

SELECTION GUIDE

# Essential Components

Get the right components, at the right price, right when you need them.

**Allen-Bradley**

by ROCKWELL AUTOMATION

# Why Choose Rockwell Automation?

Get the right components, at the right price, right when you need them.

Rockwell Automation offers quality Allen-Bradley® industrial components with 115 years of time-tested quality and durability. This catalog is your initial guide to selecting the best components to meet your specific application requirements. Throughout the book we have included resources to help you learn more and contact our local experts.

With Allen-Bradley components, you will find the highest quality at a fair price, an intuitive product selection, quick turnaround time and fast delivery. Additionally, you will get components that perform to your specifications, with the services and support you demand.

Looking for More?

This catalog highlights only our most essential components. For a complete product selection, visit our product directory at <https://rok.auto/directory>

# Choose Innovation and Excellence

## Rely on Award-Winning Products

Order and install with confidence. Don't just take our word for it. Year after year, Allen-Bradley industrial component products are ranked best in category by your peers. Our winners include:

**Control Engineering's 34th Annual Engineers' Choice Awards**

### Reader's Choice awards:

- Sequential logic control
- PLC programming
- Operator interface terminals
- Panel displays
- Electric motor drives
- Input/output systems

## AutomationWorld®

Automation World recognized Rockwell Automation as an outstanding supplier in the following categories in 2021:

- Drives
- HMI hardware
- PLCs/PACs
- Machine safety
- MES/MOM software
- Process control software

### Winners:

- Network integration – ethernet hardware, switches
- Motion control
- Process control systems

### Honorable Mentions:

- Motion Control – Drives
- Software – Asset Management, reporting
- IIoT Connectivity – software
- Motion Control – Drives, Servo
- Software – Control design

## Innovation Awards

*"Our PEOPLE are the foundation of all we do, and creating an environment where everyone can do their best work is fundamental to our success."*

- Blake Moret,  
President and  
Chief Executive Officer

FTSE4Good

## World's Most Ethical Companies List

For the thirteenth time, the Ethisphere Institute has named Rockwell Automation as one of the "World's Most Ethical (WME) Companies," a recognition that honors organizations that continue to raise the bar on ethical leadership and corporate behavior.

The Ethisphere Institute is an independent center of research promoting best practices in corporate ethics and governance. World's Most Ethical Company honorees understand the correlation between ethics, reputation and daily interactions.

# Rockwell Automation Services

Minimizing Risk. Maximizing Productivity.

## Workforce support & training

- Remediate
- Enable
- Supplement
- Optimize

## People & asset safety

- Hazardous energy control
- Machine safety

## Asset & plant optimization

- Inventory services
- Asset modernization
- Asset performance

## Information infrastructure & security

- Infrastructure development and management
- Asset performance

## Product & application lifecycle support

On-demand support | Integrated support | Managed support

For more information about how we can help you solve your unique business challenges, contact your local authorized Allen-Bradley distributor or Rockwell Automation sales office, or visit: [rok.auto/services](https://rok.auto/services)

## Support

Visit the Rockwell Automation support website for more information on all our offerings.

# Smart Devices

## Make your machines and equipment smarter

Smart Devices are the core of modern automation, which expand what's possible and is a catalyst that makes you more productive and more connected.

Allen-Bradley® Smart Devices deliver information and insights that enable predictive maintenance, speed troubleshooting, reduce downtime – and maximize ROI. Scalable Smart Devices lay the foundation for smarter machines, smart connected systems and knowledge-driven operations.

### Real-time data

Current, voltage, kWh, running time, temperature, safety

### Information

CONTEXTUALIZATION  
Production output, warnings/alarms, energy usage, downtime causals

Our Smart Devices include:

### Variable Frequency Drives

### Servo Drives

### Motor Starters

### Condition Monitoring

**Knowledge**  
ANALYTICS  
Mean time to repair,  
predictive maintenance, OEE

**Optimize**  
ACTION  
More efficient process workflows,  
continuous improvement

**Power Monitoring**

**Motor Protection**

**Sensors**

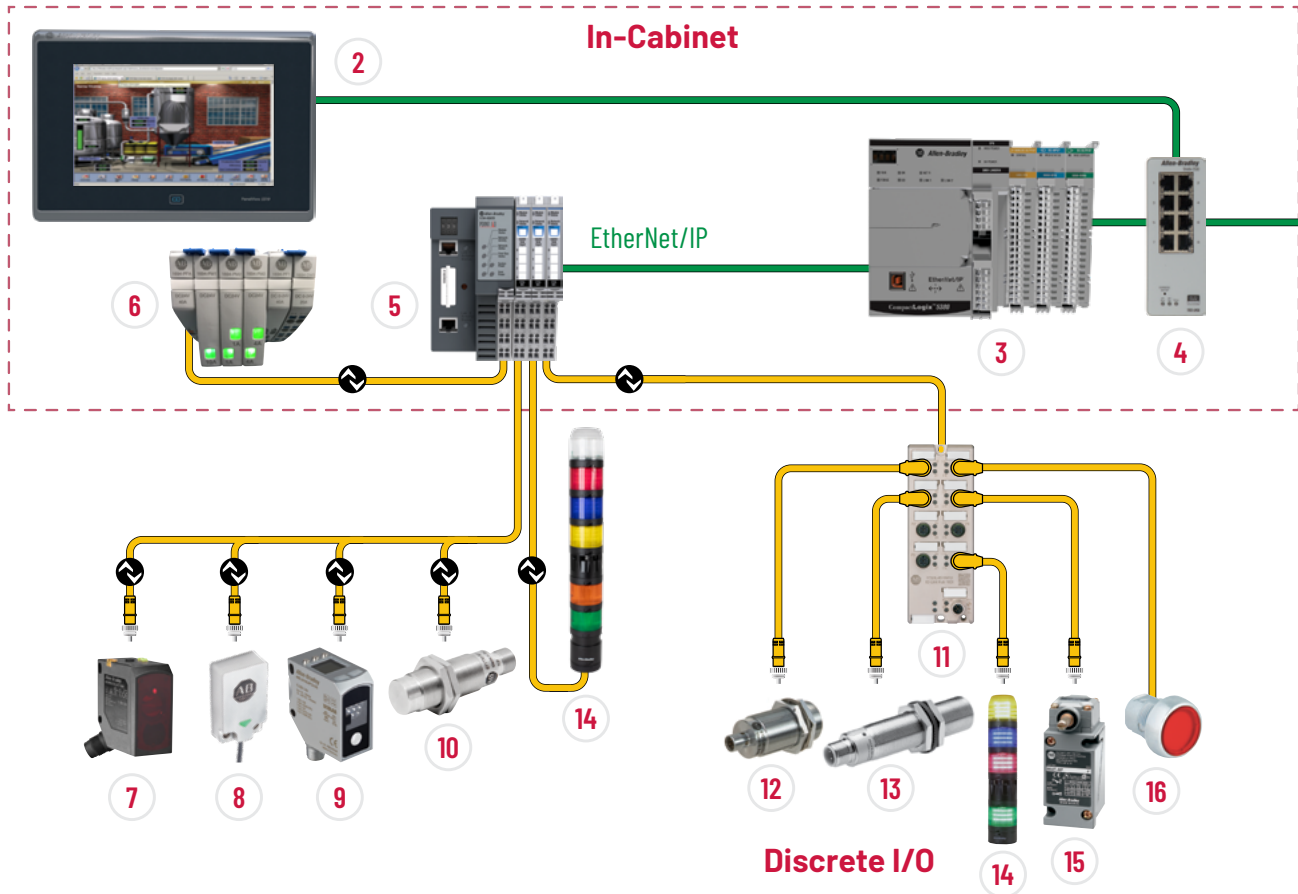

**Safety**

# Smart Sensing and Industrial Control

## Our Integrated Smart Sensing and Industrial Control Solution

When it comes to linking end point devices on the plant floor to The Connected Enterprise, Rockwell Automation offers a wide range of smart sensing and industrial control products that deliver information, advanced functionality and flexibility while increasing efficiency machine- and plant-wide. These Allen-Bradley® sensors and industrial control products use IO-Link technology for visibility of field devices through your Integrated Architecture.

Item Number	Description
2	PanelView™ 5510
3	CompactLogix™ 5380
4	Stratix Switch
5	1734-4IOL Point I/O IO-Link Master
6	1694 Electronic Circuit Protector
7	45DMS Distance Measurement Sensor
8	871FM Mini Flat Pack Proximity Sensor
9	46CLR ColorSight™ True Color Sensor

Item Number	Description
10	871TM Tubular Stainless Steel Sensor
11	ArmorBlock IO-Link Hub
12	872C WorldProx™ Tubular General Purpose Inductive Proximity Sensor
13	871C Tubular Extended Temperature Sensor
14	856T Control Tower™ Stack Lights
15	802T Oiltight Limit Switch
16	800F 22 mm Round Operator

## What is IO-Link?

IO-Link is a worldwide open-standard peer-to-peer serial communication protocol (IEC 61131-9) that allows sensors and actuators to easily integrate into The Connected Enterprise. Through IO-Link you can access all sensor configuration parameters, process data and diagnostics. So you can go beyond detecting products on your machine - now you can MONITOR your machine's health as it runs. Plus, IO-Link simplifies setup and commissioning while offering enhanced flexibility for current - and future - processes.

Item Number	Description
1	Studio 5000®
11	ArmorBlock IO-Link Hub
12	872C WorldProx™ Tubular General Purpose Inductive Proximity Sensor
13	871C Tubular Extended Temperature Sensor
14	856T Control Tower™ Stack Lights
15	802T Oiltight Limit Switch

Item Number	Description
16	800F 22 mm Round Operator
17	1732-E8IOLM12R ArmorBlock IO-Link Master
18	42AF RightSight™ M30 Sensor
19	836P Solid-State Pressure Sensor
20	45PLA Polarized Light Array Photoelectric Sensor
21	42EF RightSight™ Sensor
22	46DFA DIN Rail Fiber Optic Amplifier

# Smart Safety

## Smart Safety Technology

Rockwell Automation smart safety products enhance safety while providing connectivity through The Connected Enterprise. Allen-Bradley Guardmaster® smart safety devices featuring EtherNet/IP connectivity or GuardLink® enabling technology deliver information, diagnostics, advanced functionality and flexibility, while enhancing safety and increasing efficiency machine- and plant-wide.

## THE CONNECTED ENTERPRISE/INDUSTRY 4.0

# Smart Safety

EtherNet/IP<sup>®</sup>

## CIP Safety over EtherNet/IP™ connectivity

### 440G-MZ Guard Locking Interlock Switch

Guard Locking Switches lock/unlock signals can be provided, giving the devices current state and specific location within the system. Individual indication of the guard doors state including guard open, guard closed, guard locked or guard unlocked can also be provided.

### 450L Light Curtains

450L Light curtains can be connected simply to GuardLink via a GuardLink enabled tap. Access to the light curtains status along with the location can be communicated.

### Lifeline 5

Connect a Lifeline™ 5 Cable Pull Switch to get the location of the device and rope tension status to avoid nuisance trips from occurring when operated.

### GuardLink Enabled Tap Indication

#### LED Input Indicator

- Green = Connected input device healthy
- Flashing Green = Connected input device healthy but fault on system
- Red = Trip on connected input device
- Flashing Red = Connected input device has not performed correctly

#### LED Link Indicator

- Green = Operational
- Red = Tripped
- Flashing Red = Faulty tap

**800F Emergency Stop Pushbutton**

Connect Emergency Stop Pushbuttons to a GuardLink enabled tap quickly and simply via an M12 connector. Get information on its location when the device is operated.

**SensaGuard Non-contact Guard Interlock Switch**

Connect Non-contact Interlock Switches to a GuardLink enabled tap and receive data on the location of the switch and any fault conditions through GuardLink when the guard door is opened or closed.

**GSR DG - Dual GuardLink Safety Relay**

The GSR DG - Dual GuardLink Safety Relay can monitor two GuardLink channels and communicate status information for each safety input device via the EtherNet/IP Network Interface.

# Smart Manufacturing Delivers Measurable Results

## Improve safety, increase quality and optimize plant performance

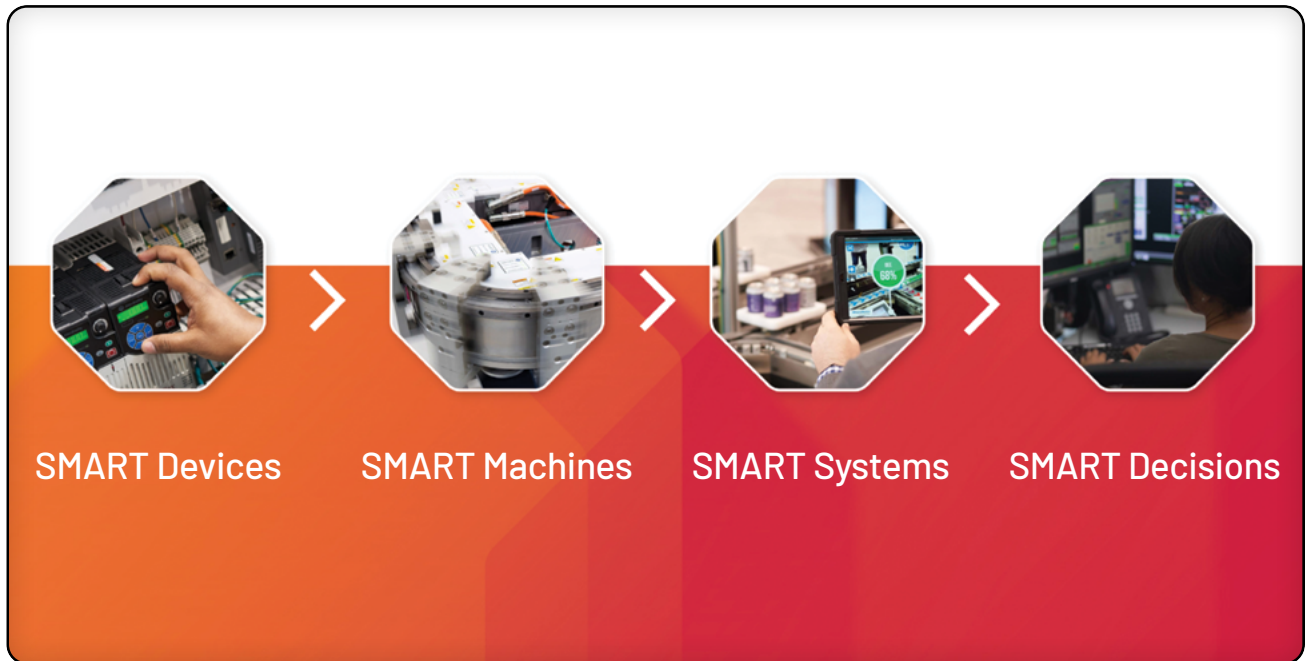

Thanks to constant evolution of technology, resulting in free flowing/open connectivity coupled to modern automation solutions, smart manufacturing has morphed from an abstract concept into a technological reality – and is now, arguably, an engineering necessity!

Modern market forces demand levels of flexibility, agility and overall operational equipment effectiveness (OEE) that only smart solutions can deliver. Are you keeping pace?

Many contemporary business outcomes – like reducing downtime – are based around knowledge-driven operations and smart, flexible manufacturing. But what is smart?

How do you get smart? Are you already smart? And what will being smart deliver?

Smart Devices provide the foundation for a digital transformation, Smart Machines provide unsurpassed level of intelligence to drive productivity and Smart Systems enable knowledge-driven operations.

# Circuit Breakers

## Applying Circuit Protection

**Molded Case Circuit Breakers (MCCB)** are designed to protect an electrical circuit from damage caused by overload or short circuit. Their basic function is to detect a fault condition and interrupt current flow. An MCCB can be reset (either manually or automatically) to resume normal operation.

**Motor Circuit Protectors (MCP)** are designed to provide short circuit (magnetic) protection and disconnect for a motor circuit. They are designed to be used with a contactor (to start/stop the motor) and an overload relay (to protect against overcurrent).

**Motor Protection Circuit Breakers (MPCB)** are designed to provide short circuit (magnetic) protection, a disconnect for motor circuit, and overload protection for the motor, all in one device.

<sup>1</sup> Horsepower/kW ratings shown in the tables above are for reference. The final selection of the manual starter depends on the actual motor full load current.

<sup>2</sup> Suitable for continuous operation at 90% current rating at 480V only if used in a minimum enclosure size of 250 x 175 x 150 mm (10 x 7 x 6 in).

Bulletin 140MT-D9V motor protection circuit breakers (MPCB) provide individual overload protection in multiple motor applications as required by NEC §430, part III.

# Circuit Breakers

## Accessories

### 140MT Motor Circuit Protectors and 140MT Motor Protection Circuit Breakers

#### Auxiliary Contacts

Description	Auxiliary Contacts		For Use With	Cat. No.
	N.O.	N.C.		
Front-mounted	1	0	140MT-C, D	140MT-C-AFA10
	1	1		140MT-C-AFA11
	2	0		140MT-C-AFA20
Right Side-mounted	2	0	140MT-C, D	140MT-C-ASA20
	0	2		140MT-C-ASA02
	1	1		140MT-C-ASA11

#### Voltage Trip Units

Description	Trip Rating	For Use With	Cat. No.
Shunt trip	110V, 50 Hz / 120V, 60 Hz	140MT-C, D	140MT-C-SND
	230V, 50 Hz		140MT-C-SNF
	240...260V, 60 Hz		140MT-C-SNA
	24V DC		140MT-C-SNZJ
Undervoltage trip	110V, 50 Hz / 120V, 60 Hz	140MT-C, D	140MT-C-UXD
	230V, 50 Hz		140MT-C-UXF
	240...260V, 60 Hz		140MT-C-UXA
	480V, 60 Hz / 415V, 50 Hz		140MT-C-UXB

#### Handles

Description		For Use With	Cat. No.
Lockable Knob	Black	140MT-C, D	140MT-C-KN
Lockable Knob	Red/Yellow		140MT-C-KRY

#### Feeder Terminals and Compact Busbars

Description	For Use With	Cat. No.
Feeder Block for Compact Busbar • Supply of compact busbars • Increases terminal capacity	140MT-C, -D	140MT-C-WBE
Feeder Terminal for Compact Busbar • Meets UL Type E spacing requirements	140MT-C, -D 140M-F	140MT-C-WTEN 140M-F-WTE
Three-Phase Compact Busbar for 32 A Motor Protection Circuit Breakers - 64 A Max. Continuous Current • 45 mm spacing • Front-mounted auxiliary contact	2 connections	140MT-C, -D
	3 connections	140MT-C, -D
	4 connections	140MT-C, -D
	5 connections	140MT-C, -D
Three-Phase Compact Busbar for 32 A Motor Protection Circuit Breakers - 64 A Max. Continuous Current • 54 mm spacing • Side-mounted auxiliary contact	2 connections	140MT-C, -D
	3 connections	140MT-C, -D
	4 connections	140MT-C, -D
	5 connections	140MT-C, -D
Three-Phase Compact Busbar for 45 A Motor Protection Circuit Breakers - 115 A Max. Continuous Current • 54 mm spacing • Front-mounted auxiliary contact	2 connections	140M-F
	3 connections	140M-F
	4 connections	140M-F
	4 connections	140M-F
Three-Phase Compact Busbar for 45 A Motor Protection Circuit Breakers - 115 A Max. Continuous Current • 63 mm spacing • Side-mounted auxiliary contact	2 connections	140M-F
	3 connections	140M-F
	4 connections	140M-F

### 140MG Motor Circuit Protectors and 140MG Motor Protection Circuit Breakers

#### Operating Mechanisms

Description	For Use With	Shaft Length	Cat. No.
Rotary, variable depth operator kits	140MG-G, I Frames	12 in (30.48 mm)	140G-G-RVM12B
		21 in (53.34 mm)	140G-G-RVM21B
	140MG-H, J Frames	12 in (30.48 mm)	140G-H-RVM12B
		21 in (53.34 mm)	140G-H-RVM21B

Description	For Use With	Cable Length	Cat. No.
Flex cable operator kits	140MG-G Frame	3 ft (9.1 m)	140G-G-FCXB03
		4 ft (1.3 m)	140G-G-FCXB04
		6 ft (1.9 m)	140G-G-FCXB06
	140MG-H, Frame	3 ft (9.1 m)	140G-G-FCXB03
		4 ft (1.3 m)	140G-H-FCXB04
		6 ft (1.9 m)	140G-H-FCXB06

#### Voltage Trip Units

Description	Trip Rating	For Use With	Cat. No.
Shunt trip	110...127V AC/ 110...125V DC	140MG-H, J	140G-G-SND
			140G-G-SNA
	220...240V AC/ 220...250V DC		140G-G-SNJ
			24...30V AC/DC
Undervoltage trip	110...127V AC/ 110...125V DC	140MG-H, J	140G-G-UVD
			140G-G-UVA
	220...240V AC/ 220...250V DC		140G-G-UVJ
			24...30V AC/DC

#### Circuit Breakers

20	20	400	140G-HC6C3-C20	140G-HCOC3-C20

Current-limiting molded case circuit breakers (MCCBs) are rated to open in less than half of a cycle under fault conditions which limits the let-through energy, providing enhanced protection for downstream components.

# Disconnect Switches

## Rotary Disconnect Switch, Fused 194R

- Up to 1250 A for IEC, and 800 A for UL
- Touch-safe, compact design
- Padlocking available
- Double-break switching for full fuse line and load side isolation when switch is OFF
- Side operation

## Rotary Disconnect Switch, Non-fused 194R

- Up to 1250 A for IEC, and 1200 A for UL
- Compact footprint for both UL and IEC switch bodies
- Suitable for severe utilization categories (AC-22 & AC-23)

## Rotary Disconnect Switch, Enclosed 194R

- Lock-out tag-out functionality
- Use as at-motor isolation
- Enclosure options:
  - Stainless Steel, NEMA 4/4X (194R-C)
  - Painted Metal, NEMA 3/4/12 (194R-F)
  - Thermoplastic, NEMA 4/4X (194R-K)

# Disconnect Switches

POWER

## Rotary Disconnect Switch, Non-fused 194U

- Touch-safe, compact design
- UL 30...125 A - IEC 40...160 A
- Can be used as main panel disconnect switch (UL98), or as at-motor disconnect switch (UR)
- NFPA79 compliant handle for robust lock-out/tag-out
- Multiple configuration options

## Configuration and Accessories

### Body Styles

3- and 4-pole versions are available in both front and base mount.

Base mount style

Base mount style

Lock out/tag out

### Handle Options

# Disconnect Switches

## Visible Blade Disconnect Switch 1494U Universal Mechanism

- 30...100 A, 3-pole, 600 V AC/DC ratings
- Universal mechanism allows for rod or cable operation
- Fusible or non-fusible versions
- Lockable handle
- Visible blade construction for safety

### Visible Blade Construction

- Reliable visible blade indication
- Blades visible – switch is de-energized
- Blades hidden – switch is energized

### Lug Connectors

- Included aluminum lugs will accept copper or aluminum wire

### Fuse Blocks

- Common base across 30/60/100 A
  - Integrated Phase Barriers
  - J and R fuse clips are available for the fusible styles

### Universal Mechanism

- Provides flexibility of installation for either rod or cable operated applications

1494U Rod Operated System

<sup>1</sup> Aluminum lug/line kits are provided with each disconnect switch.

<sup>2</sup> Ratings based on using two poles in series to break one line of the DC supply voltage and the remaining pole breaking the second DC supply line.

### Connecting Rods

Disconnect Switch Size [A]	Enclosure Working Depth [in. (mm)] <sup>3</sup>		Cat. No.
	Minimum	Maximum	
30, 60, 100, 200	6-3/4 (172)	19 (483)	1494U-R1

<sup>3</sup> Enclosure working depth is measured from the top of the flange to the disconnect switch mounting surface. Dimensions are approximate.  
**NOTE:** For enclosure depths greater than 19 in. but less than 23 in., select catalog number 1494V-RA4.

### Operating Handles

Handle Type	Description	Mounting	Disconnect Switch Size [A]	Cat. No.
Type 1, 3R, 4, 4X, 12	Nonmetallic	Right or Left Flange	30, 60, 100	1494U-HP1
Type 1, 3R, 4, 12	Painted Metal			1494U-HM1
Type 4, 4X	Stainless Steel			1494U-HS1

### Cable Mechanism

Disconnect Switch Size [A]	Cable Length [ft (m)]	Right-Hand Cable Mechanism Cat. No.
30, 60, 100	3 (0.91)	1494U-C313
	4 (1.22)	1494U-C314
	5 (1.52)	1494U-C315
	6 (1.83)	1494U-C316

### Fuse Clip Kits

# Disconnect Switches

## Visible Blade Disconnect Switches 1494V Variable Depth

- 200...600 A, 3-pole, 600V AC ratings
- Rod-operated, flange-mounted handle
- Fusible or non-fusible versions
- Lockable handle
- Visible blade construction for safety

## Visible Blade Disconnect Switches 1494C Cable Operated

- 200...600 A, 3-pole, 600V AC ratings
- Cable operation allows flexible mounting within the panel
- Fusible or non-fusible versions
- Lockable handle
- Visible blade construction for safety

## Application Spotlight

Bulletin 1494 disconnect switches are time proven, robust design with visible blade construction that is the product of choice in automotive manufacturing applications.

### 100-C Contactors with Screw Terminals

Description	Auxiliary Contacts		Screw Terminals Cat. No.
	N.O.	N.C.	
Front-mounted auxiliary contacts	0	2	100-FA02
	1	1	100-FA11
	2	0	100-FA20
	2	2	100-FA22
	3	1	100-FA31
	4	0	100-FA40
Side-mounted auxiliary contacts	0	1	100-SB01
	1	0	100-SB10
	0	1	100-SB11
	2	0	100-SB20

Surge Suppressors		Cat. No.
RC Module	24...48V AC, 50/60 Hz	100-FSC48
	110...280V AC, 50/60 Hz	100-FSC280
	380...480V AC, 50/60 Hz	100-FSC480
MOV Surge Suppressor	12...55V AC, 12...77V DC	100-FSV55
	56...136V AC, 78...180V DC	100-FSV136
	137...277V AC, 181...250V DC	100-FSV277

Mechanical Interlock	For Use With	Cat. No.
Mechanical only, without aux contacts	100-C (except 100C-40... C90)	100-MCA00
Mechanical/electrical, with 2 N.C. aux contacts		100-MCA02

Timing Modules	For Use With	Cat. No.	
<b>Pneumatic Timing Modules:</b> Contacts switch after the delay time, main control relay contacts continue to operate without delay	On-Delay 0.3...30 s Range	100-C w/ AC Coils or DC Electronic Coils	100-FPTA30
	On-Delay 2...180 s Range		100-FPTA180
<b>Electronic Timing Modules:</b> Delay of the contactor or control relay solenoid, contactor or control relay is energized at the end of the delay time	On-Delay 0.1...3 s Range	100-C w/ 110...240V, 50/60 Hz or 110...250V conventional DC coils	100-ETA3
	On-Delay 1...30 s Range		100-ETA30
	On-Delay 10...180 s Range	100-ETA180	
	On-Delay 0.1...3 s Range	100-C w/ 24...48V conventional DC coils	100-ETAZJ3
	On-Delay 1...30 s Range		100-ETAZJ30

Reversing Power Wiring Kit	For Use With	Cat. No.
For reversing connection with a solid-state or thermal overload relay	100-C09...C23	105-PW23
	100-C30...C37	105-PW37
	100-C43...C55	105-PW55
	100-C60...C97	105-PW85

POWER

## IEC Contactors 100-E/104-E

- 9...2650 A
- Compact size for smaller panel space requirements
- Wide range electronic coils for reduced energy consumption
- Environmentally friendly

The Bulletin 100-E/104-E contactor family offers wide range AC/DC electronic coils for reduced energy consumption and a compact design.

### Optional 24V DC PLC Interface

- Separate hold-in auxiliary contact not required
- Optional on 100-E116...E370 contactors
- Standard on all 100-E400...E2650 contactors
- 200-220V 50 Hz / 208-240V 60 Hz

### Optional built-in terminal lugs

- Finger-safe protection
- Allows for 2 wires per pole
- For contactors up to 146A

### ⊗ Coil Voltage Codes for AC and DC Control

AC/DC Control	
Electronic Standard Coils, 100-E09...E370	
Code	Description

## Safety Contactors 100S-C/104S-C, 100S-E

- 9...750 A
- SUVA third party certification
- AC and DC operating coils
- Mechanically linked or mirror contact performance

**POWER**

**Safety contactors** provide mechanically linked, or mirror, contact performance, which is required in feedback circuits monitoring energy isolating switchgear used in hazardous motion loads.

Red contact housing for easy identification

Gold plated, bifurcated contacts for improved signal reliability

Protective cover prevents manual operation

**100S-C Safety Contactor**

# Contactors

POWER

## Definite-Purpose Contactors 400

- 1...4 pole options, 25...120 A resistive loads
- Feed-through wiring
- Double-break contacts
- Snap-on auxiliary contacts
- Rated for inductive lighting and resistive loads

### Stationary Terminal

One piece terminal design with integral dual 0.250 quick connects. Meets NEMA Standard for spacing without insulated terminals.

### Base Assembly

High arc-resistant polyester hold stationary terminals, positions actuator, and magnet/coil assembly.

### Exclusive Terminal Screw

Hex, Slotted, Phillips, screw, #10-32 SEM's. Box lugs standard on 40 FLA models and larger.

## Applications

- Air conditioners
- Compressors
- Welding equipment
- Business machines
- Power supplies
- Refrigeration equipment
- Resistive heating
- Food service equipment

# Starters

POWER

## Manual Motor Low Voltage Starters 600, 609, 609U, 609TU

- Undervoltage protection
- Manual operation with overload protection
- Ideal for low HP applications, up to 10 HP three phase

Manual motor starters are specifically designed for full voltage motor starting applications where remote push button control is not necessary. They are ideally suited for starting and protecting smaller motors frequently used for fans and blowers.

### 600 Manual Starting Switches

- Single phase
- Starting and overload protection of small AC/DC motors up to 1 Hp

### 609 Manual Starting Switches

- Single and three phase
- Contact position indicator
- Locking feature
- Reversing and 2-speed
- Wide range of enclosures, including hazardous location

### 609U & 609TU Manual Starting Switches

- Undervoltage protection
- Single and three phase
- Contact position indicator
- Locking feature
- Wide range of enclosures
- Push button or toggle switch

# Starters

POWER

## IEC Eco Starters 190E/191E

- 5...23 A
- Type 1 and 2 coordination
- AC or DC coils available
- Shares common accessories with 100-C/100-K contactors and 140M motor protection circuit breakers

The 190E/191E motor controllers can be used in a variety of applications. These starters can be used in a group motor application or as a stand-alone product without any additional short-circuit protection in the motor branch circuits. Rated Type F combination motor controllers (UL/CSA).

### Options for Field Assembly

190/191-E starters can be field assembled. Simply select the following:

- 100-K/104-K miniature contactor (page 1-28) or 100-C/104-C contactor (page 1-30)
- 140MT motor protection circuit breaker (page 1-3)
- Eco connecting module

POWER

## Enclosed Starters, IEC 109-C/105-C

- Reversing and non-reversing
- Electronic motor protection
- Non-combination, disconnecting means to be provided separately
- Factory modifications available

## Compact Installation

Plastic enclosures provide a compact, cost effective solution to help reduce machine space and expand product flexibility.

100-C Contactor

E1 Plus Electronic Overload Relay

## Wiring Made Easy

Metal enclosures now feature component wiring color-coded by function. The wiring sleeve-cover corresponds to a colored label on the terminal block, reducing wiring errors and allowing for quicker installation times.

## Combination Starters, IEC 112/113

- 112 with fusible and non-fusible disconnect switches 113 with circuit breakers
- Non-reversing and reversing
- IP42 (Type 1) and IP66 (Type 3/4/12) enclosures
- Padlockable handle for up to three padlocks

These full-voltage combination starters are designed to provide the disconnecting means, short-circuit protection (with suitable fuses), control and overload protection for three-phase squirrel-cage motors. All starters include a normally open auxiliary contact as standard.

### Enclosures

- IP42 (Type 1) general purpose sheet metal (hinged cover)
- IP66 (Type 3/4/12) watertight, dusttight sheet metal (hinged cover)

## Space-Saving NEMA Full Voltage Starters 300

- NEMA sizes 0...8
- Energy-saving, universal coil design covers wide-range of AC and DC control voltages (sizes 4...8)
- Solid-state overload relay (direct mount through size 4)
- Panel or DIN rail mounts available
- Safety versions available (sizes 4...8)

Approximate size of traditional NEMA contactor 7 x 13.39 in., 178 x 340 mm (W x L)

The Allen-Bradley® Bulletin 300 NEMA Contactors and motor starters provide a space-saving and cost-effective alternative for applications requiring NEMA-rated motor control. Based on our Bulletin 100 IEC Contactor design these NEMA-rated products are compatible with a wide range of accessories as well as solid-state overload relays.

Compatible with full range of Bulletin 100C/E accessories for wide selection

Compact design saves panel space

Bulletin 300 Size 5  
5.51 x 8.86 in., 140 x 225 mm (W x L)  
actual size 30% smaller

## NEMA Full-Voltage Starters 509 Heavy Duty Industrial 309 Space and Energy Saving

- NEMA sizes 00...5
- Available as a modular kit for faster delivery
- Includes a 120V AC coil and (1) N.O. auxiliary contact as standard
- Solid-state overload relays: Class 10, 15, 20, and 30
- Snap-together wiring available on lift-off enclosures
- Enclosure rating: Type 1, 3R/12, 4/4X stainless steel, and 7 & 9

The 509 NEMA Starters are designed for full-voltage starting of polyphase squirrel-cage motors. These starters are available for constant horsepower, constant torque or variable torque, three-phase motors.

## Combination Starters, NEMA 312, 512 / 313, 513

- 312, 512 with fusible and non-fusible disconnect switches  
313, 513 with circuit breakers
- Starter sizes 0...7
- Patented snap-together wiring<sup>1</sup>
- Overload relays: eutectic or solid-state
- Reversing and non-reversing available
- NEMA Type 1, 4/12/3R, 4/4X, 3R/7-9
- UL listed and CSA certified

The robust NEMA combination starters, now with patented snap-together wiring, are versatile in designs and flexible in configurations, allowing various command and indication options, enclosure sizes and environmental type ratings.

<sup>1</sup> Snap-together wiring is not available for NEMA size 6 reversing starters and higher, or for NEMA Type 7/9.

# Motor Protection

POWER

## Bimetallic Overload Relays 193-K/193-T1

- Most basic motor protection device
- Overload protection trip class 10
- Phase loss sensitivity
- Rated for DC and variable frequency drives applications up to 400 Hz
- 1 N.O. and 1 N.C. auxiliary contacts

Bimetallic Thermal Overload Relays are motor protectors for IEC applications.

- 193-K bimetallic overload relays are for use with 100-K and 104-K miniature reversing contactors.
- 193-T1 bimetallic overload relays are for use with 100-C and 104-C Contactors.

## Applications

- Conveyors
- Fans
- Pumps
- VFD-controlled motors

POWER

## Electronic Overload Relays E100

- Adjustable trip class, 10 or 20
- 5:1 wide current adjustment range to cover a variety of motor applications
- 48% footprint reduction using pass-thru solution
- Pass-thru minimizes number of power terminal connections
- Accurate and repeatable settings to help minimize commissioning time
- Built-in thermal memory and phase loss detection helps protect your motor investment

The E100 Electronic Overload Relay is the next generation basic-tier electronic overload relay. It has enhanced features to better safeguard your motor protection investments, including increased accuracy and repeatability, a self-powered design with lower heat dissipation, and an aggressive component certification strategy.

### Optional Accessories

- Ground fault/jam
- Remote reset and/or indication
- Anti-tamper shields
- DIN rail/panel mounting
- External CT configurations

E100-EF shown

### Selectable Trip Class & Reset Mode

- 193-1EE: Trip Class 10 and 20, manual reset only
- 193/592-1EF: Trip Class 10, 15, 20, 30, manual or automatic reset

### 5:1 Current Range

## Electronic Overload Relays E300/E200

- Modular design for application customization
- Sensing, control, and communication modules
- Diagnostic information to monitor motor performance
- Logix integration with add-on profiles, add-on instructions, and Pre-configured Operator Faceplate Objects
- Dual-port EtherNet/IP, DeviceNet, and non-networked communication options
- Simplified wiring between E300™/E200™ Electronic Overload Relay and 100-C contactor

The E300/E200 Electronic Overload Relays provide a flexible design and advanced intelligence. With real-time motor diagnostic information to proactively indicate when a motor is having a problem allowing you to efficiently troubleshoot.

## Mounting Options

Multiple mounting options allow you to install the E300/E200 Electronic Overload Relays into your existing system.

IEC Motor Starter w/E300/E200

# Smart Motor Control

POWER

## Solid-State Contactors 156-C

- Ideal for high duty cycle applications
- Operational current rating 20...85 A
- 1, 2, or 3-phase capable
- AC and DC control options
- Zero cross switching to help reduce EMC emissions

The next generation 156-C solid-state contactors from Allen-Bradley are flexible in configuration and design, these devices can be panel or DIN Rail mounted complete with the integrated heatsink and do not require additional components or assembly. Microprocessor and PLC compatible, the solid-state contactors can be used in applications that range from heaters to small motors and valves.

Panel or DIN Rail mounting  
for flexible installation

Compact modular design  
with heatsink

### Optimized to help reduce electrical costs and needs

- Low electrical and acoustical noise
- Low input power
- Operational current up to 85 A (AC-1), 65 A (AC-3)
- Line voltage ratings up to 600V
- UL/cUL as a motor controller
- IEC AC51/AC53 resistive/inductive rated

# Smart Motor Control

POWER

## Starting Torque Controllers 154

- Ideal for reducing electrical and mechanical system shock
- Operational current rating 12...25 A
- 1 or 3-phase capable with 1 or 2 controlling phases
- AC and DC control options
- Adjustable torque setting and ramp time duration

The Allen-Bradley® Starting Torque Controller (STC) is designed for low horsepower single and three-phase squirrel cage induction motors. It is designed to help reduce system shock (electrical and mechanical) typically seen when directly starting on line voltage. This provides a smoother start and helps decrease downtime due to shock and vibration related problems. Typical applications include fans, material handling, pumps, palletizers, car washes and reduced voltage start single-phase applications.

Compact modular design with heat sink

Panel or DIN Rail mounting for flexible installation

### Optimized to help reduce downtime due to shock and vibration problems

- 10%...80% initial torque value
- 0.5...5 secs ramp time
- Operational current up to 25A
- Line voltage ratings up to 600V
- UL/cUL as a motor controller
- IEC AC53 inductive ratings

Initial torque adjustment dial

Duration ramp adjustment dial

# Smart Motor Control

POWER

## Smart Motor Controller 150 SMC™-3

- Solid-state soft-start motor controller with internal bypass
- Current ratings of 1...480 A
- Compact footprint
- Five Start/Stop modes
- Built-in machine overload protection
- 3-phase monitoring

**Internal Bypass**  
The bypass automatically closes when the motor reaches its nominal speed, minimizing heat generation.

- Reduced enclosure size
- Reduced total cost

**Easy and Secure Setup**  
DIP switches allow setting of the START/STOP profile, built-in overload, connection type, trip class, and auxiliary contact characteristics.

- Process optimization
- Setup efficiency

**Hold to Test/ Push to Reset Button**  
Used to simulate fault conditions or reset the unit.

- Reduces downtime
- Assists during setup

**Simplified Motor FLA Setup**  
Rotary switch allows quick and easy setup of motor FLA.

- Setup efficiency
- Protects motor assets

**Ultra-Compact Size**  
1...37 A units are only 45 mm wide.

- Reduced panel space
- Higher-density installations

**LED Display**  
Status information provided including RUN, Fault type and OFF.

- Instant status display
- Assists during troubleshooting

# Smart Motor Control

POWER

## Smart Motor Controller 150 SMC™ Flex

- Solid-state soft-start motor controller with internal bypass
- Current ratings of 1...1250 A
- Modular for installation and maintenance
- Built-in LCD and keypad
- Nine Start/Stop modes & up to three slow-speed modes
- Full metering and diagnostics

### Integral Bypass

The bypass automatically closes when the motor reaches its nominal speed, minimizing heat generation.

- Reduced enclosure size
- Reduced total cost

### Feed-through Wiring

### Power Pole

### Communications

Optional communication modules allow the SMC-Flex to be connected to multiple networks.

- Common DPI modules reduce inventory
- EtherNet/IP, DeviceNet, ControlNet and other networks available

### Advanced Monitoring and Diagnostics

Built-in current and voltage protection provide enhanced power monitoring and diagnostic capabilities.

- No additional monitoring equipment required
- PTC input
- Ground fault detection

### Simplified Application Setup

Built-in multilingual, backlit LCD display for programming and monitoring.

- Setup efficiency
- Process optimization

416...1250	710	1000	150-F1250NBE	-	-	

<sup>1</sup> 625...1250 A devices listed are only available for 110/120V control. For 230/240V control, change the **E** in the catalog number to an **A**.  
Example: Catalog number 150-F625NBE becomes 150-F625NBA.

<sup>2</sup> Separate 120V or 240V single-phase power supply is required for fan operation.

<sup>3</sup> Line and load termination are provided as standard.

<sup>4</sup> These controllers require a separate 100...240V, 50/60 Hz single-phase control source. To add a control circuit transformer to the enclosure, add the appropriate option code to the catalog number.

## Accessories

### Terminal Lug Kits (108...1250 A)

# Smart Motor Control

POWER

## Smart Motor Controller 150 SMC™-50

- Internal Bypass Power Structure
  - Ideal for standard applications
  - Current ratings of 108...480 A
- Solid-State Power Structure
  - Ideal for harsh environments
  - Ideal for more aggressive duty-cycle applications
  - Current ratings of 90...520 A
  - Normal and heavy-duty ratings
- 17 Start/stop modes and 3 slow-speed modes
- DeviceLogix programming for embedded user logic

The scalable design of the SMC-50 satisfies a wide variety of control needs. Advanced monitoring, superior communications capabilities and Energy Saver mode help increase efficiency and reduce downtime. The Internal Bypass power structure automatically closes when the motor reaches its nominal speed, minimizing heat generation. It offers reduced enclosure size and cost. The Solid-State power structure offers higher operations per hour, scalable thermal ratings and higher SCCR ratings.

<b>Simplified, Scalable Application Setup</b>	Optional parameter configuration module, human interface module, or PC-based software for programming and monitoring simplifies setup.	<ul style="list-style-type: none"> <li>• Setup efficiency</li> <li>• Process optimization</li> </ul>	✓	✓
<b>Hardware Expansion Ports</b>	Three hardware expansion ports accept optional digital and analog I/O expansion modules as well as a protection module (PTC, Ground Fault, Current Feedback).	<ul style="list-style-type: none"> <li>• Process scalability and optimization</li> <li>• Application flexibility (simple to complex)</li> </ul>	✓	✓
<b>Common Control Module</b>	All features/functions are included in standard control module including linear acceleration/deceleration, torque control, pump control, Smart Motor Braking (SMB), and Energy Saver mode.	<ul style="list-style-type: none"> <li>• Reduced inventory</li> <li>• Increased efficiency</li> </ul>	✓	✓
<b>Hold to Test/Push to Reset Button</b>	Used to quickly test for fault conditions or reset the unit.	<ul style="list-style-type: none"> <li>• Reduces downtime</li> <li>• Assist during setup</li> </ul>	✓	✓
<b>LED Display</b>	Multi-colored LED provides both diagnostics and controller status information.	<ul style="list-style-type: none"> <li>• Instant status display</li> <li>• Assists during troubleshooting</li> </ul>	✓	✓
<b>Communications</b>	Optional communication modules allow the SMC-50 to be connected to multiple networks.	<ul style="list-style-type: none"> <li>• Common DPI modules reduce inventory</li> <li>• EtherNet/IP, DeviceNet, ControlNet and other networks available</li> </ul>	✓	✓

POWER

## AC Drives 22F PowerFlex® 4M

- Power ratings of 0.2...11 kW / 0.25...15 Hp at 120V, 240V, and 480V to meet a wide range of applications
- Volts per hertz and slip compensation to meet application demands
- Flexible, time-saving installation using DIN Rail mounting with A and B frame drives
- Feed-through wiring for simple retrofitting into applications requiring variable speed motor control
- Side-by-side mounting in ambient temperatures up to 40 °C (104 °F), saving valuable panel space

Providing powerful motor speed control in a compact, space saving design, the Allen-Bradley® PowerFlex 4M AC drive is the smallest and most cost effective member of the PowerFlex family of drives.

Integral human interface module (HIM) with a 4-digit display for simple configuration

Drives operate up to 50 °C (122 °F) with minimal spacing

5 digital inputs (24V DC, 2 programmable)  
1 analog input (unipolar voltage or current)  
1 relay (form C)

Feed-through wiring for simple retrofitting

Supports a wide range of communication option cards, including EtherNet/IP and DeviceNet

An integral RS485/DSI port supports low-cost multi-drive networking

A compact footprint requires a 120 mm (4.7 in.) air-flow gap at the top and bottom of the drive, helping save space inside a panel

POWER

## AC Drives 25A PowerFlex® 523

- Power ratings of 0.2...22 kW / 0.25...30 Hp in global voltage classes from 100...600V to meet a wide range of applications
- Modular design features a removable control module that allows simultaneous wiring installation and software configuration to help increase productivity
- AppView® application parameter groups and CustomView™ configuration help speed machine commissioning
- Volts per hertz and sensorless vector control provide flexible motor control options

Allen-Bradley PowerFlex 523 AC drives are designed to help reduce installation and configuration time while offering the control you need for your application. These drives offer convenient programming features and installation flexibility in a cost-effective solution.

Supports a wide range of communication option cards, including dual port EtherNet/IP™ and DeviceNet

An integral RS485/DSI port supports low-cost multi-drive networking

A compact footprint requires a 50 mm (1.96 in.) mounting clearance for air flow at the top and bottom of the drive, helping save space inside a panel

An integral LCD human interface module (HIM) eases configuration with multi-language support and QuickView™ scrolling text to help explain parameters and codes

Drives operate in ambient temperatures from -20... +50 °C (-4...+122 °F). With current derating and a control module fan kit, up to 70 °C (158 °F)

5 digital inputs (24V DC, 4 programmable)  
1 analog input (unipolar voltage or current)  
1 relay (form C)

POWER

## AC Drives 25B PowerFlex® 525

- Power ratings of 0.4...22 kW / 0.5...30 Hp in global voltage classes from 100...600V to meet a wide range of applications
- Standard built-in single port for EtherNet/IP and Safe Torque-off
- AppView application parameter groups and CustomView configuration help speed machine commissioning

Allen-Bradley PowerFlex 525 AC drives are designed to support fast and easy installation and configuration and provide a variety of motor control and flexible mounting options. Available with standard built in EtherNet/IP communications and safe torque-off.

An embedded port for EtherNet/IP supports seamless integration into the Logix environment and EtherNet/IP networks

- 7 digital inputs (24V DC, 6 programmable)
- 2 analog inputs (1 bipolar voltage, 1 current)
- 2 digital outputs
- 1 analog output (1 unipolar voltage or current)
- 2 relays (1 form A relay & 1 form B relay; 24V DC, 120V AC, 240V AC)

Embedded Safe Torque-Off can help to protect personnel

Modular design features a removable control module that allows simultaneous wiring installation and software configuration to help increase productivity

Volts per hertz, sensorless vector control, closed loop velocity vector control and permanent magnet motor control to meet a wide range of applications<sup>1</sup>

A built in DSI port supports multi-drive networking, connecting up to five PowerFlex AC drives on one node

<sup>1</sup> Permanent magnet motor control is scheduled for a future firmware release.

# Additional Power Products

## CrossBoard® System

The CrossBoard System provides flexibility in motor control and protection devices. The out-of-the-box system is provided as one complete base unit, a bus structure with touch-safe plastic housing, which can be directly assembled and fitted with components after unpacking. Components simply snap onto the CrossBoard without tools, meaning the connection is automatic. Available in two widths (225 and 405 mm), the base units can be combined by adding a supply module to bridge the base units.

- Space saving and clear, clean design
- High degree of safety with IEC 61439 and UL 508 standard ratings, including IP20 touch-safe protection
- Out-of-the-box system that saves substantial time on installation and maintenance
- System components plug in easily without tools
- Up to 100 A UL (125 IEC)

Available in two widths

## A True Plug and Play Power Distribution System

### Three mounting options:

#### Standard DIN

- 225 mm - up to 2 kg
- 405 mm - up to 2 kg

#### Deep Profile DIN

- 225 mm - up to 2 kg
- 405 mm - up to 2 kg

#### Panel Mounted

## ArmorStart® Distributed Motor Controllers

- Offers EtherNet/IP™ or DeviceNet™ communication capabilities and Embedded Switch Technology
- Offers local disconnecting means, embedded field I/O, and local logic that uses DeviceLogix® software
- Offers LED status and diagnostic indication
- Includes a hardened, wash-down rating with the ability to mount the device near the motor or machine, which provides shorter cable runs
- Allows the ability to choose factory installed options for specific applications
- Is suitable for group installations with high short circuit current rating
- Available for use with round quick connect power media or fixed pipe and wire

<https://rok.auto/VBR-Armorstart>

## MachineAlert™ Dedicated Function Motor Protection Relays 809S/813S/814S/817S

- Programmable latching or inhibit at set level
- Adjustable time delay settings
- Three-phase devices are powered by the measuring circuit
- LED indication for relay, alarm, and power supply
- Global application with CE and UL approvals
- For product selection, visit <https://rok.auto/directory>.

# Additional Power Products

## Molded Case Circuit Breakers

The Bulletin 140UT-D Molded Case Circuit Breaker (MCCB) UL489 and IEC 60947-2 Listed circuit breaker for global applications. The current-limiting circuit breaker provides fixed short-circuit and overcurrent protection and offers high interrupting ratings for 2- and 3-pole devices. These circuit breakers are suitable for back feeding at 240V and 480Y/277V.

- UL 489 and IEC 60947-2 MCCB up to 40A
- Reduce panel footprint with compact design
- Lower heat load with improved thermal performance
- SCCR tested with 100-E, 100-C and 100-K contactors and connecting modules
- Back feeding capability

## NEMA Vacuum Contactors

1102C/1104C NEMA vacuum contactors provide motor control system reliability in harsh, dirty environments.

- 1500V AC maximum
- Current ratings: 200, 400, and 600 A
- Visual ON/OFF indicator
- Line and load terminals up front for ease of wiring
- Snap-on side mount auxiliary contacts

## Lighting Contactors

The 500LG compact, modular-designed lighting contactors deliver simplicity and versatility in product configuration, to meet a wide range of applications including full-bus and split-bus lighting panelboards.

- Contacts switch ballast (fluorescent or HID), tungsten, and general use loads
- Available in 30 A rating, with up to 12 field-convertible poles (maximum of 8 N.C.)
- Finger and back-of-hand safe power terminals
- Electronically and mechanically held versions

## Enclosed At-motor Disconnecting Means

Suitable as at-motor disconnecting means (UL508), available in metal enclosures.

- 140M Motor Protection Circuit Breakers (MPCB)
- 194R Rotary Disconnect Switches

## IEC Enclosures for Low Voltage Starters

198E starter enclosures are designed for a multitude of IEC starter configurations. They are available in metal or plastic, and are suitable for either indoor or outdoor environments. The enclosures are rated UL Type 1, 3, 4, 4X, 12, 12K (IP42 to IP66).

## Combination Starter, IEC 103H/107H

- Type E and Type F combination motor controllers (UL/CSA)
- 0.1...45 A
- 140M Motor Protection Circuit Breakers
- 100-C / 104-C Contactor
- Factory - installed options available

Drives

<https://rok.auto/motor-control>

# Additional Power Products

## Enclosed Soft Starters 150, 152, 153

- 90...520 A
- Snap-together wiring technology
- Floor standing Type 1, 12, 3R (IP54) enclosures
- Up to 100 kA Interrupting Capacity

## Pump Control Panels

Solutions for a wide variety of pumping applications. Designed for standalone usage, the water-tight NEMA Type 3R enclosure can be placed either indoors or outdoors. With pole mounting brackets on the enclosure, the panel can be installed in remote locations.

- NEMA starters: durable direct-on-line (DOL), up to 200 Hp
- Smart Motor Controllers: five start/stop modes, built-in overload protection, up to 300 Hp
- PowerFlex variable frequency drives up to 250 Hp

## Hazardous Locations Solutions

- Copper-free cast aluminum alloy
- Compact designs for inside and outside applications
- Flexible configuration options
- Gasket inside cover to guard against moisture and corrosive elements

### Certifications and Ratings

- UL listed/CSA certified
- UL classified enclosures

## Modified Industrial Controls

Instead of waiting weeks to get industrial control products with customer requested options, our availability strategy allows our products to be configured as close to the customer as possible.

Configure products such as:

- Enclosed starters
- Stack lights
- Wiring assemblies

## Modified Industrial Control Panels

We will turn your high volume custom panels into a repeatable solution with panels tailored to your specifications so you get exactly what you need, when you need it.

Customizable Panels Include:

- Programmable controllers
- Starters
- Distributed I/O
- Servo drives
- Push buttons and pilot lights
- Partner products and other third-party devices

## Economy Timing Relays 700-FE

- Adjustable functions and timing
- Socket-free DIN Rail mount
- Coil surge protection

## High Performance Timing Relays 700-FS

- Additional adjustable functions and timing
- Coil surge protection
- Hazardous location version available

700-FE Economy Timing Relays are a very narrow 17.5 mm wide. They have a timing range of 0.05 s...10 hr. The multi-function version helps reduce your spare parts inventory and standardize your design.

700-FS DIN Rail High Performance Timing Relays have a 22.5 mm space-saving design and a timing range of 0.05 s...60 hr. The multi-function timing helps you reduce stock and standardize your design.

LOGIC

## Tube Base Relays 700-HA

- 10 A contact rating
- DPDT or 3PDT
- Pin-style (8- or 11-pin)
- ON/OFF flag indicator
- LED, push-to-test with manual override options
- Optional bifurcated gold-plated contacts available for low energy switching

Tube-style bases are popular in general-purpose relay applications and meet a wide range of needs with 2-pole (8-pin) and 3-pole (11-pin) options. Socket bases are available in North American (open) and IEC (guarded) styles.

### Ideal Applications

- Switching currents or voltage too high for PLC outputs to handle
- Interfacing two or more system voltages - for example, 24V to 120V

Multi-function multi-range time module <sup>5,6</sup>	1	700-HT3	

<sup>5</sup> Suppressors and timer modules easily plug into sockets (catalog numbers 700-HN204 and 700-HN205). For use with 700-HA relays.

<sup>6</sup> Catalog number 700-HT3 is wired with signal "S" connected to "A1". See wiring diagram marked on the timer module.

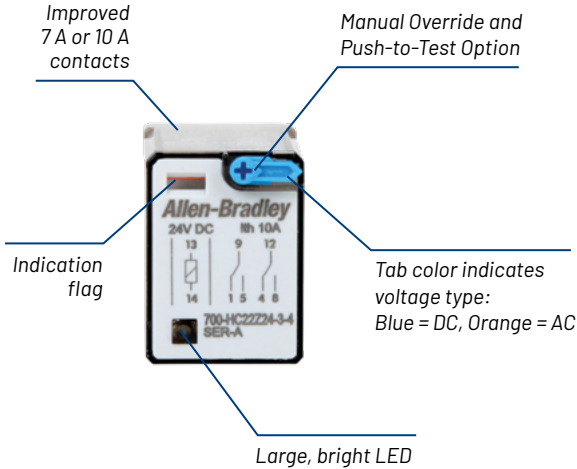

# Relays & Timers

## Miniature Ice Cube Relays 700-HC

- 7 or 10 A contact ratings
- DPDT or 4PDT
- Blade-style
- ON/OFF flag indicator
- LED, push-to-test with manual override options
- Optional bifurcated gold-plated contacts available for low energy switching

700-HC Miniature Square Base Relays are 2-pole or 4-pole plug-in relays for your low-energy switching applications. The same sockets can be used for DPDT or 4PDT versions, which improves flexibility and reduces inventory.

### Ideal Applications

- Provides longer life for PLC, saving money and increasing efficiency
- Switching currents or voltages too high for PLC outputs to handle
- Interfacing two or more system voltages - for example, 24V to 120V
- Multiplies PLC outputs by using relays to turn many devices on and off simultaneously
- Provides isolation from solid-state output leakage current

<sup>6</sup> Catalog number 700-HT3 is wired with signal "S" connected to "A1." See wiring diagram marked on the timer module.

# Relays & Timers

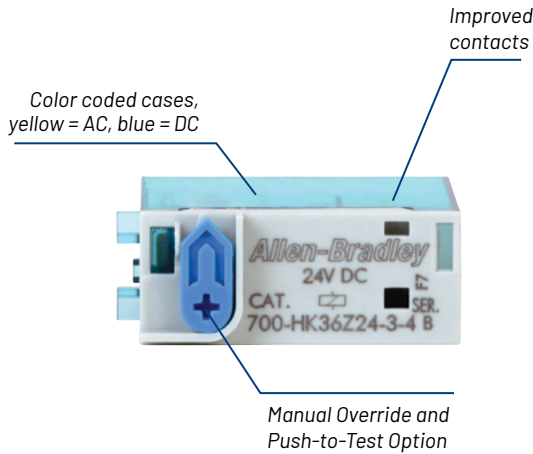

LOGIC

## Slim Line Relays 700-HK

- 8 A (2-pole) or 16 A (1-pole) contact ratings
- DPDT or SPDT
- Blade-style
- ON/OFF flag indicator
- LED, push-to-test and manual override options
- Standard or gold-plated AgNi contacts
- Maximum duty version available
- Screw or push-in socket terminals

The 700-HK relays are designed for a variety of high-density isolation and interposing applications. Installation is easy and cost effective through the use of the 8-way jumper wiring system that requires only one wire connection to a coil, common or contact power distribution terminal. Optional gold contacts switch low-energy loads reliably as low as 5V, 10 mA, 50 mW.

### Ideal Applications

- Provides longer life for PLC, saving money and increasing efficiency
- Switching currents or voltages too high for PLC outputs to handle
- Interfacing two or more system voltages - for example, 24V to 120V
- Multiplies PLC outputs by using relays to turn two devices on and off simultaneously
- Provides isolation from solid-state output leakage current

# Relays & Timers

LOGIC

## Terminal Block Relays 700-HL / 700-HL Next Gen

- Terminal Block style (1-pole: 6.2 mm wide)
- 6 A (1-pole) or 10 A (2-pole) contact rating
- Screw or spring-clamp terminal (700-HL) & screw or push-in terminals (700-HL Next Gen)
- Silver or gold contacts
- LED, reverse polarity and surge protection
- Replaceable relay modules
- Wide range voltage input (700-HL Next Gen)

700-HL Terminal Block Relays work in a variety of high-density isolation and interposing applications. The thin per-pole interface (6.2 mm wide) and quick connections help reduce installation costs. Optional leakage current suppression circuit design addresses nuisance coil turn-on or contact non-drop-out concerns for TRIAC controller outputs. The spring-clamp terminal base option is ideal for applications that are subject to vibration.

## Dial Timing Relay 700-HR

- Timing range from 0.05 s...300 hr
- 5 A contact ratings or transistor outputs
- Socket- or panel-mount
- Single- or multi-function
- Multi-voltage inputs
- Up to 8 timing functions

700-HR Dial Timing Relays are plug-in, socket-mounted timing relays. They are easy to set, and can be panel- or DIN Rail-mounted.

# Relays & Timers

LOGIC

## NEMA Heavy-Duty Relays 700-P

- NEMA and IEC ratings
- 600V maximum AC/DC
- Broad current switching options (10 A, 20 A, 35 A)
- For machine tool and other heavy-duty applications

Heavy-Duty Relays have four types of contact cartridges to meet your specific switching requirements. Time delay, latching attachments, overlapping, and logic reed contacts can be combined into one relay to yield a custom-tailored application solution.

## Product Selection

### NEMA Heavy-Duty Modular Relay = Base Blank Relay + Contact Cartridge Kit + Adder Decks (optional) + Operating Coil

#### Base Relays (up to 4 poles)

Description	Coil	Cat. No.
Base blank relay	AC	110/120V AC
	DC	24V DC

◆ Change symbol to **0,2,4** for number of poles required. 2 and 4 pole models include standard contact cartridge.

#### Individual Cartridge Selection

Description	Cat. No.
Standard contact cartridge - 10A	700-CP1
Master cartridge - 20A	700-CPM

#### Contact Cartridge Kits

Description	Package Contents	Cat. No.
Master cartridge relay kit	(4) Master contact cartridges 20 A rating	700-PMCKIT
Heavy-duty contact relay kit	Master cartridge kit, plus: (4) jumper terminals (to make two 35 A power pole contacts)	700-PHDKIT

Standard  
contact cartridge  
700-CP1

Master  
contact cartridge  
700-CPM

#### Adder Decks

Device Description	Additional Contact Cartridge Kits Required	Cat. No.
8 pole device	1 additional kit	700-PB00
12 pole device	2 additional kits	700-PB00 (Qty. 1) 700-PC00 (Qty. 1)

#### AC Operating Coils

Coil Volts	60 Hz Cat. No.	50 Hz Cat. No.
24	PA013	PA407
110 <sup>1</sup>	-	PA236
115...120 <sup>1</sup>	PA236	-
110...115 <sup>2</sup>	-	PA322
120	PA322	-

<sup>1</sup> This coil is optimized for 115...120V, 60 Hz applications and will operate satisfactorily at 110V, 50 Hz.

<sup>2</sup> This coil is optimized for 110...115V, 50 Hz applications and will operate satisfactorily at 120V, 60 Hz.

#### Product Selection Tools

# Relays & Timers

LOGIC

## Industrial Control Relays 700-K Mini

- Bifurcated contacts for low-level signals
- Optional integrated coil protection diode

## 700-CF / 700-EF

- Mechanically linked contact performance
- Gold-plated, bifurcated version for low level switching (700-CF)
- Master control relay version rated 15 A (AC-15 (700-CF)
- Electronic coils (700-EF)
- Wide control voltage range (700-EF)
- Add on auxiliary control blocks (front or side mount)

700-K, 700-CF and 700-EF IEC control relays are compact industrial relays capable of switching low-energy signals and providing features required for demanding industrial applications – mechanically linked contacts, timing options, long contact life – in an IEC design. These relays share accessories with the equivalent 100 IEC contactors.

# Programmable Controllers

LOGIC

## Micro Controllers Micro800™ Family, Bulletin 2080

- Wide range of micro controllers (built-in I/O from 10...48 pts)
- Use Connected Components Workbench™ software to program your Micro800 Controllers
- Micro800 Expansion I/O and plug-in modules to customize your controller
- Supports a wide variety of communication protocols to suit specific application needs: EtherNet/IP™, DeviceNet®, Modbus TCP, Modbus RTU, ASCII and Open socket capabilities

Micro800 Control Systems are easy to install and maintain. One software package applies to the entire family. Right-size your controllers for your standalone machines. Invest in the functionality you need, and use Expansion I/O and plug-in modules for a system tailored to your specific application.

### Micro810® Controllers Smart Relay Micro PLC

- Offers 12-point controllers
- Includes 8 A outputs, which replace the need for external relays
- Supports program download through USB programming port (adapter required)
- Allows you to configure and operate smart relay function blocks without a PC (LCD required)

\* Product selection starts on page 2-22.

### Micro820® Controllers Remote Automation Micro PLC

- Offers 20-point controllers
- Provides embedded 0...10V non-isolated 4-channel analog input and 1-channel analog output for speed control of an AC drive
- Communicates via EtherNet/IP and serial
- Supports program download through USB with an optional 3.5 in. remote LCD
- Supports up to two Micro800 plug-in modules

\* Product selection starts on page 2-22.

## Connected Components Workbench™ Software

- Single software to program your controllers, configure your drives, servo drives and safety relays, and design your human machine interface (HMI) screens
- Easy to Configure – Single software for the Micro Control System reduces machine development time and cost
- Easy to Program – Simplify programming with sample code, user-defined function blocks (UDFB) and user-defined data types (UDDT)
- Easy to Visualize – Reference Micro800 and CompactLogix™ controller variables when creating HMI tags

**Download Connected Components Workbench software!**  
<https://rok.auto/ccw>

### Micro830® Controllers Flexible Micro PLC with Simple Motion

- Offers 10-point, 16-point, 24-point, and 48-point controllers
- Supports up to five Micro800 plug-in modules
- Provides embedded motion capabilities, up to three axes with 100 kHz pulse train outputs, (PTO)
- Provides embedded communications via USB programming port and non-isolated serial port

\* Product selection starts on page 2-22.

*Micro870 Controller with Expansion I/O Modules*

### Micro850® and Micro870® Controllers Scalable Micro PLCs with Ethernet

- Provides embedded communications via non-isolated serial port (for RS-232 and RS-485 communications) and Ethernet port
- Provides embedded motion capabilities: Micro850 – up to three axes with 100 kHz PTO; Micro870 – up to two axes with 100 kHz PTO

#### Micro850 Controllers

- Supports up to five Micro800 plug-in modules and up to four Micro800 expansion I/O modules
- Offers 24-point and 48-point controllers

#### Micro870 Controllers

- Twice the memory capacity of Micro850 controller that supports up to 20,000 program steps and up to 128 KB user data
- Supports up to three plug-in modules, up to eight Expansion I/O modules and up to 304 I/O points
- Offers 24-point controllers

\* Product selection starts on page 2-23.

<sup>1</sup> All plug-in modules are for use with the Micro820, Micro830, Micro850 and Micro870 controllers, except catalog number 2080-MEMBAK-RTC and 2080-MEMBAK-RTC2. 2080-MEMBAK-RTC is for use with Micro830 and Micro850 controllers. 2080-MEMBAK-RTC2 is for use with Micro830, Micro850 and Micro870 controllers.

# Control Circuit & Load Protection

LOGIC

## Miniature Circuit Breakers 1492-SPM

- Supplemental protection for North America
- Current limiting
- Installation of up to six accessories per circuit breaker
- Reversible line and load connections
- Trip curves: B, C, and D

1492-SPM is a thermal-magnetic miniature circuit breaker as defined by IEC Standards. These devices are also rated as supplementary protectors, in North America, providing overcurrent protection for equipment where branch circuit protection is already provided, or is not required.

These supplementary protectors are offered as a broad portfolio of pole variants, current ratings, and trip curves to match the appropriate level of protection for your application. They may be used with bus bars for convenience in panel assembly, a wide range of left-, right- and space saving bottom-mount accessories, and lock out attachments for safety during maintenance.

50	1492-SPM1C500	1492-SPM2C500	1492-SPM3C500
63	1492-SPM1C630	1492-SPM2C630	1492-SPM3C630

<sup>1</sup> The catalog number listed represents Trip Curve C: Inductive. To order Trip Curve B (slightly inductive) replace the **C** in the catalog number with **B**. Example catalog number 1492-SPM1C005 becomes catalog number 1492-SPM1B005.  
To order Trip Curve D (highly inductive) replace the **C** in the catalog number with **D**.

<sup>2</sup> For 1+N and 3+N versions: add the suffix **-N** to the catalog number.

<b>Interrupting Capacity</b>	UL/CSA: 5...10 kA, IEC: 15 kA

<sup>4</sup> 1+N and 3+N devices are not UL recognized or CSA certified.

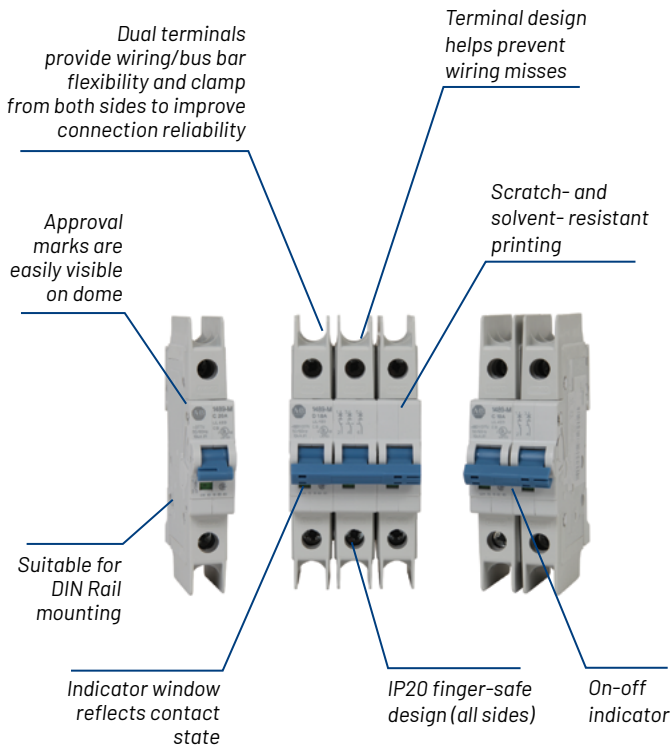

# Control Circuit & Load Protection

LOGIC

## Miniature Circuit Breakers 1489

- UL/CSA Listed for branch circuit protection
- Current limiting
- Reversible line and load connections
- Attachments available for Lockout/Tagout
- Trip curves: C and D

1489-M thermal-magnetic circuit breakers are approved for branch circuit protection in the United States and Canada, and are certified as Miniature circuit breakers for IEC applications.

These branch protectors are compatible with many accessories to meet diverse application needs, including UL 508 Listed bus bars for convenience in panel assembly, auxiliary contacts, signal contacts and shunt trips for versatility, and lockout attachments for safety during maintenance.

# Control Circuit & Load Protection

LOGIC

## Residual Current Devices 1492-RCDA

- 25...80 A residual current devices
- 30 mA sensitivity devices for personnel protection
- Reversible line and load connections
- Suitable for protection against AC and pulsating DC (rectified AC) earth leakage current
- Dual terminals allow a more secure connection of two wires, or both a wire and bus bar

By detecting small leakage currents and disconnecting all ungrounded connectors quickly, RCDs can prevent injury to exposed personnel and damage to equipment.

*Dual terminals provide wiring/bus bar flexibility and clamp from both sides to improve connection reliability*

*Approval marks are easily visible on dome*

*Suitable for DIN Rail mounting*

*Scratch and solvent resistant printing*

*IP20 finger-safe design (all sides)*

*Terminal design helps prevent wiring misses*

*Test push button to verify device functionality*

*Indicator window reflects contact state: red = closed, green = open*

*Accepts right-mounted auxiliary and signal contacts*

## Fuse Holders 1492-FB

- For Class CC, J and Midget fuses
- Compact size
- Handle isolates the fuse from top-wired power when installing or removing fuse
- Terminals are shipped in open position
- Optional blown fuse indicator

Optional blown fuse indicators for easy circuit troubleshooting

Terminal power feed

Busbar

Label holder

Suitable for DIN Rail mounting

IP20 finger-safe design (front)

The 1492-FB fuse holder family is designed for use in many OEM applications, such as power supplies, equipment protection, primary and secondary control transformers, solenoids, lighting and heater loads, and drives.

1492-FB fuse holders provide a safe and convenient means for installation of Class CC, J and Midget fuses. To support correct fuse type installation, the Class CC fuse holder is designed to reject a Midget fuse or international 10 x 38 mm fuse. The Class J fuse holder will reject all fuses other than a Class J fuse.

All fuse holders are UL Listed and CSA Certified for branch circuit protection. They are excellent for wire protection, small motor loads, and group protection of small motor loads. The Midget fuse holder is also CE Marked for 10 x 38 mm IEC Midget fuses.

<sup>1</sup> All major fuse brands and current ranges have been evaluated for this fuse holder. Due to the heat they generate, the following fuses must be derated: Mersen ATOR 1.25 I = 0.42 A max., Mersen ATQR 1.40 I = 0.47 A max.

<sup>2</sup> 690V when used in IEC applications.

## Specifications

# Control Circuit & Load Protection

LOGIC

## Modular Electronic Circuit Protection 1694

- Clear status indication by means of multicolor LED and auxiliary contact (located in power feed)
- Selective load protection by means of electronic trip curve
- No tools required at commissioning
- Width per channel only 12.5 mm (1-channel) or 6.25 mm (2-channel)

*Protection models are fed from power module and attached by attaching with built-in levers*

*Optional AUX contact for signaling any of the attached modules has tripped*

*Input feed from power supply, up to 40 A*

*Push-in Terminals for time-saving wiring*

Bulletin 1694 Electronic Circuit Protection (ECP) Modules protect the secondary circuit of 24V DC switched mode power supplies. The modular system can handle multiple channels or 40 A of total current consumption. Designed for 24V DC circuits, 1694 Electronic Circuit Protectors provide comprehensive protection against short circuit and overcurrent conditions while allowing for inrush current.

# Power Supplies

## Power Supplies 1606

- Intelligent circuit design with long-life electrolytic capacitors
- Allows 20% continuous (XLE/XLD family) or 50% temporary (XLS family) additional power reserve without reducing output voltage, while minimizing ripple and noise
- Redundancy modules or power supplies with built-in redundancy provide a means for managing multiple power supplies for back-up power
- Compact size saves valuable panel space

### Allen-Bradley efficiency = smaller enclosures

These thermal images show the difference an efficient power supply can make in a panel. All three power supplies are using the same transformer, but the Allen-Bradley power supply has the whole package running cooler due to its more efficient design.

A-B 1606-XLS - 10A, 24V DC - 93% Efficiency

Competitor A - 10A, 24V DC - 91% Efficiency

Competitor B - 10A, 24V DC - 84% Efficiency

## Selection Criteria

Power Supply Family	Basic 1606-XLB	Essential 1606- XLE	DC-DC Converter 1606-XLD	Compact 1606-XLP	Performance 1606-XLS

## Redundancy Modules 1606

- Provide back-up power in the event the primary power supply fails
- For all switched mode power supply lines
- Status indication for each switched mode power supply

## Buffer Modules 1606

- Buffer load currents during typical mains faults, switching events or load peaks
- Prevent application interruption due to short voltage dips, drops or inrush spikes
- 10+ years of life expectancy based on recommended usage

## DC UPS Modules

- Back-up power for bridge dips, sags or loss of power
- Extensive diagnostic and monitoring functions to aide in troubleshooting
- When power supply provides sufficient voltage, module charges the battery
- Capacitor and battery-based models available

## ArmorPower On-Machine Power Supplies 1607-XT

- IP67 and NEC Class 2 ratings
- Vacuum encapsulation technology
- Quick connectors
- Smooth surface, suitable for washdown

# Power Supplies

LOGIX

## Uninterruptible Power Supplies 1609-B, 1609-D

- Integrated remote on/off and dry I/O contacts
- USB communications
- Available EtherNet/IP communications (1609-D only)
- Remote on/off enables UPS to deactivate when servicing electrical panel
- Logix integration with add on profiles (1609-D only)

## Fast Recovery from Power Failures

The 1609 Uninterruptible Power Supply (UPS) is uniquely designed for the industrial market to provide back-up AC power to the control cabinet. The 1609 UPS will bridge dips, sags, or brief losses of power. If necessary, the 1609 UPS will provide enough time to facilitate a safe shut-down of your industrial PC, PLC, data logging HMI, or any other critical device in the control scheme.

# Power Quality & Energy Management

The use of energy monitoring hardware and software products can improve your equipment productivity and life, reduce your power use and its costs, and increase your company's profits. When is the right time to implement them?

- You are beginning an energy savings initiative
- You notice a spike in utility bills
- You need demand and consumption measured
- You have meters implemented currently and are looking for a sub-metering option
- You want to monitor individual processes and subprocesses

METERING LEVELS	PowerMonitor 500	PowerMonitor 1000 <sup>1</sup>	PowerMonitor 5000
Energy (Consumption) (kWh)	X	X	X
Demand (kW)	X	X	X
Power factor	X	X	X
Power quality aspects (sag/swell detection, harmonics, and transients)			X
Waveform capture			X
Door-mounted display	X	Optional	Optional
Ethernet/IP Network Communication	X	X	X
Configurable by using webpage		X	X
<b>Accuracy levels (per standard EN62053-22)</b>			
Class 1, 1% energy accuracy	X	X	
Class 0.2, 0.2% energy accuracy			X

<sup>1</sup> The PowerMonitor 1000 unit has an LCD display option and can be used with any Rockwell Automation operator interface.

# Surge & Filter

LOGIC

## DIN Rail AC Power Surge Protector 4983-DS

- Compact modular design
- Visual fault indicator linked to internal thermal disconnect
- A controlled end-life occurrence will trigger SPD replacement indicator
- Equipped standard with safety remote signaling AC network connection

### Application Information

Brief voltage spikes and surges can be caused by a wide range of factors originating from both within and outside of a production facility. Whatever their source, these transients can damage electronic equipment, requiring expensive replacement and production delays.

Bulletin 4983-DS surge protectors use metal oxide varistor (MOV) technology. Unlike most MOV-based surge protection, these devices are larger, replaceable and designed for DIN Rail mounting in an electrical environment.

The MOV technology is a high impedance component (high resistance device) When a surge occurs, the MOV changes to a low impedance (resistance) device and diverts surges away from the load and directs it to ground. MOVs have high energy capability and consistent clamping performance.

Because MOV-based surge protectors are sacrificial – they break down every time they divert surges away from a load – 4983-DS protectors can be replaced after an event. Many electronic components have some form of built-in protection and are not user-replaceable.

# Surge & Filter

## Filter Protective Devices 4983-PF

- Filter for low-level transients and high-frequency noise
- UL 1283, CSA, CE
- Features Islatrol® filter technology
- LED power indication
- Panel (flange) mount

## 4983-DC

- UL 1449 Third Edition, UL 1283, CE
- Small combination (filter and SPD) package size
- Features Islatrol filter technology
- LED power indication
- Form C contact for remote status indication

Bulletin 4983-PF and 4983-DC filter protective devices address low-level voltage transients and high-frequency noise disturbances that, over time, cause premature aging. The long term effects of noise are just as damaging as high voltage transients. The 4983-PF and 4983-DC devices feature Islatrol filter technology. Islatrol filter technology continually tracks and monitors the input signal to provide clean and reliable AC power for critical equipment.

Bulletin 4983-PF and 4983-DC filters are connected in series. Protection is best when the devices are installed directly in front of the load requiring protection. Typical applications include any microprocessor based products such as PLCs, motion control systems, and computers exposed to harsh environments.

# Additional Logic Products

## Control Circuit Transformers 1497

- Designed to reduce supply voltages to control circuits, providing greater safety to operators
- P2X finger-safe terminal covers and fuse covers
- 1497 global control transformers 63...2000 VA (50, 60 and 50/60 Hz)
- 1497A machine tool transformers 50...3000 VA (50/60 Hz)
- 1497B control power transformers 50...3000 VA (60 Hz)
- 1497D general purpose transformers 0.050...25.0 kVA (60 and 50/60 Hz)

## i-Sense/i-Grid Intelligent Network 1608S

The i-Sense<sup>®</sup> voltage event monitor is ideal for analyzing the feed into your facility with limited investment. Voltage quality data is viewed on the i-Grid<sup>®</sup> cloud-based application, which means that there is no software to install or maintain. Instant event e-mail and text notifications will keep power quality data at your fingertips.

## DySC Voltage Sag Correctors 1608

DySC<sup>®</sup> voltage sag correctors protect against voltage sags and momentary outages that account for a significant amount of manufacturing downtime and damaged equipment.

- Single- and three-phase portfolio
- Up to five seconds of ride-through
- 1608N Mini DySC (0.25...14 kVA)
- 1608P Pro DySC (10...165 kVA)
- 1608M Mega DySC (333...2000 kVA)

# Push Buttons

## 22 mm Push Buttons, Pilot Lights, and Selector Switches 800F

- 800FP plastic operators
  - IP65/66/69k, Type 4/4X/13
  - Engineering grade thermoplastics
  - Chemical-resistant for harsh environments
- 800FM metal operators
  - IP65/66, Type 4/13
  - Die-cast metal construction
  - Chrome-plated

### 800F Push Buttons

- Momentary or alternate action
- Illuminated or non-illuminated
- Flush or extended
- 2-color legend caps
- Multi-operators

### 800F Pilot Lights

- LED and incandescent
- Multiple voltages
- 24V, 120V, 240V
- 6 color options

### 800F Selector Switches

- 2-, 3-, and 4-position
- Illuminated or non-illuminated
- Maintained or spring return
- Key selector switches

#### Dependable Sealing

- IP66 and Type 4/13
- Superior ingress protection
- Diaphragm seals

#### Selection Switches feature Positive Detent

- No hang-up between positions
  - Constant energy solution
  - Vibration insensitive

#### Rotating Latch Collar

- Easier installation
- One-hand removal
- Plastic or metal

# Push Buttons

## 22 mm Emergency Stop Operators 800F/800FD

- Trigger action
- 30, 40, 60, and 90 mm operating heads
- Complies with EN ISO 13850 and EN 60947-5-5
- Self-monitoring contact blocks for increased safety
- Global certifications

Rockwell Automation® safety products and solutions improve the functional operation of your machinery while helping to increase personnel safety, efficiency and productivity. 800F 22 mm E-stops offer a wide variety of devices to meet individual customer application requirements.

### Self-Monitoring Contact Blocks (SMCB)

- Opens controlled circuit in unlikely event contact block is separated from operator
- Monitors proper installation between:
  - Operator and latch
  - Latch and SMCB

### 800F Enclosed E-stops for SensaGuard, GuardLink or Series Wiring

The pre-wired 800F E-stop push button stations allow for quick installation with the 5- and 8-pin SensaGuard™ and GuardLink family of non-contact safety switches. The 5-pin stations can also be wired in series with each other for easy conveyor or long run installation.

- 24V AC/DC
- Pre-tested and factory sealed for time savings on wiring and set-up
- Illuminated when activated for ease and speed of identification
- Maintains SensaGuard PLe, Cat 4, SIL 3 rating
- Flexibility for use in non-SensaGuard and GuardLink applications

To learn more about GuardLink technology and its benefits, see page 5-2

For additional emergency stop devices, see page 5-48

# Push Buttons

## 22 mm Monolithic Push Buttons, Pilot Lights, and Selector Switches 800FD

- Single-piece construction with integrated contact block
- Cost-effective design
- Low back-of-panel profile (45.7 mm)
- IP66, Type 3/3R/4/4X/12/13

800FD monolithic push buttons feature a self-contained design that combines the contact block and operator for ease of ordering, stocking, and installation.

**Push Button Operator**

**Pilot Light Device**

### Products

- Non-illuminated

# Push Buttons

## 30 mm Push Buttons, Pilot Lights, Selector Switches, and Push-Pulls 800T/H

- Heavy industrial stations and operators
- Type 4/13 watertight/oiltight (800T)
- Type 4/4X/13 watertight/corrosion-resistant/oiltight (800H)
- Universal LED for long life, simplified product selection and reduced energy usage
- Class I, Div. 2 solutions available

## Imitated, But Never Duplicated

800T and 800H push button product lines are in a class by themselves. They are designed and constructed to perform in the most demanding industrial environments. Bold yet functional, rugged yet attractive, Allen-Bradley® push buttons represent the world's most innovative and unique offering.

### Explosion-Protected Contact Block

- Class I Div. 2 certified
- Ideal for high shock and vibration applications
- 1 N.O., 1 N.C., A600-rated
- Positive opening N.C. contact

### Push Buttons

# Push Buttons

## 30 mm Emergency Stop Operators 800T/H

- Trigger action
- Certified UL Category NISD and NNTD Emergency Stop Devices
- Complies with EN ISO 13850 and EN 60947-5-5
- Tamper-resistant front-of-panel mounting
- Non-removable mushroom cap
- Non-teasible with standard normally closed (N.C.) contacts

### State-of-the-art, Tamper-resistant Design

Trigger action functionality provided in the 800T/H trigger action E-stop delivers operators that meet global requirements and are ideal for installation in heavy duty applications. The twist release design conforms to functional safety guidelines where intentional action is required to reset the E-stop device.

### Self-Monitoring Contact Block

- Opens controlled circuit in the unlikely event the contact block becomes separated from the operator
- 10 A max., A600 rated
- Bifurcated spanner with pure fine silver contacts
- Color-coded yellow for easy identification
- IP2X finger-safe protection standard

# Push Buttons

## Piezoelectric Push Buttons 800K

- IP69K rating
- 22.5 mm and 30.5 mm
- 316 stainless-steel
- Smooth, crevice-free surface
- Custom engraving (text and symbols) available

The 800K Piezoelectric push buttons represent an innovative rethinking of push button technology and its industrial applications. The potted piezoelectric circuit detects pressure on the surface of the button to provide a momentary actuation signal with no moving parts. These push buttons are ideal for food, beverage and other industries where high-pressure, caustic washdowns can challenge even the most robust push buttons.

### Smooth, Crevice-free Surface

- Easier to clean
- Minimizes areas on the button in which contaminants can potentially be lodged

### Illumination

Red, green, white, blue or yellow

### 316 Stainless-steel

Corrosion resistant to caustic wash-down solutions

### Potted Circuit

- Helps prevent fluids from corroding operator components
- Provides an additional barrier of protection

### No Moving Parts

By using piezoelectric technology, moving seals and crevices can be eliminated from the push button

### Mounting Ring

Nickel-plated Brass

### Anti-rotation Washer

316 Stainless Steel

### Push Buttons

# Push Buttons

## 16 mm Push Buttons, Pilot Lights, Selector Switches, and E-Stops 800B

- Ergonomic design
- Designed to global standards
- IP66 and Type 4/13
- Excellent for panels with limited space
- Illuminated and non-illuminated
- Trigger action E-stop

800B 16 mm push buttons can meet your light industrial and instrumentation application needs with their highly configurable and flexible design. These operators are excellent for applications with limited panel space or a small footprint. They are made of corrosion-proof plastic to ensure long push button life.

### Ease of Installation

### Push Buttons & Pilot Lights

- Momentary or maintained options
- Bright, bold, consistent operators (green, red, yellow, blue, white)
- Contoured button surface for comfort
- Diaphragm seals

### Selector Switches

- 2 or 3 position
- V seal - High pressure sealing
- Gold-plated snap action contacts

### E-stop

- Anti-tease feature
- Trigger-action design
- K seal - Dual wiping action

#### Push Buttons

## Panel Mount Alarms 855P

- Visual, audible, or combined indication
- Completely enclosed front, suitable for harsh washdown environments
- Ingress protection rating UL Type 4/4X/13, IP65
- Rear-securing and finger-safe terminals
- Mount in a standard 22.5 mm hole or 30.5 mm hole with adapter

855P panel mount alarms allow local indication of the status of a machine or equipment while enhancing space efficiency with devices ready to be installed in a control panel. These devices include features that preserve the control panel integrity and reduce installation time. Alarm options include sounders, status indicator beacons, xenon strobes, and sounders with status indicator combination, as well as dual-circuit alarms.

### Bulletin 855PB LED Beacon

Mounting ring to secure device to the rear of the panel

### 855P Sounders

Removable plug-in terminal block  
Keyed to avoid wiring mistakes

### 855PC Combined Sounder w/ LED beacon

Completely enclosed front tamper/vandal resistant suitable for wash down environments

### Bulletin 855PS Xenon Strobe Beacon

Voltage color coding for easy identification of the circuit

### 2-Color Half-Lens (with barrier)

Signal up to two different conditions on a machine with only one device

## Control Tower™ Stack Lights 854J (40 mm) & 854K (60 mm)

- Suitable for indoor and outdoor use
- IP66 rated housing
- Expandable to five levels per stack or up to ten modules in a single arrangement via the double-sided base option
- Piezoelectric sound modules maintain the ingress rating when mounted in the stack

The Control Tower stack lights are designed to communicate status of different conditions alerting you to critical equipment and systems needs on plant floor. Available in a wide variety of light and sound functions, sizes, colors, voltages and mounting options, our stack lights help monitor some of your most challenging control panel and on-machine applications.

**Lens Colors Options**

		
<b>3 = Green</b>	<b>4 = Red</b>	<b>5 = Amber</b>
		
<b>6 = Blue</b>	<b>7 = Clear</b>	<b>8 = Yellow</b>

Five circuits maximum in one stack

854K (60 mm)

**Piezo Sound Module**

**Light Modules**

- LED or incandescent
- Multiple color options

Terminal Block mounted on top of the base for easy wiring

**Mounting Options**

- Pole
- Quick release
- Surface
- Tube
- Vertical
- Double-sided base
- Half-inch NPT base
- Surface mount with M12-5 pin connector

854J (40 mm)

Tool-free lens assembly

Up to ten circuits maximum on double sided base

## Wall Mount Signal Lights 855W

- Up to six different conditions can be indicated (five visual and one audible) in the same device
- Wall mount does not add extra height to machine or equipment
- Units can be mounted vertically or horizontally
- IP65 ingress protection rating for indoor/outdoor and harsh environment use

855W wall mount signal lights are designed to communicate the status of different conditions in the machine or critical equipment in a compact size housing. Our signal lights are available in configurations from two- to five-light indicators with optional sound in the same unit.

## Industrial Horns 855H/855HM

- Multi-tone, multi-stage (circuits), and voice playback capabilities
- Visualization option for enhanced industrial applications
- Surface and wall mount styles
- Multi-horn synchronization for most models
- Plastic and metal housings are heat and shock resistant, corrosion-free, suitable for harsh environments and outdoor applications

855H audible devices include general purpose, high-performance, and recordable electronic horns that provide multi-stage, multi-tone voice messaging and volume control capabilities. The high-performance and recordable horns are available as stand-alone devices or with beacons attached.

### General Purpose

#### Mounting Options

- Surface mount
- Semi-flush mount

#### Sound Options

- 108...113 dB tones
- Three tones

#### Environmental Ratings

- Semi-flush mount:  
UL Type 3R/13, IP54
- Surface mount:  
UL Type 4/4X/13/3R,  
IP66

### High Performance

855H

855HM

#### Mounting Options

- Surface mount

#### Illumination Options

- 855H - Xenon tube (strobe, 5 J)
- 855HM - LED

#### Sound Options

- 855H - 10...126 dB outputs
- 855HM - 119 dB output
- Up to 45 tones and 3 circuits

#### Environmental Ratings

- 855H - Frame C and E: UL Type 3R, 4/4X, 13, IP66
- 855H - Frame A, B, and D: UL Type 13/3R, IP56
- 855HM - UL Type 4/4X/13/3R, IP66

### Recordable

#### Mounting Options

- Surface mount
- Adjustable bracket (flare style)

#### Illumination Options

LED beacon (red, green, or amber)

#### Sound Options

- 101...111 dB voice
- 110...126 dB tone
- Up to 45 tones

#### Environmental Ratings

- Frame C and E:  
UL Type 3R, 4/4X, 13, IP66
- Flare:  
UL Type 3R, 4/4X, 13, IP66/IP67

# Signaling

## Industrial Beacons

### 855B

- Three diameter sizes
- Illumination options: LED, halogen, and xenon tube
- Six colors available: green, red, amber, blue, clear, and yellow
- 855BS, 855BM, 855BL
  - Surface, NPT conduit, or tube mounting options
  - UL Type 4/4X/13, IP65
- 855B-GMS
  - Surface mount only
  - UL Type 3R, IP66

855B industrial beacons offer flexibility in size, mounting, voltages, colors, and illumination options to fit your application needs. The three diameter sizes are available in steady halogen, flashing halogen and rotating halogen versions. The 90 mm size offers also LED steady, flashing, strobe and three-color functionality.

**855BS - 90 mm<sup>1</sup>**

**Illumination Options**

- Halogen bulb (steady/ flashing/ rotating)
- LED (steady/ flashing/ strobe/ 3-color)
- Xenon tube (strobe)

<sup>1</sup> LED option shown

**855BM - 120 mm**

**Illumination Options**

- Halogen bulb (steady/ flashing/ rotating)
- Xenon tube (strobe)

**855BL - 160 mm**

**Illumination Options**

- Halogen bulb (steady/ flashing/ rotating)
- Xenon tube (strobe)

**855B-GMS - Square**

**Illumination Options**

# Graphic Terminals

## PanelView™ 800 Graphic Terminals 2711R

- High-resolution display (65K colors) with LED backlight, supporting simple graphic animation
- Communicate with MicroLogix™, Micro800™, CompactLogix™ 5370 and CompactLogix™ 5380 controllers and other devices using serial (RS232, RS422/485) protocols and Ethernet
- Review alarm status, history and time/date of equipment events even after power cycle
- Languages supported: French, German, Italian, Portuguese, Spanish and Simplified Chinese

The PanelView 800 graphic terminal features a high-speed processor, high-resolution display with LED backlight and internal memory; helping to improve productivity and maintenance, while enjoying the convenience and efficiencies of single-source buying.

### Landscape and Portrait Modes

Serial or Ethernet Network

Optimized for use with Micro800 and MicroLogix controllers.

## Connected Components Workbench Software

Connected Components Workbench™ software is a single software environment supporting...

- E200™ electronic overload relays
- Guardmaster® 440C-CR30 software configure safety relay
- Guardmaster speed monitory safety relays
- GuardShield™ 450L safety light curtains
- Kinetix® servo drives
- Micro800 controllers
- PanelView 800 graphic terminals
- PowerFlex® drives
- SMC™ soft starters

...in your standalone machines.

# Additional Operator Interface Products

## Hazardous Location Products

- 800G/H/R Push Buttons
- 855X/XM Horns and Beacons

## Control Tower™ Stack Lights 855E (50 mm)

- UL Type 4/4X/13, IP65
- Stacking configurations 1...5 modules high
- Continuous or pulsing piezo sound modules

## Compact Control Tower Stack Lights 855D (30 mm)

- UL Type 4/4X/13, IP65
- Steady and flashing LED light modules
- Continuous or pulsing piezo sound modules
- Multiple mounting options
- Factory pre-assembled and pre-wired

## Panel Light Bars 855L

- Low voltage potential in panel
- Low heat output
- Low weight due to absence of heavy ballast
- Ideal for environments with high shock and vibration

# Terminal Blocks

Leading the industry in efficiency and productivity, our family of IEC terminal blocks includes a broad range of DIN Rail mountable products. With push-in, screw and spring clamp connections available, they are designed for safety, installation ease, and ruggedness.

## Push-in, Screw Type and Spring Clamp Terminal Blocks are Available in the Following Styles:

### Standard Feed-through Terminal Blocks

- Designed for single-circuit feed-through applications

### Multi-circuit Feed-through Terminal Blocks

- Designed for high-density wiring applications

### Sensor Terminal Blocks

- Provide all connections needed for two-, three-, and four-wire applications in one terminal block

### Grounding Terminal Blocks

- Provides easy to identify grounding bus that is mounted on the DIN Rail

### Plug-in Style Terminal Blocks

- Allow for insertion of fixed components into control circuits (resistor, diodes, surge suppression circuit and shunt bars)

### Fuse Blocks

- Provide better overcurrent protection in hinged-arm design

### Control Power Distribution

- Available in Push-in Terminal Blocks

## Terminal Blocks

### Push-in Terminal Blocks 1492-P

- When using an automated ferrule machine, installation time can be up to 65% faster than a screw clamp
- One-hand, one-second installation
- No torque values are needed to install or double check

### Screw Clamp Terminal Blocks 1492-J

- All screw clamps have self-locking feature for unmatched connection reliability
- UL tested and approved for multiple wire terminations per connection terminal
- Use strong clamping materials to form gas-tight connection

\* Product selection begins on page 4-14.

### Spring Clamp Terminal Blocks 1492-L

- Help reduce wiring connection time by up to 30...50%
  - Excellent reliability performance in high-vibration environments
- Easy top-wire installation

\* Product selection begins on page 4-21.

#### Available Accessories<sup>1</sup>

- Marker cards
- Partition Plates
- DIN Rail
- End Anchor
- Jumpers

<sup>1</sup> DIN Rail and End Anchors can be found on page 4-29.  
For accessory options, please visit  
<https://rok.auto/directory>

#### All IEC Terminal Blocks are:

- IP2x finger-safe
- DIN Rail mount
- High fault short-circuit current rating (SCCR) with fuses and circuit breakers
- Meet IEC, UL, CSA and ATEX standards

## Product Selection

### Grounding Terminal Blocks, Push-in (10...16 mm wire size)

Dimensions are not intended to be used for manufacturing purposes.

Note: Height for dimension is measured from top of rail to top of terminal block.

1492-PG10

Two-level, Feed-through terminal block with commoning bar

<b>Standards</b>	UR/CSA	IEC	ATEX
<b>Voltage rating [V AC/DC]</b>	600	1000	550
<b>Wire range (Rated cross section)</b>	#20...6 AWG	10 mm <sup>2</sup>	10 mm <sup>2</sup>
<b>Wire Strip Length</b>	0.71 in (18 mm)		
<b>Density</b>	30 pcs/ft (100 pcs/m)		
<b>Housing Temperature Range</b>	-76...+266°F (-60...+130 °C)		
<b>Terminal block</b>	<b>Cat. No.</b>	<b>Pkg. Qty.</b>	
<b>Green/Yellow</b>	1492-PG10	25	

Dimensions are not intended to be used for manufacturing purposes.

Note: Height for dimension is measured from top of rail to top of terminal block.

1492-PG16

Two-level, Feed-through terminal block with commoning bar

<b>Standards</b>	UR/CSA	IEC	ATEX
<b>Voltage rating [V AC/DC]</b>	600	1000	550
<b>Wire range (Rated cross section)</b>	#18...6 AWG	16 mm <sup>2</sup>	16 mm <sup>2</sup>
<b>Wire Strip Length</b>	0.71 in (18 mm)		
<b>Density</b>	25 pcs/ft (83 pcs/m)		
<b>Housing Temperature Range</b>	-76...+266°F (-60...+130 °C)		
<b>Terminal block</b>	<b>Cat. No.</b>	<b>Pkg. Qty.</b>	
<b>Green/Yellow</b>	1492-PG16	20	

⊗ For colored terminal blocks, replace the ⊗ in the catalog number with the following: **RE** = Red, **B** = Blue, **BL** = Black, **G** = Green, **Y** = Yellow, **OR** = Orange, **W** = White, to the end of the catalog number.

Standard	-	1492-P10PD3E-2B2RE <sup>2</sup>	28-12 AWG (2.5mm <sup>2</sup> )
Ferrules	For specific information on which Panduit ferrules to use with individual Bulletin 1492-P Push-in Terminal Blocks, consult Appendix sections in Publication 1492-TD017.		

<sup>1</sup> Shape/Size Configuration #1: (+/-) on separate terminal blocks.

<sup>2</sup> Shape/Size Configuration #2: (+/-) integrated into a single terminal block.

<sup>3</sup> Not grounded to the DIN Rail. This is a functional earth ground that allows you ground the minus potential of the power supply to 0 V.

<b>Marking Systems</b>	ClearPlot Basic Marker Cards		1492-MR5X8 (120/card)	5 cards	1492-MR6X8 (120/card)	5 cards	1492-MR5X8 (120/card)	5 cards
	ClearMultiprint Markers		1492-MT5X8 (800/roll)	1 roll	1492-MT6X8 (600/roll)	1 roll	1492-MT5X8 (800/roll)	1 roll
<b>Ferrules</b>			For specific information on which Panduit ferrules to use with individual Bulletin 1492-P Push-in Terminal Blocks, consult Appendix sections in Publication 1492-TD017.					

<sup>1</sup> Available in orange as standard, to order other colors add the appropriate suffix to the catalog number listed: Blue =B, Red = RE. Example for a red 2-pole center jumper, the catalog number will be 1492-CJP3-2-RE. Multiple pole sizes available.

<sup>2</sup> Two marker card markers per terminal block are required.

<b>Marker card (edge marking)</b>	1492-M3X5		5 cards (120/card)		1492-M5X10		5 cards (144/card)		1492-M6X10		5 cards (120/card)	
<b>Marker card (center marking)</b>	1492-M3X12		5 cards (200/card)		1492-MR5X8		5 cards (200/card)		1492-M6X5		5 cards (200/card)	
<b>Snap-in marker tags for ClearMultiPrint</b>	1492-MT3X12		1000		1492-MT5X8		800		1492-MT6X8		600	

⊗ For colored terminal blocks, replace the ⊗ in the catalog number with the following: **RE** = Red, **B** = Blue, **BL** = Black, **G** = Green, **Y** = Yellow, **OR** = Orange, **BR** = Brown, **W** = White, to the end of the catalog number.

† For blocks with 1-in and 2-out, add a **T** after the L3 or L4. For blocks with 2-in and 2-out a **Q** after the L3 or L4. Example: catalog number 1492-L3T, 1492-L4Q, 1492-L3T-RE, 1492-L4Q-BL.

\* You must also add a **T** or **Q** to the end barrier part number when using 3 or 4 connection terminal blocks.

Example: The end barrier for Bulletin 1492-L3T is catalog number 1492-EBL3T. For the Bulletin 1492-L2Q, the end barrier is catalog number 1492-EBL2Q.

<sup>1</sup> Multiple pole sizes available.

# Terminal Blocks

## Terminal Block Marking Systems 1492

- Choose from two marking system technologies
- ClearMultiprint™ for cost sensitive applications using spool format marker tags
- ClearPlot™ for high quality applications using card format marker tags

### ClearMultiprint™ Marking System

The ClearMultiprint marking system provides high-quality spool media printing in an easy-to-use format for all users.

- Thermal transfer technology eliminates ink dry out issues
- Less than a minute to print and set a full row of marker cards
- Provides high contrast on white marker tags and wire labels
- Wide range of print media: terminal block tags, wire and cable labeling, heat shrink, and adhesive device markers

### ClearPlot™ Marking System

The ClearPlot marking system provides high-quality printing for low to medium volume users on terminal block marker cards.

- Plot partial marker cards
- Load up to three marker cards at a time (mix and match)
- Character customization
- Extensive marker card library offers optimal flexibility

### ClearTools™ Software

Free ClearTools software makes it easy to create everything from basic numbering and sequences to images. You can import from a variety of file formats or use the included library of symbols.

# Terminal Blocks

## Power Distribution Blocks 1492-PDE

- IP20 Finger-safe protection
- Power distribution through 510 A
- DIN Rail and panel mountable
- High fault SSCR up to 100 kA

Finger-safe power distribution terminal blocks are designed to prevent accidental contact with live connectors – without the use of additional barriers or shields. These panel mount devices have a compact footprint, and are available with either aluminum or copper terminals. Captive termination screws ensure that parts never get lost and the rugged thermoplastic housing will resist physical damage.

These single-pole devices are available with DIN or panel mount options and can easily be assembled together to create multi-pole solutions.

# Wiring Systems

CONNECTIVITY

## Wiring Systems 1492

- Interface modules (IFM) connect through pre-wired cables to digital and analog I/O
- Simplified design reduces bill of materials – one IFM module and cable replaces multiple terminal blocks, wires and terminations
- Design flexibility – feed-through, LED indication, fusing, and interposing relay IFMs are available to meet application variables

## Value Add of Wiring Systems

You can achieve up to 75% savings on your control wiring time and reduce wiring errors when using a Bulletin 1492 Wiring System compared with wiring to traditional terminal blocks.

### 1492 Wiring Systems

1:08 min.

Replace multiple terminal blocks, wires and terminations with single IFM and cable.

### Conventional Wiring

46:30 min.

### Cables:

- Pre-wired
- IFM Ready
- I/O Ready

### Interface Modules (IFM):

#### Digital

- Straight Feed-through
- LED indicating
- Fused
- Relay

#### Analog

- Straight Feed-through

# Signal Interface

## Signal Conditioners 931 N/S

- Helps protect your expensive control system from transients and noise
- Eliminates ground loop/noise-induced errors in process measurements through high levels of galvanic isolation
- Cost effective signal conversion to solve a signal mismatch between field device and I/O
- Eliminates signal degradation of critical process measurement during transmission

Signal Conditioners are designed for use with I/O systems to provide reduced installation and maintenance costs in process applications. A wide range of products are available for use wherever temperature, pressure, speed, weight, level, and flow are measured and controlled as part of a continuous or batch production process.

A variety of product types are offered to meet your application needs, including:

### 931N - Nano Series

- Space-saving 6 mm housing
- Easy onboard configuration
- Angled terminals for ease of wiring
- Power rail option reduces supply wiring

### 931S - Smart Series

- Compact housings 12.5, 17.5, and 22.5 mm wide
- Angled terminals for ease of wiring
- Removable terminals
- Interactive display

## Accessories

	Description	DIN Size	Length	Catalog Number
	Kit Contains: • 1 bus circuit layer insert • 1 support section • 1 cover • 1 end left plate • 1 end right plate	35 x 7.5 mm	250 mm	931A-CS

# Signal Interface

CONNECTIVITY

## Intrinsic Safety Modules 937 Z/T/C

- For analog and digital signals in hazardous locations
- Simple maintenance with integrated diagnostics and quick change of modules during ongoing operation
- Comprehensive standards compliance, including up to SIL3 compliance for easy and reliable planning and documentation
- Horizontal or vertical mounting with no reduction in operational ratings
- Power Rail for drastically reduced wiring, collective error messaging, efficient troubleshooting and installation

Bulletin 937 Intrinsic Safety Modules connect intrinsically safe rated equipment – such as transmitters, solenoids, proximity sensors and encapsulated assemblies – with control systems.

### Product Range Overview

- From simple switch amplifiers to highly functional signal converters
- Modules available with galvanic isolation
- Low heat dissipation thanks to low power consumption
- Broad supply voltage range including AC, DC and universal power supply (AC/DC)

### Easy Configuration

- DIP switches or Pushbuttons with LCD display
  - FDT Interface between devices and control system

### Power Rail System

- Allows simple snap-in of modules
- Power supply and monitoring of lead breakages/short circuit on gold-plates rails
- Reduces wiring
- Vertical and horizontal mounting
- Simplifies future expansions

### Compact Size

- 12.5 mm housing allowed for 2 channel densities

### Removable Terminals

- Rapid connection
- Up to 2.5mm/14 AWG wiring
- Keyed terminals eliminate misconnection

### Power Feed Module

- Link power supply to the Power Rail
- Group fusing
- Redundancy options
- Alarming for lead breakage, short circuit, and power failure
- Reduces I/O overhead
- Front switch for mode of operation

## Application

Non-network Connectivity is ideal for compact machines, cost-sensitive applications or those where minimal diagnostics are required.

### ProposalWorks Proposal Builder

We offer many standard and custom connectivity products not shown in this catalog. Our free ProposalWorks software is the easiest way to select or configure a solution from our wide range of connectivity products.

<https://rok.auto/configure>

### A complete connectivity solution, including:

- Cordsets (connector at one end, leads on the other)
- Patchcords (connectors at each end)
- Field-attachable connectors
- Panel-mount receptacles
- Distribution boxes
- Splitters and tees
- V- and Y-cables
- Raw cable spools

### Connectivity Styles

- DC micro (M12)
- AC micro (1/2 in.)
- Mini (7/8 in.)
- M23
- Pico
- Mini Plus
- EAC micro
- DIN Valve

### Various cable jacket materials, colors, and flex ratings for a wide range of applications and environments:

- PVC – General purpose applications  
– Yellow, black, grey, red, or blue
- TPE – Bending and flexing applications, temperature extremes  
– Yellow and black
- PUR – Bending and flexing applications, chemical environments, water submersion  
– Yellow and black
- ToughWeld™ (CPE) – Welding applications, chemical environments
- ToughLink™ (TPE) – UV and water resistant, chemical environments
- High Flex TPE and PUR – rated to 5 million, 9 million, and 10 million flex cycles

## DC Micro Cordsets & Patchcords 889D

- 4-, 5-, and 8-pin connectors
- Straight or right angle versions
- 22 or 24 AWG cable
- Oil-resistant yellow, black or red PVC jacket

## Product Selection

### Cordsets

Female (Sensor End) Connector Style	Cable			Cat. No. <sup>1,3</sup>	
	Wire Color		Assembly Rating		Length [m (ft)]
4-pin straight	1 Brown 2 White	3 Blue 4 Black	22 AWG 250V, 4 A	1...30m (3.3...98.4 ft)	889DQ-F4AC-*
4-pin straight					889D-F4AC-2
4-pin right angle					889D-R4AC-2
5-pin straight	1 Brown 2 White	3 Blue 4 Black 5 Grey	24 AWG, 30V AC/36V DC, 1.5 A	2 (6.56)	889D-F5AC-2
8-pin straight	1 White 2 Brown 3 Green 4 Yellow	5 Grey 6 Pink 7 Blue 8 Red			889D-F8AB-2 <sup>2</sup>

\* Quick Connect version

### Patchcords

Female (Sensor End) Connector Style	Male (I/O End) Connector Style	Cable		Cat. No. <sup>1</sup>
		Assembly Rating	Length [m (ft)]	
4-pin straight	4-pin straight	22 AWG 250V, 4 A	2 (6.56)	889D-F4ACDM-2
	4-pin right angle			889D-F4ACDE-2
4-pin right angle	4-pin straight			889D-R4ACDM-2
	4-pin right angle			889D-R4ACDE-2
5-pin straight	5-pin straight			889D-F5ACDM-2
8-pin straight	8-pin straight			889D-F8ABDM-2 <sup>2</sup>

<sup>1</sup> Replace the **2** after the dash with **1, 5, or 10** for additional lengths in meters.

<sup>2</sup> The 8-pin cordset is for Safety devices. To order with a red PVC jacket, replace the **A** in the catalog number with an **N**. For example, 889D-F8NB-2 or 889D-F8NBDM-2.

<sup>3</sup> To order with black PVC jacket, replace the **A** in the catalog number with a **B**. For example, 889D-F4BC-2.

# Safety Connection Systems

## Safety Connectivity

Allen-Bradley safety connection systems offer a complete wiring solution dedicated to machine safety.

 **GuardLink™**

GuardLink is a safety-based communications protocol that links safety to The Connected Enterprise. Allen-Bradley® Guardmaster® smart safety devices featuring GuardLink technology deliver information, advanced functionality and flexibility, while enhancing safety and increasing efficiency machine- and plant-wide.

<https://rok.auto/guardlink>

### Application

Safety Connectivity is suited for compact machines with a limited number of safety components using safety relays for monitoring.

\* Product selection for red patchcords can be found on page 4-42.

Terminal Blocks

Connection Systems

4-40...4-49

**Safety Connection Systems**

**4-50...4-53**

Network Media

4-54...4-61

Allen-Bradley Guardmaster safety connection systems are complete quick-disconnect wiring solutions dedicated to machine safety.

### Components

- Safety-wired GuardLink Enabled Taps
- Safety-wired distribution boxes
- Safety-wired shorting plugs
- Patchcords
- Receptacles

### Connector Options

- DC Micro (M12)
- M23

### Flexible and reliable connections for safety

- Interlock switches
- Safety limit switches
- Cable pull switches
- Guard locking
- SensaGuard
- E-Stops
- Safety relays
- Safety mats switches

### Not Suitable For

- Pressure-sensitive safety edges

### Notes

- Designed to simplify the installation of safety devices
- Reduced installation costs, simplified expansion and troubleshooting, increased modularity
- Single- or dual-channel options with or without enunciation
- Enunciation systems allow direct feedback on individual systems in the system and provide an auxiliary contact as input for tower lights, audible alarms, PLC input cards, etc.
- Shorting plugs must be installed in all unused distribution box ports for the system to operate

# Safety Connection Systems

## Safety Distribution Boxes 898D & 898R

- Prewired for compatibility with safety dual-channel and three-channel switches
- For use in Cat 2, 3, or 4 systems per EN 954-1 and up to SIL3 per EN 13849-1
- Enunciation models identify open contacts via LEDs on box and discrete wire in home-run connection

## Product Selection – Safety Wired Distribution Box

### Dual-Channel

Safety Switch Configuration	Enunciation	Connection Type	No. of Ports	Home Run Connection	Cat. No.
2 N.C.	No	4-pin DC micro	4	DC micro pigtail, 200 mm (7.87 in.)	898D-44LT-DM4

## Safety Wired T-Port & Shorting Plug 898D & 898R

### Safety Wired T-Port

- T-Port/splitter designed for use with dual-channel safety devices with four-pin DC micro connector
- For use in Cat 2 or 3 systems per EN 954-1
- SensaGuard™ units may be wired in series maintaining a Cat 4/SIL3 rating

### Safety Wired Shorting Plug

- Shorting plug designed for use with safety-wired distribution boxes
- Ratcheting coupling nut on four-pin models for vibration resistance

## Product Selection – Safety Wired T-Port

# Network Media

## Industrial Ethernet Connectivity

We offer a complete portfolio of industrial-grade Ethernet physical media specifically designed for use in harsh environments.

### Application

Ethernet Network Connectivity is ideal for highly distributed machines that require extensive diagnostics at the PLC.

### Sales Offices and Distributors

Our network of sales offices and distributors offers exceptional knowledge and service to help you design, implement and support your automation investment.

<https://rok.auto/buy>

Terminal Blocks

4-2...4-33

4-36...4-39

Connection Systems

4-40...4-49

Safety Connection Systems

4-50...4-53

### Network Media

4-54...4-61

Allen-Bradley® Ethernet media components combine specially-designed cable with rugged connector construction to preserve network integrity and performance.

### Components

- Cordsets and patchcords
- Receptacles/outlets
- Bulkhead adapters
- Raw cable spools
- Field-attachable connectors

### Connector Options

- RJ45 (IP20)
- M12 D-Coded (IP67)

### Two- or four-pair shielded and unshielded cable options in multiple cable jackets:

- Two-pair for 10/100 BaseT and On-Machine applications
- Four-pair for backbone and uplink ports or any areas requiring data rates greater than 100 BaseT Interlock switches
- PVC Cable – General purpose applications
- PUR Cable – High flex, Halogen-free
- TPE Cable – High flex applications
- Plenum Cable – Air handling applications
- 600V PVC – Use in cable trays with up to 600V rated cables

### Notes

- Allen-Bradley Ethernet media is designed to ODVA EtherNet/IP™ standards for enhanced performance in industrial applications
- The 600V rated cable has a 600V AWM rating as well as PLTC (Power Limited Tray Cable) – NEC Type PLTC Listed, which is approved for cable tray use in Class 1, Division 2, hazardous areas and nonhazardous areas, cable trays, raceways, conduit and supported by messenger wires
- Transition from inside the cabinet to on-machine can be accomplished with an RJ45-to-M12 bulkhead adapter or an RJ45-to-M12 female panel mount patchcord. Both solutions provide a sealed solution mounted on to the cabinet and enables as easy transition from IP20 to IP67
- High flex cables rated to 10 million flexing cables

# Network Media

## Ethernet Media Cable Spools 1585

- Four- and eight-conductor styles
- 24 AWG conductors, Cat 5e
- Twisted pairs maintain signal balance through cable to provide high noise immunity without need for shield
- Designed to ODVA EtherNet/IP™ specifications and ISO IEC 24702, IEC 61918
- Suitable in noise environments M3 I3 C3 E3
- Robotic cables are flex rated, rated to 10 million cycles

CONNECTIVITY

## Gigabit Ethernet Connectivity 1585D/1585J

- Ethernet speeds of 1 Gigabit per second
- 360 degree shield for optimal signal performance without system noise interference
- Cat 6, UL Listed. Conforms to ISO IEC 11801, ANSI/TIA-1005, TIA-568-C.2.
- Flex-rated TPE cables for various applications.
- M12 feature X-code key alignment and are IP67 and M3 I3 C3 E3 rated
- RJ45 features ideal 1p20 industrial applications and M1 I1 C2 E2

## Innovative Connectivity for Demanding High-speed Data Transfer in Industrial Applications

Our Ethernet media connects with Stratix™ Ethernet switches, programmable controllers, PanelView™ graphic terminals and drives.

Female M12 X-code receptacle to RJ45 female adaptor right angle	1585A-DD8JD

# Additional Connectivity Products

## DeviceNet Media

Used as the backbone for your DeviceNet network, our media includes multiple trunk and drop cable solutions to best suit your topology.

- Choose from traditional round media or time-saving KwikLink™ flat media
- Options for IP20 and IP67 applications
- Available in bulk spools or pre-molded cordsets or patchcords
- DeviceNet media tools help simplify your network installation and diagnostics

## NEMA and Process Terminal Blocks 1492, 1492JP

The 1492 family of NEMA terminal blocks offer easy wiring with standard size screwdrivers, easy visual verification of proper wire position and easy marking.

1492-JP process terminal blocks are designed specifically for process marshalling applications to save 45% panel space and improve the performance of signal routing and distribution.

# GuardLink Technology

## GuardLink® Technology

GuardLink is a safety-based communications protocol that links safety to The Connected Enterprise. Allen-Bradley® Guardmaster® smart safety devices featuring GuardLink technology deliver information, advanced functionality and flexibility, while enhancing safety and increasing efficiency machine- and plant-wide. GuardLink enabled devices offer advanced features and diagnostics that can only be accessed through a GuardLink connection tap.

**GuardLink provides access to diagnostic data when the safety function occurs**

- No configuration is required, with wiring achieved through the use of standard cables with M12 connectors
- A maximum of 32 safety input devices can be connected in series
- GuardLink enabled taps allow standard safety input devices with either electromechanical or solid state safety outputs to be connected to a GuardLink system
- Passive taps allow safety input devices with built-in GuardLink technology to be connected to a GuardLink system
- Remote lock/unlock and fault reset of safety input devices can be achieved
- Certified for applications up to and including PLe Cat 4 (ISO 13849-1) and SIL CL3 (IEC 62061)

## Why choose GuardLink?

Series connection of safety input devices is common practice in safety control systems. However when the system trips, fault finding is difficult due to the lack of diagnostic information. Providing diagnostics historically meant connecting auxiliary contacts from each safety input device to the PLC increasing costs due to the need for additional input cards, and increased installation time to hard wire each auxiliary contact to the allocated input. GuardLink provides both safety information and diagnostics through the same cable, with the diagnostics available via EtherNet/IP, reducing the amount of wiring required for the safety system, and the cost and time to install the solution.

## GuardLink Enabled Connection Taps

- Provides device location and status to DG Relay
- Two bright indicators for device and link communication status
- Compact 40 mm housing fits on standard aluminum profiles
- TÜV Approved PLe, SIL 3, Cat 4 Rated
- IP65/IP67/IP69k environmental rating
- Power-To-Release and Power-To-Lock taps available

## DG Guardmaster Safety Relays

- Dual channel relay monitors up to two circuits – one or two GuardLink circuits, one or two safety input devices, or one of each
- Local controls to configure the safety function
- Configurable multipurpose terminals
- Relay outputs to switch higher loads
- Connectivity to network interface via optical link
- Support of Single Wire Safety (SWS) to cascade multiple safety relays
- Add-on profile for Studio 5000® Logix Designer software provides access to relay and GuardLink device data

## Product Selection

	Description	Catalog Number
Safety Relay, Ethernet Gateway and cable to the first GuardLink enabled tap	Ethernet Gateway	440R-ENETR

# Presence Sensing Safety Devices

SAFETY

## GuardShield™ POC Type 4 Safety Light Curtain 450L-B

- Point of Operation Control (POC) for finger or hand protection
- Innovative plug-in modules (purchased separately) for application flexibility and reduced inventory costs
- Protection heights 150...1950 mm (5.9...76.7 in.) in increments of 150 mm (0.5 ft)
- Compact design 30 mm x 30 mm (1.18 in. x 1.18 in.)
- TÜV certified Ple, Type 4 IEC 61496-1/-2, SILCL3 per EN ISO 13849-1, IEC 62061

## World's first CIP Safety Over Ethernet/IP™ Safety Light Curtain

The GuardShield 450L-B Safety Light Curtain system features a patented technology which allows each transceiver to be used as a transmitter or receiver via an innovative plug-in module. The functionality of a pair of 450L-B safety light curtains is determined by inserting a plug-in module into the bottom of each transceiver. This advanced technology greatly reduces stock and provides a flexible, cost-effective safety solution. Plus, connection over EtherNet/IP makes the light curtain a smart safety device that enhances safety and delivers diagnostics while providing connectivity through The Connected Enterprise®.

*Innovative plug-in modules establish transceiver as an emitter or receiver and provide other advanced functions.*

*The active protective field provides sensing over the entire length of a transceiver and allows for trouble-free installation in machine frames.*

*Resolution for finger and hand detection, and full body intrusion will also activate the safety function.*

SAFETY

## GuardShield™ POC Type 4 Safety Light Curtain 450L-E

- Point of Operation Control (POC) for finger or hand protection
- Innovative plug-in modules (purchased separately) enables functionality for muting, blanking and cascading
- Protection heights 150...1950 mm (5.9...76.7 in.) in increments of 150 mm (0.5 ft)
- Integrated laser alignment system helps provide quick and more reliable installation
- TÜV certified Plc, Type 4 IEC 61496-1/-2, SILCL3 per EN ISO 13849-1, IEC 62061

## An Enhanced light curtain with advanced functions and EtherNet/IP™ connectivity

The GuardShield 450L-E Safety Light Curtain system is the enhanced version of the GuardShield 450L-B Safety Light Curtain system. It offers a larger operating range and each stick has a integrated laser alignment feature which allows a quick and more reliable installation. Functionalities like blanking, muting or cascading can be integrated. This advanced modular technology greatly reduces stock and helps provide a flexible, cost-effective safety solution. Plus, connection over EtherNet/IP makes the light curtain a smart safety device that enhances safety and delivers diagnostics while providing connectivity through The Connected Enterprise®.

- Point of Operation Control (POC) for finger or hand protection
- Heavy-duty IP65 housing
- Wide operating range 0.3...16 m (0.98...52.49 ft)
- Dip switch selectable functions: blanking (including teach-in), beam coding, EDM (External Device Monitoring), and start mode
- Available options: cascading, integrated laser alignment, ArmorBlock® Guard I/O™ connectivity

## A Robust Solution for Finger and Hand Detection

GuardShield safety light curtains offer an extraordinary robustness against high-mechanical impacts. The unique profile design is a perfect solution for heavy duty applications. An integrated laser feature allows for easy set up and a comfortable control of the alignment. With these features this product helps to provide the highest reliability.

<sup>1</sup> Models are available in protective heights from 160...1760 mm (6.3...69.3 in.) in 160 mm increments. To order, replace the **xxxx** in the catalog number with the protective height in mm. For example, to order 160 mm height, replace the **xxxx** with **0160** (440L-P4K**0160**YD), or for 1760 mm height, replace **xxxx** with **1760** (440L-P4K**1760**YD).

<sup>2</sup> Models are available in protective heights from 320...1600 mm (12.6...63 in.) in 160 mm (6.3 in.) increments.

<sup>3</sup> Models are available in protective heights from 320...1760 mm (6.3...69.3 in.).

## Specifications

<b>Standards</b>	Type 4 (IEC 61496), PLe Cat 4 (ISO 13849-1), SIL CL3 (IEC 62061)
<b>Certifications</b>	UL Listed, TÜV Certified, and CE Marked for all applicable directives
<b>Power Supply</b>	24V DC ±20%
<b>Safety Output</b>	2 OSSDs (max. 0.5 A)
<b>Enclosure Rating</b>	IP65
<b>Cross Section</b>	40 x 50 mm (1.57 x 1.96 in.)
<b>Scanning Range</b>	Finger: 0.3...7 m (0.98...22.9 ft) Hand: 0.3...16 m (0.98...52 ft)

## Required Cordsets & Accessories

Description	Cat. No.
4-pin straight transmitter cable	889D-F4AC-2 <sup>4</sup>
8-pin straight receiver cable	889D-F8AB-2 <sup>4</sup>
Vertical shock mounting kit	440L-AF6120
Horizontal shock mount kit	440L-AF6121
Weld Shield	440L-AGWSxxxx <sup>1</sup>
IP67 washdown enclosure kit (limited offering) <sup>7</sup>	440L-AGSTxxxx <sup>1,6</sup>
Mirror 75 mm (2.95 in.)	440L-AM075yyyy <sup>5</sup>
Mirror 125 mm (4.92 in.)	440L-AM125yyyy <sup>5</sup>
Muting box	445L-AMUTBOX1

<sup>1</sup> Models are available in protective heights from 160...1760 mm (6.3...69.3 in.) in 160 mm increments. To order, replace the **xxxx** in the catalog number with the protective height in mm. For example, to order 160 mm height, replace the **xxxx** with **0160** (440L-P4K**0160**YD), or for 1760 mm height, replace **xxxx** with **1760** (440L-P4K**1760**YD).

<sup>4</sup> Replace the **2** with **5, 10, 15, 20, or 30** for available lengths in meters.

<sup>5</sup> **yyyy** = mirror length in mm

<sup>6</sup> 440L-AGSTxxxx is only available for the standard i.e. non-laser model in the following sizes: 320, 480, 640, 800, 960.

<sup>7</sup> Washdown enclosure kits are not compatible with 440L models with integrated laser alignment.

**Note:** For additional information, see Safety Connection Systems (page 4-50).

SAFETY

## Micro 400 POC Type 4 Safety Light Curtain 445L

- Point of Operation Control (POC) for finger or hand protection
- Slim housing
- Economical three-box system
- Requires MSR41 or MSR42 controller
- IP54 enclosure rating
- No dead zone
- TÜV Certified

### A Slim-profile Solution for Point of Operation Control

Micro 400 are Type 4 safety light curtains with an extremely small profile of 15 x 20 mm (0.59 x 0.78 in.) and are available with both finger and hand resolution. They are designed to be built *into* the machine and not on the machine. This product must be used in combination with an MSR41 or MSR42 controller. The MSR42 controller is multi-functional and allows for additional functions like blanking, override, and muting.

### Typical Application

# Presence Sensing Safety Devices

SAFETY

## GuardShield™ PAC Type 4 & Safe 4/Micro 400 Safety Light Curtain 440L

- Perimeter Access Control (PAC) for whole body detection around machines
- Two-, three-, and four-beam solution
- Integrated laser alignment tool
- Long operating range
- cULus Listed and TÜV Certified

## Whole-body Detection for Machine Perimeter Safeguarding

Based on the individual safety light curtain platforms and perimeter access control (PAC), these safety light curtains are used for whole-body detection. They are typically positioned around an area or in front of a machine process entry or exit area. Multi-sided access control is attained through the use of corner mirrors. The integrated laser alignment tool makes the set up with mirrors most efficient.

## SafeZone™ Safety Laser Scanners 442L

- Singlezone, Multizone, Mini and EtherNet/IP versions
- Selectable resolutions of 30...200 mm
- Horizontal or vertical mounting
- Stationary or mobile applications
- SafeZone 3 AOP for integration to safety logix system
- Rugged IP65 housings
- Scanning angles of 190°, 270° and 275°
- Seven-segment diagnostic display, rotatable by 180°
- EtherNet/IP version has colored text display

EtherNet/IP

### SafeZone 3

## A Flexible, Easy-to-Use Machine Safeguarding Solution

SafeZone safety laser scanners are Type 3 optoelectronic devices that use reflection of emitted infrared light to detect a person or object within a user-defined area. The Class 1 (eye safe) infrared laser scans a 190° to 275° angular area to create a two-dimensional detection field. Light reflected off an object or person in the field is processed by the SafeZone, which sends a stop signal to the machine or to the safety controller.

SafeZone Multizone has up to four configurable, switchable field sets (Safety and Warning). Two field sets can be simultaneously monitored.

SafeZone 3 has up to eight configurable fields, four safety and four warning, Up to four fields can be simultaneously monitored.

### Mounting Brackets

#### Singlezone or Multizone

Description	Cat. No.
Mounting kit 1: bracket for direct mounting at the rear of the scanner	442L-AMBSFZNMZ1
Mounting kit 2: mounts to bracket 1 only, horizontal adjustment.	442L-AMBSFZNMZ2
Mounting kit 3: mounts to bracket 1 and bracket 2 only, wall or floor mount	442L-AMBSFZNMZ3

#### SafeZone Mini

Description	Cat. No.
Mounting kit 1: mounts to scanner body	442L-AMBSZMN1
Mounting kit 2: mounts to scanner body with protection for optic window	442L-AMBSZMN2
Mounting kit 3: mounts to either mounting bracket 1 or bracket 2	442L-AMBSZMN3
Mounting kit 4: mounts to either mounting bracket 1 and 3 or bracket 2 and 3	442L-AMBSZMN4

#### SafeZone 3

Description	Cat. No.
Mounting kit 1: mounts to housing	442L-AMBSZCP1
Mounting kit 2: mounts to housing with protection for optic window	442L-AMBSZCP2
Mounting kit 3: mounts to bracket 1 or 2. Used when the system plug is installed on the bottom side of the safety laser scanner.	442L-AMBSZCP3
Mounting kit 4: mounts to bracket 1 or 2. Used when the system plug is installed on the rear side of the safety laser scanner.	442L-AMBSZCP4

# Presence Sensing Safety Devices

SAFETY

## SC300 Safety Sensor 442L

- Compact hand detection system
- 110° field of view
- Automatic alignment
- No programming software required
- Horizontal or vertical mounting
- Integrated EDM, Restart/Reset and Teach-in
- IP54 industrial-grade housing

## Cost-effective, Vision-based Machine Guarding

The Guardmaster® SC300 is a compact hand detection safety sensor system, which operates based on image processing technology. The SC300 compares a two-dimensional image against a passive pattern, i.e., the background. Detection is based on an object of a certain resolution blocking the sensor's view of the pattern.

This Type 3 vision-based protective device is designed for use in certain machine-guarding applications where reflective tape can be attached to a square or rectangular frame to define the detection boundaries.

*Two SC300 safety sensors can be synchronized to expand the sensing area or for multiple-sided guarding*

# Presence Sensing Safety Devices

SAFETY

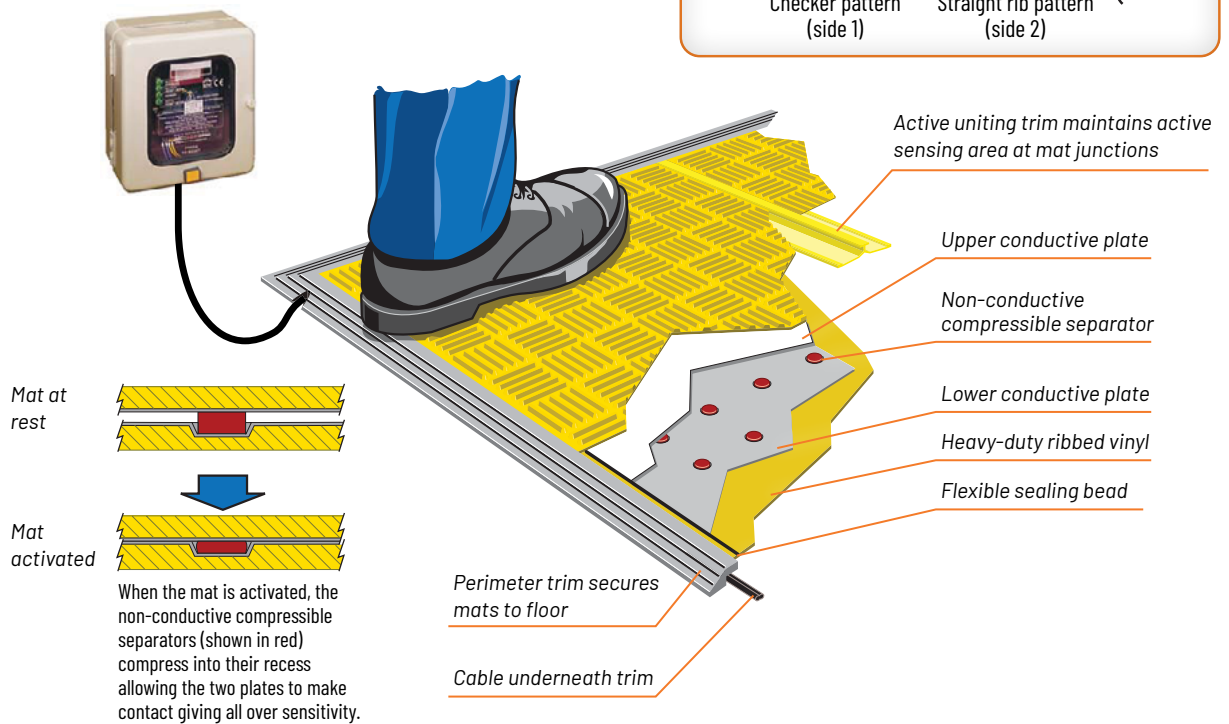

## Safety Mat System 440F

- Pressure-sensitive protective device per EN ISO 13856-1 for machine safeguarding
- Hardened steel plate construction
- No dead spots
- Four-wire system to detect opens and shorts
- Withstands 4500 psi static pressure
- IP67 rated
- PLd per ISO 13849-1 when used with a suitable safety control

## Anatomy of a Safety Mat System

When integrated to a suitable safety mat controller, it detects a presence on the mat, a short circuit, or an open circuit. Under each of these conditions, the safety control issues a stop command. Multiple mats can be combined into one safety mat system with the use of joining trim.

2 m, 2 part perimeter trim with square end (up to 8 cables through channel)		440F-T3211
External corner trim for use with 440F-T3211 (up to 8 cables through channel)		440F-T3014
Internal corner trim for use with 440F-T3211 (up to 8 cables through channel)		440F-T3015

**Note:** All perimeter trim features aluminum construction.

<sup>1</sup> Replace the **2** with **5** or **10** for available lengths in meters.

<sup>2</sup> Replace the **1** with **OM3**, **5**, or **10** for other available lengths in meters.

<sup>3</sup> Replace with **4** or **8** for number of ports available.

<sup>4</sup> Other 440F-C280xx controllers available with different voltages, connector types for Mats and Power. Please see technical data for additional catalog numbers.

**Note:** For additional information, see Safety Connection Systems (page 4-50).

### 440F Safedge™

- Conductive rubber technology
- Various profiles and cushion factors
- Up to 50 m lengths
- Aluminum, plastic, or zinc-coated steel mounting rails

# Interlock Switches

SAFETY

## SensaGuard™ Non-Contact Switches 440N

- PLe Cat 4 per ISO 13849-1 (safety performance is maintained when connected in series)
- Type 4 interlocking device per ISO 14119 with low or high coded RFID actuators
- Standard, magnetic hold, and integrated latch versions
- IP69K washdown rating

## Non-contact Machine Safeguarding with RFID Technology

Featuring RFID technology for coding, inductive technology for sensing and combining a large sensing range with optimal operation and a generous tolerance to misalignment, SensaGuard switches offer a cost-effective solution that is ideally suited to a wide range of safety applications and is intended for use with all types of guard doors.

### Rectangular Flat Pack Version

RFID coded security offers tamper resistant operation

Optional magnetic hold feature aids door stability and reduces nuisance tripping

LED offers diagnostics for switch status, margin alignment, and fault finding

Short circuit protection and over voltage protection allow the switch to be reset

Cable, 8-pin Micro (M12) quick disconnect pigtails, and 5-pin Micro (M12) for connection to ArmorBlock Guard I/O quick disconnect pigtails, simplify installation and maintenance

# Interlock Switches

SAFETY

## Magnetically Coded Non-Contact Switches 440N

- Non-contact actuation
- Magnetic coded sensing
- Small size
- Molded-in mounting brackets
- High tolerance to misalignment
- Type 4 interlocking device per ISO 14119 with low coded actuators

## Small Size, High Integrity

With the increasing speed and complexity of applications, a simple magnetic switch may be insufficient to meet the increased risks. The Magnetically Coded MC1 and MC2 non-contact switches incorporate several magnetically sensitive elements, which must be triggered in a particular sequence to operate correctly. The sensor with its molded-in brackets and diminutive size, is extremely versatile and simple to install.

# Interlock Switches

SAFETY

## Electromagnetic Switches 440G-EZ

- PLe Cat 4, SIL CL3 for door position monitoring
- Type 4 interlocking device with a Power to Lock (PTL) electromagnetic locking function for process protection per ISO 14119
- Solid state OSSD outputs
- High tolerance to door offset within 5 mm (0.2 in.) in all directions
- IP69K enclosure rating
- Status indicators for switch and lock status
- Sensor can be surface mounted or flush mounted

## Protection for Personnel and Process

Guardmaster® safety switches help protect personnel, processes and equipment by providing physical interlocking of guard doors, allowing access to potentially hazardous areas only when the area is safe.

The 440G-EZ electromagnetic interlocking safety switch is designed to protect a working process from unplanned downtime to improve productivity and increase efficiency while providing personnel safety.

The 440G-EZ electromagnetic safety switch combines a PTL electromagnetic locking function featuring a 500N holding force and  $\pm 5$  mm misalignment tolerance. Intended for use on all types of guard doors, 440G-EZ electromagnetic safety switches are TÜV-certified up to Cat 4, SIL3, PLe – the highest level of safety for guard position monitoring – and can be connected in series with other Cat 4, SIL 3 or PLe rated safety devices.

# Interlock Switches

SAFETY

## Guard Locking Switches 440G-LZ

- PLe Cat 4, SIL CL3 – the highest level of safety for guard position and lock monitoring
- Solid-state OSSD outputs
- RFID unique (high) or standard (low) coded actuators
- High holding force for partial body access applications
- Power-to-release and power-to-lock versions
- IP69K and hygienic design
- Type 4 interlocking device with guard locking per ISO 14119 with low or high coded RFID actuators
- Auxiliary output versions: lock status or guard proximity

## The Highest Level of Safety

The Guardmaster® 440G-LZ is a guard locking switch designed for partial body access guards. Combining microprocessor technology with an RFID coded actuator, the 440G-LZ features a locking bolt drive mechanism that will only lock when the correct actuator is detected. The locking bolt is continuously monitored for correct insertion within the actuator. This extra functionality allows the 440G-LZ to be certified PLe Cat 4, SIL CL3 – the highest level of safety for guard position and lock monitoring – and it can be connected directly or in series with other PLe Cat 4 or SIL CL3 rated safety devices.

# Interlock Switches

SAFETY

## Guard Locking Switches 440G-MZ

- SIL 3, PLe, Cat 4 – the highest level of safety for guard position monitoring and guard locking
- Can operate as a standalone device (5-pin OSSD connection) or in a GuardLink system
- RFID unique (high) or standard (low) coded actuators
- High holding force optimized for full-sized guard doors, which allow whole body access to a safeguarded area
- IP65, IP66, IP67, IP69k rated

## Guard Locking for Whole Body Access

440G-MZ Guard locking switches help protect personnel and are suitable for use with many types of guard doors, including full-sized guard doors, which allow whole body access to the safeguarded area, where a high holding force and a wide tolerance to guard misalignment are commonly required.

The 440G-MZ has embedded GuardLink® technology making it a smart device that provides the benefits of enunciation and product-specific diagnostics. It reduces wiring, simplifies installation and enables premier integration via an Ethernet/IP communications adapter and safety logic device when connected in a GuardLink system using a passive tap.

Switch can operate as a standalone device (OSSD mode) or in a GuardLink system (GuardLink mode)

2500 N holding force suitable for full-size guard doors

RFID actuator (unique coded or standard)

Flexible and 360° rotatable actuator facilitates +/- 5 mm misalignment tolerance and mounting flexibility

Three directions of approach for mounting flexibility

Two bright 270° wrap-around LEDs - for DEVICE and LINK status

Ingress rating: IP65, IP66, IP67, IP69k

SAFETY

## TLS-Z GD2 Guard Locking Switches 440G

- Type 4 Interlocking Devices with guard locking
- Meets PLe, Cat 4 per ISO 13849-1, the highest level of safety
- RFID high level coded actuator
- Solid-state series connectable OSSD outputs
- High holding force (Fzh)
- Power-to-release and power-to-lock versions
- Auxiliary output versions: lock status or guard proximity

## Guard Locking Plus RFID Technology for Whole Body Access

The TLS-Z GD2 Guard Locking Switch is an interlock switch that has a uniquely coded RFID technology sensor with inductive door position sensing technology. This switch can detect if an actuator key breaks or becomes separated from its door mounted position. Built with the same solid-state technology as the SensaGuard, this switch supports the highest level of safety – Performance Level “e”, Cat 4 per ISO 13849-1 for the guard position and lock monitoring.

# Interlock Switches

SAFETY

## TLS-GD2 Guard Locking Switches 440G

- Type 2 Interlocking Devices with guard locking and low coded (tongue-shaped) actuators per ISO 14119
- Plastic enclosure with stainless steel actuator guide
- High holding force (Fzh)
- Power-to-release and power-to-lock versions
- Four actuator entry points
- Escape release versions
- Quick disconnect versions
- Large range of accessories

## For Demanding Whole Body Access Applications

The TLS-GD2 is for demanding whole body access guard locking applications where “zero volt” connectivity is needed. A stainless steel actuator guide is fitted to protect the unit from actuator damage due to poor guard alignment or guard wear. The TLS-GD2 is available in two versions: TLS-3 GD2 is power-to-release while the TLS-2 is power-to-lock. Each product has five sets of contacts of various forms. Four actuator entry points are possible; two manual release points. Optional key release and escape release versions are available. An ingress rating of IP69K makes TLS-GD2 suitable for washdown applications.

# Interlock Switches

SAFETY

## Trapped Key Switches 440T

- Interlocking for pre-determined sequence of events
- All stainless interlocking and coded parts
- Weather cap as standard
- Standard red color-coded key and ID tags
- A complete range of isolators, gate (guard) interlocks, key exchange units and specialty devices
- Meets the requirements of ISO 14119
- PLd, Cat 3 per ISO 13849

## Trapped Key Interlocks – Why Use Them?

Based upon the premise that a key cannot be in two places at once, trapped key interlock systems can be configured to provide that a predetermined sequence of events takes place or that hazards have been reduced before operators can become exposed to them.

A trapped key interlock system is mechanical and is therefore widely used in applications including those where the location of plant, environment, or explosive atmospheres make the use of electrical interlock systems unsuitable or expensive to install. In addition, unique coding can be provided, leading to a greater degree of security and tamper-resistance.

In order to derive the full benefits from a trapped key interlocking system its components must be totally practical, easily maintainable, and readily available. The unique key and code barrel of Prosafe® gives the ability for even complicated interlocking systems and spare parts to be ordered from our worldwide network of distributors fast – which is a first for trapped key interlocks.

### Isolators

*Designed to isolate the machine's power and ensure the power remains off while the key is being used in another part of the interlocking system.*

### Exchange Units

*Used in an interlocking sequence to link other devices.*

### Interlocks

*Ideal for interlocking guard doors, cams and valves.*

# Design Suggestions for an Interlocking System

## Plant and Machinery Interlocking

### Sequence of Operation

The Solenoid Release Unit (SRU) is used for electrical isolation of machinery to improve safe access. It consists of a rotary power switch and a solenoid. The trapped key can be removed once an external signal is given to its internal solenoid locking mechanism. An indicator light on the solenoid release unit indicates when the trapped key "AA" key can be removed. Insert the "AA" key into the Key Exchange Unit (KEX) and turn it 90°.

- Turn one of the "AB" keys 90° and remove it from the KEX. This traps the "AA" key in the KEX and prevents the restarting of the machine.
- Insert the "AB" key into the Single-key Bolt Lock (SBL) and turn it 90° to gain partial body access to the machine.

- Turn the second "AB" key 90° and remove it from the KEX. Removal of this key also traps the "AA" key in the KEX and prevents the restarting of the machine.
- Insert the "AB" key into the Dual-key Access Lock (DAL) and turn it 90°.
- Turn the "AC" key 90° and remove the "AC" key. Rotate the access handle to allow full body entry into the hazard zone.
- Take the "AC" key into the hazard zone, insert it into the rotary key switch (RKSE) and turn it 90° to send a signal to the machine control system, to allow the machine to operate in a slow or teach mode.

Reverse the process to return the machine to full operational mode.

# Access Control

SAFETY

## Multifunctional Access Box 442G

- High holding force (Fzh) 2000 N per ISO 14119
- Power-to-Release or Power-to-Lock modules
- Diagnostic outputs for door position, bolt position, and lock status are available to the control system
- Standard models can be operated as a standalone device or in series with other devices, maintaining a PLe Cat 4 safety rating to ISO 13849-1
- Ethernet models enable easy integration in a networked automation control system using Studio 5000 Logix Designer

The Guardmaster® 442G Multifunctional Access Box, is an integrated access control and guard locking device which provides a complete safeguarding solution for full body access applications.

Four LEDs for status and diagnostics

Power-to-Release or Power-to-Lock modules

Escape release option provides a means for exiting the safeguarded area quickly and easily

Choice of integrated controls (E-stop with two push buttons is shown)<sup>1</sup>

Handle Assembly Available right or left (Right handle shown)

<sup>1</sup> Units with push buttons are supplied with a kit of colored caps, including one each of blue, green, red and yellow, and two white.

<sup>2</sup> Shown with required mounting plate.

<b>Safety Classification of Interlocking Device Functions</b>	Type 4 Interlocking Device with Guard Locking with high (unique) coding per ISO 14119 PLe Cat 4 per ISO 13849-1
<b>Functional Safety</b>	Visit <a href="https://rok.auto/safety-sr001">https://rok.auto/safety-sr001</a>
<b>Certifications</b>	cULus Listed, TUV Certified, and CE Marked for all applicable directives <a href="https://rok.auto/certifications">https://rok.auto/certifications</a>
<b>Power Supply</b>	Class 2 PELV 24V DC +10/-15% required
<b>Holding Force Fzh (ISO 14119)</b>	2000 N (450 lbs)
<b>Safety Outputs</b>	Standard versions: 2 x PNP, 0.2 A max., Status: ON (+24V DC); Ethernet versions: CIP Safety
<b>Enclosure Type Rating</b>	IP65

## Cover Controls

Description		Cat. No.
Blank cover		C00
One illuminated push button <sup>2</sup>		C01
Two illuminated push buttons <sup>2</sup>		C02
E-stop with two illuminated push buttons <sup>2</sup>		C03
E-stop with three illuminated push buttons <sup>2</sup>		C04
E-stop only		C05

<sup>2</sup> Covers with push buttons are supplied with a colored lens kit, including one each of blue, green, red and yellow, and two white.

**Note:** If you selected right handle assembly and want a power-to-release lock module with a (19-pin) M23 connector and two illuminated push buttons, you would order 442G-MABR-URM-C02.

## Accessories

Description	Cat. No.
Escape release assembly w/standard actuation shaft (115 mm)	442G-MABE1
Escape release mounting plate	442G-MABAMPE
Escape release shaft (250 mm)	442G-MABASHFT
Lock module mounting plate	442G-MABAMPL
19-pin M23 2 m cordset <sup>4</sup>	889M-F19RM-2

## Software-Configurable Relay 440C

- Monitoring and Configuration from Studio 5000 Logix Designer® or Connected Components Workbench software
- PLE Cat 4 per EN ISO 13849-1 & SIL CL3 per IEC 62061
- Predefined function blocks
- AND, OR, NAND, NOR, XOR Logic functions
- 22-point embedded safety I/O
- Expandable via two Micro800® Plug-in I/O Modules
- Expandable with EtherNet/IP™ plug-in
- Embedded communication via USB programming port and non-isolated RS-232 serial port
- Two single-wire safety input/output points

SAFETY

## Guardmaster® Safety Relays (GSR Family) 440R

- A broad range of safety functions
- Simple logic, reset, and timing configurations
- Single-wire safety relay connection
- Universal inputs
- Compact 22.5 mm housings
- Optional EtherNet/IP network interface

## Guardmaster Safety Relays

Guardmaster Safety Relays include units capable of monitoring a broad range of safety devices in a variety of applications. These units can achieve most of the functions safety systems require, helping simplify purchasing and parts management. The family is designed to meet new functional safety standards, such as EN ISO 13849-1 or IEC/EN 62061 and offers key functions to simply installations and system complexity.

SAFETY

## Single and Specialty Function Safety Relays (MSR Family) 440R

- Single function and specialty relays
- Broad range of input types
- Multiple output configurations
- Electromechanical or solid-state
- Compact housings
- Fixed or removable terminals
- Safe speed control (MSR57)
- Back EMF Monitor (MSR55)

## A Full Line of Single and Specialty Function Relays

Guardmaster® single function and specialty safety relays support a wide variety of input devices and output configurations. Ideal for relatively small safety applications and single zone control, these relays are compact packages with removable terminals. They are also available in electromechanical versions, or solid-state models for applications involving high cycle rates. Applications include safe speed control (MSR57), Back EMF monitor (MSR55) and safety control circuits involving light curtains, laser scanners, safety mats, interlock switches, guard locking interlocks, two-hand controls, safety edges, enabling devices, and E-stop push buttons.

Interface directly and monitor safety control relays, valves, contactors, drives, and motion systems.

The MSR57 is ideal for small- to medium-sized safety related control systems dedicated to specific applications.

# Emergency Stop Devices

SAFETY

## Lifeline™ Cable Pull Switches 440E

- Up to 125 m cable span
- Universal mounting and operation
- Lid mounted emergency stop button
- Switch latches when cable is pulled or cable is slack
- Cable status indicator on switch lid
- Lifeline Rope Tensioner System (LRTS) speeds installation

The patented Lifeline 5 Cable Pull Switch is a microprocessor-based solution that brings advanced features and diagnostics that help enhance safety while improving productivity. The Lifeline 5 offers features and functions that simplify setup and allow for more efficient maintenance and troubleshooting, making it the most advanced switch on the market today.

The Lifeline Rope Tensioner System (LRTS) is a unique cable (rope) tensioning system which enables quicker installation of cable actuated systems.

## Selection Guide

The patented Lifeline 5 cable pull switch rounds out the family offering that already includes the Lifeline 3 and Lifeline 4.

	Lifeline 5	Stainless Steel Lifeline 4	Lifeline 4	Lifeline 3

## 22 mm Metal and Plastic, 30 mm Metal, and 15 mm Plastic 440P

- Lever and plunger type actuator styles
- Direct opening contacts
- Type 1 interlocking device per ISO 14119
- Replaceable actuators

### 22 mm Metal and Plastic

Various actuator style options

## A Full Line of IEC Safety Switches

The 440P limit switch family offers a full range of international-style solutions for both safety and standard sensing applications. Available in four different body styles – 30 mm metal, 22 mm metal and plastic, and 15 mm plastic – with a broad selection of operator types, circuit arrangements and connection options, the 440P is ideal for a wide variety of applications. These include material handling, packaging, elevators, escalators, scissor lifts, industrial trucks and tractors, cranes and hoists, overhead door as well as general safety guarding applications.

## CIP Safety over EtherNet/IP™ Encoders 843ES

The 843ES CIP Safety over EtherNet/IP Encoders are designed for safety applications that require speed, direction, or position monitoring safety functions.

- Rated up to and including
  - SIL 3 according to IEC 61800-5-2, IEC 620261 and IEC 61508-1
  - PLe, Cat. 3, according to ISO 13849-1
- Dual Ethernet ports with embedded EtherNet/IP switch for linear networks and Device Level Ring topologies
- 15-bit safety resolution, 18-bit standard resolution, 12-bit multi-turn resolution

## Additional Safety Products

Our innovative safety products and solutions improve the functional operation of your machinery while helping to increase personnel safety, efficiency and productivity. We offer one of the broadest safety portfolios in the industry to help you achieve both safety and productivity goals in process and discrete manufacturing applications.

- Safety Programmable Controllers
- Safety Input/Output (I/O) Modules
- Safety Motor Control
- Safety Drives and Motion Control

# Photoelectric Sensors

## Sensor Selection

Photoelectric Sensors operate by sensing a change in the amount of light that is either reflected or blocked by an object to be detected (target). The change of light could be the result of the presence or absence of the target or as the result in the change of the size, shape, reflectivity or color of a target.

These sensors can be used in applications to detect targets at distances over 300 m.

To successfully apply a photoelectric sensor the following requirements must be clearly understood:

### For Your Selection Keep in Mind...

**Margin:** defined as the measurement of the amount of light from the light source detected by the receiver, expressed as a multiple of the minimum amount of light level required to switch the sensor output. A margin of 2X is reached when the light level received is twice the minimum required to switch the output.

For minimizing maintenance the sensor should be operated at a margin greater than 2X. Detection in dirty environments (or of a low reflectivity target) requires sensors with higher margin.

**Light Operate Output (LO):** output is ON (energized) when the receiver can see sufficient light from the light source.

**Dark Operate Output (DO):** output is ON (energized) when the receiver cannot see light from the light source.

## Application Considerations

Target	Environmental	Electrical	Installation
Detection Range	Temperature	Supply Voltage	Mounting Space
Object	• High	• DC or AC	Cable Connections
• Shape	• Low	Output Type	• 2 m cable
• Size	Conditions	• PNP, NPN	• Micro M12 QD
• Opacity	• Wet or dry	• SPDT relay, MOSFET	• Pico M8 QD
• Reflectivity	• Clean or dirty	Response Time	Shock/Vibration
• Speed	• Humidity	Analog Outputs	Interference
	Chemical Substances	Communications	• Electrical Noise
	High-pressure Washdown		• Sunlight

## Standard Sensing Modes

	Advantages	Precautions
<b>Diffuse</b> 	<ul style="list-style-type: none"> <li>• Ideal for short-range applications</li> <li>• No reflector required</li> <li>• Easy installation/alignment</li> </ul>	<ul style="list-style-type: none"> <li>• Sensing range depends on target's characteristics (color, reflectivity, etc.)</li> <li>• Highly reflective backgrounds may false trigger the sensor</li> <li>• Relatively short sensing distance</li> </ul>
<b>Retroreflective</b> 	<ul style="list-style-type: none"> <li>• Moderate sensing distances</li> <li>• Easy to align</li> <li>• Requires mounting and wiring of only one emitter/receiver unit</li> </ul>	<ul style="list-style-type: none"> <li>• Shorter sensing distances than transmitted beam</li> <li>• May detect reflections from shiny objects (see polarized retroreflective)</li> <li>• Reflector required</li> </ul>
<b>Transmitted Beam</b> 	<ul style="list-style-type: none"> <li>• High margin for contaminated environments</li> <li>• Longer sensing ranges than other technologies</li> <li>• Most reliable sensing mode for highly reflective objects</li> </ul>	<ul style="list-style-type: none"> <li>• Requires proper alignment</li> <li>• Not recommended for clear object sensing</li> <li>• Space required to mount and wire separate emitter and receiver</li> </ul>

SENSORS

## Miniature 42KD

- Our smallest rectangular photoelectric sensor
- Ranges up to 3 m (9.74 ft)
- IP67 enclosure rating
- Auto PNP/NPN
- Push button teach
- Through-hole or dovetail clamp mounting
- Visible red

## Our Smallest Photoelectric Sensor Package

The 42KD sensors, designed for applications with limited mounting space, offer the performance of much larger sensors in a compact housing. This family of LED and laser sensors is the most complete family of miniature sensors on the market. Additionally, these sensors offer easy commissioning via push button teach or through a control wire. The background suppression versions provide reliable object detection independent of the target size, shape, or color.

Bottling application – A 42KD ensures a bottle cap is in place prior to a cartoning process

SENSORS

## VisiSight™ 42JS and 42JT

- Industry standard 25.4 mm (1.0 in.) mounting
- Ranges up to 13 m (42.65 ft)
- IP69K and 1200 psi washdown rating (with ECOLAB) for 42JT
- Auto PNP/NPN (42JT only)
- Push button teach (42JT only)
- IO-Link enabled (42JT only)

### A Compact General-purpose Solution

The 42JS and 42JT VisiSight sensors offer a small rectangular package with visible light beam for ease of alignment and 25.4 mm industry standard mounting hole spacing.

The 42JS is a basic, cost-effective model ideal for general purpose applications. The 42JT is an advanced line that features push button teach and a unique "Auto PNP/NPN" output that simplifies installation and reduces the number of models to be stocked by 50%.

*Clear object detection – clear objects such as bottles are difficult for standard sensors to detect because they see through the target. The 42JT clear object sensor reliably detects these objects thanks to specialized optics.*

# Photoelectric Sensors

SENSORS

## VisiSight™ Laser 42JT

- Class 1 eye safe visible laser for small object detection
- Industry standard 25.4 mm (1.0 in.) mounting
- Ranges up to 18 m (59.05 ft)
- IP69K (with ECOLAB)
- Auto PNP/NPN
- Push button teach

### Our Compact, Easy-to-use Laser-based Solution

Laser sensors are ideal for small object detection or in applications requiring a narrow field of view. In most cases, laser sensors offer better operating margin and/or longer sensing distances than their LED-based counterparts. The 42JT VisiSight family offers a wide range of sensing modes and a teach push button that simplifies sensitivity adjustment and offers light vs. dark operate output selection. The unique “Auto PNP/NPN” output continuously monitors how the load is connected and automatically configures the output for proper operation and output LED to indicate correct output status. Not only do these features make the 42JT VisiSight easy to apply in challenging packaging and assembly applications, but they help optimize your supply chain by reducing the number of models to be stocked by 50%.

Bottling inspection - When the single 42JT LaserSight mounted on the side of the conveyor senses the bottle carton, it triggers the three standard VisiSights above to check for missing bottles.

## SENSORS

### VisiSight™ M20A 42JA

- IP67 enclosure
- 360° visible LED status indicators
- Visible light source on all models
- Selectable light or dark operate adjustment knob
- Wide range of sensing modes
- Transmitted beam models available with infrared light source
- Input to disable light source on transmitted beam emitter

## An Economical and easy-to-apply global sensing solution

The VisiSight™ family of photoelectric sensors are ideal for material handling, packaging and assembly applications. The VisiSight also address the small form factor needs of many other industries including Life Sciences, Pharmaceutical, Food and Beverage and Home, Health and Beauty. VisiSight sensors offer a wide range of sensing modes, mounting options and unique features that make them optimal solutions for global use.

SENSORS

## RightSight™ M30 42AF

- Universal 30 mm nose and 18 mm base mounts
- 360-degree highly visible status indicator LEDs
- Dual auto PNP/NPN
- 4 Available sensing modes:
  - Background suppression
  - Background reflection
  - Polarized retroreflective
  - Transmitted beam
- IP67, 1,200 psi and IP69k rated

## High-power, mid-size solution

The RightSight M30 addresses the challenges of a wide range of industries and applications. The rugged IP67/IP69k housing is also fully sealed, allowing the RightSight M30 to withstand tough industrial environments, including those involving high-pressure and high-temperature washdowns.

☑ IO-Link enabled.

Connection Options: The following suffixes describe the available connection options:

- D4: Describes an integral 4-pin DC micro (M12) quick-disconnect for DC models
- G4: Describes a 4-pin AC micro (M12) quick-disconnect on a 150 mm (6 in.) length pigtail on AC/DC models
- F4: Describes a 4-pin DC micro (M12) quick-disconnect on a 150 mm (6 in.) length pigtail on DC models
- A2: Describes a 2 m PVC cable
- M4: Describes a 4-pin mini quick-disconnect on a 150 mm (6 in.) length pigtail. Transmitted beam emitter only.
- M5: Describes a 5-pin mini quick-disconnect on a 150 mm (6 in.) length pigtail on AC/DC models. Polarized retroreflective and transmitted beam receivers only.

<sup>1</sup> Sensor response time can be changed up to 75 ms to achieve distance of up to 4 m. A higher distance between target and high reflectivity background may be needed when operating the sensors at distances greater than 2 m.

Additional connection options may be available. Refer to ProposalWorks for available options by sensing mode.

## Specifications

<b>Certifications</b>	CCC, cULus and CE marked for all applicable directives
<b>Enclosure Type Rating</b>	IP67, IP69K
<b>Operating Temperature [C (F)]</b>	-40...+70 °C (-40...158 °F) <sup>1</sup>

SENSORS

## RightSight™ 42EF

- Universal 18 mm mounting
- Ranges up to 20 m (65.6 ft)
- IP69K and 1200 psi washdown rating
- Non-adjustable, adjustable and teach models
- 360° visible LED indicators
- ECOLAB on cable models
- IO-Link enabled (select models)

## The Industry Standard for Durability and Performance

Many applications can be solved with a smaller sensor, but don't be fooled – this durable and rugged sensor has become the standard in many material handling applications. The polarized retroreflective has a maximum sensing range of 3 m (9.8 ft). It also requires much less space for mounting.

Material handling application – A retroreflective RightSight detecting packages on a conveyor line.

# Photoelectric Sensors

SENSORS

## RightSight™ LaserSight™ 42EF

- Class 1 eye safe visible laser for small object detection
- Universal 18 mm mounting
- Ranges up to 40 m (131.2 ft)
- IP69K rated enclosure for diffuse and transmitted beam
- IP54 for polarized retroreflective
- Non-adjustable, adjustable, and teach models
- 360° visible LED indicators

### Ideal for Small Object Detection

Laser sensors are ideal for small object detection or in applications requiring a narrow field of view. In most cases, laser sensors offer better operating margin and/or longer sensing distances than their LED-based counterparts.

The 42EF RightSight LaserSight uses eye-safe Class 1 visible laser light and features the same mounting options as other products in the RightSight product line. Class 1 lasers require no additional safety or protective training or equipment and are safe for general purpose use.

Roll detection - A 42EF RightSight LaserSight monitors a roll of film to indicate low film level.

SENSORS

## 18 mm Plastic Cylindrical 42CA

- 18 mm plastic cylindrical
- Ranges up to 16 m (52.5 ft)
- Extended range high-speed models
- IP67 rating
- Linear sensitivity adjustment
- Stability indication
- Dual LED indicators

## A Cost-effective General-purpose Solution

The 42CA 18 mm plastic cylindrical general-purpose sensors are ideal for light to medium duty industrial applications. Five possible sensing modes allow the 42CA to be used in a variety of complex applications. These sensors offer a highly linear sensitivity adjustment, stability indication and excellent noise immunity; making them easy to apply and maintain.

SENSORS

## 18 mm Metal Cylindrical 42CM

- Heavy duty 18 mm metal housing
- Ranges up to 20 m (65.6 ft)
- IP67 rating
- Sensitivity adjustment (diffuse models only)

## General-purpose Sensing in a Rugged Metal Housing

The 42CM 18 mm Metal Cylindrical General-purpose Sensors are intended for heavy-duty industrial applications requiring an industry standard 18 mm cylindrical housing. Five possible modes of sensing allow the 42CM to be used in a variety of complex applications. Outputs are short-circuit protected to provide continuous operation even under unexpected conditions.

Feeder bowl application - A 42CM monitors bowl level to prevent component runout. This background suppression model ignores reflections from the bowl to accurately detect the components only.

SENSORS

## LaserSight™ 18 mm Metal Cylindrical 42CM

- Class 1 eye safe visible laser for small object detection
- Heavy duty 18 mm metal housing
- Ranges up to 50 m (164 ft)
- Small 0.1 mm spot size
- IP67 rating

## Rugged, Laser-based Sensing

The 42CM 18 mm LaserSight photoelectric laser sensors combine an eye-safe Class 1 visible laser light source and an industry standard cylindrical housing. They are ideal for tough sensing applications that require a longer range, where the environment is dusty, dirty, or when the object to be sensed is small.

## 18 mm Stainless Steel Cylindrical 42CS

- Stainless steel 18 mm cylindrical
- Smooth barrel design
- Ranges up to 20 m (65.6 ft)
- IP69K, ECOLAB, and Johnson Diversey rated
- Extended temperature operating range
- Ferromagnetic teach

## The Ideal Solution for Food and Beverage Applications

The 42CS stainless steel cylindrical sensors are ideal for food, beverage, and pharmaceutical applications. The smooth, clean design minimizes the collection and accumulation of undesired particles allowing for a fast and easy clean up. An innovative teach feature also simplifies setup – just place a ferromagnetic metal object on a section of the sensor housing to initiate the teach process.

Flush, hardened PMMA lens prevents build-up

Optional block mounting bracket for smooth barrel housing (Cat. No. 60-BCS-18B)

Flap detection - When the single 42CS mounted on the side of the conveyor senses a food package, it triggers the two sensors above to check for open box flaps, ensuring all packages are sealed.

# Photoelectric Sensors

SENSORS

## Long-Range Background Suppression 42BT and 42BC

- Adjustable 1 m and 2 m range background suppression
- Slim flat pack housing design
- Infrared LED or red LED
- Selectable L.O. and D.O.
- Dual (PNP and NPN) outputs
- AC/DC relay output models (42BC)

## Sensing the Target While Ignoring the Background

Background suppression sensors are designed for applications requiring the sensor to see a target very close to a reflective background. Background suppression is particularly effective when the target and background have similar reflectivities or when dark targets are to be sensed against a lighter, more reflective background. These long range models offer high background suppression performance at sensing ranges up to 2 m (6.6 ft).

Side-by-side conveyors - A 42BT background suppression sensor detects bins on the near conveyor while ignoring bins on the second.

# Photoelectric Sensors

SENSORS

## Laser Measurement 45LMS

- Long-range, high performance measurement
- One discrete and one analog (4...20 mA) output
- Push button setup of switch points or analog scaling

## PHOTOSWITCH® Distance Measurement 45DMS

- Averaging filter function stabilizes the signal to provide a more constant measurement
- Ability to change the 4-20 mA to 0-10V DC on the analog output models
- Accurate to  $\pm 20$  mm ( $\pm 1.18$  in.) linearity

## Compact and Flexible

The 45DMS and 45LMS are great solutions for long range detection/measurement in difficult applications. The 45DMS features a 3-in-1 sensing mode which can be easily interchanged - Distance Measurement, Background Suppression and Background Reflection. Available in three ranges, the 45LMS uses the Time of Flight principle and has a relatively small beam spot, even from a distance of 50 m (164 ft).

	45DMS	45LMS
<b>Distance measurement range</b>	0.06...5 m	0.2...8 m; 0.2...15 m
<b>Light source</b>	Class 1 Laser	
<b>Outputs</b>	1 x Auto PNP/NPN + Remote Teach, 1 x Auto PNP/NPN + 4...20 mA (0-10V via IO-Link)	1 x PNP + 4...20 mA
<b>Linearity</b>	(SYMBOL) $\pm 30$ mm	(SYMBOL) $\pm 25$ mm
<b>Repeatability</b>	1.2 mm (1 sigma)	Less than 5 mm
<b>Resolution</b>	1 mm IO-Link, 5 mm Analog	Less than 5 mm
<b>Response time</b>	2 ms	10 ms
<b>Operating voltage</b>	18...30V DC	10...30V DC
<b>Enclosure size</b>	50 x 50 x 23 mm	94 x 55 x 26 mm
<b>Embedded IO-Link</b>	included	
<b>Enclosure rating</b>	IP67 and IP69K	IP65

### Typical 45LMS applications:

- Distance measurement
- Verifying material position
- Stack level
- Roll diameter or thickness measurement
- Fixture positioning
- Error-proofing inspection
- Level monitoring
- Crane crash protection

### The 45DMS is ideal for space-limited applications:

- Food and beverage
- Material handling
- Packaging plants

## ColorSight™ True Color 46CLR

- Three models to address your needs:
  - Glare suppression
  - Small spot size (for small object detection)
  - Long range
- Internally stores up to seven colors in color match mode and unlimited colors by using IO-Link when connected to CompactLogix™

## Advanced, High-Performance Color Sensing

The 46CLR was designed to perform the sensing operations commonly found in the automotive, food and beverage, pharmaceutical, and plastics, among other industries.

The 46CLR color sensing solution features patent-pending distance correction technology that confirms consistent color detection at ranges up to 65 mm. Additional features include internal storage of up to seven colors and nine adjustable tolerance levels for optimal application flexibility.

### Ideal for a variety of industries:

- automotive
- food and beverage
- pharmaceutical
- plastics

## SENSORS

### Luminescence 45LUM

- Detects luminescent/fluorescent particles
- 5...50 mm (0.2...2 in.) sensing range
- Teach button setup
- External teach capability
- Rotatable M12 connector
- IP67 rating

### Detect What Is Invisible to the Human Eye

The 45LUM luminescence sensor provides a solution for detection of substances which are invisible to the human eye. This sensor detects luminophores or fluorescence, which are emitted from the object being detected. The sensor converts the UV light into a visible light, which is then received by the luminescence sensor. This sensor can detect particles such as glue, clear labels, oils, greases, paint, detergents, and chalks.

Label detection - A 45LUM checks bottles for missing labels.

## SENSORS

### Measuring and Discrete Light Arrays 45MLA and 45DLA

- Detect oddly shaped or non-uniform objects
- Detect targets with gaps or spaces
- Large sensing area
- Discrete (45DLA) and measurement (45MLA) models
- Slim housing profiles
- Sensing range:
  - 45MLA: 4 m
  - 45DLA: 1.5 m or 8 m, selectable via wiring

Traditional photoelectric transmitted beam sensor - single sensing beam

Light array sensor - multiple sensing beams

### Light Array Concept

Traditional photoelectric transmitted beam sensors detect in a single line from the emitter to the receiver. Light array sensors combine multiple emitter or receiver elements into a single housing to create a sensing field instead of a single sensing beam. Therefore, light arrays are capable of detecting targets over a wider area. This makes them ideal for detecting oddly shaped parts, products with gaps or spaces, or inconsistently positioned targets, at a fraction of the cost of using multiple sensor pairs.

45DLA detects product with gaps or spaces.

# Photoelectric Sensors

SENSORS

## Area and Bin Picking Arrays 45AST and 45PVA

- Specialty light arrays
- Small parts detection (45AST)
- "Pick-to-light" bin picking verification (45PVA)
- Large detection area

## 45PVA Parts Verification Array

The 45PVA parts verification array is a special purpose light array for bin picking applications. By mounting the sensors on parts bins and wiring them into a controller programmed with the necessary logic, a virtually error-free bin-picking process can be achieved.

- Bin picking sensors – "pick-to-light" with automatic feedback
- Green "job light" indicates proper bin
- Red "warning indicator" automatically indicates incorrect bin pick
- Reduce risk of missing components or incorrect assembly

*Part ejection/counting – A 45AST uses two-dimensional scanning technology to sense an object regardless of its orientation. This is ideal for the detection and counting of parts being ejected from a machine.*

## Polarized Light Array 45PLA

- 69 mm (2.7 in.) wide sensing area
- 6 mm (0.25 in.) smallest detectable object
- 4.5 m (14.76 ft) maximum sensing range
- Highly visible 360 degree indication LEDs
- IP67 rated

## Wide Area Sensing for Material Handling and Packaging Applications

The 45PLA Polarized Light Array is a compact retroreflective array designed to detect irregularly shaped objects in a wide range of industries and applications, notably in the material handling, packaging, food and beverage and lumber industries.

## Optical Fork 45LSP

- Detects objects as small as 0.2 mm (0.008 in.)
- Highly visible status indication on both sides
- Through-hole, threaded hole, or dovetail mounting
- Gap size up to 120 mm (4.7 in.)
- Remote teach and teach button lock (4-pin models)
- No alignment required
- IP67 rated

## Alignment-free Small Part Detection

By eliminating the alignment and adjustment issues associated with other transmitted beam sensing solutions, optical fork sensors are the most easy-to-apply and cost-effective method for small part detection and counting in a wide range of industries.

The range of gap sizes and flexible mounting options make the 45LSP a viable solution for a broad range of applications. In addition to small object detection, these include, but are not limited to, edge detection, parts counting, gear tooth detection, and dimension verification.

Web alignment application - Two 45LSP fork sensors monitor horizontal film position on both sides of the roll. If the film drifts in either direction the sensor's light beam will be interrupted, causing the machine's dancer arm to correct the film position.

## SENSORS

### DIN Rail Fiber Optic Amplifier 46DFA

- ECO display mode reduces power consumption by 25%
- Teachable LED intensity for reliable sensing of clear or transparent objects
- Fast, programmable response speeds
- Push button selectable PNP and NPN output using
- Two high-visibility displays
- Cross-talk protection
- Built-in totalizer

### Sensing for Space-critical Applications

Ideal for sensing small objects, fiber optic cables can be mounted in locations that would otherwise be inaccessible to photoelectric sensors. Other characteristics/advantages of fiber optic sensors include:

- Some glass fiber optic tips have the ability to withstand high temperatures [up to 482 °C (900 °F)]
- Withstand extreme shock and vibration
- Often have the fastest response times
- Immunity to electrical interference (EMI, RFI)

Small part detection - The 46DFA fiber optic ensures continuous flow of small parts exiting from a feeder bowl.

### 2. Select Amplifier

Optical Aperture	Light Source	Sensing Distance	Output Mode	Output Type	Response Time	Connection Type	Catalog Number
2.2 mm	Visible red LED	Depends on fiber optic cable	Programmable complementary light operate and dark operate	Programmable PNP or NPN (both outputs)	Programmable 50 $\mu$ s, 500 $\mu$ s, 4 ms, 32 ms (500 $\mu$ s default)	2 m cable	46DFA-L2LBT1-A2
						4-pin M12 QD on 150 mm pigtail	46DFA-L2LBT1-F4

# Proximity Sensors

## Sensor Selection

Inductive proximity sensors provide non-contact detection of metal objects across relatively short distances (up to 2.5 inches or 65 mm). Sensor size, along with whether the sensor has shielded (flush-mountable) or unshielded (non flush-mountable) construction, dictates sensing range. Other factors/ functions to consider include output and connection type, environmental protection rating, power requirements and proximity to electrical fields (i.e. weld field immunity).

Allen-Bradley® inductive proximity sensors set the standard for ruggedness, reliability and application flexibility. We offer one of the industry's widest sensor offerings serving the full spectrum of your needs, from light-duty packaging applications to the punishing environments on automotive welding equipment or the harsh washdowns in food processing plants. Below is a quick selection guide for our most popular products - to see our complete line of sensors, go to <https://rok.auto/sensors-switches>.

## Inductive Sensors

SENSORS

## Miniature 871C

- Miniature housings for space-critical applications
- Extended sensing range
- Stainless steel housing
- Quick disconnect and cable options
- Fully integrated electronics

## Miniature Sensors for Industrial Automation

Our miniature inductive sensors were designed to meet the needs of today's compact machines. With limited space on these machines, mounting space for sensors is limited. Allen-Bradley 871C sensors were developed to meet this design requirement while providing superior performance, including longer sensing range. Longer sensing ranges allow our sensors to be mounted further away from the target reducing the risk of mechanical contact.

These small-barrel sensors are designed for space-critical applications where standard size sensors simply won't fit.

# Proximity Sensors

SENSORS

## WorldProx™ 872C

- General purpose
- Wide range of options
- Standard, extended and long range
- Extended range and long range models offer up to three times standard sensing range
- Multiple connection styles

## An Extended Range, General Purpose Solution

The most common cause of sensor failure is contact with the intended target. Sensors with longer range can be used to eliminate/limit contact with the target, thus reducing the cost associated with replacing damaged sensors (due to the cost of the sensor, maintenance time, and lost production).

Additionally, increased sensing range allows machine manufacturers to use smaller sensors and save space on the machine or to locate the sensors in previously inaccessible areas.

Conveyor application - Two 872CWorldProx sensors detecting presence of a part bin on a conveyor belt

Paper tension - A pair of WorldProx sensors detecting the tension roller position for speed control

# Proximity Sensors

SENSORS

## Stainless Steel – Weld Field Immune 871TM

- Heavy duty stainless steel face and barrel
- IP69K and 1200 psi washdown rated
- Chemical and abrasion resistant
- Long range models offer equal sensing distance for all metals
- Long range weld field immune up to 40mT (select models)
- IO-Link enabled (select models)

## For Your Toughest Applications

The 871TM stainless steel sensors are ideal for harsh or extremely demanding environments. These sensors resist impact, abrasion and corrosion – to keep things moving where ordinary sensors grind to a halt. This line features full mechanical seals at all barrel openings and full epoxy encapsulation for optimal performance in the toughest environments.

### Welding Applications

Select weld field immune models are ideal for welding environments and other applications where strong magnetic fields are present.

# Proximity Sensors

SENSORS

## Food and Beverage 871TS

- Corrosion-resistant stainless steel housing with FDA Certified PPS sensing face
- IP67, IP68, and IP69K enclosure ratings
- Extended sensing range
- Extended temperature rating
- ECOLAB and Johnson Diversey Certified
- Smooth barrel models for sanitary applications (18 mm models)
- Laser etched product markings

## Sensors for the Food & Beverage Industry

The Allen-Bradley 871TS food and beverage inductive proximity sensors are designed to address the most demanding applications in the food and beverage industry. These sensors withstand high pressure and high temperature washdown, while offering superior resistance to corrosion and damage caused by harsh cleansing agents.

SENSORS

## Weld Field Immune with Equal Sensing 871ZT

- Equal sensing distance for all metals
- Weld-field immune
- Weld-slag resistant PTFE-coated brass barrel and face
- Extended sensing range
- IP67, IP69K, and 1200 psi washdown rated
- 360° visible LED status indicator

## The Full-featured Line for Welding Applications

The 871ZT inductive proximity sensors are equal sensing models – they sense all metals at nearly the same distance. Plus, these special weld-field immune models are ideal for welding environments and other applications where large magnetic fields are present.

*Automotive application – A pair of 871ZT weld-field immune sensors detect truck frame presence prior to a welding operation.*

SENSORS

## Miniature Rectangular 871FM

- Space-critical applications
- Equal sensing distance for all metals (select models)
- Cable, Micro QD, Pico QD, and Pico QD on 6-inch pigtail
- Stainless steel, chrome-plated brass and plastic housings
- IP67 or IP69K rated
- Factor-1/equal sensing auto detect NPN or PNP on power-up for 871FM Metal Flat Pack

## Smaller Sensors for Your Hard-to-reach Applications

There are some applications that can't be solved with an industry standard-sized proximity sensor. Whether the application you're trying to solve is part of the semiconductor industry, or you're an OEM who manufactures machines which generate miniature parts, these sensors are able to go where traditional proximity sensor sizes cannot. These IO-Link enabled miniature inductive proximity sensors are ideal for applications where limited space - not sensing distance - is the driving factor.

5 mm x 22 mm x 5 mm (W x L x H)  
(actual size)

20 mm x 32 mm x 8 mm (W x L x H)  
(actual size)

30 mm x 52 mm x 14 mm  
(W x L x H)(actual size)

Weld Slag Resistance

871FM Miniature Rectangular sensors can be applied where traditional tubular proximity sensors cannot, whether you're trying to sense small parts, space is at a premium, or both.

# Proximity Sensors

SENSORS

## VersaCube™ Equal Sensing 871P

- Weld-field immune with optional ToughCoat Finish™
- Factor-1/equal sensing for all metals
- Five-position sensing face
- Enhanced-visibility status LEDs
- Optional heavy duty model with metal base
- Unique jam nut and L-bracket mounting option

## Equal Sensing, Versatility, and Durability

These 4-wire DC sensors integrate standard and specialty features into a 40 mm rectangular housing suited for general purpose and welding applications. For the most demanding welding applications, the 871P VersaCube can be ordered with ToughCoat Finish (our patented weld-slag resistant coating).

### Changing the Sensing Head Position

To switch the sensing head between top and side sensing positions, follow these steps:

### Mounting

Standard Zinc Mounting Bracket

Optional Stainless Steel Mounting L-Bracket

Automotive application - A VersaCube detecting the presence of a truck frame prior to initiating a weld.

# Proximity Sensors

SENSORS

## VersaCube™ General Purpose 871P

- General purpose and weld-field immune versions
- Weld-slag resistant PEEK housing (WFI models)
- One-piece housing and mounting bracket
- Five-position sensing face

General Purpose Model

## Long Range General-purpose Sensing

The VersaCube package is ideal for applications that require long-range sensing in a compact sensor. Their size is approximately half that of a NEMA style limit switch. In fact, the mounting holes on the VersaCube base align with the standard NEMA limit switch mounting holes allowing for an easy and convenient retrofit.

SENSORS

## Flat Pack 871F

- General purpose and weld-field immune versions
- Sensing ranges up to 65 mm (2.55 in.)
- Through-hole or DIN Rail mounting
- Complementary N.O. and N.C. outputs

## Maximum Sensing Range

The 871F is ideal for applications that require long sensing range - up to 65 mm (2.55 in.). This sensor is often used in material handling and welding applications.

Automotive application - An 871F sensing car door carriers to position them for final assembly.

## Mounting Requirements

Shielded units must be fully embedded in mild steel to achieve maximum sensing distance.

# Proximity Sensors

SENSORS

## Capacitive 875F, 875L

- Metal, nonmetal solid, and liquid sensing
- Adjustable sensing distance (875L)
- Cylindrical (875L) and flat housing types (875F)
- IP67 and IP69K enclosures
- Cable or quick-disconnect styles

## Reliably Detect a Variety of Materials

Unlike inductive proximity sensors, the 875F and 875L capacitive sensors can detect non-metal solids and liquids in addition to standard metal targets. They can even sense the presence of some targets through certain other materials, making them an ideal choice in those applications where the inductive proximity and photoelectric sensors cannot be used.

*Pellet level detection - An 875L detects the level of plastic pellets through a glass vessel.*

# Ultrasonic Sensors

SENSORS

## 18, 30 and 38.8 mm Plastic Discrete and Analog 873P

- Detect clear, shiny or non-reflective objects
- Sensing range up to 6 m (19.6 ft)
- Push button programming
- Discrete output models (single set-point or window mode)
- Scalable analog output models
- Wide range of operating voltages
- Synchronization on select models to prevent crosstalk
- Four output modes

## A Sound Solution

The 873P ultrasonic sensors use reflected sound waves to detect targets – such as clear, shiny, or non-reflective objects – that can be challenging for other sensing technologies. The 873P sensors offer a wide range of operating voltages, simple push-button setup and a synchronization feature to reduce cross-talk between adjacent sensors.

Roll diameter and tank level – An 873P analog ultrasonic continuously measures roll diameter or tank level and provides a proportional 4...20 mA or 0...10V DC output. If a dual discrete output sensor is used, one switch point is set for low level indication and the other set for a full condition.

# Ultrasonic Sensors

SENSORS

## 18 mm Metal General Purpose 873M

- Detect clear, shiny, or non-reflective objects
- Sensing range up to 800 mm (31.5 in.)
- Compact 18 mm (0.71 in.) housing
- Scalable analog output models
- Teachable discrete output models (single set-point or window mode)
- Remote teach or optional programming cable

## Compact Clear Object Detection

The 873M general purpose ultrasonic sensors detect solid or liquid targets by using sound waves. These compact sensors are a great solution for areas with limited space and are excellent for standard packaging and assembly applications. They are ideal for sensing targets that are challenging for photoelectric sensors to detect, including clear, shiny, or non-reflective objects.

*Film position detection - An 873M ultrasonic checks for continual feed of a clear wrap while monitoring tension.*

*Part counting - A right angle 873M counts bottles that, due to color, luster and clarity, might be difficult to sense with photoelectric sensors.*

# Limit Switches

SENSORS

## Oiltight Plug-in 802T

- Heavy duty
- Plug-in style
- Front mount
- Side rotary or side push styles
- Quick mode change (CW/CCW)
- Castle-lock head design

## The Benchmark for Toughness and Reliability

The 802T limit switches are ideal for applications in which heavy-duty pilot ratings, small size, a high degree of versatility and a rugged NEMA Type 4, 13, and 6P construction are desirable. These limit switches are extensively applied in rugged and heavy-duty production environments.

# Limit Switches

SENSORS

## Pre-wired, Factory Sealed 802M and 802MC

- Harsh environment applications
- NEMA 4, 4X, 6P, and IP69K enclosure ratings
- Resistant to moisture and cleaning agents
- Submersible (802MC)
- Sealed, corrosion resistant versions with stainless steel shaft and hardware (802MC)
- Two- and four-circuit versions (only two-circuit for 802MC)
- Oil resistant cable on pre-wired models

## For the Most Demanding Environments

The 802M and 802MC compact pre-wired limit switches are factory-sealed to meet the demanding requirements for NEMA Type 4, 4X, 6P, and IP67 enclosures. A large variety of operating heads and levers are available to suit a wide range of applications, especially where the switch may be subject to washdowns, steams of coolant, or occasionally submerged in fluids commonly found on machines or in industrial processes.

## IEC 30 mm Metal 802K

- Rugged die-cast 30 mm housing
- Large selection of actuator heads
- Positive operation, forced disconnection of contacts
- Snap-acting, slow make before break, or slow break before make contact blocks
- Two- or four-contact configurations
- IP66 enclosure

## Our Rugged, IEC-style Offering

The 802K limit switches have a range of options including snap action or slow break/make with two or four contact configurations and a choice of actuator heads. You can rotate the head in 90° increments before installation for easy mounting. Operation of these limit switches is achieved by the moving objects deflecting the plunger or lever.

Non-adjustable offset lever 1.44 in. radius roller on front	Steel	19.05 (0.749)	6.35 (0.25)	802T-W12A <sup>2</sup>

## Roller Levers

For use with the 802T, 802M, & 802X switches

Material	Rod Diameter [mm (in.)]	Cat. No.
Stainless steel rod, 5 in. long	3.3 (0.13)	802T-W3 <sup>3</sup>
Stainless steel rod, 8.5 in. long	3.3 (0.13)	802T-W3B <sup>3</sup>
Stainless steel rod, 11.5 in. long	3.3 (0.13)	802T-W3A
Stainless steel rod, 11.5 in. long	2.03 (0.08)	802T-W3F <sup>4</sup>
Nylon rod, 12 in. long	6.35 (0.25)	802T-W3C
Stainless steel, 5 in. long	1.52 (0.06)	802T-W5 <sup>3</sup>
Nylatron looped rod, 6 in. long, 2 in. wide loop	4.57 (0.18)	802T-W14

- <sup>1</sup> The micrometer adjustment roller lever is designed especially for installations where the position of the roller is a critical factor. This lever has a pivoted roller which can be turned laterally. After clamping the lever to the switch shaft, the position of the roller can be precisely adjusted through an arc of 7.5° on either side of the center or straight-line position.
- <sup>2</sup> When mounted on Plug-In devices, the offset lever provides equivalent cam tracking to the Non-Plug-In devices using catalog number 802T-W1 levers.
- <sup>3</sup> Recommended for use with low-operating-torque switches.
- <sup>4</sup> Not for use with catalog number 802M-NPY5 type switches.

# Limit Switches

## Compact, Precision and Small Precision 802B

- Rugged die-cast housings
- Industry standard dimensions
- Low trip and reset points (precision and small precision models)
- Wide range of options and operators

## For When Bigger Switches Won't Fit

The 802B product line consists of different body styles: compact, precision, and small precision. Each style has been designed to withstand the rugged environments that industrial applications demand. The 802B family of limit switches can be mounted in areas that traditional NEMA limit switches can not, due to their size and mounting options.

SENSORS

## EtherNet/IP 842E

- EtherNet/IP Interface
- Single- and multi-turn
- Status indication LEDs
- Easy integration and setup in Studio 5000 Logix Designer®
- Fully compliant CIP sync and CIP motion support (842E-CM)
- Endless shaft
- Flash upgradable

## Integrated Motion on EtherNet/IP

EtherNet/IP uses CIP Sync and CIP Motion technologies to provide real-time, closed loop motion on standard Ethernet. This topology-independent network provides a simplified integration of the entire control solution on one network, including HMI, PAC, IO, and Motion Control.

Which version meets your application?

Velocity or Position Control  
842E-<sup>1</sup>

Position/Servo Control  
842E-CM-<sup>1</sup>

- Use the EtherNet/IP Encoder
- Provides position and velocity back to the Logix controller on EtherNet/IP
- Ideal applications: standard VFD drives

- Use the Integrated Motion on EtherNet/IP Encoder for servo applications
- Ideal applications: Kinetix® 5500 Servo drive applications that require auxiliary feedback or master half axis for gearing/camming applications

# Encoders

## Sine Cosine/Serial 842HR

- Absolute feedback for position control
- High resolution incremental feedback for speed control
- Sine/Cosine differential interface
- Digital bi-directional RS-485 interface
- Compatible with Hiperface interface
- Internal diagnostic functions

## Replace Multiple Encoders with a Single 842HR Encoder

Today's high performance digital servo drive systems require absolute feedback for position control and high resolution incremental feedback for speed control. Conventional systems use multiple incremental and absolute encoders to achieve this. The Allen-Bradley® 842HR Sine/Cosine encoder combines the advantages of incremental and absolute encoder technologies in a single, standalone unit targeted for high performance digital servo drive systems.

## Ideal Applications

Compatible with a variety of motor control products including Kinetix drives and the Allen-Bradley Guardmaster® MSR57 safe speed monitoring relay, the 842HR is a flexible solution for wide range of industrial applications.

## Single- Versus Multi-turn

In a single-turn encoder, absolute position retention on one full rotation of the encoder is provided. Multi-turn encoders provide absolute position on multiple turns of the encoder shaft (better for linear applications).

SENSORS

## CIP Safety with EtherNet/IP Encoder 843ES

- Rated up to and including
  - SIL 3 according to IEC 61800-5-2, IEC 620261, and IEC 61508-1
  - PLe, Cat. 3, according to ISO 13849-1
- Solid and hollow shafts available
- Dual Ethernet ports with embedded EtherNet/IP switch for linear networks and Device Level Ring topologies
- IP67 washdown rating
- 15-bit safety resolution, 18-bit standard resolution
- 12-bit multi-turn resolution

EtherNet/IP

## The first and only encoder on the market featuring CIP Safety over EtherNet/IP up to – and including – SIL 3/PLe safety applications

Networked safety solutions provide the ability to simplify your machine design and minimize equipment redundancies. Fewer components mean smaller panel enclosures which helps reduce machine footprint.

### Benefits of Controller-based Safety/Integrated Safety

- A single GuardLogix® controller manages both safety and standard control
- Complete safety function integration within one software environment – Studio 5000 Logix Designer®
- Improved visibility to all machine events – including safety events
- Reduced complexity and rich diagnostic data
- Simplified zoning and reduced changeover time
- Integrated or hardwired safety – Safe Torque-Off – SIL3 PLe
- Advanced safety with five safe stop functions and three safe monitoring functions
- Safety and standard control share the same EtherNet/IP network

# Condition Sensing

SENSORS

## Integrated Condition Monitoring System Dynamix™ 1444

- Machinery protection and condition monitoring of rotating and reciprocating assets
- Distributed I/O on Ethernet/IP
- Easy integration and setup in Studio 5000 Logix Designer®
- Rugged, conformally coated and approved for electrical safety and hazardous areas
- Expansion modules available for additional capabilities

## Enable Smart Machine strategy with the Dynamix 1444 series

Don't let unplanned downtime impact your manufacturing objectives. The Dynamix 1444 series provides a distributed solution for protecting or monitoring the condition of your critical machinery. The dynamic measurement module can support dynamic and static measurements to realize the benefits of a condition based maintenance or a predictive maintenance program. As a part of the Rockwell Automation's Integrated Architecture, other system components such as controllers, visualization products, other input/output products, and more can be easily applied to meet the specific needs of the application.

# Condition Sensing

SENSORS

## Solid-State Pressure Sensors 836P

### Display

- -1...551 bar (-14.5 psi to 8,000 psi)
- Rotatable housing (320°) and head (330°)
- IO-Link enabled

### Non-Display

- -1...689 bar (-30 in. Hg to 10,000 psi)
- Multiple process connections available
- IP67 enclosure rating

## Accurate and Reliable with Quick Response Time

High-accuracy, new technology, and rigid standards have combined to manufacture the Solid-State 836P Pressure Sensors, available in display and non-display models in rugged, compact housings with corrosion-resistant 316L solid-state sensor elements.

## SENSORS

### Solid-State Temperature Switches 837T, 837RTD

#### Display

- Temperature range: -20...80 °C (-4...176 °F)
- Large visual display rotates 180°

#### Non-display

- Temperature range: -50...250 °C (-58...482 °F)
- IP67, IP69K enclosure ratings

#### Resistance Temperature Detector

- Temperature range:  
-50...200 °C (-58...392 °F)
- Pt100, Pt1000 measuring elements

### A Compact, Comprehensive Solution

Built with high-accuracy and new technology, 837T and 837RTD solid-state switches provide users with a comprehensive solution for measuring temperatures in liquids, gases and vapors.

## SENSORS

### Solid-State Flow Switches 839E

- Flow rates from 0.03...3 m/s
- Rugged, corrosion-resistant stainless steel housing, and sensing element
- RTD sensor technology
- Calorimetric measurement principle
- Independently programmable dual N.O./N.C. PNP outputs or 4...20 mA analog output with single PNP output
- Operation and visualization via PC using ReadWin 2000 software

### Flow Sensors for the Harshest Environments

Allen-Bradley 839E solid-state flow sensors are used for process and industrial automation applications. Rockwell Automation sensors can be found in food and beverage, pharmaceuticals, water and waste water plants, and hydraulic applications.

These sensors are capable of measuring the liquid flow rate from 0.03 m/s to 3 m/s. The flow rate is displayed as a percentage of flow rate. For example at no flow the display will read 0%. The sensor probe is designed using 316L stainless steel probe and is resistant to aggressive media and capable of withstanding corrosive liquids.

### Technology

Allen-Bradley flow switches are based on the calorimetric principle. The 839E sensors incorporate a heated temperature element; as media flows passed the sensor heat is removed due to convection. The amount of heat transfer is dependent on the flow velocity of the medium and the temperature difference between the sensor and the medium.

SENSORS

## Solid-State Level Switches 840E

- Piezoelectric effect technology
- Rugged, corrosion-resistant stainless steel housing and sensing element
- DC Micro (M12) and DIN valve connection types
- Highly-visible status LED for process monitoring
- Complementary N.O./N.C. outputs
- Operation independent of the medium properties – build up, changing media, turbulence, air bubbles, foam, and vibration

## Reliable Level Detection Regardless of Media Characteristics

Allen-Bradley level sensors are a quick and easy solution for applications requiring point level detection. These sensors have been applied in applications such as liquid level monitoring in tanks, containers, and pipes.

The 840E stainless steel liquid level sensors are capable of detecting corrosive liquid media and operate independently of the media properties such as liquid build up on the forks, change of media structure, turbulence, foam or air bubbles as well as plant vibrations.

## Technology

The 840E switch uses piezoelectric effect technology to see the difference in vibration when the medium is sensed on the forks. The use of alternating voltage current causes the piezo to expand and contract. The difference in vibration oscillation detected by the medium indicates the presence of the medium.

  - Standard: (WVGA, 0.3 MP resolution, fixed focus)
  - Advanced: (SXGA, 1.2 MP resolution, autofocus)
- Read ranges 102...400 mm (4.02...15.75 in.) fixed and adjustable
- Speeds up to 60 frames per second (fps) for fixed focus and 42 fps for autofocus code readers
- 16 LED-integrated illumination

EtherNet/IP<sup>®</sup>

## The Smallest Industrial Code Reader on the Market

### Provides clear, high-speed codes on any surface

The rugged 48CR decodes 1D/2D and Direct Part Marked (DPM) codes and solves the most challenging readings under any condition. Featuring the latest decoding algorithms technology, the 48CR can successfully read damaged and incomplete symbols despite scenarios with poor prints, scratches or various obstructions. The 48CR supports Ethernet/IP™ and can be configured through either the Studio 5000 Logix Designer® Add-On Profile (AOP) or the embedded WebConnect visual browser.

The 48CR solves difficult barcode reading challenges throughout various applications and industries:

- automotive
- packaging
- material handling
- assembly
- pharmaceutical
- food and beverage

### Able to read any barcode or QR code

- 1D/2D and Direct Part Marked (DPM) codes
- Advanced decoding algorithm allows for successful reads of damaged and/or incomplete symbols

# Identification Devices

SENSORS

## High Frequency RFID 56RF/59RF

- One- and two-channel EtherNet/IP and IO-Link interfaces available
- Production efficiency – detailed tracking of who, when, where and what was done to build product(s)
- Rugged IP67 (M18 and M30) and IP68 and IP69K (4040) enclosures for harsh industrial applications
- Pre-programmed batches – tags identify which recipe to load automatically, reducing errors

## Track and Trace Materials Through Your Process

Industrial Radio Frequency Identification (RFID) systems are a rugged and reliable way to track and document products as they move through the manufacturing process. Unlike the bar code systems used for similar, less demanding applications, industrial RFID systems are designed to withstand harsh environments. Plus, reusable read/write tags allow for flexibility in information and application.

- Production efficiency – detailed tracking of who, when, where and what was done to build product(s)
- Rugged IP67 (M18 and M30) and IP68 and IP69K (4040) enclosures for harsh industrial applications
- Pre-programmed batches – tags identify which recipe to load automatically, reducing errors

### Manufacturing Application

Each tool, person, and machine has an RFID tag for validation and usage count.

- Inventory control by tagging each tool
- Validate user checking out tool

- Validate tool with machine
- Read/write tool usage count

- Schedule tool maintenance during downtime
- Total tool usage count stored on tool RFID tag

# Additional Sensor Products

## 42KL MiniSight General Purpose

Bulletin 42KL Minisight™ general purpose sensors are an exact match for one of the industry's most popular form factors, but with additional features. 871D cylinder position models for in-port end-of-stroke detection on hydraulic and pneumatic cylinders.

- Universal 18 mm and through-hole mounting
- Durable 1200 psi washdown-rated housing
- 360° visible status indicators

## 45CLR ColorSight

The 45CLR ColorSight™ is a compact color sensing solution that offers high-end performance and advanced features to address a broad range of color-based inspection challenges.

- Concurrent sensing of three different colors
- Easy-to-use teach button (3 channels) and remote teach (single channel)
- IP67 housing with 270° rotatable connector

## 45BPD/BRD Laser Measurement

The Allen-Bradley 45BPD and 45BRD are laser sensors intended for industrial applications requiring reliable small part detection, positioning and precision measurement.

- Visible red Class 2 laser for small beam spot and easy alignment
- Teach-in and fixed range models
- IP67 housing with 270° rotatable connector

## Cylinder Position Sensors

Our cylinder position inductive proximity sensors are specialty models used to indicate position of pneumatic and hydraulic cylinders or power clamps and grippers.

- 871D cylinder position models for in-port end-of-stroke detection on hydraulic and pneumatic cylinders
- 871D WorldClamp™ sensors for open/closed position indication in power clamp and gripper applications
- Rugged, low-profile housings
- Weld-field immune

## Rectangular Inductive Proximity Sensors

Our rectangular inductive proximity sensors offer sensing ranges longer than those found in traditional cylindrical housings. Choose from our many styles of rectangular sensors for your welding applications and other environments.

- 802PR heavy duty limit switch style sensors (including hazardous location models)
- 871L/872L limit switch style sensors
- 871F aluminum block sensors
- 871P can sensors

## 871C Specialty Proximity Sensors

We offer a complete line of 871C specialty inductive proximity sensors to address your toughest industrial applications in the harshest environments. Models include:

- Extended temperature
- Analog output
- Intrinsically safe
- Miniature

# Additional Sensor Products

## 801 General Purpose Limit Switches

801 general purpose limit switches are ideal for a wide variety of applications.

- Multiple contact arrangements
- Slow and snap action contacts
- High snap-through force

## 802T Direct Action Limit Switches

802T direct action NEMA-style limit switches are used for safety applications per ISO 14119. Direct opening action assures that the normally closed contacts open when the limit switch is actuated.

- Direct opening action
- Snap acting contacts
- Rugged metal construction
- NEMA 6P/IP67 plug-in design

## 802R/X/XR Hazardous Location Limit Switches

Our hazardous location switches are designed for use in applications such as refineries, distilleries, grain elevators, and flour mills where dangerous gases or other materials may be present.

- 802R sealed contact (Class 1, Division 2)
- 802X NEMA Type 4 watertight (Class 1, groups B, C and D or Class 2, groups E, F and G or Class 3)
- 802XR sealed contact (Class 1, Groups B, C and D or Class 2, Groups E, F and G)
