

specifications

The HD Flex enclosure shall house, organize, manage and protect fiber optic trunk cables, terminations, splices, connectors and patch cords as well as accommodate all HD Flex cassettes and fiber adapter panels (FAP). The HD Flex Enclosures provide front access with drawers that slide out into two locked positions, regardless of how many enclosures are stacked together. The Enclosure trays have a unique split tray feature that allows for half of the tray to operate independently, which is an ideal option for maintainability as well as redundant networks.

The Enclosures allow cassettes and FAPs to be installed by dropping them into the front of the enclosure tray or sliding them into the rear of the enclosure tray. This allows each individual cassette or FAP to be removed with minimal disruption to other cassettes or FAPs.

The Enclosures are constructed of steel material and can be ordered in either 4-port, 6-port or 12-port configurations that accept combinations of either 4-port, 6-port cassettes and 12-port cassettes respectively.

technical information

Mounting:	Integral mounting flange for installation in 19" wide EIA-310 racks
Material:	Steel and plastic

key features and benefits

Modular design accepts up to 12 HD Flex Fiber Cassettes or Fiber Adapter Panels per rack unit	Provides higher patch field density in fewer rack units saving valuable rack space
Compatible with all HD Flex Fiber Cassettes and Fiber Adapter Panels	Provides versatility and flexibility with a fully modular solution for a variety of pre-terminated installations
Rack/Cabinet Rail Mounting Cable Management Bracket	Provides template for additional mounting of cables, moving cable from back of enclosure to side of enclosure resulting in easy access to connections for improved serviceability
Front and Rear Accessible Enclosure Tray	Allows access to connections from front or rear of rack/cabinet facilitating easy moves, adds and changes without disruption of network connections
Front Drop In and Rear Slide Out Mounting of Cassettes and Fiber Adapter Panels	Allows access to cassettes without fully sliding out cable management plate
Split Enclosure Tray	Allows each half of tray to operate independently providing improved reliability and serviceability of redundant network connections
Multi-positional Enclosure Tray	Allows tray to be locked in two extended positions resulting in improved access when patching and maintaining network connections
Convertible between 4-port, 6-port and 12-port Cassettes and Fiber Adapter Panels	Accommodates current and future optical connectivity options, duplex, and parallel fiber

applications

HD Flex Fiber Optic Enclosures provide a system for managing fiber terminations, connections, and patching in all types of applications. The enclosures are a component of the HD Flex Fiber Cabling System. They are ideal for fast, flexible and reliable patch field solutions within main, horizontal and/or equipment distribution areas (MDA, HDA and EDA).
