Create a visual workplace with facility and floor marking products

Visual Workplace is a lean concept that emphasizes putting critical information at the point of use. Companies that incorporate lean visuals throughout their facility are proven to have higher productivity, reduced waste, and improved safety.

Visuals can be something as simple as a line, shape or color band — whatever employees can understand at a glance. Or visuals can include signs, labels, displays and more.

OSHA regulations now include aisle marking

OSHA has recently began requiring, or implying, the need for marking and color coding.

OSHA - Use of Mechanical Equipment
1910.176(a) Where mechanical handling equipment is used, sufficient safe clearances shall be allowed for aisles, at loading docks, through doorways and wherever turns or passage must be made. Permanent aisles and passageways shall be appropriately marked.

OSHA - Letter of Interpretation
1910.22(b) The lines used to delineate aisles may be any color so long as they clearly define the area considered as aisle space. The lines may be composed of dots, square, strip or continuous. The recommended width of aisle markings varies from 2 in. to 6 in., therefore any width 2 in. or more is considered acceptable.

OSHA - Means of Egress
1910.35 OSHA will deem an employer demonstrating compliance with the exit route provisions of NFPA 101, Life Safety Code, or the exit route provisions of the IFC 2009, to be in compliance with 190.34, 1910.36 and 1910.37.

IFC - International Fire Code 2009
1024.1 Approved luminous egress path markings delineating the exit path shall be provided...having occupied floors located more than 75 ft. above the lowest level of fire department vehicle access.

1024.2.1 A solid and continuous stripe shall be applied to the horizontal leading edge of each step and shall extend the full length of each step.

1024.2.4 Perimeter and floor mounted demarcation lines shall be placed within 4 in. of the wall and extend to within 2 in. of the markings on the leading edge of landings. Demarcation lines shall be 1 in. to 2 in. wide with interruptions not exceeding 4 in.

ToughStripe Max Floor Marking Tape (B-543)

- Resistance to cuts and scrapes in high-traffic forklift and industrial-vehicle traffic areas due to its increased thickness (1.25 mm)
- Aggressive adhesive performance to floor, but easily removes in one piece
- Tapered edges minimize "pick points" and traffic bumps
- Service temperature range of 0° F to 140° F (-18° C to 60° C)

BRADY

PaintStripe™ Floor Marking Stencil

- Faster application, exact measurement and precise control
- Two adhesive types to securely mask edges and provide easy removal on concrete and other floor surfaces
- Printed cut-lines and a repeating 12-inch ruler facilitate accurate length measurement and rapid alignment of 90° corners
- Ideal for areas where paint is preferred for line-marking, such as areas with aggressive or abrasive traffic conditions, or facilities that are unable to use aisle marking tapes due to wet floors, washdown conditions, floor-cleaning protocols or chemical exposures

B-518 with lower adhesion for clean, polished floors

Paint vs. ToughStripe Tape

	Preparation and Execution	Environment	Removal	Brady Solutions	
Tape	Requires less planning and preparation. Tape immediately bonds to floor.	Indoor, dry environments	Easier to remove if markings need to be rearranged	**Good: B-726 Vinyl Tape**	Cost-effective solution for short application periods
				Better: ToughStripe Tape	Longer application period and available in die-cuts and signs
				Best: ToughStripe Max Tape	Highest durability for forklift traffic
Paint	Extensive surface preparation, ventilation and control of ignition or contamination sources. Downtime for drying.	Indoor and outdoor use, including wash down environments	Difficult to remove if markings need to be rearranged	**PaintStripe™ Floor Marking Stencil**	Paint stencil for longer, more permanent marking on rough or pitted floors

BRADY®

Egress Marking

The 2015 versions of the International Building Code (IBC), International Fire Code (IFC) and the National Fire Protection Agency's (NFPA) 101 Life Safety Code contain new provisions for the means of egress in most new and pre-existing buildings with five or more stories.

Luminous (glow-in-the-dark) egress path markings are now required for the full width of every stair and handrail, among other markings. Brady offers a complete line of egress marking products that meet the current requirements for the 2015 means of egress regulations.

BradyGlo™ Floor Tapes
- B-324 phosphorescent surface printed polyester
- Designed to safely mark egress pathways during power outages and emergencies
- 10+ hours of glow life
