*With a successful trajectory of over 35 years in the field of power factor compensation and harmonics filtering, **CIRCUTOR offers its most complete range** of elements for the assembly, on behalf of the panelbuilder, of any power factor compensation equipment, from the most simple types to those requiring maximum complexity.*

*Being a firm principle since the beginning of **CIRCUTOR's** trajectory, absolutely all the elements that may be supplied for the assembly of capacitor banks are regulated by the most demanding quality standards so to assure the total satisfaction on behalf of the end customer, and its complete assurance of obtaining an end product adjusted to the desired quality requirements.*

**You can count with our help and support** in solving any query or doubt that you may have at the moment of assembling the power factor compensation equipment. Proximity to our customers is one of the main values in our organization and we have always proven it so.

Power Factor Compensation  
and harmonic filtering

# Testing Laboratory and Type Test Certification

## Official metrological verification laboratory

**CIRCUTOR** has its own laboratories to perform electromagnetic compatibility test (EMC/EMI), calibration test and an official metrological verification laboratory to guarantee the quality of all its products and make sure they comply with the highest quality standards.

Our product range have type test certification in agreement IEC standards. Available under request:

- |                             |                 |
|-----------------------------|-----------------|
| - LV Cylindrical Capacitors | - MV Capacitors |
| - LV Prismatic Capacitors   | - MV Reactors   |
| - LV Capacitor Banks        |                 |

## Innovation with new products

### Innovating with new electrical energy efficiency solutions

**CIRCUTOR** has a commitment to innovation, in order to bring out products with the latest technology and the best added value.

## Certifications

**CIRCUTOR** manufactures its products in compliance with the highest quality standards, respecting the environment and protecting the health of its employees. To this end, it has been certified with the following:

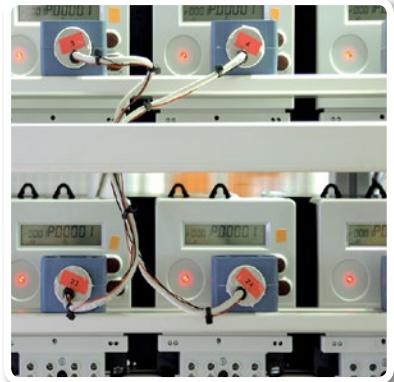

**EN ISO 9001**, Quality

**EN ISO 14001**, Environment

**OHSAS 18001**, Occupational Health and Safety

**(RoHS) QC 080000**, Management of dangerous substance processes

**ISO 50001**, Energy management system

## Innovation within your reach

The application of new technologies and the use of printed circuit boards to manufacture prismatic capacitors have allowed **CIRCUTOR** to reinvent the classic **CS** capacitor, manufactured for over 35 years. The spirit of innovation and proprietary technology used during the design of the new **CSB** capacitor have increased the lifespan of traditional prismatic capacitors by over 60%. This new series has improved all aspects of the previous models, offering our customers a longer-lasting, safer and more profitable capacitor.

## **CIRCUTOR** Guarantees

### Durability guarantee

- Top quality polypropylene with a European origin guarantee.
- Dielectric thickness designed to offer a greater capacitor durability.

### Continuity of the service guarantee

- Self-regeneration technology that guarantees the minimum loss of the capacity.
- Internal individual fuse that guarantees the disconnection exclusively of the damaged element

### Safety guarantees

- Over-pressure disconnection, isolating the damaged element.
- Anti-deflagration system, by means of compacting coils with inert and fireproof materials.

**+60%**  
**lifespan**

*“Through constant innovation we are able to continue improving our products, making them safer, more durable and more cost-effective for our customers.”*

*The use of the PCB collector plate guarantees the minimum losses.*

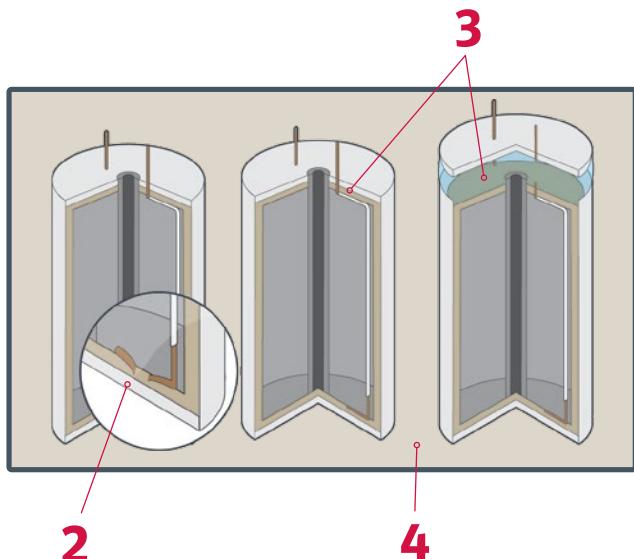

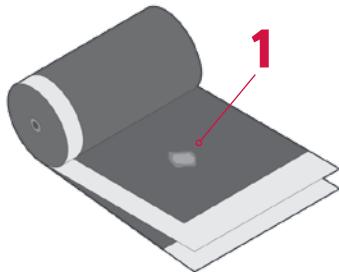

## 4 levels of protection

**1 Self-regeneration**  
Minimum capacity losses (exclusive use of European polypropylene)

**2 Individual internal fuse**  
Disconnection, exclusively of the damaged elements

**3 Over-pressure system**  
Evacuation of gases

**4 Inert and fireproof material**  
Anti-deflagration system

## Technical features

Overload	1.3 times the rated current
Oversupply	10% 8 over 24 hours 15%, up to 15 minutes over 24 hours 20%, up to 5 minutes over 24 hours 30%, up to 1 minute over 24 hours
Insulation level	3 / 15 kV
Power ratings	5 kvar to 120 kvar
Voltage	230 V to 1100 V
Power tolerance	-5 ... +15%
Discharge resistance	75 V/3 min
Frequency	50 ... 60 Hz
Losses:	Dielectric < 0.2 W / kvar Total < 0.5 W / kvar
Protections	Dielectric regeneration, Internal fuse, Over-pressure system, Vermiculite
<b>Construction features</b>	
Enclosure	Treated and painted steel, colour RAL 3005
Terminals:	Power M10 Earth M6
Torque value	15 Nm
Protection degree	IP 42 with terminal cover
<b>Environmental conditions</b>	
Class D temperature:	Daily average 45 °C Annual average 35 °C Maximum 55 °C Minimum -40 °C
Relative humidity	80%
Maximum altitude	2000 m
<b>Assembly conditions</b>	
Type of assembly	Vertical / Horizontal
Ventilation	Natural or forced, depending on the design of the cabinet
Distance between capacitors	Minimum: 4 cm
<b>Standards</b>	IEC 60831-1, UNE - EN 60831-1

Type Test Certification

The CLZ tubular capacitor range is composed of capacitors with a tubular casing, of the dry-type, covering a wide range of power and voltage ratings, at 50 and 60 Hz. The design, manufacturing and testing processes of CLZ tubular capacitors guarantee the production of top quality and long lasting capacitors.

## Type Test Certification

### Refrigeration technology

The CLZ capacitors up to 25 kvar offer a new refrigeration technology by means of nitrogen gas, being a refrigerating system of high benefits, inert and nonflammable.

### Faston type terminals

For CLZ-FPT capacitors with rated power up to 6,25 kvar.

### IP20 Protection degree

The use of a covered connection terminal makes the plastic cover unnecessary for CLZ-FP types.

### Low size and high refrigeration

85, 110 and 136 mm diameters. Capacitors low height aluminium enclosure.

### Multi-marking labels

Use of characteristic plate with powers equivalence at 220/230/240 V, 380/400/415 V, 400/440 V, 460 V, 480/525/550 V (50 or 60 Hz).

### IP54 Optional protection

Use of the new plastic terminal cover TCLZ-FP.

# Computers

## Power Factor Intelligent Relays

computer

# max

*Top features, accuracy and technology at the best price*

### User-friendly and fully intuitive installation

**computer max** provides the “phase selection” function, that allows the user choosing the power line phase where the measuring current transformer (C.T.) has been placed in. This option eliminates the difficulty in placing the C.T. in a specific phase of the power line.

phase  
selection  
function

computer

# smart

*PF correction, measuring and protection at your reach*

### Built-in power analyzer

**computer smart** has a built in power analyzer allowing the measurement of main electrical parameters (voltage, current, harmonics, active and reactive power, apparent power, etc.). The device gives a detailed information on both, voltage and current harmonic components. **computer smart** measures also ambient temperature and keeps a record of maximum and minimum values of all measured parameters. All these values can be read on the device display or can be sent and displayed in a master PC, equipped with **PowerStudio Scada** software by RS-485 communications channel.

A  
COS  
%

computer

# plus

*Full control and maximum innovation*

### Measurement

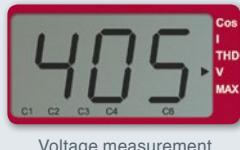

**computer plus** regulators include a three-phase network analyzer, enabling instantaneous display of all the network electrical parameters (voltage, current, active power, reactive power, energies, harmonics, etc.). The three-phase network analyzer shows the instantaneous values, of electrical parameters and the recording of maximum values.

### Leakage control

**computer plus** measures the leakage current in real time and step by step, and disconnects only the damaged capacitor.

### Measurement of basic electrical parameters

**computer max** shows by display:  $\cos \phi$ , voltage, current, THD( $I$ ) and, besides, records in memory maximum values for voltage and current.

Voltage measurement

Current measurement

THD( $I$ ) measurement

Current maximum value

Voltage maximum value

### Built-in alarms

**computer max** automatically assigns the alarm conditions to the last output relay (relay 6 or 12), provided that this is not used for switching a capacitor step.

Indication by display or through relay output of following alarm conditions:

- Compensation failure
- Over-compensation
- Over-voltage
- Over-current
- C.T. not connected or open
- Line current below measurable value

### Plug&Play function

**computer smart** is a friendly programmable device. The setup, adapting the PF regulator to the installation site, is fully automatic by simply selecting the plug&play menu option and pushing a key.

### AUTO-ON-OFF function

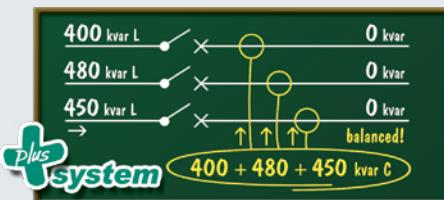

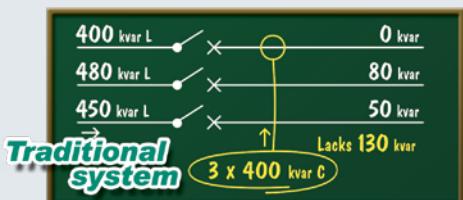

This function allows to define the operating mode of each individual capacitor step:

- Automatic mode (auto)
- Fixed mode (on): capacitor is always ON
- Disconnected mode (off). capacitor is always OFF

### Intelligent regulators

**computer plus** regulators are a new concept in Power Factor Correction:

- They measure on the three phases and accurately compensate the total reactive energy
- They compensate reactive energy using individual phase control in real time and in addition to correcting the total reactive to zero; they also achieve a balance of active power between phases
- Plug and Play, start up at the touch of a key.

### Easy

**computer plus** regulators are equipped with intelligent controllers designed to make adjustment and navigation through the different menus and display of all the registered parameters easy. They begin working just pushing a key.

# Computers

## Power Factor Intelligent Relays

### computer max

Power factor correction and measurement of the main electrical parameters.

### computer smart

Offers in a single device, power factor correction functions, network analyzer and leakage control.

### computer plus

Power factor correction measuring in all three phases, functions of a powerful network analyzer and leakage control.

# Contactors

Capacitor Contactors.  
CMC Series

**CMC series**, a contactor or special use, is adjusted for switching single-step or multiple-step capacitor bank. It is standardized by **IEC-60947-4941**.

## Operation condition

### Operating Times

CMC 12, CMC 18, CMC 32, CMC 40: 240 times/h  
CMC 65, CMC 85, CMC 150: 100 times/h

### Electrical Endurance

CMC 12, CMC 18, CMC 32, CMC 40: 200,000 times  
CMC 65, CMC 85, MC 150: 100,000 times

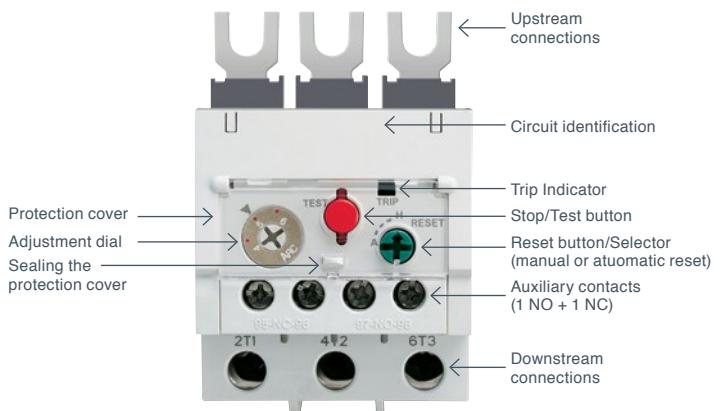

1. When the switch is closed capacitor must be discharged before recharged. (Maximum residual voltage at terminals  $\leq 50$  V)
2. In working voltage 500 V ( $U_e = 500$  V), 100,000 times for **CMC 12~40** and 80,000 times for **CMC ~65 ~ 85**
3. To prevent short current, gG type Fuse must be 1.5~2 times than rated current
4. It must be separated from resistant wire

## Overload relays

Type **MT**, bimetal-style, overload relays are designed to protect AC circuits and motors against overloads, phase failure, long starting times and prolonged stalling of the motor

Protection function and trip class:

Non-differential: 3 pole - 3 bimetal (heater) and trip class 10 A.

## Contactors references

Huge stock for immediate delivery.

Type	Code	Maximum operating power (kvar)			Coil voltage	Damping resistors	Overload Relay	Dimensions (W x H x D)
		200-240 V	400-440 V	500-550 V				
CMC 12	R28186ZH00000	6,7	12,5	18	230	AC9	MT-32	45 x 73,5 x 86 mm
CMC 18	R28187ZH00000	8,5	16,7	24	230	AC9	MT-32	45 x 73,5 x 86 mm
CMC 32	R28188ZH00000	15	25	36	230	AC9	MT-32	45 x 83 x 90 mm
CMC 40	R28181ZH00000	20	33,3	48	230	AC9	MT-32	45 x 83 x 90 mm
CMC 65	R28182ZH00000	25	45,7	66	230	AC50	MT-63	55 x 106 x 119 mm
CMC 85	R28183ZH00000	35	60	92	230	AC50	MT-95	75 x 140 x 136 mm
CMC 150	R2818DZH00000	45	80	100	230	--	MT-150	95 x 158 x 132 mm

**CIRCUTOR** supply damping resistors blocks (**AC-9** and **AC-50**) separately from magnetic contactor. So, customer needs to issue an order for magnetic contactor (**CMC series**) and damping resistors unit (**AC-9** or **AC-50**) separately.

Type	Code	Damping resistors
AC9	R29984ZH00000	CMC 12, CMC 18, CMC 32, CMC 40
AC50	R29985ZH00000	CMC 65, CMC 85,

# Reactors

## RBX/RX Reactors

**CIRCUTOR** has a complete range of rejection reactors,  $p = 7\%$ , with a resonance frequency of 189 Hz for 50 Hz networks (or 227 Hz for 60 Hz networks). Is the most frequent tuning value to avoid any resonance of the 5th harmonic and above. The set of capacitors-reactors absorbs part of the current of the 5th harmonic and acts as a rejection filter for higher frequencies. In some installations, other values of P% are required, for example 5.6% (210 Hz), 14% (134 Hz), etc.

**RX/RBX** type reactors are built with plates with low losses and are coiled with an aluminum winding or copper wire, according to the model. The connection is achieved with the adequate terminals. **RX/RBX** reactors are used, with a magnetic plate nucleus and multiple steel cores, which offer excellent characteristics and a low loss ratio.

**RX/RBX** type reactors have a vacuum varnish sealing to increase the insulation, providing a greater mechanical resistance and reduce the level of noise.

## Application

The rejection reactors of the **RX/RBX** series have been specially designed for their use in capacitor banks in installations with a high harmonic content. The reactors must be connected in series to each capacitor for the adequate protection of capacitors and to avoid the resonance effects in the installation.

## Technical features

### Features

Voltage	400 V / 480 V. On demand: up to 1000 V
Network frequency	50 / 60 Hz
Power rating	In accordance with the table. Other values on demand
Value of p %	7 % (189 / 227 Hz) 5,67 % (210 / 252 Hz) 14 % (134 / 160Hz)
Type of conductor	Aluminum band / copper wire

Tolerance L	$\pm 5\%$
-------------	-----------

Linearity (5% L)	$1.8 I_n$ On demand: $2.0 I_n$
------------------	-----------------------------------

Isolation voltage	4 kV
-------------------	------

Maximum room temperature	-10 ... +45 °C
--------------------------	----------------

Internal isolation	Class F (155 °C). On demand: class H (180 °C)
--------------------	--

### Maximum overload

Permanent	$1.17 I_n$
Temporary (1 min)	$2 I_n$

### Safety

Protection thermostat	Opening at 90 °C
Degree of protection	IP 00

Installation	Indoor
--------------	--------

### Standards

UNE-EN-60289, IEC 60076
