# Be Certain with Belden

**Belden and Hirschmann Industrial Ethernet Solutions help keep many different rugged and mission-critical operations up and running.**

## Process Industries

Safety and uptime are critical in all processing operations. This is why Hirschmann's networking and media products have multiple forms of redundancy, the necessary industry approvals, and integrated security - all to insure your network's maximum availability.

Data can be transmitted between multiple devices via redundant data paths (optical and/or fiber), even in applications having potentially hazardous environments.

### Applications:

- Oil, Gas, and Petrochemical Processing
- Mining
- Food and Beverage Processing
- Pulp and Paper Processing
- Cement and Concrete Manufacturing
- Oil Drilling and Exploration
- Pharmaceutical
- Chemical Processing

## Discrete Manufacturing

Uptime and dependability of operations are hallmarks of Belden and Hirschmann products, preventing transmission problems in the factory network which can lead to catastrophic failures and untold costs. These products are designed to meet stringent system requirements, providing resilient data throughput. The service and support provided by our Competence Center makes it possible to meet and exceed the high demands of our discrete manufacturing customers.

### Applications:

- Industrial Equipment
- Semiconductors
- Rubber Products
- Electronic Components
- Automotive Powertrain and Assembly
- Fabricated Metals
- Machine Tools
- Plastics
- Packaging
- Consumer Products
- Medical Devices and Equipment
- Construction and Off-Road Equipment

## Infrastructure

Control, centralized monitoring and management continue to perform seamlessly in very demanding applications for our infrastructure customers. Whether networking a long underground rail tunnel, a large wastewater complex, an airport in the desert, or power generation facilities in the arctic, Belden and Hirschmann products will deliver continuity in network availability and efficiency to operations.

### Applications:

- Water Supply
- Roadway and Railway Tunnels
- Pipelines
- Bridges
- Wind Power
- Waste Treatment and Management
- Shipyards and Shipping Vessels
- Airports
- Rail Yards
- Electric, Hydro-Electric, Gas, and Nuclear Power Generation

From the Factory Floor to the Office, Hirschmann has you connected with the industry's largest selection of Industrial Ethernet Media Solutions.

## Industrial Ethernet Media Solutions - Product Characteristics

Hirschmann Industrial Grade OCTOPUS with M12 D-Coded Industrial Ethernet connectors and stranded (Bonded-Pairs) TPE jacket.

Hirschmann Industrial Ethernet Compact OpenRail Switch with RJ45 Industrial Ethernet connectors and stranded (Bonded-Pairs) TPE jacket.

### About The Products

Prior to the advent of Industrial Ethernet (standardized Ethernet communications via hardened networking infrastructure), office grade Ethernet cabling and connectors were the only available options. Unfortunately, these traditional media solutions proved unable to withstand the harsh environment of the factory floor or other industrial applications.

The Hirschmann™ product family of Industrial Ethernet Media Solutions eliminates these issues by combining standard RJ45 connection technology with the proven industrial Micro (M12) connection technology typically found in sensor/actuator machine applications. Standard combinations include:

- RJ45 to RJ45
- RJ45 to Micro (M12)
- Micro (M12) to Micro (M12)
- RJ45 to Micro (M12) Panel Mount Receptacle

### Cable Designed for Maximum Durability

The cable itself is also designed for maximum durability. We chose the finest technology on the market for our products, Bonded-Pairs from Belden. This patented technology absolutely ensures that Hirschmann media is the most rugged and dependable product available. A wide variety of cable and jacket construction is also available, including:

- Copper 2- and 4-pair, 24 AWG Bonded-Pairs
- Stranded construction
- Polyolefin insulation
- Shielded and Unshielded
- PVC or ultra-rugged TPE jackets

## Why the Hirschmann Product Brand?

With Layer One issues comprising over 50% of reported problems in network installations, trust the global leader in industrial Ethernet with your media requirements.

- We use only industry-approved, standard connector options
- Proven, state-of-the-art Bonded-Pairs technology in every cable
- Over 200 standard cables in the connectors/wire/jacket/lengths/colors you need for every installation
- We manufacture our own products. No third party production facilities here.

## Non-Bonded-Pair versus Bonded-Pair Cable for Mission Critical Industrial Ethernet Applications

### What is Bonded-Pair Technology?

Bonded-Pair Technology was developed to ensure superior electrical performance in twisted pair Ethernet cable installations. This design affixes the individual insulated conductors together along their longitudinal axes which assures uniform conductor-to-conductor spacing and electrical integrity.

### How Does Bonded-Pair Cable Help You?

- 1) Bonded-Pairs are Less Susceptible to Noise - Cables with nonbonded-pairs tend to separate due to movement during installation, flexing or handling. Each pair can be pictured as an antenna that can receive or transmit signals. Variations in non-bonded conductor-to-conductor spacing are cumulative and result in susceptibility to EMI and RFI that degrades signal transmission and network performance. In addition, the cable will emit more noise that can adversely affect surrounding instrumentation. Bonded-Pairs lock conductor-to-conductor spacing in place. "Physicals Equals Electricals" is a statement that describes why bonded-pairs are critical.
- 2) Bonded-Pairs Improve Impedance and Return Loss Performance - Impedance irregularities, due to non-bonded-Pair separation, cause signal reflections (return loss). Any impedance variation is cumulative along the length of the cable. Bonded-Pairs maintain conductor-to-conductor spacing, thus improving impedance stability and return loss performance.
- 3) Minimizes pair-to-pair crosstalk - All twisted pair Ethernet cables have crosstalk or pair-to-pair coupling. Each pair has different twists/inch (lay length) to minimize crosstalk. Lay length variation can increase the crosstalk that is cumulative down the length of the cable. Bonded-Pairs reduce crosstalk by minimizing lay length variation.
- 4) Lower Connectorization Failure - Bonded-Pairs maintain the electrical characteristics all the way into the connector. Bonded-Pairs increase installation consistency and signal integrity while reducing maintenance calls.
- 5) Superior Mechanical Robustness - Bonded-Pairs improve the pulling strength of a cable by up to 60% over non-bonded designs by equalizing the tension on each conductor. This is especially critical during the installation process, flexing or handling.

## TPE - High Flex Applications

Hirschmann by Belden is the first to offer High Flex Industrial Ethernet Cord Sets with bonded pairs.

We warrantee these products (THF) to no less than 10 million flex cycles @ 20X OD and 1M flex cycles @ 10X OD.

Industrial Ethernet CAT 5E, TPE unshielded, 2-pair, 24 AWG cable, bonded-pairs, stranded (7x32) tinned copper conductors, polyolefin insulation, and industrial grade sunlight-and-oil-resistant, teal jacket.

Physical Characteristics		Connector Specifications	
Number of Pairs	2	Pins	4
Conductors	4	Coding	D-Coded
Gauge	24 AWG	Housing/Molded Body	PUR, Black
Stranding	Stranded (7x32)	Insert	PUR, Self Extinguishing
Diameter	.022"	Contacts	Brass, Gold over Nickel Plated
Material	TC - Tinned Copper	Coupling Nut	Brass, Nickel Plated
Color Codes	1 = White/Orange Stripe & Orange 2 = White/Green Stripe & Green	Ingress Protection Rating	IP 68
		Temperature Range	-20°C to +75°C
		CMR(UL)	CMR

### Outer Shield

Material Unshielded

### Outer Jacket

Material TPE

Jacket Color Teal

Overall Diameter 0.275"

### Mechanical Characteristics

Operating Temperature Range -40°C to +75°C

Storage Temperature Range -25°C to +75°C

Installation Temperature Range -25°C to +75°C

Max. Pulling Tension 40 lbs.

Min. Bend Radius 0.250"

### Application Standards
