## Introduction

The E100 Electronic Overload Relay is the next generation basic-tier electronic overload relay. It has enhanced features to better safeguard your motor protection investments, including increased accuracy and repeatability, a self-powered design with lower heat dissipation, and the certifications to comply with many applications.

The E100 portfolio is available in two offerings: a Basic (Cat. No. 193-1EE) and Advanced (Cat. No. 193-1EF, 592-1EF) version, supporting both single- and three-phase operation in a single component. The Basic version allows adjustable trip current, manual trip reset, and limited trip class selection. The Advanced version offers the same adjustable trip current, manual and automatic trip reset, a larger selection of trip classes, and the ability to connect additional accessory modules.

## Summary of Changes

This publication contains the following new or updated information. This list includes substantive updates only and is not intended to reflect all changes.

<b>Topic</b>	<b>Page</b>
Updated Cat. No. Explanation	5
Added overload relays suitable for use with Bulletin 100-E IEC contactors and Bulletin 300 Energy-saving NEMA contactors	6
Added overload relays suitable for use with Bulletin 500 NEMA Size 4 and 5 contactors	7

This section gives you an overview of the Bimetallic, E100, E200, and E300™ lines of overload relays and their respective features.

Relay Type	Bimetallic <sup>(1)</sup>	E100	E200 <sup>(2)</sup>	E300 <sup>(2)</sup>

(1) See publication [193-TD010](#) for more information.

(2) See publication [193-TD006](#) for more information.

(3) You can also configure E300/E200 devices using an optional expansion operator diagnostic station.

## Features

The E100 relay provides the following features:

- Electronic overload detection
- Simple configuration
- Selectable trip class
- Adjustable trip current
- Direct mounting for both IEC and NEMA contactors
- Test and reset buttons
- Automatic (193/592-1EF only)/manual reset selection
- RMS current sensing (50/60 Hz)
- External current transformer configurations for high-current applications
- Pass-thru wiring option

The E100 relay lets you connect accessory modules, some of which interface through the front-mounted communication port. Accessories include:

- Ground fault/jam protection module (193/592-1EF only)
- Remote reset solenoid
- Anti-tamper shield
- Electronic remote indication display (ERID), with or without reset (193/592-1EF only)
- External reset adapter
- DIN Rail/Panel adapter

Throughout this publication, we also refer to the E100 Electronic Overload Relay as the E100 overload relay and E100 relay. These terms are interchangeable. For more information on operation and maintenance of this product, see the user manual, publication [193-UM013](#).

### Overload Performance

Feature	Description
Current Measurement-based Protection	Current measurement-based overload protection models a motor's thermal condition more accurately than eutectic alloy or bimetallic options.. Ambient temperature over the specified temperature operating range does not impact the performance of current measurement-based designs.
Electronic Design	Thermal modeling is performed electronically with precision solid-state components, using a state-of-the-art microprocessor. The microprocessor continually processes motor current data to accurately maintain the time-current status of the motor thermal capacity utilization (%TCU) value.
Thermal Memory	A thermal memory design lets the E100 Overload Relay model the heating and cooling effects of motor on and off periods. This achieves accurate protection for both hot and cold operation.
Phase Loss Protection	Phase loss detection is incorporated into the E100 Overload Relay, allowing it to respond quickly to this condition.

### Rugged Construction

Feature	Description
Self-powered Design	The E100 relay base unit does not require additional auxiliary control power. The low energy consumption of the electronic design minimizes temperature rise issues inside industrial control cabinets.
Wide Adjustment Range	A wide 5:1 current adjustment range requires fewer catalog numbers than bimetallic overload alternatives to cover the same current range. This helps to reduce inventory carrying costs and affords greater installation flexibility for a variety of applications.
IEC and NEMA Direct-mount Power Connections	Unique line-side over-molded power connections yield a sturdy two-component starter assembly that is unmatched in the industry. The pre-formed power connections simplify starter assembly.
Internal Current Transformers (CTs)	The current transformers are secured separately in the overload housing to deliver the greatest degree of resistance to shock and vibration conditions. Varnished laminations deliver consistent performance and provide additional protection against corrosion.

### Versatile and Expandable

Feature	Description
Pass-thru Design	The E100 relay Pass-thru option consumes less panel space than a standard E100 relay that is configured with a panel-mount adapter. The Pass-thru design provides integrated DIN Rail mount and panel mounting holes. The Pass-thru design provides greater flexibility for installing components in tight spaces.
Adjustable Trip Class and Reset Modes	The Basic E100 relay (Cat. No. 193-1EE) offers Trip Class 10 and 20 with manual reset only. The Advanced E100 relay (Cat. No. 193/592-1EF) offers Trip Class 10, 15, 20, and 30 with manual or automatic reset.
Remote Reset Capability	The E100 relay offers optional remote reset capabilities through the use of an electro-mechanical reset solenoid or an electronic remote reset accessory (Cat. No. 193-1ERR) module. <sup>(1)</sup>
Ground Fault and Jam Protection <sup>(1)</sup>	The E100 relay offers optional ground fault and jam protection through the use of an accessory (Cat. No. 193-1EGJ) module. The ground fault current detection level is configurable via a mechanical rotary dial from 0.02...5 A. Jam protection is configurable via two mechanical rotary dials, current level from 125...600% FLA, and delay from 0.1...10 seconds. The ground fault module also supports remote reset capability.
External CTs <sup>(1)</sup>	For motor overload protection applications above 100 A in current sensing capability, the E100 relay offers functionality with external CT configurations up to 800 A maximum capacity (Cat. No. 193-1EF_Z).

(1) 193/592-1EF (advanced) devices only.

This section provides catalog number explanations and product selection information for the E100 overload relays and accessories.

## Catalog Number Explanation

Examples given in this section are for reference purposes. This basic explanation should not be used for product selection; not all combinations will produce a valid catalog number.

Attribute	Rating
Rated Insulation Voltage $U_i$	264V (AC/DC)
Rated Operating Voltage $U_e$ , IEC	24...240V (AC/DC)
Rated Frequency	45...65 Hz
Power Consumption	0.8 W @ 24V AC; 1.0 W @ 240V AC

# Environmental Specifications

**Table 4 - Environmental Specifications**

Attribute	Overload Rating	Accessory Rating
<b>Ambient Temperature</b>		
Storage	-40...+85 °C (-40...+185 °F)	
Operating (open) <sup>(1)</sup>	-20...+65 °C (-4...+149 °F)	
Operating (enclosed)	-20...+50 °C (-4...+122 °F)	-20...+55 °C (-4...+131 °F)
<b>Humidity</b>		
Operating	5...95% Non-condensing; 92% relative humidity	
Damp Heat - Steady State (per IEC 60068-2-78)	93% relative humidity, 40 °C (104 °F), 56 days	
Damp Heat - Cyclic (per IEC 60068-2-30)	93% relative humidity, 25 °C/40 °C (77 °F/104 °F), 21 Cycles	
Cooling Method	Natural convection	
Vibration (per IEC 68-2-6), operating	Operating 3 G	
Shock (per IEC 68-2-27), operating	Operating 30 G	
Maximum Altitude	2000 m	
Pollution Environment	Pollution Degree 3	
Degree of Protection	IP20 (front of panel)	IP20

(1) Specified ambient operating temperature per ABS rules and standards.

# Electromagnetic Compatibility Specifications

**Table 5 - Immunity and Emissions**

Attribute	Overload Rating	Accessory Rating
<b>Electrostatic Discharge Immunity</b>		
IEC 61000-4-2, IEC 60533	6 kV Contact Discharge, 8 kV Air Discharge (Performance Criterion "B")	8 kV Contact Discharge, 8 kV Air Discharge (Performance Criterion "B")
<b>Radio Frequency Immunity</b>		
IEC 61000-4-3	10V/m; 80 MHz...6.0 GHz (Performance Criterion "A")	
	3V/m; 1.4 GHz...2.0 GHz	
	1V/m; 2.0 GHz...2.7 GHz	
IEC 60533	10V/m; 80 MHz...2.0 GHz (Performance Criterion "A")	
<b>Electrical Fast Transient / Burst Immunity</b>		
IEC 61000-4-4, IEC 60533	4 kV (3-phase Power); 2 kV (Control Power & Communication I/O when 193-1ERR or 193-1EGJ accessory installed); Performance Criterion "A"	
<b>Surge Immunity</b>		
IEC 61000-4-4, IEC 60533	2 kV (L-N); 1kV (L-L); Performance Criterion "B"	
<b>Radiated Emissions</b>		
CISPR11 Environment A	30 MHz...1.0 GHz	
IEC 60533	150 KHz...2.0 GHz	
<b>Conducted Emissions</b>		
CISPR11 Environment A	150 KHz...30 MHz	
IEC 60533	10 KHz...30 MHz (general power distribution only)	
<b>Conducted Immunity</b>		
IEC 61000-4-6, IEC 60533	Modulation 80% AM at 1 KHz; 10V RMS (150 KHz...80 MHz)	
<b>Power Frequency Magnetic Field Immunity</b>		
IEC 60947-1, IEC 61000-4-8	30 A/m; 50 Hz	
<b>Voltage Variation Immunity</b>		
IEC 61000-4-11, IEC 60533	—	Control Power 40...240V (AC/DC)

# Protection

**Table 6 - General Protection**

Protection Type	Cat. No. 193-1EE		Cat. No. 193-1EF, 592-1EF	
	Trip	Warning	Trip <sup>(1)</sup>	Warning <sup>(1)</sup>
Overload	Yes	No	Yes	Yes
Phase Loss	Yes	No	Yes	Yes
Ground Fault <sup>(2)</sup>	No	No	Yes	Yes
Jam <sup>(2)</sup>	No	No	Yes	Yes

- (1) Trip/Warning indication also available using the 193-1ERR/1EGJ and 193-ERID/1ERIDN accessory modules.
- (2) Ground fault and jam protection accessory 193-1EGJ required.

**Table 7 - Overload Protection**

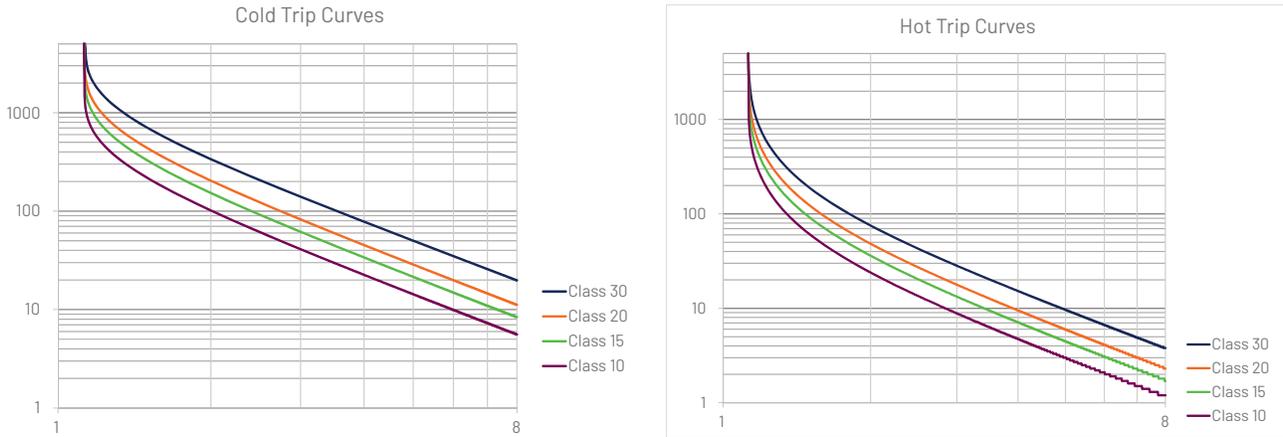

Attribute	Rating	
	Cat. No. 193-1EE	Cat. No. 193-1EF, 592-1EF
Type of Relay	Ambient Compensated Time-Delay Phase Loss Sensitive	
Nature of Relay	Solid-state	
FLA Setting	Rotary Dial	
Trip Rating	120% FLA	
Trip Class	10, 20	10, 15, 20, 30
Reset Mode	Manual	Automatic or Manual
Overload Reset Level	Auto Reset occurs at 70% TCU when accessory powered, after approximately 2 minutes when self powered. Manual Reset can occur any time by pressing the manual reset button. Electronic Reset (ERID input) can only occur below 70% TCU.	

**Table 8 - Ground Fault Protection**

Attribute	Rating—Cat. No. 193-1EF, 592-1EF Only
Type	Core Balanced
Intended Use	Equipment Protection
Classification (Per UL 1053)	Evaluated to UL 1053 but not listed as such
Internal Protection Range	0.02...5.0 A
Trip and Warning Time Delay	Fixed at 100 ms ± 20 ms

# Overload Trip Curves

Typical reset time for 193/592-1EF devices set to automatic reset mode is dependent upon overload trip class. Typical reset time for Trip Class 10 is 90 seconds, Trip Class 15 is 135 seconds, Trip Class 20 is 180 seconds, and Trip Class 30 is 270 seconds.

## Wiring Specifications

**Table 9 - Wiring Specifications for 193-1E...B, 193-1E...D, and 193-1E...E**

Wire Type	No. of Wires	Control Wiring		Power Wiring					
		All		193-1E B		193-1E D		193-1E E	
		Range	Torque	Range	Torque	Range	Torque	Range	Torque
Flexible Stranded w/ Ferrule	1 wire	0.75...2.5 mm <sup>2</sup> (18...14 AWG)	1.4 N•m (12 lb•in)	2.5...16 mm <sup>2</sup> (14...6 AWG)	2.5 N•m (22 lb•in)	2.5...16 mm <sup>2</sup> (14...6 AWG)	2.5 N•m (22 lb•in)	4...35 mm <sup>2</sup> (12...1 AWG)	4.6 N•m (40 lb•in)
	2 wires <sup>(1)</sup>			2.5...10 mm <sup>2</sup> (14...8 AWG)	3.4 N•m (30 lb•in)	2.5...10 mm <sup>2</sup> (14...8 AWG)	3.6 N•m (32 lb•in)	4...25 mm <sup>2</sup> (12...4 AWG)	
Stranded/Solid	1 wire	0.75...4.0 mm <sup>2</sup> (18...12 AWG)	1.4 N•m (12 lb•in)	2.5...16 mm <sup>2</sup> (14...6 AWG)	2.5 N•m (22 lb•in)	2.5...16 mm <sup>2</sup> (14...6 AWG)	2.5 N•m (22 lb•in)	4...35 mm <sup>2</sup> (12...1 AWG)	4.6 N•m (40 lb•in)
	2 wires <sup>(1)</sup>			25 mm <sup>2</sup> (4 AWG)	3.4 N•m (30 lb•in)	25 mm <sup>2</sup> (4 AWG)	3.4 N•m (30 lb•in)	4...35 mm <sup>2</sup> (12...2 AWG)	

(1) For multiple conductor applications, you must use the same size and style of wire.

**Table 10 - Wiring Specifications for 193-1E...F, 193-1E...G, 193-1E...H, and 193-1E...J**

Wire Type	No. of Wires	Control Wiring		Power Wiring							
		All		193-1E...F		193-1E...G		193-1E...H		193-1E...J	
		Range	Torque	Range	Torque	Range	Torque	Range	Torque	Range	Torque
Flexible Stranded w/ Ferrule	1 wire	0.75...2.5 mm <sup>2</sup> (18...14 AWG)	1.4 N•m (12 lb•in)	0.75...6 mm <sup>2</sup> (16...10 AWG)	1.5 N•m (13 lb•in)	1.5...10 mm <sup>2</sup> (14...8 AWG)	2.5 N•m (22 lb•in)	4...35 mm <sup>2</sup> (12...1 AWG)	4 N•m (35 lb•in)	6...50 mm <sup>2</sup> (6...1 AWG)	6 N•m (53 lb•in)
	2 wires <sup>(1)</sup>										
Stranded/Solid	1 wire	0.75...4.0 mm <sup>2</sup> (18...12 AWG)	1.4 N•m (12 lb•in)	1...6 mm <sup>2</sup> (16...10 AWG)	1.5 N•m (13 lb•in)	2.5...10 mm <sup>2</sup> (14...8 AWG)	2.5 N•m (22 lb•in)	6...35 mm <sup>2</sup> (12...1 AWG)	4 N•m (35 lb•in)	6...70 mm <sup>2</sup> (6...1 AWG)	6 N•m (53 lb•in)
	2 wires <sup>(1)</sup>										

(1) For multiple conductor applications, you must use the same size and style of wire.

**Table 11 - Wiring Specifications for 592-1EF\_T, 592-1EF\_C, and 592-1EFGD**

Wire Type	No. of Wires	Control Wiring		Power Wiring					
		All		592-1EF_T		592-1EF_C		592-1EFGD	
		Range	Torque	Range	Torque	Range	Torque	Range	Torque
Flexible Stranded w/ Ferrule	1 wire	0.75...2.5 mm <sup>2</sup> (18...14 AWG)	1.4 N•m (12 lb•in)	2.5...16 mm <sup>2</sup> (14...6 AWG)	2.5 N•m (22 lb•in)	2.5...16 mm <sup>2</sup> (14...6 AWG)	2.5 N•m (22 lb•in)	4.0...35 mm <sup>2</sup> (12...1 AWG)	4.6 N•m (40 lb•in)
	2 wires <sup>(1)</sup>			2.5...10 mm <sup>2</sup> (14...8 AWG)	3.4 N•m (30 lb•in)	2.5...10 mm <sup>2</sup> (14...8 AWG)	3.6 N•m (32 lb•in)		
Stranded / Solid	1 wire	0.75...4.0 mm <sup>2</sup> (18...12 AWG)	1.4 N•m (12 lb•in)	2.5...16 mm <sup>2</sup> (14...6 AWG)	2.5 N•m (22 lb•in)	2.5...16 mm <sup>2</sup> (14...6 AWG)	2.5 N•m (22 lb•in)	4.0...35 mm <sup>2</sup> (12...1 AWG)	4.6 N•m (40 lb•in)
				25 mm <sup>2</sup> (4 AWG)	3.4 N•m (30 lb•in)	25 mm <sup>2</sup> (4 AWG)	3.4 N•m (30 lb•in)		
	2 wires <sup>(1)</sup>			2.5...16 mm <sup>2</sup> (14...6 AWG)		2.5 N•m (22 lb•in)	2.5...16 mm <sup>2</sup> (14...6 AWG)	3.6 N•m (32 lb•in)	

(1) For multiple conductor applications, you must use the same size and style of wire.

**Table 12 - Wiring Specifications for 592-1EFHE, 592-1EFHE-X1, and 592-1EFKF**

Wire Type	No. of Wires	Control Wiring		Power Wiring			
		All		592-1EFHE, 592-1EFHE-X1		592-1EFKF	
		Range	Torque	Range	Torque	Range	Torque
Flexible Stranded w/ Ferrule	1 wire	0.75...2.5 mm <sup>2</sup> (18...14 AWG)	1.4 N•m (12 lb•in)	—	—	—	—
	2 wires <sup>(1)</sup>			—	—	—	—
Stranded / Solid	1 wire	0.75...4.0 mm <sup>2</sup> (18...12 AWG)	1.4 N•m (12 lb•in)	6...4/0 AWG	275 lb•in	4 AWG...500 MCM	375 lb•in
	2 wires <sup>(1)</sup>			—	—	—	—

(1) For multiple conductor applications, you must use the same size and style of wire.

**Table 13 - Wiring Specifications for 193-1EGJ and 193-1ERR Accessories**

Wire Type	No. of Wires	Range	Torque
Stranded/Solid/Flexible Stranded w/ Ferrule	1 Wire	0.2...2.5 mm <sup>2</sup> (24...14 AWG)	0.55 N•m (5 lb•in)
	2 Wires <sup>(1)</sup>	0.2...2.5 mm <sup>2</sup> (24...14 AWG)	

(1) For multiple conductor applications, you must use the same size and style of wire. Recommended use of twisted pair for remote reset and ground fault, 24 AWG minimum.

**Table 14 - Wiring Specifications for 193-1EPB, 193-1EPD, and 193-1EPE**

Wire Type	No. of Wires	193-1EPB		193-1EPD		193-1EPE	
		Range	Torque	Range	Torque	Range	Torque
Flexible Stranded w/ Ferrule	1 Wire	2.5...6.0 mm <sup>2</sup> (14...10 AWG)	1.8 N•m (16 lb•in)	1.5...16 mm <sup>2</sup> (16...6 AWG)	2.3 N•m (20 lb•in)	4.0...35 mm <sup>2</sup> (12...2 AWG)	4.6 N•m (40 lb•in)
	2 Wires <sup>(1)</sup>			1.5...10 mm <sup>2</sup> (16...8 AWG)		4.0...25 mm <sup>2</sup> (12...4 AWG)	
Stranded / Solid	1 Wire	2.5...10 mm <sup>2</sup> (14...8 AWG)		1.5...16 mm <sup>2</sup> (16...6 AWG)		4.0...35 mm <sup>2</sup> (12...2 AWG)	
	2 Wires <sup>(1)</sup>	2.5...6.0 mm <sup>2</sup> (14...10 AWG)		1.5...10 mm <sup>2</sup> (16...8 AWG)		4.0...35 mm <sup>2</sup> (12...2 AWG)	

(1) For multiple conductor applications, you must use the same size and style of wire.

Dimensions are given in millimeters (inches). Dimensions are not intended to be used for manufacturing.

## Additional Resources

These documents contain additional information concerning related products from Rockwell Automation. You can view or download publications at [rok.auto/literature](http://rok.auto/literature).

Resource	Description
E100 Electronic Overload Relay User Manual, publication <a href="#">193-UM013</a>	Provides user information for the E100 Electronic Overload Relay.
Bulletin 193 Core Balanced Ground Fault Sensor Application and Installation Instructions, publication <a href="#">193-IN047</a>	Provides instruction about how to install and apply 193-CBCT core balanced ground fault sensors.
E100 Overload Relay Application and Installation Instructions (IEC), publication <a href="#">193-IN081</a>	Provides instruction about how to install the E100 Overload Relay onto 100-C contactors.
E100 Ground Fault/Jam and Remote Reset Module Application and Installation, publication <a href="#">193-IN082</a>	Provides instruction about how to install and apply the ground fault/jam and remote reset module.
E100 Overload Relay with Pass-thru Wiring Application and Installation Instructions, publication <a href="#">193-IN083</a>	Provides instruction about how to install the E100 Overload Relay with the pass-thru wiring option.
E100 External Current Transformer Overload Relay Application and Installation Instructions, publication <a href="#">193-IN084</a>	Provides instruction about how to install the Advanced E100 Overload Relay.
E100 Overload Relay Remote Reset Installation, publication <a href="#">193-IN085</a>	Provides instruction about how to install and set up the remote reset module.
E100 DIN Rail or Panel Adapter Installation, publication <a href="#">193-IN086</a>	Provides instruction about how to install the E100 relay onto DIN Rail or the panel adapter.
E100 Remote Indication Display Application and Installation, publication <a href="#">193-IN087</a>	Provides instruction about how to install and set up the remote status indication module.
Bulletin 193 E100 Overload Relay Application and Installation, publication <a href="#">193-IN089</a>	Provides instruction about how to install the E100 Overload Relay onto 100-E contactors.
E100 Overload Relay Application and Installation Instructions (NEMA), publication <a href="#">592-IN021</a>	Provides instruction about how to install the E100 Overload Relay onto 500 line contactors.
Bulletin 592 E100 Overload Relay Application and Installation, publication <a href="#">592-IN024</a>	Provides instruction about how to install the E100 Overload Relay onto 500 line contactors.
E200/E300 Overload Relay Specifications, publication <a href="#">193-TD006</a>	Provides complete specifications for the E300/E200 Electronic Overload Relays.
Bimetallic Overload Relay Specifications, publication <a href="#">193-TD010</a>	Provides complete specifications for bimetallic overload relays.
EtherNet/IP Network Devices User Manual, <a href="#">ENET-UM006</a>	Describes how to configure and use EtherNet/IP devices to communicate on the EtherNet/IP network.
Ethernet Reference Manual, <a href="#">ENET-RM002</a>	Describes basic Ethernet concepts, infrastructure components, and infrastructure features.
UL Standards Listing for Industrial Control Products, publication <a href="#">CMPNTS-SR002</a>	Assists original equipment manufacturers (OEMs) with construction of panels, to help ensure that they conform to the requirements of Underwriters Laboratories.
American Standards, Configurations, and Ratings: Introduction to Motor Circuit Design, publication <a href="#">IC-AT001</a>	Provides an overview of American motor circuit design based on methods that are outlined in the NEC.
Industrial Components Preventive Maintenance, Enclosures, and Contact Ratings Specifications, publication <a href="#">IC-TD002</a>	Provides a quick reference tool for Allen-Bradley industrial automation controls and assemblies.
Safety Guidelines for the Application, Installation, and Maintenance of Solid-state Control, publication <a href="#">SGI-1.1</a>	Designed to harmonize with NEMA Standards Publication No. ICS 1.1-1987 and provides general guidelines for the application, installation, and maintenance of solid-state control in the form of individual devices or packaged assemblies incorporating solid-state components.
Industrial Automation Wiring and Grounding Guidelines, publication <a href="#">1770-4.1</a>	Provides general guidelines for installing a Rockwell Automation industrial system.
Product Certifications website, <a href="http://rok.auto/certifications">rok.auto/certifications</a> .	Provides declarations of conformity, certificates, and other certification details.

# Rockwell Automation Support

Use these resources to access support information.

<b>Technical Support Center</b>	Find help with how-to videos, FAQs, chat, user forums, Knowledgebase, and product notification updates.	<a href="http://rok.auto/support">rok.auto/support</a>
<b>Local Technical Support Phone Numbers</b>	Locate the telephone number for your country.	<a href="http://rok.auto/phonesupport">rok.auto/phonesupport</a>
<b>Technical Documentation Center</b>	Quickly access and download technical specifications, installation instructions, and user manuals.	<a href="http://rok.auto/techdocs">rok.auto/techdocs</a>
<b>Literature Library</b>	Find installation instructions, manuals, brochures, and technical data publications.	<a href="http://rok.auto/literature">rok.auto/literature</a>
<b>Product Compatibility and Download Center (PCDC)</b>	Download firmware, associated files (such as AOP, EDS, and DTM), and access product release notes.	<a href="http://rok.auto/pcdc">rok.auto/pcdc</a>
