

The easiest solution to making even the most complex installation

Without compromising quality, the Easy & Safe range is our basic offering. For temporary power outtake to permanent installation, the tough and safe range is up and running in no time.

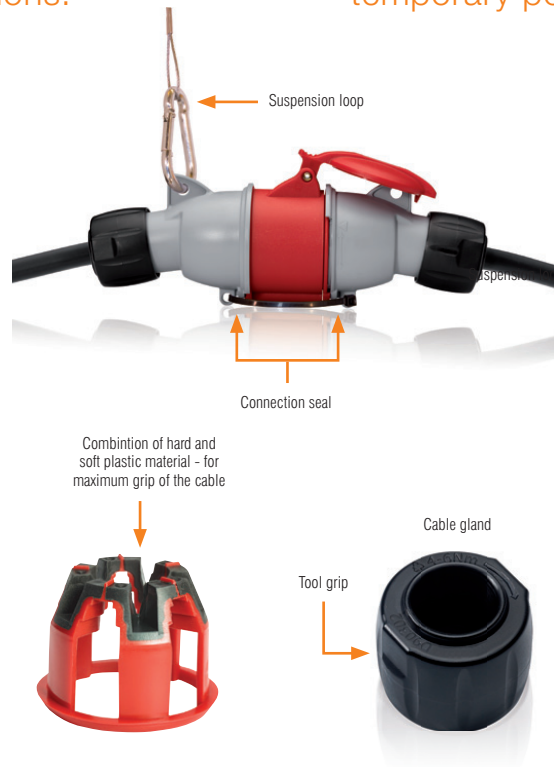

Features

- IP44 Splash proof
- 16 - 32 A, 50 - 690 VAC
- PA6 plastic material
- IEC 60 309-1, -2
- Ergonomic design

Non-decaying plastic increases plug and socket lifetime

Ergonomic design simplifies handling and allows for more frequent connections.

Connection seals ensures there are no interruptions to your temporary power feed.

Keeping the mall clean

A key factor in making a one-time visitor at the mall a returning visitor is making a good impression by keeping the mall clean. Big vacuumers, floor cleaning machines and other equipment need reliable temporary power supply. ABB's Easy & Safe range is quick and easy to connect and offers increased reliability during operation. It even protects the equipment in events of a splash from the nearby in-mall fountain.
