a Building - Typically one level of isolation or protection from outdoor power lines.																																	
(2) Excluding failure from cosmic radiation. Cosmic radiation increases rate of IGBT malfunction at altitudes greater than 3000 m (9842.6) above sea level. Concrete walls and ceilings or concrete walls and large bottles of water overhead are examples of ways to shield against cosmic radiation.																																		
(3) Frame 1 drives are limited to a maximum of 2000 m (6,561.7 ft) thermally. See Derating Guidelines on page 70 .																																		
(4) IEC Standard 60364																																		
(5) Drive is limited to a maximum of 4800 m (15,748.0 ft) thermally. See Derating Guidelines on page 70 .																																		
(6) PowerFlex 755 Frame 1 can only be operated on a solidly grounded system.

	Short circuit trip	Phase-to-phase on drive output					

Technical Specifications (Continued)

Category	Specification			
Electrical	AC input voltage tolerance	See Input Voltage Tolerance on page 66 for full power and operating range.		
	Frequency tolerance	47...63 Hz		
	Input phases	Three-phase input provides full rating for all drives. For Frames 1...7 (output current up to 456 A), single-phase operation provides up to 50% of rated current at 25 °C (77 °F) surrounding temperature. Single-phase operation is not recommended for Frames 8 and larger.		
	DC input voltage tolerance	±10% of nominal bus voltage (see Nominal bus voltage (full load) on page 63)		
	Displacement power factor	0.98 across entire speed range		
	DC link impedance	≤ 4%		
	Efficiency	97.5% at rated amps, nominal line volts		
	Maximum short circuit rating	200,000 A RMS symmetrical (20F and 20G drives only)		
	Actual short circuit rating	Determined by AIC rating of installed fuse/circuit breaker. See page 120 for 21G drives.		
	Drive to motor power ratio			
	Min	Recommended not less than 1:2 ratio		
	Max	Recommended not greater than 2:1 ratio		
	Brake IGBT rating	100% of motor-rated torque		
	Control POD current draw	5 A		
	Digital inputs			
	Nominal	DC	AC	
Maximum	24V DC	120V AC		
High state	30V DC	132V AC		
Low state	20...24V DC	100...132V AC		
	0...5V DC	0...30V AC		
PTC inputs				
Standard	PowerFlex 753 MCB	22-Series I/O option module	ATEX option module for 11-Series I/O option module	
Trip resistance	N/A ⁽¹⁾	DIN 44082	IEC 6094-8	
Nominal resistance	3.1 kΩ	3.1 kΩ	3.2 kΩ	
Reset resistance	1.8 kΩ	1.8 kΩ	1.6 kΩ	
Short circuit trip resistance	2.2 kΩ	2.2 kΩ	N/A ⁽³⁾	
	N/A ⁽²⁾	80 Ω	100 Ω	
	(1) Not designed to a standard.			
	(2) No short circuit fault.			
	(3) No hysteresis, fault is latched.			
Battery	User-installed CR1220 lithium coin cell battery provides power to the real-time clock (optional, not supplied). Preserves the clock setting in the event power to the drive is lost or cycled. Approximate life is 4.5 years with drive unpowered, or lifetime if drive is powered.			

Technical Specifications (Continued)

Category	Specification	
Control	Method	Sine coded PWM with programmable carrier frequency. Ratings apply to all drives.
	Carrier frequency	Default settings Frames 1...34 kHz Frames 4...102 kHz Settings Frames 1...62, 4, 8, 12 kHz ^{(1) (2)} Frame 72, 4, 8 kHz ⁽¹⁾ Frames 8...102, 4 kHz
	Output voltage range	0 to rated motor voltage
	Output frequency range	0...325 Hz at 2 kHz carrier 0...590 Hz at 4 kHz carrier
	Frequency accuracy Digital input Analog input	Within ±0.01% of set output frequency Within ±0.4% of maximum output frequency
	Frequency control	Speed regulation – with slip compensation (V/Hz and Sensorless Vector modes) 0.5% of base speed across 40:1 speed range, 40:1 operating range
	Speed control	Without feedback (Flux Vector mode), 0.1% of base speed across 100:1 speed range, 120:1 operating range, 50 rad/s bandwidth
		With feedback (Flux Vector mode), 0.001% of base speed across 100:1 speed range, 1000:1 operating range, 190 rad/s bandwidth
	Torque regulation	Without feedback (Flux Vector mode), ±5%, 600 rad/s bandwidth
		With feedback (Flux Vector mode), ±2%, 2500 rad/s bandwidth
	Selectable motor control	• Standard V/Hz with full custom capability • Sensorless Vector mode with full tuning • Flux Vector mode with and without a feedback device • Induction motor control • Surface-mount permanent magnet motor control with encoder feedback (Frames 1 . . . 10)⁽³⁾ • Surface-mount permanent magnet motor control without encoder feedback (Frames 1 . . . 7)⁽³⁾ • Internal permanent-magnet motor control with encoder feedback (Frames 1 . . . 10) • Internal permanent-magnet motor control without encoder feedback (Frames 1 . . . 7)
	Stop modes	Multiple programmable stop modes including - Ramp, Coast, DC-Brake, Ramp-to-Hold, Fast Braking, and Current Limit Stop.
	Accel/Decel	Two independently programmable accel and decel times. Each time can be programmed from 0...3600 seconds in 0.1 second increments (0 to motor nameplate speed).
	S-curve time	Adjustable from 0...100% of ramp time (normal duty rating)
	Intermittent overload Light duty (only Frames 8...10)	110% overload capability for up to 1 min out of 10 min
	Normal duty	110% overload capability for up to 1 min out of 10 min 150% overload capability for up to 3 s out of 60 s
	Heavy duty	150% overload capability for up to 1 min out of 10 min 180% overload capability for up to 3 s out of 60 s
Current limit capability	Proactive current limit programmable from 20...160% of rated output current. Independently programmable proportional and integral gain.	
Electronic motor overload protection	Class 10 motor overload protection according to NEC article 430 and motor over-temperature protection according to NEC article 430.126 (A)(2). UL 508C File E59272.	

(1) Frames 6 and 7 600/690V AC input drives can be set to 2 kHz or 4 kHz.

(2) Frames 3...5 600/690V AC input drives can be set to 2, 4, or 8 kHz.

(3) Only PowerFlex 755 drives.

Design Considerations

This section provides information for design considerations.

Input Voltage Tolerance

Table 0.A

Drive Rating	Nominal Line Voltage	Nominal Motor Voltage	Drive Full Power Range	Drive Operating Range	
200...240	200	200	200...264	180...264	Hp @ Motor (Drive Output) Nominal Motor Voltage - 10% Nominal Motor Voltage Drive Rated Voltage Drive Rated Voltage + 10% No Drive Output Derated Power Range Full Power Range Drive Operating Range Actual Line Voltage (Drive Input)
	208	208	208...264		
	240	230	230...264		
380...480	380	380	380...528	342...528	
	400	400	400...528		
	480	460	460...528		
600...690	600	575	575...759	517...759	
	690	660	660...759		
Drive full power range =	Nominal motor voltage to drive-rated voltage + 10%. Rated current is available across the entire drive full-power range.				
Drive operating range =	Lowest nominal motor voltage - 10% to drive-rated voltage + 10%. Drive output is linearly created when actual line voltage is less than the nominal motor voltage				

EXAMPLE

Calculate the maximum power of a 5.0 Hp, 460V motor connected to a 480V-rated drive supplied with 342V actual line voltage input.

- Actual line voltage/nominal motor voltage = 74.3%
 - 74.3% x 5.0 Hp = 3.7 Hp
 - 74.3% x 60 Hz = 44.6 Hz
- At 342V actual line voltage, the maximum power the 5.0 Hp, 460V motor can produce is 3.7 Hp at 44.6 Hz.

IMPORTANT

For maximum protection of the drive and its internal components, we recommend the use of semiconductor fuses to other methods of circuit protection. Semiconductor fuses reduce the risk of drive damage from power quality events and improves machine and process utilization.

Approximate Watts Loss

The following table lists watts loss data for PowerFlex 750-Series drives running at full load, full speed, and default carrier frequency.

Internal watts are the watts that the control structure of the drive dissipates into the cabinet, regardless of mounting style. External watts are the watts that are dissipated directly through the heatsink and are outside the cabinet for flange mount, and inside the cabinet for other mounting types.

(1) Select the watts loss based on the catalog number.

(2) For MCC power bus options, add the following watts: 1250 A power bus = 188 watts; 2000 A power bus = 261 watts; 3200 A power bus = 421 watts.

Derating Guidelines

If a catalog number is not shown, you can operate that drive without derating as long as the limits specified on [page 61](#) and [page 63](#) are followed.

Ambient Temperature/Load and Altitude/Load – 208V AC (Frames 1...7)

Cat. No. (see page 5)	208V AC Power Rating						Derating for IP20 NEMA/UL Type Open (Frames 1...5) and IP00 NEMA/UL Type Open (Frames 6 and 7) ⁽¹⁾	
	Light Duty		Normal Duty		Heavy Duty		Ambient Temperature/Load	Altitude/Load
	kW	Cont. Amps	kW	Cont. Amps	kW	Cont. Amps	— 2 kHz --- 4 kHz --- 8 kHz — 12 kHz	— 2 kHz --- 4 kHz --- 8 kHz — 12 kHz
20x...B6P8 (Frame 1)	—	—	1.5	7.8	0.75	4.8

Fuse and Circuit Breaker Ratings

The tables in this section provide recommended AC line input fuse and circuit breaker information. See [Fusing on page 100](#) and [Circuit Breakers on page 100](#) for UL and IEC requirements. The size recommendations are based on 40 °C (104 °F) and the U.S. NEC. Other country, state, or local codes can require different ratings. DC link fuse recommendations for DC input drives are also provided. In addition, Frame 8 and larger drives include AC line fuses (with blown fuse indicators) to provide drive short circuit protection.

Input Device Requirements

Frame s	Enclosure Catalog Code	Enclosure Type	Installation Type	UL Certification Required	UL Certification Not Required
1	R	IP20 NEMA/UL Open Type	Installed in a ventilated or non-ventilated cabinet.	All devices that are listed on pages 101 , 103 , 105 and 109 are acceptable. When installed in a ventilated cabinet, time delay fuses, circuit breakers, and 140M/MT Motor Protection Circuit Breakers (MPCBs) that are rated for use as self-protected combination motor controller must meet or exceed the listed minimum enclosure volume on pages 105 and 109 .	All devices that are listed on pages 101 through 117 are acceptable.
			Installed outside of cabinet by using NEMA Type 1 kit or in a ventilated cabinet.	Only non-time delay fuses that are listed on pages 101 , 103 , 105 and 109 , excluding maximum value, are acceptable.	
2...5	N	IP20 NEMA/UL Open Type	Installed in a ventilated or non-ventilated cabinet. Heat sink is inside or outside of cabinet.	All devices that are listed on pages 101 , 103 , 105 , 109 , and 113 are acceptable. When installed in a ventilated cabinet, time delay fuses, circuit breakers, and 140M/MT MPCBs must meet or exceed the listed minimum enclosure volume on pages 101 , 103 , 105 , 109 , and 113 .	
	F	Flange			
	N	IP20 NEMA/UL Open Type	Installed outside of cabinet by using NEMA Type 1 kit or in a ventilated cabinet.	208V AC/281V DC or 240V AC/324V DC drives. Only non-time delay fuses that are listed on pages 101 and 103 , excluding maximum value, are acceptable. 400V AC/540V DC or 480V AC/650V DC drives. Only non-time delay fuses that are listed on pages 105 and 109 , excluding maximum value, are acceptable. 600V AC/810V DC drives. Only non-time delay fuses that are listed on page 113 are acceptable, with maximum value of 40 A (Frame 3), 60 A (Frame 4), and 100 A (Frame 5).	
	F	Flange			
	G	IP54 NEMA/UL Type 12		Installed inside or outside of any cabinet.	
6 and 7	N	IP00 NEMA/UL Open Type	Installed in any cabinet. Heat sink is inside or outside of cabinet.	208V AC/281V DC or 240V AC/324V DC drives. Only non-time delay fuses that are listed on pages 101 and 103 , excluding maximum value, are acceptable. 400V AC/540V DC or 480V AC/650V DC drives. All devices that are listed on pages 105 and 109 are acceptable. 600V AC/810V DC drives. Only time delay and non-time delay fuses that are listed on page 113 are acceptable.	
			Installed outside of cabinet by using NEMA Type 1 kit.		
	G	IP54 NEMA/UL Type 12	Installed inside or outside of any cabinet.	All devices that are listed on pages 101 , 103 , 105 , 109 , and 113 are acceptable.	
8...10	B, L, P, W	IP20 NEMA/UL Type 1	Installed inside of any cabinet.	All devices that are listed on pages 107 , 111 , and 115 are acceptable.	
	J, K, Y	IP54 NEMA 12	Installed inside or outside of any cabinet.	All devices that are listed on pages 107 , 111 , and 115 are acceptable.	

IMPORTANT

For maximum protection of the drive and its internal components, we recommend the use of semiconductor fuses to other methods of circuit protection. Semiconductor fuses reduce the risk of drive damage from power quality events and improves machine and process utilization.

Fusing

The recommended fuse types are listed here. If available current ratings do not match the ratings that are listed in these tables, choose the next higher fuse rating.

- IEC – BS88 (British Standard) Parts 1 & 2, EN60269-1, Parts 1 & 2, type gG or equivalent must be used.
Typical designations include, but is not limited to the following; Parts 1 & 2: AC, AD, BC, BD, CD, DD, ED, EFS, EF, FF, FG, GF, GG, GH.
- UL – UL Class CC, T, RK1, J, or L must be used.

Circuit Breakers

The non-fuse listings in the following tables include inverse time circuit breakers, instantaneous trip circuit breakers (motor circuit protectors), and 140M/MT Motor Protection Circuit Breakers (MPCBs) that are rated for use as self-protected combination motor controller. If one of these methods are chosen for protection, the following requirements apply:

- IEC – Both types of circuit breakers and 140M/MT self-protected combination motor controllers are acceptable for IEC installations.
- UL – Only inverse time circuit breakers and the specified 140M/MT self-protected combination motor controllers are acceptable for UL installations.

(1) 'Applied Rating' refers to the motor that will be connected to the drive. For example, a 'C02Z' drive can be used in Normal Duty mode on a 7.5 kW motor. A 'C015' drive can be used in Heavy-duty mode on a 5.5 kW motor with the same ratings as a 'C01T'. The drive can be programmed for either mode. Wiring and fuses can be sized based on the programmed mode. For any given drive catalog number, Normal Duty mode provides higher continuous current but smaller overload current regarding Heavy-duty mode. See parameter 306 [Duty Rating].

(2) For IP66 (NEMA 4X) enclosures, this drive increases from the frame size listed to the next higher frame size. For example, if this drive is listed as Frame 4, then for all IP ratings other than IP66, it is a Frame 4 and for the IP66 rating, it increases to Frame 5. See table [1 on page 5](#) for frame/rating cross reference.

(3) This drive is the next larger frame size.

(4) Minimum protection device size is the lowest rated device that supplies maximum protection without nuisance tripping.

(5) Maximum protection device size is the highest rated device that supplies drive protection. For US NEC, minimum size is 125% of motor F.L.A. Ratings that are shown are maximum.

(6) Circuit Breaker – inverse time breaker. For US NEC, minimum size is 125% of motor F.L.A. Ratings that are shown are maximum.

(7) When using a circuit breaker or time-delay fuse with a drive installed in a ventilated enclosure, the enclosure volume must be greater than or equal to the minimum volume specified in this column. Application-specific thermal considerations can require a larger enclosure.

(8) Motor Protection Circuit Breaker – instantaneous trip circuit breaker. For US NEC, minimum size is 125% of motor F.L.A. Ratings that are shown are maximum.

(9) Bulletin 140M/MT devices with adjustable current range must have the current trip set to the minimum range that the device does not trip.

(10) Manual Self-Protected (Type E) Combination Motor Controller. UL Listed for 208V Wye or Delta, 240V Wye or Delta, 480V Wye or Delta, 480V V/347 or 600V V/347. Not UL Listed for use on 480V or 600V Delta/Delta, corner ground, or high-resistance ground systems.

(11) The AC ratings of Bulletin 140M/MT devices can vary. See publication [140-ID005](#) or [140M-ID002](#).

(12) Bulletin 140MT devices must be Frame C (C3E) or Frame D (D9E).

(13) Bulletin 140MT devices must be Frame D (D9E).

(14) When using a Manual Self-Protected (Type E) Combination Motor Controller, the drive must be installed in a ventilated or non-ventilated enclosure with the minimum volume that is specified in this column. Application-specific thermal considerations can require a larger enclosure.

(15) See Fuse Certification and Test Data in PowerFlex AC Drives in Common Bus Configurations Application Guidelines, publication [DRIVES-AT002](#) for fuse self-certification and test data for Bussmann 170M and JKS fuses recommended for the DC bus fusing.

(1) 'Applied Rating' refers to the motor that will be connected to the drive. For example, a 'C022' drive can be used in Normal Duty mode on an 11 kW motor, or in Heavy-duty mode on a 7.5 kW motor. A 'C015' drive can be used in Heavy-duty mode on a 5.5 kW motor with the same ratings as a 'C011'. The drive can be programmed for either mode. Wiring and fuses can be sized based on the programmed mode. For any given drive catalog number, Normal Duty mode provides higher continuous current but smaller overload current regarding Heavy-duty mode. See parameter 306 [Duty Rating].

(2) For IP66 (NEMA /UL Type 4X/12) enclosures, this drive increases from the frame size listed to the next higher frame size. For example, if this drive is listed as Frame 4, then for all IP ratings other than IP66, it is a Frame 4 and for the IP66 rating, it increases to Frame 5. See table [12 on page 5](#) for frame/rating cross reference.

(3) This drive is the next larger frame size.

(4) Minimum protection device size is the lowest rated device that supplies maximum protection without nuisance tripping.

(5) Maximum protection device size is the highest rated device that supplies drive protection. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(6) Circuit Breaker – inverse time breaker. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(7) When using a circuit breaker or time-delay fuse with a drive installed in a ventilated enclosure, the enclosure volume must be greater than or equal to the minimum volume specified in this column. Application-specific thermal considerations can require a larger enclosure.

(8) Motor Protection Circuit Breaker – instantaneous trip circuit breaker. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(9) Bulletin 140M/MT devices with adjustable current range must have the current trip set to the minimum range that the device does not trip.

(10) Manual Self-Protected (Type E) Combination Motor Controller, UL Listed for 208V Wye or Delta, 240V Wye or Delta, 480V Y/277 or 600V Y/347. Not UL Listed for use on 480V or 600V Delta/Delta, corner ground, or high-resistance ground systems.

(11) The AIC ratings of Bulletin 140M/MT devices can vary. See publication [140-ID005](#) or [140M-ID002](#).

(12) Bulletin 140MT devices must be Frame C (C3E) or Frame D (D9N).

(13) Bulletin 140MT devices must be Frame D (D9E).

(14) When using a Manual Self-Protected (Type E) Combination Motor Controller, the drive must be installed in a ventilated or non-ventilated enclosure with the minimum volume that is specified in this column. Application-specific thermal considerations can require a larger enclosure.

(15) See Fuse Certification and Test Data in PowerFlex AC Drives in Common Bus Configurations Application Guidelines, publication [DRIVES-AT002](#) for fuse self-certification and test data for Bussmann 170M and JKS fuses recommended for the DC bus fusing.

								323.8	467.3	600	1000	1400	1400		600		Bussmann 170M6613

(1) Applied rating refers to the motor that is connected to the drive. For example, a C022 drive can be used in Normal Duty mode on an 11 kW motor, or in Heavy Duty mode on a 7.5 kW motor. A C015 drive can be used in Heavy Duty mode on a 5.5 kW motor with the same ratings as a C011. The drive can be programmed for either mode. Wiring and fuses can be sized based on the programmed mode. For any given drive catalog number, Normal Duty mode provides higher continuous current but smaller overload current when compared to Heavy Duty mode. See parameter 306 [Duty Rating].

(2) For IP66 (NEMA IUL Type 4X/12) enclosures, this drive increases from the frame size listed to the next higher frame size. For example, if this drive is listed as Frame 4, then for all IP ratings other than IP66, it is a Frame 4 and for the IP66 rating, it increases to Frame 5. See table [63 on page 6](#) for frame/rating cross reference.

(3) Minimum protection device size is the lowest rated device that supplies maximum protection without nuisance tripping.

(4) Maximum protection device size is the highest rated device that supplies drive protection. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(5) Circuit breaker – inverse time breaker. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(6) When using a circuit breaker or time-delay fuse with a drive that is installed in a ventilated enclosure, the enclosure volume must be greater than or equal to the minimum volume specified in this column. Application-specific thermal considerations can require a larger enclosure.

(7) Motor Protection Circuit Breaker – instantaneous trip circuit breaker. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(8) Bulletin 140M/MT devices with adjustable current range must have the current trip set to the minimum range that the device does not trip.

(9) Manual Self-Protected (Type E) Combination Motor Controller. UL Listed for 208V Wye or Delta, 240V Wye or Delta, 480V V/277 or 600V V/347. Not UL Listed for use on 480V or 600V Delta/Delta, corner ground, or high-resistance ground systems.

(10) The AIC ratings of Bulletin 140M/MT devices can vary. See publication [140-ID005](#) or [140M-ID002](#).

(11) Bulletin 140MT devices must be Frame C (C3E) or Frame D (D9N).

(12) Bulletin 140MT Devices must be Frame D (D9E).

(13) When using a Manual Self-Protected (Type E) Combination Motor Controller, the drive must be installed in a ventilated or non-ventilated enclosure with the minimum volume that is specified in this column. Application-specific thermal considerations can require a larger enclosure.

(14) See Fuse Certification and Test Data in PowerFlex AC Drives in Common Bus Configurations Application Guidelines, publication [DRIVES-AT002](#), for fuse self-certification and test data for Bussmann 170M and JKS fuses recommended for the DC bus fusing.

(1) Applied rating refers to the motor that is connected to the drive. For example, a C460 drive can be used in Normal Duty mode on a 250 kW motor, in Heavy Duty mode on a 200 kW motor or in Light Duty mode on a 315 kW motor. The drive can be programmed for each mode. Wiring and fuses can be sized based on the programmed mode. For any given drive catalog number, Normal Duty mode provides higher continuous current but smaller overload current when compared to Heavy Duty mode. See parameter 306 [Duty Rating].

(2) These AC line fuses (with blown fuse indicators) are included in the drive to provide drive short circuit protection. AC input protection devices for branch circuit protection based on US NEC are listed in the table. Each drive bay has one fuse per phase.

(3) Each drive bay has one fuse per DC line.

(4) Minimum protection device size is the lowest rated device that supplies maximum protection without nuisance tripping.

(5) Maximum protection device size is the highest rated device that supplies drive protection. For US NEC, minimum size is 125% of motor F.L.A. Ratings that are shown are maximum.

(6) Circuit breaker – inverse time breaker. For US NEC, minimum size is 125% of motor F.L.A. Ratings that are shown are maximum.

(7) Recommended motor circuit protector – instantaneous trip circuit breaker. The trip setting must be set to the input current of the drive and must be sized for the continuous current of the system.

(8) These DC line fuses (with blown fuse indicators) are included in the drive to provide drive short circuit protection.

650V DC Input																		

(1) Applied rating refers to the motor that is connected to the drive. For example, a D022 drive can be used in Normal Duty mode on a 15 Hp motor, or in Heavy Duty mode on a 10 Hp motor. A D074 drive can be used in Heavy Duty mode on a 7.5 Hp motor with the same ratings as a D011. The drive can be programmed for either mode. Wiring and fuses can be sized based on the programmed mode. For any given drive catalog number, Normal Duty mode provides higher continuous current but smaller overload current when compared to Heavy Duty mode. See parameter 306 [Duty Rating].

(2) For IP66 (NEMA UL Type 4X/12) enclosures, this drive increases from the frame size listed to the next higher frame size. For example, if this drive is listed as Frame 4, then for all IP ratings other than IP66, it is a Frame 4 and for the IP66 rating, it increases to Frame 5. See table [14 on page 6](#) for frame/rating cross reference.

(3) Minimum protection device size is the lowest rated device that supplies maximum protection without nuisance tripping.

(4) Maximum protection device size is the highest rated device that supplies drive protection. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(5) Circuit breaker – inverse time breaker. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(6) When using a circuit breaker or time-delay fuse with a drive that is installed in a ventilated enclosure, the enclosure volume must be greater than or equal to the minimum volume specified in this column. Application specific thermal considerations can require a larger enclosure.

(7) Motor Protection Circuit Breaker – instantaneous trip circuit breaker. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(8) Bulletin 140M/MT devices with adjustable current range must have the current trip set to the minimum range that the device does not trip.

(9) Manual Self-Protected (Type E) Combination Motor Controller, UL Listed for 208V Wye or Delta, 240V Wye or Delta, 480V Y/277 or 600V Y/347. Not UL Listed for use on 480V or 600V Delta/Delta, corner ground, or high-resistance ground systems.

(10) The AIC ratings of Bulletin 140M/MT devices can vary. See publication [140-TD005](#) or [140M-TD002](#).

(11) Bulletin 140MT devices must be Frame C (C3E) or Frame D (D3N).

(12) Bulletin 140MT devices must be Frame D (D9E).

(13) When using a Manual Self-Protected (Type E) Combination Motor Controller, the drive must be installed in a ventilated or non-ventilated enclosure with the minimum volume that is specified in this column. Application-specific thermal considerations can require a larger enclosure.

(14) See Fuse Certification and Test Data in PowerFlex AC Drives in Common Bus Configurations Application Guidelines, publication [DRIVES-AT002](#), for fuse self-certification and test data for Bussmann 170M and JKS fuses recommended for the DC bus fusing.

650V DC Input																				

(1) Applied rating refers to the motor that is connected to the drive. For example, a D430 drive can be used in Normal Duty mode on a 350 Hp motor, in Heavy Duty mode on a 300 Hp motor or in Light Duty mode on a 400 Hp motor. The drive can be programmed for each mode. Wiring and fuses can be sized based on the programmed mode. For any given drive catalog number, Normal Duty mode provides higher continuous current but smaller overload current when compared to Heavy Duty mode. See parameter 306 [Duty Rating].

(2) These AC line fuses (with blown fuse indicators) are included in the drive to provide drive short circuit protection. AC input protection devices for branch circuit protection based on US NEC are listed in the table. Each drive bay has one fuse per phase.

(3) Each drive bay has one fuse per DC line.

(4) Minimum protection device size is the lowest rated device that supplies maximum protection without nuisance tripping.

(5) Maximum protection device size is the highest rated device that supplies drive protection. For US NEC, minimum size is 125% of motor F.L.A. Ratings that are shown are maximum.

(6) Circuit breaker – inverse time breaker. For US NEC, minimum size is 125% of motor F.L.A. Ratings that are shown are maximum.

(7) Motor Protection Circuit Breaker – instantaneous trip circuit breaker. For US NEC, minimum size is 125% of motor F.L.A. Ratings that are shown are maximum.

(8) These DC line fuses (with blown fuse indicators) are included in the drive to provide drive short circuit protection.

(1) Applied rating refers to the motor that is connected to the drive. For example, a E063 drive can be used in Normal Duty mode on a 60 Hp motor, in Heavy Duty mode on a 50 Hp motor. The drive can be programmed for each mode. Wiring and fuses can be sized based on the programmed mode. For any given drive catalog number, Normal Duty mode provides higher continuous current but smaller overload current when compared to Heavy Duty mode. See parameter 306 [Duty Rating].

(2) Minimum protection device size is the lowest rated device that supplies maximum protection without nuisance tripping.

(3) Maximum protection device size is the highest rated device that supplies drive protection. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(4) Normal duty.

(5) Heavy duty.

(6) Circuit breaker – inverse time breaker. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(7) When using a circuit breaker or time-delay fuse with a drive that is installed in a ventilated enclosure, the enclosure volume must be greater than or equal to the minimum volume specified in this column. Application specific thermal considerations can require a larger enclosure.

(8) Motor Protection Circuit Breaker – instantaneous trip circuit breaker. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(9) Bulletin 140M/MT devices with adjustable current range must have the current trip set to the minimum range that the device does not trip.

(10) Manual Self-Protected (Type E) Combination Motor Controller. UL Listed for 208V Wye or Delta, 240V Wye or Delta, 480V Y/277 or Delta, 480V Y/347. Not UL Listed for use on 480V or 600V Delta/Delta, corner ground, or high-resistance ground systems.

(11) The AC ratings of Bulletin 140M/MT devices can vary. See publication [140-ID005](#) or [140M-ID002](#).

(12) Bulletin 140MT devices must be Frame C (C3E) or Frame D (D9N).

(13) Bulletin 140MT devices must be Frame D (D9E).

(14) When using a Manual Self-Protected (Type E) Combination Motor Controller, the drive must be installed in a ventilated or non-ventilated enclosure with the minimum volume that is specified in this column. Application-specific thermal considerations can require a larger enclosure.

(15) See Fuse Certification and Test Data in PowerFlex AC Drives in Common Bus Configurations Application Guidelines, publication [DRIVES-AT002](#), for fuse self-certification and test data for Bussmann 170M and JKS fuses recommended for the DC bus fusing.

(1) Applied rating refers to the motor that is connected to the drive. For example, a E420 drive can be used in Normal Duty mode on a 450 Hp motor, in Heavy Duty mode on a 350 Hp motor or in Light Duty mode on a 500 Hp motor. The drive can be programmed for each mode. Wiring and fuses can be sized based on the programmed mode. For any given drive catalog number, Normal Duty mode provides higher continuous current but smaller overload current when compared to Heavy Duty mode. See parameter 306 [Duty Rating].

(2) These AC line fuses (with blown fuse indicators) are included in the drive to provide drive short circuit protection. AC input protection devices for branch circuit protection based on US NEC are listed in the table. Each drive bay has one fuse per phase.

(3) Minimum protection device size is the lowest rated device that supplies maximum protection without nuisance tripping.

(4) Maximum protection device size is the highest rated device that supplies drive protection. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(5) Circuit breaker - inverse time breaker. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(6) Motor Protection Circuit Breaker - instantaneous trip circuit breaker. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(7) These DC line fuses (with blown fuse indicators) are included in the drive to provide drive short circuit protection.

(1) Applied rating refers to the motor that is connected to the drive. For example, a F400 drive can be used in Normal Duty mode on a 400 kW motor, in Heavy Duty mode on a 355 kW motor or in Light Duty mode on a 450 kW motor. The drive can be programmed for each mode. Wiring and fuses can be sized based on the programmed mode. For any given drive catalog number, Normal Duty mode provides higher continuous current but smaller overload current when compared to Heavy Duty mode. See parameter 306 [Duty Rating].

(2) These AC line fuses (with blown fuse indicators) are included in the drive to provide drive short circuit protection. AC input protection devices for branch circuit protection based on US NEC are listed in the table. Each drive bay has one fuse per phase.

(3) Minimum protection device size is the lowest rated device that supplies maximum protection without nuisance tripping.

(4) Maximum protection device size is the highest rated device that supplies drive protection. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(5) Circuit breaker – inverse time breaker. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(6) Motor Protection Circuit Breaker – instantaneous trip circuit breaker. For US NEC, minimum size is 125% of motor FLA. Ratings that are shown are maximum.

(7) These DC line fuses (with blown fuse indicators) are included in the drive to provide drive short circuit protection.

Short Circuit Current Ratings for Drives with Options

Default ratings (no added protection) shown. A ‘•’ indicates ratings that can be achieved with additional protection.

Cable Considerations

This section provides information for cable types and routing.

Power Cable Types Acceptable for 200...600 Volt Installations

Various cable types are acceptable for drive installations. For an in-depth discussion of cable types, including a table of maximum motor cable lengths, see the Wiring and Grounding Guidelines for Pulse Width Modulated (PWM) AC Drives, publication [DRIVES-IN001](#).

Recommended Cable Design

Rating/Type	Description
600V 75 °C (167 °F)	- Four tinned copper conductors with XLPE insulation. - Copper braid/aluminum foil combination shield and tinned copper drain wire. - PVC jacket.

Wiring Considerations

This section provides information for power, signal, and I/O wiring.

Type		Wire Types	Description	Min Insulation Rating
Power ^{(1) (2)}	Standard	–	- Four tinned copper conductors with XLPE insulation. - Copper braid/aluminum foil combination shield and tinned copper drain wire. - PVC jacket.	600V, 75 °C (167 °F)
	Standard analog I/O	–	0.750 mm ² (18 AWG), twisted pair, 100% shield with drain.	
Signal ^{(1) (3) (4)}	Remote pot	–	0.750 mm ² (18 AWG), 3 conductor, shielded.	
	Encoder/ Pulse I/O <30 m (100 ft)	Combined	0.196 mm ² (24 AWG) individually shielded pairs.	
	Encoder/ Pulse I/O 30...152 m (100...500 ft)	Signal	0.196 mm ² (24 AWG) individually shielded pairs.	300V, 75...90 °C (167...194 °F)
		Power	0.750 mm ² (18 AWG) individually shielded pairs	
		Combined	0.330 mm ² (22 AWG), power is 0.500 mm ² (20 AWG) individually shielded pairs.	
	Encoder/ Pulse I/O 152...259 m (500...850 ft)	Signal	0.196 mm ² (24 AWG) individually shielded pairs.	
		Power	0.750 mm ² (18 AWG) individually shielded pairs.	
		Combined	0.750 mm ² (18 AWG) individually shielded pairs.	
Digital I/O Safety inputs Homing inputs ^{(1) (3) (4)}	Unshielded	–	Per US NEC or applicable national or local code.	300V, 60 °C (140 °F)
	Shielded	Multi-conductor shielded cable	0.750 mm ² (18 AWG), 3 conductor, shielded.	

(1) Separate control and signal wires from power wires by at least 0.3 m (1 ft).

(2) The use of shielded wire for AC input power is not always necessary, but is recommended.

(3) If the wires are short and contained within a cabinet that has no sensitive circuits, the use of shielded wire is not always necessary, but is recommended.

(4) I/O terminals that are labeled (–) or common are not referenced to earth ground and are designed to reduce common mode interference. Grounding these terminals can cause signal noise. For CE installations, 115V I/O must use shielded cable or have a cable length less than 30 m (98 ft).

Power Wiring Options

This section describes the cabling options available for each Frame 8...10 drive enclosure. See pages [148...177](#) for conduit plate dimensions.

		
Adequate Spacing Available conduit plates provide adequate spacing for typical cabling.	Possible - Evaluation is Required Available conduit plates must be evaluated to determine if cabling fits.	Not Possible - Insufficient Spacing Conduit plates are not available for the specified configuration.

Cable Entry and Exit Routes

Frame	Enclosure Rating	Enclosure Code	Cabinet Layout	Top Entry/ Top Exit	Top Entry/ Bottom Exit	Bottom Entry/ Top Exit	Bottom Entry/ Bottom Exit
8	IP20, NEMA/UL Type 1	B	600 mm drive cabinet	X		X	0

Motor Considerations

Due to the operational characteristics of AC variable frequency drives, we recommend motors with inverter grade insulation systems that are designed to meet or exceed NEMA MG1 Part 31.40.4.2 standards for resistance to spikes of 1600 volts.

Guidelines must be followed when using non-inverter grade motors to avoid premature motor failures. See Wiring and Grounding Guidelines for Pulse Width Modulated (PWM) AC Drives, publication [DRIVES-IN001](#) for recommendations.

Allen-Bradley Permanent Magnet Servo Motors

When using a PowerFlex 755 drive to control a permanent magnet motor, the motor feedback device must have a resolution such that the number of pulses per revolution (PPR) is an exponent of 2 (for example: 512, 1024, 2048, 4096, 8192, and so on).

The following table contains a list of specifications for Allen-Bradley® servo motors compatible with PowerFlex 750-Series drives. This information is provided to help configure a PowerFlex 750-Series drive with the appropriate servo motor data. For information about compatibility and configuration of Allen-Bradley servo motors (including Bulletin RDB or RDD-Series™ Direct Drive motors) and third-party PM motors, contact Rockwell Automation technical support.

Enclosure Options

IMPORTANT IP00, IP20, and NEMA/UL Open Type PowerFlex 750-Series drives must be mounted in a clean, dry location. Contaminants such as oils, corrosive vapors, and abrasive debris must be kept out of the enclosure. These enclosures are intended for indoor use primarily to provide a degree of protection against contact with enclosed equipment. These enclosures offer no protection against airborne contaminants. See the following tables for an explanation of enclosure options and the environmental specifications that are found on [page 61](#).

Pollution Degree Ratings According to EN 61800-5-1

Pollution Degree	Description
1	No pollution or only dry, non-conductive pollution occurs. The pollution has no influence.
2	Normally, only non-conductive pollution occurs. Occasionally, a temporary conductivity that is caused by condensation is to be expected, when the drive is out of operation.
3	Conductive pollution or dry non-conductive pollution occurs, which becomes conductive due to condensation, which is to be expected.
4	The pollution generates persistent conductivity that is caused, for example, by conductive dust or rain or snow.

Drive Enclosure Ratings

Frames	Enclosure Type (Cat. No. Position 6)	Installed Accessory Kit	Front Side Rating		Back Side/Heat Sink Rating	
			Enclosure Type	Pollution Degree	Enclosure Type	Pollution Degree

	J, K, Y	None	IP54, NEMA 12	1, 2, 3, 4	IP54, NEMA 12	1, 2, 3, 4

Minimum Mounting Clearances

Specified vertical clearance requirements are intended to be from the drive to the closest object that can restrict airflow through the drive heat sink and chassis. The drive must be mounted in a vertical orientation as shown and must make full contact with the mounting surface. Do not use standoffs or spacers. In addition, inlet air temperature must not exceed the product specification.

Approximate Weights

Drive		Frame Size	Drive Rating		Enclosure Code/Weight, kg (lb)			
			kW (208V ⁽¹⁾ , 400V, 690V)	Hp (240V ⁽¹⁾ , 480V, 600V)	F	G	N	R

Frame Type **Approximate Dimensions - mm (in.)**

Technical drawing of the 1,2 NEMA/UL Type Open enclosure. The front view shows dimensions A (width), B (height), D (internal width), E (base width), and F (internal height). Mounting hole specifications are given as 6.4 (0.25) for the top hole and 14.3 (0.56) for the bottom hole. The side view shows dimension C (depth). The enclosure is labeled 'Frame 2 Shown'.

Frame	A	B	C	D	E	F	Weight t kg (lb)

Technical drawing of a rectangular structure, likely a container or enclosure, showing dimensions in millimeters (mm) and inches (in). The drawing includes a top view and a side view.

Top View Dimensions:

- Overall width: 1131 mm (44.5 in)
- Overall height: 742 mm (29.2 in)
- Internal width (labeled 1): 440 mm (17.3 in)
- Internal height (labeled 1): 292 mm (11.5 in)
- Distance from left edge to internal width start: 200 mm (7.9 in)
- Distance from right edge to internal width end: 440 mm (17.3 in)
- Distance from bottom edge to internal height start: 292 mm (11.5 in)
- Distance from top edge to internal height end: 440 mm (17.3 in)
- Distance from left edge to internal height start: 200 mm (7.9 in)
- Distance from right edge to internal height end: 440 mm (17.3 in)
- Distance from bottom edge to internal height start: 292 mm (11.5 in)
- Distance from top edge to internal height end: 440 mm (17.3 in)

Side View Dimensions:

- Overall height: 742 mm (29.2 in)
- Distance from bottom edge to internal height start: 292 mm (11.5 in)
- Distance from top edge to internal height end: 440 mm (17.3 in)
- Distance from left edge to internal height start: 200 mm (7.9 in)
- Distance from right edge to internal height end: 440 mm (17.3 in)
- Distance from bottom edge to internal height start: 292 mm (11.5 in)
- Distance from top edge to internal height end: 440 mm (17.3 in)
- Distance from left edge to internal height start: 200 mm (7.9 in)
- Distance from right edge to internal height end: 440 mm (17.3 in)

Other Dimensions:

- Top edge offset: 76 mm (3.0 in)
- Right edge offset: 18.0 mm (0.71 in)
- Bottom edge offset: 43 mm (1.7 in)
- Distance from bottom edge to internal height start: 292 mm (11.5 in)
- Distance from top edge to internal height end: 440 mm (17.3 in)
- Distance from left edge to internal height start: 200 mm (7.9 in)
- Distance from right edge to internal height end: 440 mm (17.3 in)
- Distance from bottom edge to internal height start: 292 mm (11.5 in)
- Distance from top edge to internal height end: 440 mm (17.3 in)
- Distance from left edge to internal height start: 200 mm (7.9 in)

Drive Options

This section provides information for the drive options.

Human Interface Modules

This section provides information for the human interface modules.

Cat. No.	Description
20-HIM-A0	No HIM (blank plate)
20-HIM-A6	Enhanced, LCD, full numeric, handheld/local, NEMA Type 1
20-HIM-C6S	Enhanced, LCD, full numeric, IP66 NEMA Type 4X/12 (for indoor use only) ⁽¹⁾

Blank Plate 20-HIM-A6 20-HIM-C6S

(1) Includes a 3 m (9.8 ft) catalog number 1202-C30 interface cable for connection to drive.

IMPORTANT The 20-HIM-A6 and the 20-HIM-C6S are a product of category C2 according to IEC 61800-3. In a domestic environment, this product can cause radio interference in which case supplementary mitigation measures can be required.

Human Interface Modules Specifications

Attribute	20-HIM-A6	20-HIM-C6S
Drive Protocol Data rates	Drive Peripheral Interface (DPI™) 125 Kbps or 500 Kbps	
Consumption Drive (DPI)	140 mA at 12V DC supplied by the host drive	
Dimensions, H x W x D 20-HIM-A6 20-HIM-C6S	116 x 70 x 16 mm (4.57 x 2.75 x 0.63 in.) 180 x 93 x 25 mm (7.08 x 3.66 x 0.98 in.)	
Weight	91 g (3.2 oz)	173 g (5.7 oz)
Temperature Operating Storage	0...50 °C (32...122 °F) -40...+85 °C (-40...+185 °F)	
Relative humidity	5...95% noncondensing	
Atmosphere	IMPORTANT Do not install the module in an area where the ambient atmosphere contains volatile or corrosive gas, vapors, or dust. If the module is not going to be installed right away, store the module in an area where it is not exposed to a corrosive atmosphere.	
UV radiation	The HIM is not UV rated.	
Vibration Operating Nonoperating	2.5 G at 5...2000 Hz 5 G at 5...2000 Hz	
Shock Operating Nonoperating	30 G peak acceleration, 11 (±1) ms pulse width 50 G peak acceleration, 11 (±1) ms pulse width	
Certifications	See Certifications and Specifications on page 60 for current certification information.	

Human Interface Module Accessories

Cat. No.	Description
20-HIM-B1	Bezel kit for LCD HIMs, NEMA Type 1 ⁽¹⁾
20-HIM-H10	PowerFlex HIM interface cable, 1 m (39 in.) ⁽²⁾
1202-C03 1202-C10 1202-C30 1202-C90	Comm option cable kit (male-male) 0.33 m (1.1 ft) 1 m (3.3 ft) 3 m (9.8 ft) 9 m (29.5 ft)
1202-H03 1202-H10 1202-H30 1202-H90	Cable kit (male-female) ⁽³⁾ 0.33 m (1.1 ft) 1 m (3.3 ft) 3 m (9.8 ft) 9 m (29.5 ft)

Human Interface Module Accessories (Continued)

Cat. No.	Description
1202-CBL-KIT-100M	DPI cable kit with connectors, tools, and 100 m (328 ft) cable
1202-TB-KIT-SET	DPI cable connector kit
1203-S03	DPI/SCANport™ one-to-two-port splitter cable

(1) Includes a 3 m (9.8 ft) catalog number 1202-C30 interface cable for connection to drive.

(2) Required only when HIM is used as hand-held or remote.

(3) Required with catalog number 20-HIM-H10 for distances up to a total maximum of 10 m (32.8 ft).

Communication Option Kits and Accessories

This section provides information for communication option kits and accessories.

Communication Option Kits and Accessories

Cat. No.	Description (see page 193 for specifications)
20-750-BNETIP	BACnet/IP option module
20-750-CNETC	Coaxial ControlNet™ option module
20-COMM-C ⁽¹⁾	ControlNet communication adapter (coax)
20-750-DNET	DeviceNet™ option module
20-COMM-D ⁽¹⁾	DeviceNet communication adapter
20-750-ENETR	Dual-port EtherNet/IP™ option module
20-750-ENET2P	Dual-port EtherNet/IP option module
20-COMM-E ⁽¹⁾	EtherNet/IP communication adapter
20-COMM-H ⁽¹⁾	HVAC communication adapter (only Modbus RTU can be used)
20-COMM-K ⁽¹⁾	CANopen communication adapter
20-COMM-L ^{(1) (2)}	LonWorks communication adapter
20-COMM-M ⁽¹⁾	Modbus/TCP communication adapter
20-750-PBUS	PROFIBUS DPV1 option module
20-750-PNET	Single-port Profinet I/O option module
20-750-PNET2P	Dual-port Profinet I/O option module
20-COMM-P ⁽¹⁾	PROFIBUS DP communication adapter
20-COMM-Q ⁽¹⁾	ControlNet communication adapter (fiber)
20-COMM-S ⁽¹⁾	RS-485 DF1 communication adapter
20-XCOMM-AC-PS1	External communication kit power supply
20-XCOMM-DC-BASE	DPI external communication kit ⁽³⁾
20-XCOMM-IO-OPT1	External DPI I/O option board ⁽⁴⁾
1769-SM1 ⁽²⁾	Compact I/O™ module (3-channel)
1203-SNM	Serial null modem adapter
1203-SSS	Smart Self-powered serial converter (RS-232) includes 1203-SFC and 1202-C10 cables
1203-USB	Universal serial bus (USB) converter includes 2 m (6.6 ft) USB, 20-HIM-H10, and 22-HIM-H10 cables
1786-TPS	ControlNet T-tap straight
20-750-20COMM-F1	Communication carrier card for PowerFlex 750-Series Frame 1 drives
20-750-20COMM	Communication carrier card for PowerFlex 750-Series Frame 2 or higher drives

(1) Requires a communication carrier card (catalog number 20-750-20COMM or 20-750-COMM-F1). See [page 192](#) for compatibility details.

(2) This product is [discontinued](#).

(3) Only compatible with the following communication options: catalog number 20-COMM-E EtherNet/IP; 20-COMM-C ControlNet (coax); 20-COMM-Q ControlNet (fiber); 20-COMM-D DeviceNet (Series B or later); and 20-COMM-M Modbus/TCP.

(4) For use only with DPI external communications kit, catalog number 20-XCOMM-DC-BASE.

PowerFlex 755 System Resource Allocation

Some drive configurations that use certain communication options can exceed the available resources of the processor on the main control board. This issue is a consideration for PowerFlex 755 drives with firmware revision 2.000 (or later). See the PowerFlex 750-Series Programming Manual, publication [750-PM001](#), for details.

PowerFlex 750-Series Legacy Communication Options

Most legacy communication adapters (20-COMM) can be used with the PowerFlex 755 drives (with these restrictions):

- **Frame 1** - We recommend that you install catalog number 20-750-20COMM-F1 communication carrier card in port 4. Port 5 is not accessible when this module is installed.
- **Frames 2 and larger** - We recommend that you install catalog number 20-750-20COMM communication carrier card in port 6. If you use port 4 or 5, the adjacent left port is inaccessible to other option modules and can interfere with network cable connections. For details, contact Rockwell Automation technical support.

Adapter		Accesses Ports 0...6 for I/O Connections (implicit and Explicit Messaging)	Accesses Ports 7 and Higher (I/O, Explicit Messaging)	Supports Drive Add-on Profiles	Supports Asian Languages ⁽¹⁾
Cat. No.	Type				
20-COMM-B	BACnet MS/TP	Not compatible			
20-COMM-C	ControlNet (Coax)	Revision 3.001 ⁽²⁾	Revision 3.001 ⁽²⁾	See footnote ⁽³⁾	Revision 3.001 ⁽²⁾
20-COMM-D	DeviceNet	See footnote ⁽⁴⁾	Not compatible		
20-COMM-E	EtherNet/IP	Revision 4.001 ⁽²⁾	Revision 4.001 ⁽²⁾	See footnote ⁽³⁾	Revision 4.001 ⁽²⁾
20-COMM-H	RS-485 HVAC	Revision 2.009 ⁽⁵⁾⁽²⁾	Not compatible		
20-COMM-K	CANopen	Revision 1.001 ⁽²⁾			
20-COMM-L ⁽⁶⁾	LonWorks	Revision 1.007 ⁽²⁾			
20-COMM-M	Modbus/TCP	Revision 2.001 ⁽²⁾	Revision 2.001 ⁽²⁾	Not compatible	Revision 2.001 ⁽²⁾
20-COMM-P	PROFIBUS DP	Revision 1.006 ⁽²⁾	Revision 1.006 ⁽²⁾		Not compatible
20-COMM-Q	ControlNet (Fiber)	Revision 3.001 ⁽²⁾	Revision 3.001 ⁽²⁾	See footnote ⁽³⁾	Revision 3.001 ⁽²⁾
20-COMM-S	RS-485 DF1	See footnote	Not compatible		

(1) Chinese, Japanese, and Korean languages are supported at the time of publication.

(2) Requires this adapter firmware revision or higher.

(3) Requires firmware revision 1.05 or later of the drive Add-on Profiles for Studio 5000 Logix Designer application.

(4) Controller must be able to read/write 32-bit floating point (REAL) values.

(5) Supports all three modes of operation (RTU, P1, and N2).

(6) This product is [discontinued](#).

Environmental Specifications – Communication Modules

Attribute	Description
Temperature Operating Storage	-10...+50 °C (14...122 °F) -40...+85 °C (-40...+185 °F)
Relative humidity	5...95% noncondensing
Atmosphere	IMPORTANT: Do not install the module in an area where the ambient atmosphere contains volatile or corrosive gas, vapors, or dust. If the module is not going to be installed right away, store the module in an area where it is not exposed to a corrosive atmosphere.

(1) The communication kit is powered by a nominal 24V DC. The current consumption that is listed in this table differs from the value that is shown on the label of the communication adapter. The label of the communication adapter is based on the adapter being powered by 5V DC from the drive.

(2) The I/O board is not designed for fast I/O response times. Do not use with input devices that transition (OFF-ON-OFF) faster than the response time. Potential inputs include auxiliary contact inputs from relays or overload, push buttons, and so on.

(3) The I/O board is not designed for fast I/O response times. Do not use with output devices that must transition (OFF-ON-OFF) faster than the response time. Potential output devices include pilot lights or a contact closure reset to another hardware device.

Feedback Options

This section provides information for the feedback options.

Cat. No.	Description
20-750-ENC-1 ⁽¹⁾ 20-750-ENC-1-XT	Incremental encoder
20-750-DENC-1 ⁽¹⁾ 20-750-DENC-1-XT	Dual incremental encoder
20-750-UFB-1 ⁽²⁾ 20-750-UFB-1-XT	Universal feedback board (includes Stegmann, Heidenhain, SSI, Biss, 5V incremental)

(1) Homing and registration functions are not supported when using this device with Studio 5000 Logix Designer[®] embedded motion instructions. To use the homing and registration functions, you must use the Universal Feedback Board (catalog number 20-750-UFB-1).

(2) Only PowerFlex 755 drives.

This table specifies which encoder type combinations work on a universal feedback board (UFB).

I/O Option Kits

This section provides information for the I/O option kits.

Cat. No.	Description ⁽¹⁾
20-750-ATEX	ATEX option module with 1 thermosensor input connection (requires 11-Series I/O module)
20-750-1132C-2R	24V DC 11-Series I/O module with 1 analog in, 1 analog out, 3 digital in and 2 relay outputs
20-750-1133C-1R2T	24V DC 11-Series I/O module with 1 analog in, 1 analog out, 3 digital in, 1 relay and 2 transistor outputs
20-750-1132D-2R	115V AC 11-Series I/O module with 1 analog in, 1 analog out, 3 digital in and 2 relay outputs
20-750-2262C-2R	24V DC 22-Series I/O module with 2 analog in, 2 analog out, 6 digital in and 2 relay outputs
20-750-2262D-2R	115V AC 22-Series I/O module with 2 analog in, 2 analog out, 6 digital in and 2 relay outputs
20-750-2263C-1R2T	24V DC 22-Series I/O module with 2 analog in, 2 analog out, 6 digital in, 3 digital out, 1 relay, and 2 transistor outputs

(1) I/O option kits are not allowed in Integrated Motion on the EtherNet/IP Network mode.

Safety Options

Four safety options are available for the PowerFlex 750-Series drives:

- Safe Torque Off
- Safe Speed Monitor
- Integrated Safety - Safe Torque Off
- Integrated Safety Functions

Safe Torque Off is ideal for safety-related applications that require the removal of rotational power to the motor without shutting down the drive. Safe Torque Off functionality offers the benefit of quick start-up after a demand on the safety system. Safe Torque Off helps reduce wear from repetitive start-up, and provides safety ratings up to and including SIL CL3, PLe, and category 3.

Safe Speed Monitor is ideal for applications where the speed is controlled and monitored. The Safe Speed Monitor option combines Safe Torque Off capability with integrated safety relay functionality and the Safe Speed control technology in one hardware option. The Safe Speed Monitor option provides safety ratings up to and including SIL CL3, PLe, and category 4.

With the Safe Speed Monitor option, you can safely monitor and control the speed of your application, which allows operators to perform process or maintenance work without stopping the machine.

The Integrated Safety - Safe Torque Off (STO) option module provides either a hardwired or a networked STO function via an Ethernet/IP network.

With Networked Safe Torque Off, a GuardLogix safety controller issues the Safe Torque Off command over the Ethernet /IP network, and the PowerFlex drive executes the command.

Description	Cat. No.	Publication
Safe Torque Off ⁽¹⁾	20-750-S 20-750-S-XT	PowerFlex 750-Series Safe Torque Off Option Module User Manual, publication 750-UM002
Safe Speed Monitor ⁽¹⁾ ⁽²⁾ ⁽³⁾	20-750-S1	Safe Speed Monitor Option Module for PowerFlex 750-Series AC Drives Safety Reference Manual, publication 750-RM001
Integrated Safety - Safe Torque Off ⁽¹⁾	20-750-S3 20-750-S3-XT	PowerFlex 755/755T Integrated Safety - Safe Torque Off Option Module User Manual, publication 750-UM004
Integrated Safety Functions ⁽¹⁾	20-750-S4 20-750-S4-XT	PowerFlex 755/755T Integrated Safety Functions Option Module User Manual, publication 750-UM005

(1) Drive can accommodate only one option.

(2) Requires the dual incremental encoder or universal feedback option.

(3) Requires catalog number 20-750-EMCSSM1-F8 EMC Option Kit with Frame 8...9 drives.

IMPORTANT

You cannot install multiple safety option modules simultaneously. Only one of these safety option modules can be installed in the drive:

- PowerFlex 750-Series Safe Torque Off option module (catalog numbers 20-750-S, 20-750-S-XT)
- PowerFlex 750-Series Safe Speed Monitor option module (catalog numbers 20-750-S1)
- PowerFlex 755 Integrated Safety - Safe Torque Off option module (catalog numbers 20-750-S3, 20-750-S3-XT)
- PowerFlex 755 Integrated Safety Functions option module (catalog numbers 20-750-S4, 20-750-S4-XT)

The Integrated Safety Functions option module (20-750-S4) provides a networked STO (Safe Torque Off) function through an Ethernet/IP network. It is also equipped for Integrated (drive-based) Timed SS1, Monitored SS1, and Safe Brake Control, which operate in the drive and are activated through the network safety connection.

The Integrated Safety Functions option module also supports select controller-based IEC 61800-5-2 safety functions operating in GuardLogix 5580 or Compact GuardLogix 5380 controllers that use the Ethernet/IP network to communicate with the safety I/O. This support includes the new safety function instructions that are provided on the Drive Safety tab in the Logix Designer application.

Safe Torque Off and Safe Speed Monitor Specifications

Attribute	20-750-S Safe Torque Off	20-750-S1 Safe Speed Monitor
Standards	IEC/EN60204-1, ISO13489-1, IEC 61508, IEC 61800-5-2	IEC/EN60204-1, ISO12100, IEC 61508, IEC 61800-5-2
Safety category	Cat. 3 and PLe per EN ISO 13849-1; SIL CL3 per IEC 61508 and EN 62061	Cat. 4 and PLe per EN ISO 13849-1; SIL CL3 per IEC 61508 and EN 62061
Power supply (user I/O)	24V DC $\pm 10\%$, 0.8...1.1 x rated voltage ⁽³⁾ protected extra low voltage (PELV) or safety extra low voltage (SELV)	
Power consumption	4.4 W	36 W
Safety enable (SE+, SE-)	24V DC, 22 mA, short-circuit protected	-
Safety power (SP+, SP-)	24V DC, 35 mA, short-circuit protected	-
SLS outputs (68, 78)	-	24V DC, 50 mA, short-circuit protected
SS outputs (34, 44)	-	24V DC, 50 mA, short-circuit protected
Door control outputs (51, 52)	-	24V DC, short-circuit protected, 0.75 A bipolar (power to release/power to lock) configuration. 20 mA, cascading (2 CH Source) configuration.

Safe Torque Off and Safe Speed Monitor Specifications (Continued)

Attribute	20-750-S Safe Torque Off	20-750-S1 Safe Speed Monitor
Pulse outputs (S11, S21)	–	24V DC, 50 mA, short-circuit protected
Pulse inputs (S12, S22, S32, S42, S52, S62, S72, S82, X32, X42)	–	5 mA per input, max
Input ON voltage, min	24V DC $\pm 10\%$, 21.6...26.4V DC	15V
Input OFF voltage, max	5V	5V
Input OFF current, max	2.5 mA at 5V DC	2 mA
Input-to-output response time (SS_In, SLS_In, DM_In, ESM_In, LM_In)	–	20 ms
Overspeed response time	–	User-configurable
Inputs (S34)	–	5 mA per input, max
Conductor size ⁽¹⁾	0.3...0.8 mm ² (28...18 AWG)	0.25...2.5 mm ² (24...14 AWG)
Strip length	10 mm (0.39 in.)	6 mm (0.25 in.)
Terminal screw torque	–	0.2...0.25 N•m (1.8...2.2 lb•in)
Certification ⁽²⁾		
cULus	UL Listed, certified for US and Canada.	
CE	European Union 2004/108/EC EMC Directive, and EU 2006/42/EC Machinery Directive EN 61800-3; categories C2 and C3 EN 62061; EM Immunity EN ISO 13849-1 EN 61800-5-1 EN 61800-5-2 IEC 61508 Parts 1-7

PowerFlex 750-Series Drives Option Kits

This section provides information for PowerFlex 750-Series drives option kits.

PowerFlex 750-Series Drives Option Kits

Cat. No.	Description		Frame Size
20-750-APS	Auxiliary power supply	24V auxiliary power supply	1...7 ⁽¹⁾
20-750-DCBB1-F6	DC bus bar option kit	DC bus bars for 200...240 and 380...480V AC drives	6
20-750-DCBB1-F7			7
20-750-DCBB2-F6		DC bus bars for 600...690V AC drives	6
20-750-DCBB2-F7			7
20-750-BUSIA-F8	DC bus connection kit	Allows connection of the drive DC bus terminals to the bus rails at the back of the cabinet. ⁽²⁾	8
20-750-EMC1-F1	EMC option kit	EMC plate with core for 200...240 and 380...480V AC drives	1
20-750-EMC1-F2			2
20-750-EMC1-F3			3
20-750-EMC3-F3		EMC plate with core for 600V AC drives	3
20-750-EMC1-F4		EMC plate with Cores for 200...240 and 380...480V AC drives	4
20-750-EMC1-F5			5
20-750-EMC3-F4		EMC plate with cores for 600V AC drives	4
20-750-EMC3-F5			5
20-750-EMC2-F1		EMC core for 200...240 and 380...480V AC drives	1
20-750-EMC2-F2			2
20-750-EMC2-F3			3
20-750-EMC4-F3		EMC core for 600V AC drives	3
20-750-EMC2-F45		EMC cores for 200...240 and 380...480V AC drives	4...5
20-750-EMC4-F4		EMC cores for 600V AC drives	4
20-750-EMC4-F5			5
20-750-EMC3-F6		EMC plate with cores for 600...690V AC drives	6
20-750-EMC3-F7			7
20-750-EMC5-F6		EMC plate with cores for 600...690V AC drives (only IP54)	6
20-750-EMC5-F7			7
20-750-EMCCM1-F8		EMC core - inverter-mounted output, for 380...690V AC Input and DC Input drives. ⁽³⁾	8...10
20-750-EMCSSM1-F8		EMC cores - required when using the Safe Speed Monitor option, catalog number 20-750-S1, with 380...690V drives.	8...10
20-750-HOOD1-F8	Exhaust hood	Exhaust Hood - IP20, NEMA/UL Type 1 drives	8
20-750-FLNG1-F2	Flange adapter kit	Converts Open Type drive to external heatsink (flange) with NEMA/UL Type 1 integrity backside. This kit is for use with IP20, NEMA/UL Type 0 drives and does not provide an airtight or watertight seal. Where an airtight or watertight seal is required (for example, contaminated, dirty, or wet environments), use a drive with an "F" enclosure option.	2
20-750-FLNG1-F3			3
20-750-FLNG1-F4			4
20-750-FLNG1-F5			5
20-750-FLNG4-F6		Converts Open Type drive to external heatsink (flange) with NEMA/UL Type 4X/12 integrity backside.	6
20-750-FLNG4-F7			7
20-750-LBRKT1	L bus bar kit	Includes three L-brackets	8...10

PowerFlex 750-Series Drives Option Kits (Continued)

Cat. No.	Description		Frame Size
20-750-NEMA1-F1	NEMA/UL Type 1 Option Kit	NEMA/UL Type 1 Kit	1
20-750-NEMA1-F2			2
20-750-NEMA1-F3			3
20-750-NEMA1-F4			4
20-750-NEMA1-F5			5
20-750-NEMA1-F6			6
20-750-NEMA1-F7			7
20-750-ACTE1-F6	Power terminal extension	Allows connection of two parallel leads to the AC power terminals.	6
20-750-PTG1-F6	Power terminal guard	Provides additional protection against contact with the power terminals.	6
20-750-PTG1-F7			7
20-750-RPD1-F8	Remote control POD mounting kit	Fiber-optic and power supply cables that are used to mount the control POD up to 23 m (75 ft) from the drive.	8...10
20-750-CART1-F8	Roll-out cart	A wheeled roll-out cart that facilitates drive installation and removal. Required for Frame 8 and larger drives.	8...10
20-750-MPLT755T	PowerFlex 750-Series Service Cart Conversion Kit	This kit attaches to the 20-750-MCART1. It enables the removal of power cores from PowerFlex 755 floor mount drives using the PowerFlex 755T drive service cart.	8...10

(1) Frame 8 and up drives can be powered from an external 24V DC source, option kit catalog number 20-750-APS is not required.

(2) DC bus access is included with Frames 9 and 10.

(3) Frame 8 requires one EMC output core, Frame 9 requires two EMC output cores, and Frame 10 requires three EMC output cores.

PowerFlex 755 IP00, NEMA/UL Open Type Drive Options

This section provides information for PowerFlex 755 IP00, NEMA/UL Open Type drive options.

PowerFlex 755 IP00, NEMA/UL Open Type Drive Options

Description	Required?	Frame 8		Frame 9		Frame 10	
		Cat. No.	Qty.	Cat. No.	Qty.	Cat. No.	Qty.
Field termination, converter, AC input	Recommended	20-750-BUS2-F8	1	20-750-BUS2-F9	1	20-750-BUS2-F10	1
Field termination, inverter, AC output	Recommended	20-750-BUS3-F8	1	20-750-BUS3-F9	1	20-750-BUS3-F10	1
Field termination, DC bus, 400/480V	Recommended	20-750-BUS4-F8	1	20-750-BUS4-F9	1	20-750-BUS4-F10	1
Field termination, DC bus, 600/690V	Recommended	20-750-BUS4-F8	1	20-750-BUS6-F9	1	20-750-BUS6-F10	1
Field termination, DC input, common bus precharge ⁽¹⁾⁽²⁾	Recommended	20-750-BUS5-F8	1	20-750-BUS5-F9	1	20-750-BUS5-F10	1
Pod bucket assembly	Required	20-750-POD1-F8	1	20-750-POD1-F8	1	20-750-POD1-F8	1
Pod, cable, 24V supply ⁽³⁾	Required	20-750-PH1-F8	⁽⁴⁾	20-750-PH2-F9	1	20-750-PH3-F10	1
Cable, fiber-optic, 560 mm (22 in.) ⁽³⁾	Required	20-750-FCBL1-F8	1	-	-	-	-
Cable, fiber-optic, 2.8 m (110 in.) ⁽³⁾	Required	-	-	20-750-FCBL1-F10	2	20-750-FCBL1-F10	3
Transceiver, fiber-optic	Required	See EU and UK Ecodesign following this table.					
Pod, remote mounting kit	Optional	20-750-RPD1-F8	1	-	-	-	-
Mounting kit, back panel	Recommended	20-750-MNT2-F8	1	20-750-MNT2-F9	1	20-750-MNT2-F10	1
Mounting kit, floor	Recommended	20-750-MNT3-F8	1	20-750-MNT3-F9	1	20-750-MNT3-F10	1
Duct, top outlet	Recommended	20-750-DUCT2-F8	1	20-750-DUCT2-F8	2	20-750-DUCT2-F8	3
Duct, bottom inlet	Recommended	20-750-DUCT4-F8	1	20-750-DUCT4-F8	2	20-750-DUCT4-F8	3
Roll-out cart	Recommended	20-750-CART1-F8	1	20-750-CART1-F8	1	20-750-CART1-F8	1
Control power circuit breaker ⁽²⁾	Recommended	1489-A2D130	1	1489-A2D130	2	1489-A2D130	3
Control power circuit breaker lock ⁽²⁾	Recommended	1489-AALOA	1	1489-AALOA	2	1489-AALOA	3
EMC core, converter input, AC input	Optional	20-750-EMCBUS1-F8	1	20-750-EMCBUS1-F8	2	20-750-EMCBUS1-F8	3
EMC core, inverter output	Optional	20-750-EMCCM1-F8	1	20-750-EMCCM1-F8	2	20-750-EMCCM1-F8	3

(1) EMC cores are included with the catalog number 20-750-BUS5-Fx kits.

(2) Common DC input drives only.

(3) If the control pod is mounted in the drive, use catalog number 20-750-PH1-Fx and catalog number 20-750-FCBL1-Fx kits. If the control pod is remote-mounted (up to 23 m [75 ft] away), order catalog number 20-750-RPD1-Fx kit.

(4) A 24V supply cable is included with each Frame 8 drive unit.

EU and UK Ecodesign

This table provides required information per Ecodesign Regulation (EU) 548/2014 and its amendments. The following table includes control transformers with a minimum power rating of 1 kVA used in 50 Hz applications that are used in PowerFlex 755 frame 8 drives and up.

Energy Efficiency Data for 1 kVA Transformers used in IP00 Open Type Kits

Cat. No.	Rated Power (VA)	Primary Voltage	Secondary Voltage	Frequency (Hz)	Core	Core Weight [kg (lb)]	Conductor	Conductor Weight [kg (lb)]	Full Load Losses (W)	No Load Losses (W) ⁽¹⁾	Qty
SK-R1-XFMR1-F8	1000	415/480/600/690V	240V	50/60	Steel	6.7 (14.8)	Copper	1.50 (3.31)	86	40	2
SK-R1-OFANXFMR	1000	120/240V	120/230V	50/60	Steel	10.2 (22.5)	Copper	2.29 (5.04)	88.2	31.1	2
SK-R1-CBPXFMR1-F8	1000	415/480/600/690V	120/240V	50/60	Steel	6.8 (15.1)	Copper	1.40 (3.08)	76.2	20.4	2

(1) Electrical power of any cooling system required at no load.

Internal Dynamic Brake Resistor Kits

These resistors have a limited duty cycle. To determine whether an internal resistor is sufficient for your application, see the PowerFlex Dynamic Braking Resistor Calculator Application Technique, publication [PFLEX-AT001](#). An external resistor can be required.

Cat. No.	Drive Input Voltage	Frame	Rating (ND kW)	Rating (ND Hp)	Brake Resistance
20-750-DB1-D1	200...240V AC	1	0.37...0.75	0.5...1	62 Ω
20-750-DB1-B1			1.5...4	2...5	22 Ω
20-750-DB1-B2		2	0.37...5.5	0.5...7.5	22 Ω
20-750-DB1-D1A	380...480V AC	1	0.75...2.2	1...3	115 Ω
20-750-DB1-D1			4...7.5	5...10	62 Ω
20-750-DB1-D2		2	0.75...11	1...15	62 Ω

Terminators

This table provided information for terminators.

Cat. No.	Description ⁽¹⁾
1204-TFA1	For use with 3.7 kW (5 Hp) and lower drives.
1204-TFB2	For use with 1.5 kW (2 Hp) and higher drives.

(1) For selection information, see Appendix A of the Wiring and Grounding Guidelines for Pulse Width Modulated (PWM) AC Drives, publication [DRIVES-IN001](#).

Reflected Wave Reduction Modules with Common Mode Choke

This table provided information for reflected wave reduction modules with common mode choke.

Cat. No.	Description ⁽¹⁾
1204-RWC-17-A	17 A with common mode choke

(1) For selection information, see Appendix A of the Wiring and Grounding Guidelines for Pulse Width Modulated (PWM) AC Drives, publication [DRIVES-IN001](#).

Notes:

Additional Resources

These documents contain additional information concerning related products from Rockwell Automation.

Resource	Description
Motor Protection Circuit Breaker and Motor Circuit Protector Specifications, publication 140-TD005	Provides product selection and specification information for Bulletin 140MP/MT motor protection circuit breakers and motor circuit protectors.
PowerFlex 750-Series Drive Installation Instructions, publication 750-IN001	Provides detailed information on how to install PowerFlex® 750-Series AC drives.
PowerFlex 750-Series Programming Manual, publication 750-PM001	Provides detailed information on I/O, control, and feedback options; parameters and programming; faults, alarms, and troubleshooting.
PowerFlex 20-HIM-A6 and 20-HIM-C6S HIM (Human Interface Module) User Manual, publication 20HIM-UM001	Provides detailed information on HIM components, operation, and features.
PowerFlex 755 Integrated Safety - Safe Torque Off Option Module User Manual, publication 750-UM004	Provides detailed information on how to install and use the Integrated Safety - Safe Torque Off option module.
PowerFlex 750-Series Safe Torque Off User Manual, publication 750-UM002	Provides detailed information on how to install and use the Safe Torque Off option module.
Safe Speed Monitor Option Module for PowerFlex 750-Series AC Drives Safety Reference Manual, publication 750-RM001	Provides detailed information on how to install and use the Safe Speed Monitor option module.
PowerFlex 7-Class Network Communication Adapter User Manuals, publication 750COM-UM	These publications provide detailed information on to configure, use, and troubleshoot PowerFlex 750-Series communication option modules and adapters. To display a list of the available adapters, enter 750com-um in the search field.
PowerFlex Dynamic Braking Resistor Calculator Application Technique, publication PFLEX-AT001	Provides information to help you understand dynamic braking and how to apply dynamic braking to drive systems.
Wiring and Grounding Guidelines for PWM AC Drives, publication DRIVES-IN001	Provides basic information to properly wire and ground PWM AC drives.
Preventive Maintenance of Industrial Control and Drive System Equipment Service Bulletin, publication DRIVES-TD001	Provides information for preventative maintenance and periodic inspection of drive systems.
PowerFlex 750-Series Service Cart Frames 8...10 Conversion Kit, publication 750-IN017	Provides information on installing the frames 8...10 conversion kit to the PowerFlex 750-Series Service Cart.
PowerFlex 750-Series Service Cart and DCPC Lift Renewal Parts, publication 750-PC106	Provides additional information to acquire spare parts for the PowerFlex 750-Series.
PowerFlex 750-Series Service Cart and DCPC Module Lift Installation Instructions, publication 750-IN105	Provides instructions to setup and use the PowerFlex 750-Series Service Cart and DCPC Lift. Includes spare parts for the service cart and for the high power conversion kit.
PowerFlex 750-Series Spare Parts Installation Instructions, publication 750-IN013	Provides additional information to acquire spare parts for the PowerFlex 750-Series.
EtherNet/IP Network Devices User Manual, ENET-UM006	Describes how to configure and use EtherNet/IP devices to communicate on the EtherNet/IP network.
Ethernet Reference Manual, ENET-RM002	Describes basic Ethernet concepts, infrastructure components, and infrastructure features.
System Security Design Guidelines Reference Manual, SECURE-RM001	Provides guidance on how to conduct security assessments, implement Rockwell Automation products in a secure system, harden the control system, manage user access, and dispose of equipment.
UL Standards Listing for Industrial Control Products, publication CMPNTS-SR002	Assists original equipment manufacturers (OEMs) with construction of panels, to help ensure that they conform to the requirements of Underwriters Laboratories.
American Standards, Configurations, and Ratings: Introduction to Motor Circuit Design, publication IC-AT001	Provides an overview of American motor circuit design based on methods that are outlined in the NEC.
Industrial Components Preventive Maintenance, Enclosures, and Contact Ratings Specifications, publication IC-TD002	Provides a quick reference tool for Allen-Bradley industrial automation controls and assemblies.
Safety Guidelines for the Application, Installation, and Maintenance of Solid-state Control, publication SGI-1.1	Designed to harmonize with NEMA Standards Publication No. ICS 1.1-1987 and provides general guidelines for the application, installation, and maintenance of solid-state control in the form of individual devices or packaged assemblies incorporating solid-state components.
Industrial Automation Wiring and Grounding Guidelines, publication 1770-4.1	Provides general guidelines for installing a Rockwell Automation industrial system.
Product Certifications website, rok.auto/certifications .	Provides declarations of conformity, certificates, and other certification details.

You can view or download publications at [rok.auto/literature](#).

Rockwell Automation Support

Use these resources to access support information.

Technical Support Center	Find help with how-to videos, FAQs, chat, user forums, Knowledgebase, and product notification updates.	rok.auto/support
Local Technical Support Phone Numbers	Locate the telephone number for your country.	rok.auto/phonesupport
Technical Documentation Center	Quickly access and download technical specifications, installation instructions, and user manuals.	rok.auto/techdocs
Literature Library	Find installation instructions, manuals, brochures, and technical data publications.	rok.auto/literature
Product Compatibility and Download Center (PCDC)	Download firmware, associated files (such as AOP, EDS, and DTM), and access product release notes.	rok.auto/pcdc

Documentation Feedback

Your comments help us serve your documentation needs better. If you have any suggestions on how to improve our content, complete the form at rok.auto/docfeedback.
