Product Description

ArmorStart® Bulletin 281E and 284E products are integrated, pre-engineered distributed motor control solutions that have quick disconnect connectivity, to satisfy automotive and material handling needs. They are available in full-voltage reversing or variable-speed motor control types. The ArmorStart product offers a standard IP67/Type 4/12 enclosure design, which is suitable for water wash-down environments. The modular design offers simplicity in wiring by applying quick disconnects for power, I/O, communications, and motor connection. The hardware machine stop version, when used with the recommended Bulletin 1732ES Safety I/O block, achieves Category 4 Performance Level e (PLe), SIL 3.

The ArmorStart product provides a standard local at-motor disconnect. It is UL Listed as suitable for Group Motor installation. This Listing can eliminate the need for additional components that would otherwise be required in each motor branch circuit.

The ArmorStart Bulletin 281E and 284E motor controllers natively support EtherNet/IP™, Device Level Ring, and IEEE 1588 transparent clock (Precision Time Protocol). Configuration is done using Studio 5000® Add-On Profile (AOP) capability. The AOP provides easy-to-navigate setup wizards and automatically creates descriptive producer and consumer tags in the Logix controller. An embedded web server allows you to easily retrieve status and diagnostic information when the AOP is not accessible. The ArmorStart product includes externally accessible node address switches and a comprehensive cluster of status and diagnostics light-emitting diodes for easy setup.

Included Features

Standard Features for ArmorStart ST Bulletin 281E and 284E Motor Controllers:

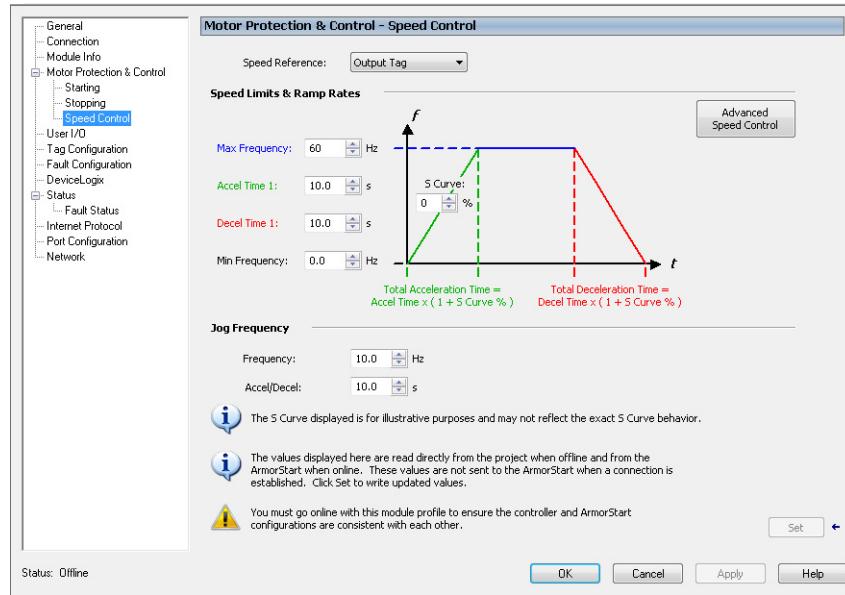

UL Listed "Suitable for Group Motor Applications" — Where NFPA 70 (National Electrical Code) or NFPA 79 are required installation standards, this Listing allows two or more motors to be connected to the same branch circuit without individual motor branch short-circuit or ground-fault protection.

At-motor disconnect switch — ArmorStart motor controllers offer a local ON/Off motor disconnect means with lockout-tag out provision. Industrial standards require a local at-motor disconnect to be within eye sight of the motor for maintenance or other shutdown reasons.

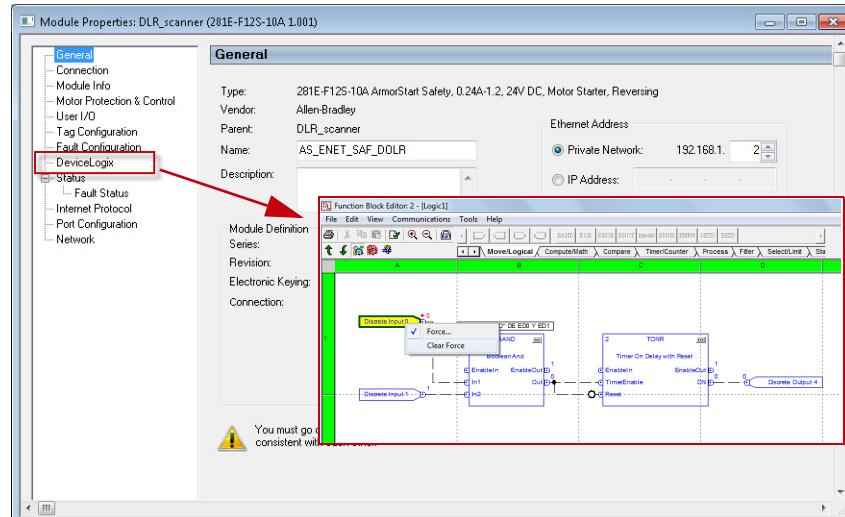

User I/O (field devices) — ArmorStart motor controllers offer four user-configurable inputs and two (sourcing) 24V DC outputs. You can select any point as a sourcing 24V DC output.

Light-emitting Diode Status Indication — The light-emitting diode indication provides a comprehensive number of status light-emitting diodes with indication for the following: POWER, RUN, NETWORK STATUS, FAULT, AND I/O.

Studio 5000 Add-on Profile (AOP) — ArmorStart motor controllers offer an Add-on Profile (AOP) for Allen-Bradley® ControlLogix® or CompactLogix™ Programmable Logic Controllers (PLCs). The AOP simplifies setup and commissioning via predefined tags and a setup wizard. The AOP allows copy and paste functionality for quick setup and configuration of multiple controllers.

DeviceLogix™ — ArmorStart motor controllers offer local programmable logic via DeviceLogix. DeviceLogix is a standalone program that resides within the ArmorStart motor controller and implements operations such as, AND, OR, NOT, Timers, Counters, and Latches.

Motor Connector — A common motor connector is used for ArmorStart 281E and 284E motor controllers when the RRG gland is selected. It is available as a single-ended, double-ended, shielded, or non-shielded cable assembly that meets UL 2237 for distributed three-phase power for machinery applications. The motor brake cable must be purchased separately. See [Accessories](#) for details.

Standard Features for Bulletin 284E (with RRG Gland):

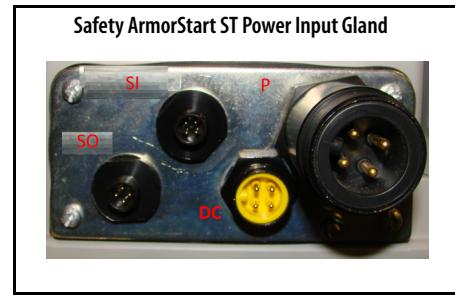

Electro Magnetic Interference (EMI) filter — An internal EMI filter is provided for CE compliance. CE requires that a shielded motor cable is used per product specifications.

Electromechanical Brake Connector — An internal mechanical contactor is used to switch an electromechanical motor brake On/Off. The motor brake contactor is powered from two phases of the main power circuit that is referred to as the Source Brake. The configuration of the R1 relay controls the operation of the brake. A customer accessible 2.5 A fuse is provided to protect the brake cable. The motor brake cable or sealing cap must be purchased separately. See [Accessories](#) for details.

Dynamic Brake Connector — The dynamic brake feature is used when decelerating high inertia loads that can cause over bus voltage faults. This feature is exclusively used with the IP67 Dynamic Brake Resistor. See [Accessories](#) for additional details regarding the IP67 Dynamic Brake Resistor or sealing cap.

Hardware Machine Stop (Category 0 Stop Function) Category 4 PLe

ArmorStart 281E and 284E motor controllers with Safety achieve hardware machine stop of Category 4 functionality by using redundant internal contactors. The 1732ES-IB12XOBV2 (two bipolar outputs) or 1732ES-IB8XOBV4 (four bipolar outputs) safety I/O module is used to achieve PLe performance. The 1732ES monitors [S0] and controls [S1] the internal contactors. See [Accessories](#) for safety I/O block section details.

ArmorConnect 3-Phase Power Media

ArmorConnect® power media offers both three-phase and control power cable systems of cordsets, patchcords, receptacles, tees, reducers and accessories, to be used with the ArmorStart distributed motor controller. These cable system components allow quick connection of ArmorStart distributed motor controllers, which reduces installation time. They allow for repeatable, consistent connection of the three-phase and control power to the ArmorStart distributed motor controller and motor. They provide a plug and play environment that also helps to avoid mis-wiring of the system.

See [Accessories](#) for additional details.

Through-panel receptacles

Trunk cable assemblies

Tee, reducer adapter, and field attachable connector

Auxiliary Power Media

Auxiliary power media offers a mini style quick disconnect cable that provides a secure connection to the ArmorStart ST motor controller. The auxiliary power media components are based on a 4-pin, mini connector to avoid mis-wires. The connectors can be straight or right angled and are physically keyed to avoid wiring mishaps. See [Accessories](#) for additional details.

Through-panel receptacles

4-pin mini auxiliary power cables

Tees

I/O and Network Media

Connection Devices include Network Media for Ethernet, Input and Output devices, and Safety Connection Systems. Rockwell Automation offers many product solutions in cordsets, patchcords, V- and Y-cables, splitters, field-attachable connectors, and receptacles.

See [Accessories](#) for additional details.

I/O cordset and patchcord

Ethernet cordset and patchcord

Sealing caps

Product Selection — Bulletin 281E

Bulletin 281E ArmorStart ST Distributed Motor Controller with RRG Gland

Full-voltage Reversing Standard Starter

The ArmorStart catalog number 281E...Z-RRG is the standard version motor controller and is used in applications that require across-the-line starting. It has full in-rush current and locked-rotor torque.

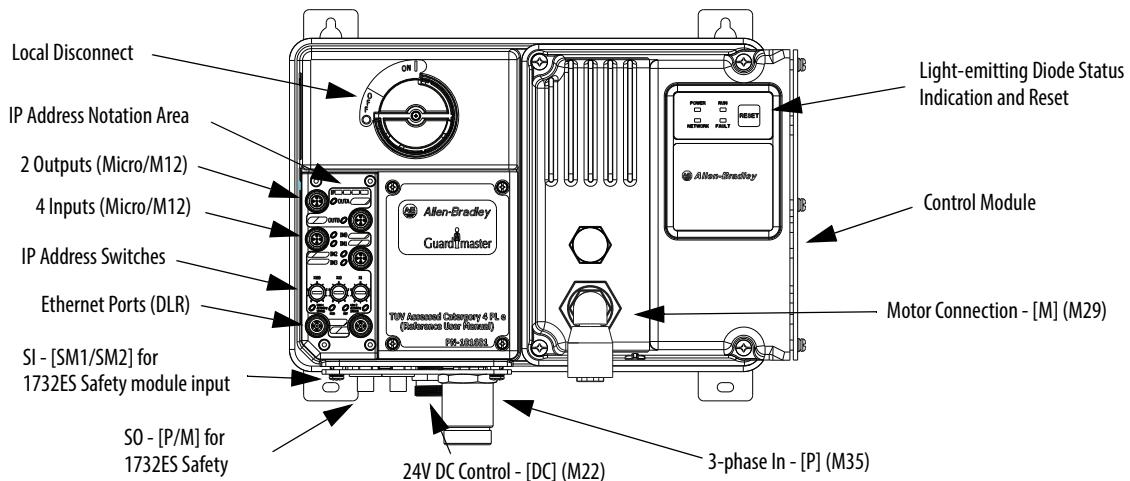

Standard Version

Hardware Machine Off Safety Starter (Category 0 Stop)

The ArmorStart catalog number 281E...S-RRG is the safety version motor controller and is used in applications that require across-the-line starting and is also key to the overall machine safety compliance based on the risk assessment. This safety system solution can achieve a maximum of Category 4 PLe Safety.

Safety Version

Features

On-Machine™ motor starting solution from 0.5...10 Hp (0.37...7.5 kW). Includes:

- Native dual-port Ethernet switch and supports DLR over EtherNet/IP
- Four digital inputs and two digital outputs
- IP67/Type 4/12 enclosure rating
- Quick disconnect connections for I/O, communications, motor, three-phase, and control power.
- ArmorConnect power media is the only UL recommended solution
- Comprehensive local light-emitting diode status indication
- Local logic technology using DeviceLogix
- TÜV certified Category 4 PLe Safety performance

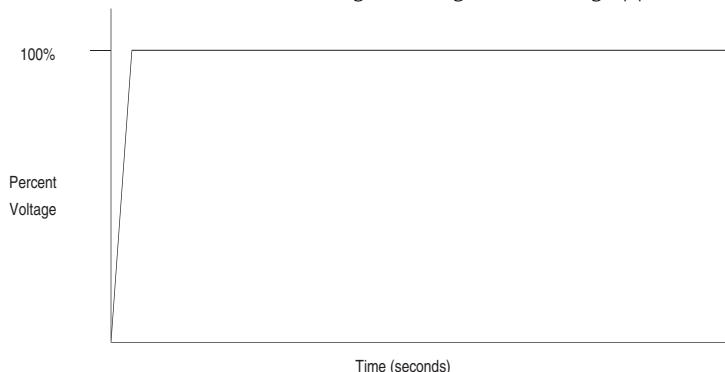

Standards Compliance and Certifications

• UL 508	• EN/IEC 60947-4-1	• CCC
• CSA C22.2, No. 14	• CE Marked per Low Voltage 2006/95/EC	• ODVA for EtherNet/IP
• EN/IEC 60947-4	• EMC Directive 2004/108/EC	• TÜV

Mode of Operation

Full-voltage Start

This method is used in applications that require across-the-line starting. It has full in-rush current and locked-rotor torque. The ArmorStart Bulletin 281E motor controller offers full-voltage starting for reversing applications.

Overload Protection

The Bulletin 281E ArmorStart distributed motor controller incorporates, as standard, electronic motor overload protection. This overload protection is accomplished electronically with an I^2t algorithm. The overload protection is programmable via the communication network providing you with flexibility. The overload trip class can be selected for class 10, 15, or 20 protection. Ambient insensitivity is inherent in the electronic design of the overload.

Fault Diagnostics

Fault diagnostics capabilities that are built into the Bulletin 281E ArmorStart Distributed Motor Controller:

• Short Circuit	• Control Power Fuse Detection	• Phase Imbalance
• Overload	• I/O Fault	• EEPROM Fault
• Phase Loss	• Output Power Fuse Detection	• Hardware Fault
• Control Power Loss	• Overtemperature	

Catalog Number Explanation

Examples that are given in this section are for reference purposes. This basic explanation should not be used for product selection; not all combinations will produce a valid catalog number.

Product Selection — Bulletin 284E

Bulletin 284E ArmorStart ST Distributed Motor Controller with RRG Gland

Standard Variable Frequency Drive, Sensorless Vector Control Performance (SVC) Starter

The ArmorStart catalog number 284E-...Z-RRG... is the standard version motor controller and is used in applications that require regulated speed control of AC Motors. Variable speed and control are accomplished through selectable V/Hz or SVC control.

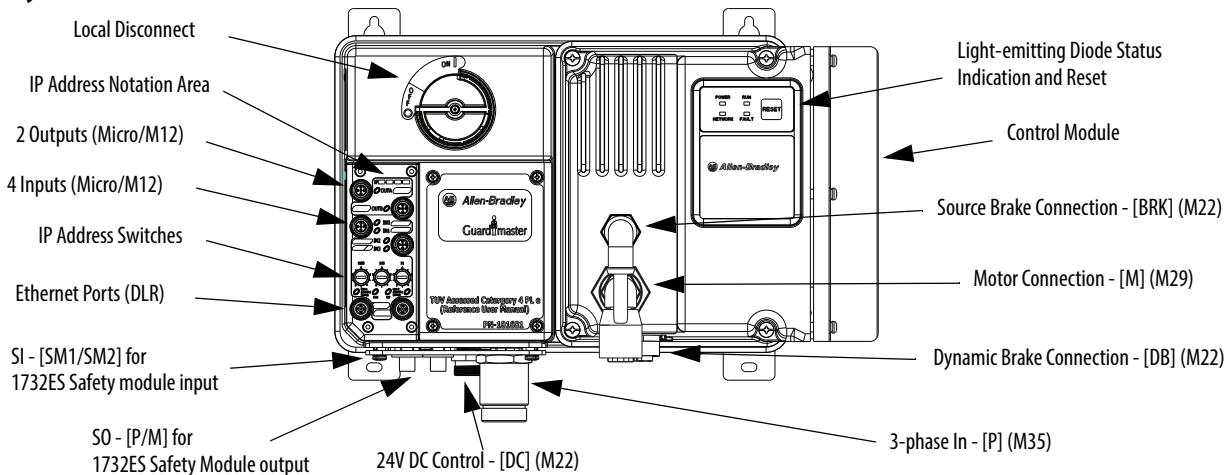

Standard Version

Hardware Machine Off Safety VFD Starter

The ArmorStart catalog number 284E-...S-RRG... is the safety version motor controller and used in applications that require regulated speed control of AC Motors. Variable speed and control are accomplished through selectable V/Hz or SVC control. This is key to the overall machine safety compliance based on the risk assessment. This safety system solution can achieve a maximum of Category 4 PLe Safety.

Safety Version

Features

On-Machine motor starting solution from 1...5 Hp (0.75...3.0 kW). Includes:

- Variable frequency AC drive using PowerFlex® Technology
- Native dual-port Ethernet switch and supports DLR over EtherNet/IP
- Four digital inputs and two digital outputs
- IP67/Type 4/12 enclosure rating
- Quick disconnect connections for I/O, communications, motor, three-phase, and control power.
- ArmorConnect power media is the only UL recommended solution for distribution of 3-phase power.
- Comprehensive local light-emitting diode status indication
- Local logic technology using DeviceLogix
- TÜV certified Category 4 PLe Safety performance
- Electromechanical Source Motor Brake Connector
- Dynamic Brake Connector (IP67 Resistor sold separately)
- Internal EMI Filter

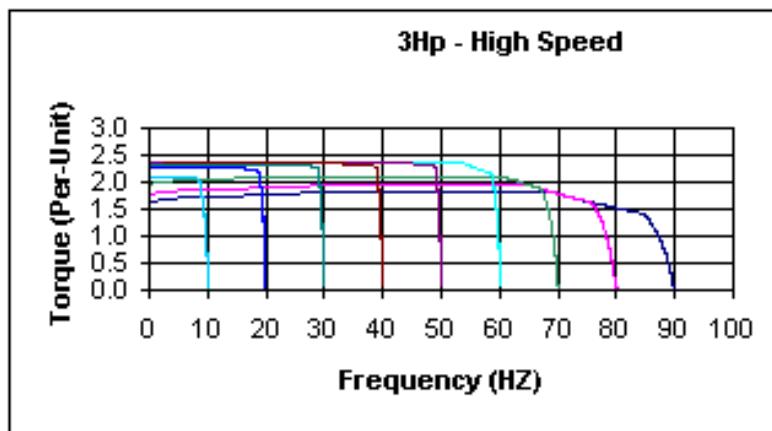

Standards Compliance and Certifications

• UL 508	• EN 61800-3	• EMC Directive 2004/108/EC
• CSA C22.2, No. 14	• EN/IEC 60947-4-2	• ODVA for EtherNet/IP
• EN 50178	• CE Marked per Low Voltage 2006/95/EC	• TÜV

Mode of Operation

Sensorless Vector Control (SVC)

This method provides exceptional speed regulation and high levels of torque across the entire speed range of the drive.

- The Autotune feature allows the Bulletin 284E SVC to adapt to individual motor characteristics.
- Develops high torque over a wide speed range and adapts to individual motor characteristics.

Overload Protection

The Bulletin 284E ArmorStart distributed motor controller incorporates a standard electronic motor overload protection. This overload protection is accomplished electronically with an I^2t algorithm. The overload protection is programmable via the communication network providing you with flexibility. The overload trip class allows for class 10 overload protection. Ambient insensitivity is inherent in the electronic design of the overload.

Fault Diagnostics

Fault diagnostics capabilities that are built into the Bulletin 284E ArmorStart Distributed Motor Controller:

• Short Circuit	• Control Power Loss	• Output Fuse Protection	• Hardware Fault
• Overload	• Control Power Fuse Detection	• Brake Fuse Protection	• Restart Retries
• Phase Short	• I/O Fault	• Internal Communication Fault	• Miscellaneous Fault
• Ground Fault	• Overcurrent	• DC Bus Fault	
• Stall	• Overtemperature	• EEPROM Fault

Safety Information and TÜV Requirements

ArmorStart Safety-related Parts

Each ArmorStart Safety distributed motor controller is intended to be combined with the catalog number 1732ES-IB12XOBV2 or 1732ES-IB8XOBV4 safety I/O module to form a subsystem that is part of the overall machine stop function. The motor controllers are connected to the safety I/O module through specified cable assemblies. The combination of one of these controllers, the safety module, and the specified interconnecting cables are referred to as the ArmorStart safety-related parts. The catalog numbers and specific combinations for these safety-related components are shown in the following tables. The safety I/O module and PLC program must be configured appropriately to meet TÜV CAT4 PLe certification. See Publication [280ES-UM001](#), ArmorStart ST Motor Controller User Manual, for details.

Safety-related Parts

Catalog Number	Description

Assembly provides contactor position feedback. P/M cable assembly - Interconnecting cable assembly between safety module output and ArmorStart controller connector labeled "SO". Assembly provides output contactor coil power.

ArmorBlock Guard I/O Modules

	Description	Cat. No.
	The ArmorBlock® I/O family provides a low-cost, hardened, digital I/O product suitable for On-Machine use. Water- and corrosion-proof, it can mount anywhere on a machine, allowing OEMs and end users to reduce installation and operating costs. ArmorBlock® Guard I/O™ is available in 16-point combined input and output versions, for use with your choice of safety input and actuator devices. This module supports multi-cast and unicast for user flexibility and features embedded EtherNet/IP that enables flexibility in choice of topographies.	1732ES-IB12XOBV2 - 24V DC, 12 Input/ 2 Bipolar Pair Out, EtherNet/IP Safety

Standard Version Connector and Cable Requirement Overview

① CAT5e Bulkhead Connector and Receptacle – Example **Cat.No. 1585A-DD4JD**

② CAT5e Patchcord, IP67, M12 D-Code, Male Straight, Male Right Angle – Example **Cat.No. 1585D-M4TBDE-***

③ CAT5e, Patch Cable, IP20, RJ45 Male to RJ45 Male – Example **Cat.No. 1585J-M4TB-***

④ Three-phase Power Receptacles - Female receptacles are a panel mount connector with flying leads – Example **Cat. No. 280-M35F-M1**

⑤ Three-phase Power Trunk- Patchcord cable with integral female or male connector on each end – Example **Cat. No. 280-PWR35A-M***

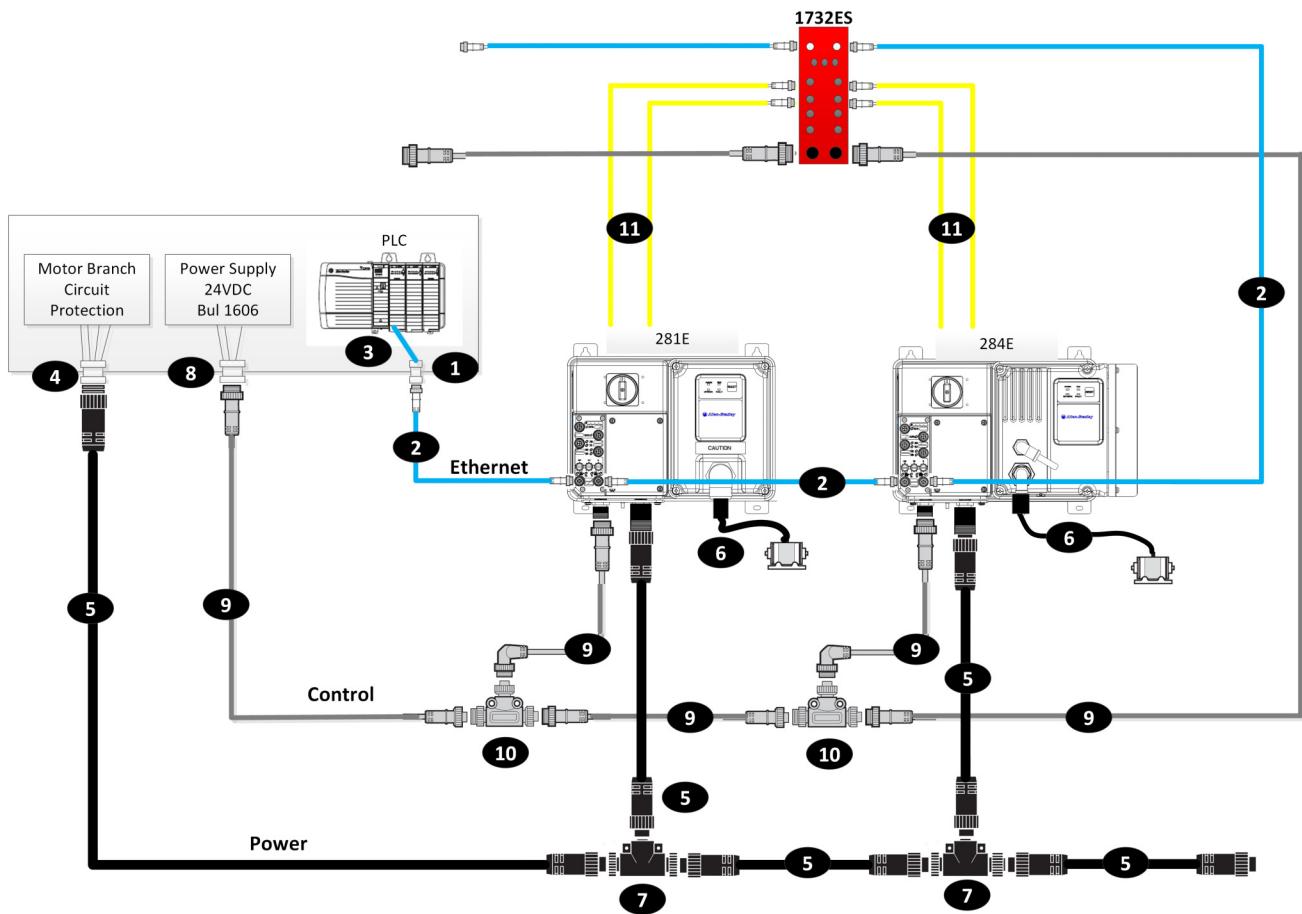

⑥ Three-Phase Motor Cable – Example **Cat. Nos. 284-PWRM29A-M3 or 280-PWRM29A-M3**

⑦ Three-phase Power Tee connects to a single M35 drop line to trunk connectors – **Cat. No. 280-T35**

⑧ Control Power Receptacles - Female receptacles are a panel mount connector with flying leads – **Cat. No. 888N-D4AF1-1F**

⑨ Control/Auxiliary Power Media Patchcords – Patchcord cable with integral female or male connector on each end – Example **Cat. No. 889N-F4AFNM-***

⑩ Control/Auxiliary Power Tees - The Tee is used with cordset or patchcord to connect several ArmorStart ST controllers to the same control power source.– Example **Cat. No. 898N-43PB-N4KT**

Safety Version Connector and Cable Requirement Overview

① CAT5e Bulkhead Connector and Receptacle – Example **Cat.No. 1585A-DD4JD**

② CAT5e Patchcord, IP67, M12 D-Code, Male Straight, Male Right Angle – Example **Cat.No. 1585D-M4TBDE-***

③ CAT5e, Patch Cable, IP20, RJ45 Male to RJ45 Male – Example **Cat.No. 1585J-M4TB-***

④ Three-phase Power Receptacles - Female receptacles are a panel mount connector with flying leads – Example **Cat. No. 280-M35F-M1**

⑤ Three-phase Power Trunk- Patchcord cable with integral female or male connector on each end – Example **Cat. No. 280-PWR35A-M***

⑥ Three-Phase Motor Cable – Example **Cat. Nos. 284-PWRM29A-M3 or 280-PWRM29A-M3**

⑦ Three-phase Power Tee connects to a single M35 drop line to trunk connectors – **Cat. No. 280-T35**

⑧ Control Power Receptacles - Female receptacles are a panel mount connector with flying leads – **Cat. No. 888N-D4AF1-1F**

⑨ Control/Auxiliary Power Media Patchcords – Patchcord cable with integral female or male connector on each end – Example **Cat. No. 889N-F4AFNM-***

⑩ Control/Auxiliary Power Tees – The Tee is used with cordset or patchcord to connect several ArmorStart ST controllers to the same control power source.– Example **Cat. No. 898N-43PB-N4KT**

⑪ Patch cable between Safety I/O module input and ArmorStart connector labeled "SM" and "P/M". This cable provides status and control feedback to the safety system. – Example **Cat. No. 889D-F4AEDM-***

Industrial Ethernet Media

D Code Connectivity (M12) – 1585D

IP67 Patchcords and Cordsets		
M12 D Code	Connector Type	Cat. No. Unshielded
	Male Straight to Male Straight	1585D-M4TBDM-(¹)
	Male Straight to Male Right Angle	1585D-M4TBDE-(¹)
	Male Right Angle to Male Right Angle	1585D-E4TBDE-(¹)
	Male Straight to Female Straight	1585D-M4TBDF-(¹)

(1) Available in 0.3, 0.6, 1, 2, 5, 10, 15, and increments of 5 meters up to 75 meters.

Note: See www.ab.com/networks/media/ethernet to learn more about Industrial Ethernet Media.

Sensor Media

Description	Description	I/O Connection	Pin Count	Connector	Cat. No.
	DC Micro Patchcord	Input/Output	4-Pin	Straight Female Straight Male	889D-F4ACDM-(¹)
				Straight Female Right Angle Male	889D-F4ACDE-(¹)
	DC Micro V-Cable			Straight Female	879D-F4ACDM-(¹)
				Right Angle Female	879D-R4ACM-(¹)

(1) Replace symbol with desired length in meters (for example, Cat. No. 889D-F4ACDM-1 for a 1 m cable). Standard cable lengths: 1 m, 2 m, 5 m, and 10 m.

Safety I/O Cables and Connectors

Micro Cables

	Description	Cat. No.
	DC Micro (M12) Male Cordset	889D-F4HJ-(¹)
	DC Micro Style Patchcord	889D-F4HJDM-(¹)

(1) Replace symbol with 1 (1 m [3.3 ft]), 2 (2 m [6.6 ft]), 5 (5 m [16.4 ft]), or 10 (10 m [32.8 ft]) for standard cable length.

Motor and Brake Cables

Description	Rating	Length m (ft)	Cat. No.
Single-ended, Non-shielded Motor Cable			
			
Non-shielded cordset cable assembly with straight male / flying leads, 29 mm shell, 4-pin, 12 AWG Conductors	IP67, NEMA 4/12, TC-ER Bending radius not to exceed 10x the cable diameter Cable diameter 0.657 in. +/- 0.12 in. (16.71 mm +/- 0.5 mm) with four 12 AWG conductors	0.5	280-PWRM29G-M05

Non-shielded receptacle straight female with flying leads 22 mm shell, 3 -pin, 14 AWG Conductors	IP67/NEMA Type 4/12	0.25 (0.8)	285-M24F-M025

Three-phase Power

Description ⁽¹⁾	Cat. No.	
Power cable - straight female to straight male	280-PWRM35A-M ⁽²⁾	
Power tee - 3-phase, 4-pole	280-T35	
Power tee - 3-phase, 4-pole, reducing drop (when using ArmorStart EtherNet/IP version 0.5...2 Hp)	280-RT35	
Field-attachable M35 connector - 10 AWG, 600V, 32 A	280-FAM35F (female)	280-FAM35M (male)

(1) UL Listed - UL 2237 (File No. E318496, Guide PVVA)

(2) See Publication [280PWR-SG001](#), ArmorConnect Power and Control Media Selection Guide, for available lengths.

Note: See Publication [280PWR-SG001](#), ArmorConnect Power and Control Media Selection Guide, for additional three-phase media options.

24V DC Auxiliary Power

Description	Cat. No.
Cordset - mini straight female to flying leads	889N-F4AFC ⁽¹⁾
Cordset - mini straight male to flying leads	889N-M4AFC ⁽¹⁾
Patchcord - mini straight male to straight female	889N-F4AFNM ⁽²⁾
Control power tee - 24V DC, 4-pole	898N-43PB-N-4KF
Auxiliary device T-port	898N-43PB-N4KT
ArmorStart auxiliary T-port (ArmorStart adapter tee when using ArmorStart EtherNet/IP version with quick disconnects)	898N-543ES-NKF
Patchcord - 5/6-pin mini (for use with ArmorStart auxiliary T-port drop) (ArmorStart drop from Tee when using ArmorStart EtherNet/IP version with quick disconnects)	889N-F65 ⁽¹⁾

(1) Replace symbol with 6F (1.8 m [6 ft]), 5 (5 m [16.4 ft]), or 10 (10 m [32.8 ft]) for standard cable length.

(2) Replace symbol with 2 (2 m [6.6 ft]), 5 (5 m [16.4 ft]), or 10 (10 m [32.8 ft]) for standard cable length.

Note: See <http://ab.rockwellautomation.com/connection-devices/cables-and-cordsets> for additional auxiliary power cable options.

Control Power Tee (898N-43PB-N-4KF) Internal Wiring

Pin Count	Assembly Rating	Wiring Diagram	Cat. No.

Dynamic Brake Resistors Recommended Dynamic Brake Modules for Option DB1 (IP67 Resistor)

Drive and Motor Size kW	Cat. No. ⁽¹⁾	Resistance $\Omega \pm 5\%$	Continuous Power kW	Max Energy kJ	Max Braking Torque % of Motor	Application Type 1		Application Type 2	
						Braking Torque % of Motor	Duty Cycle %	Braking Torque % of Motor	Duty Cycle %
380...480 Volt AC Input Drives									
0.37 (0.5)	284R-360P500-M ⁽²⁾	360	0.086	17	305%	100%	47%	150%	31%
0.75 (1)	284R-360P500-M ⁽²⁾	360	0.086	17	220%	100%	23%	150%	15%
1.5 (2)	284R-360P500-M ⁽²⁾	360	0.086	17	110%	100%	12%	110%	11%
2.2 (3)	284R-120P1K2-M ⁽²⁾	120	0.26	52	197%	100%	24%	150%	16%
4 (5)	284R-120P1K2-M ⁽²⁾	120	0.26	52	124%	100%	13%	124%	10%

(1) Drive rating and DB part numbers are not interchangeable. Only use specified resistor. Customer is responsible to evaluate if performance meets application requirement.

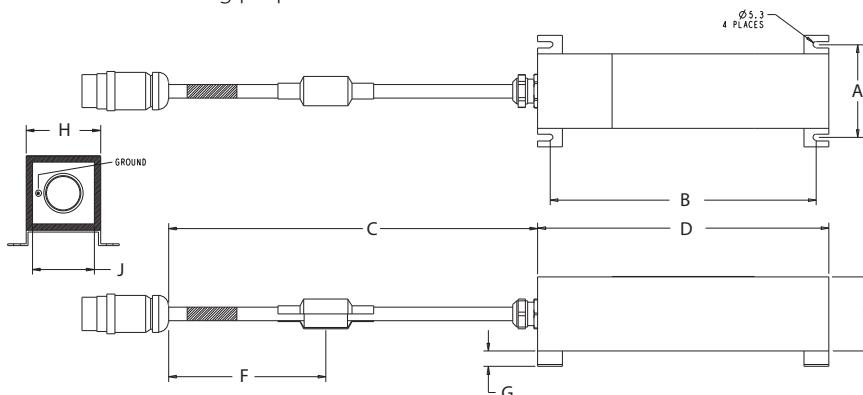

(2) Length is user-selectable based on a suffix added to the catalog number. For a length of 500 ± 10 mm, add **-M05** to the end of the catalog number. For a length of 1000 ± 10 mm, add **-M1** to the end of the catalog number.

Notes: Duty Cycle that is listed, is based on full speed to zero speed deceleration. For constant regen at full speed, duty cycle capability is half of what is listed.

- Application Type 1 represents maximum capability up to 100% braking torque where possible.
- Application Type 2 represents more than 100% braking torque where possible, up to a maximum of 150%.

Bulletin 284 Dynamic Brake Resistor Approximate Dimensions

Dimensions are not intended to be used for manufacturing purposes.

Cat. No.	A mm (in.)	B mm (in.)	C mm (in.)	D mm (in.)	E mm (in.)	F mm (in.)	G mm (in.)	H mm (in.)	J mm (in.)
284R-091P500									
284R-120P1K2	89 ± 3 (3.5 ± 0.12)	215 ± 5 (8.46 ± 0.2)	$M05 = 0.5 \text{ m}$ $M1 = 1 \text{ m}^{(1)}$	235 ± 5 (9.25 ± 0.2)	60 ± 2 (2.36 ± 0.08)	127 (5)	12.54 (0.49)	60 ± 2 (2.36 ± 0.08)	50 ± 1.5 (1.97 ± 0.06)
284R-120P1K2		420 ± 5 (16.54 ± 0.2)		440 ± 5 (17.32 ± 0.2)					

(1) Length is user-selectable based on the suffix added to the catalog number. For a length of 500 ± 10 mm, add **-M05** to the end of the catalog number. For a length of 1000 ± 10 mm, add **-M1** to the end of the catalog number.

Note: The customer must protect the resistor in the event of a shorted switch in the VFD, which is done via PLC control. An example ControlLogix program can be downloaded from <http://samplecode.rockwellautomation.com>

Sealing Caps

Description	Cat. No. EtherNet/IP	
	Input	Output
Plastic Sealing Cap (M12) ⁽¹⁾	1485A-M12	1485A-M12
Aluminum Sealing Cap (M22) ⁽¹⁾	—	1485A-C1
Aluminum Sealing Cap (M35) ⁽¹⁾	—	889A-QMCAP

(1) To achieve IP67 rating, sealing caps must be installed on all unused I/O connections.

Disconnect Accessory

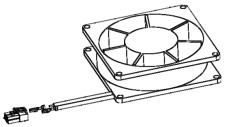

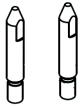

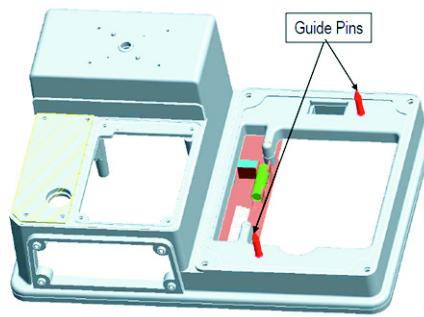

Description	Cat. No.
 Locking Tag Padlock attachment to the lockable handles Up to three padlocks 4...8 mm (5/16 in. diameter) shackle	140M-C-M3

Replacement Parts

Replacement Fuses

Description	Part No.
Output Fuse	
Fast acting, high-interrupting capacity, tubular fuse Rating: 2.5 A, 250V Dimension [mm (in.)]: 20 (0.787) x 5 (0.197)	Littlefuse PN 021602.5
Control Fuse	
UL Listed Class CC, CSA HRC-1 Rating: 7 A, 600V Dimensions [in.]: 1.5 x 0.405	Cooper Bussman PN KTK-R-7 or Littlefuse PN KLKR007.T
Source Brake Fuse (For use with Bulletins 284)	
UL Listed Class CC, CSA HRC-1 Rating: 3 A, 600V Dimensions [in.]: 1.5 x 0.405	Cooper Bussman PN KTK-R-3 or Littlefuse PN KLKR003.T

Fan and Guide Pins

Description	Cat. No.
 Replacement Fan for 284 Control Module	284-FAN
 Replacement Guide Pins (2 pins per package) ⁽¹⁾	 284-PIN

(1) These pins are replacement parts for factory-installed alignment pins. They cannot be retrofitted in the field.

(1) ArmorStart safety controller used in combination with ArmorStart safety-related parts.

Motor Overload Trip Curves

Motor overload current parameter provides class 10, 15, and 20 overload protection. Ambient insensitivity is inherent in the electronic design of the overload.

Bulletin 281E Overload Trip Curves

Note: For Bulletin 281E, if an overload fault occurs it can require 60 s or more before a fault reset is allowed. See Overload Class Parameter 107, Thermo-Utilization parameter 105, and OL Reset Level parameter 108 to adjust the reset time.

Note: For Bulletin 281E, when the mechanical motor brake voltage is applied using power from the load side of the ArmorStart controller, this current adds to the load and can result in a phase imbalance or overload if the FLA of the motor and the brake current are similar in scale.

Contactor Life Load Curves

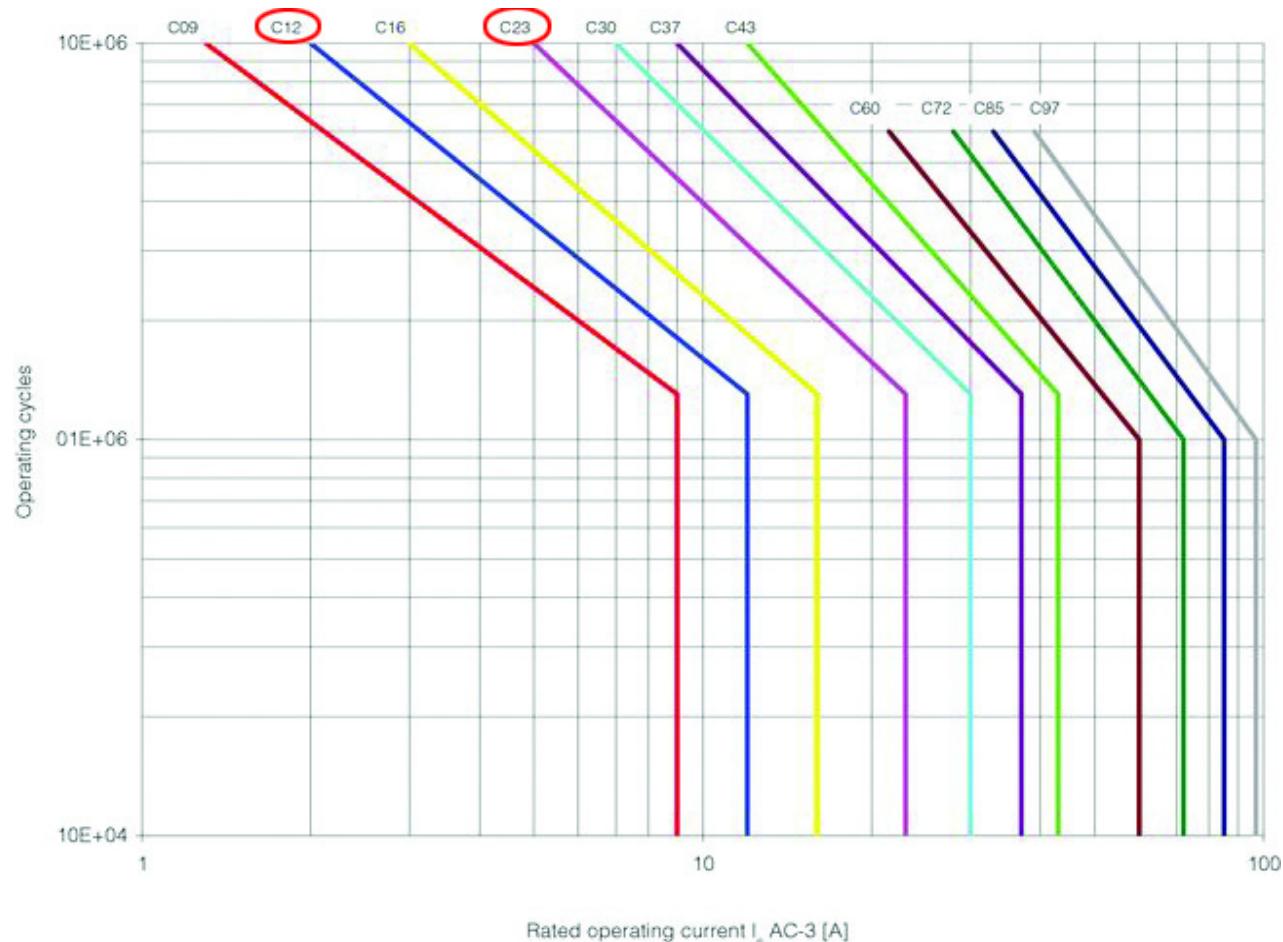

280/1_12* = 100-C12*

280/1_23* = 100-C23*

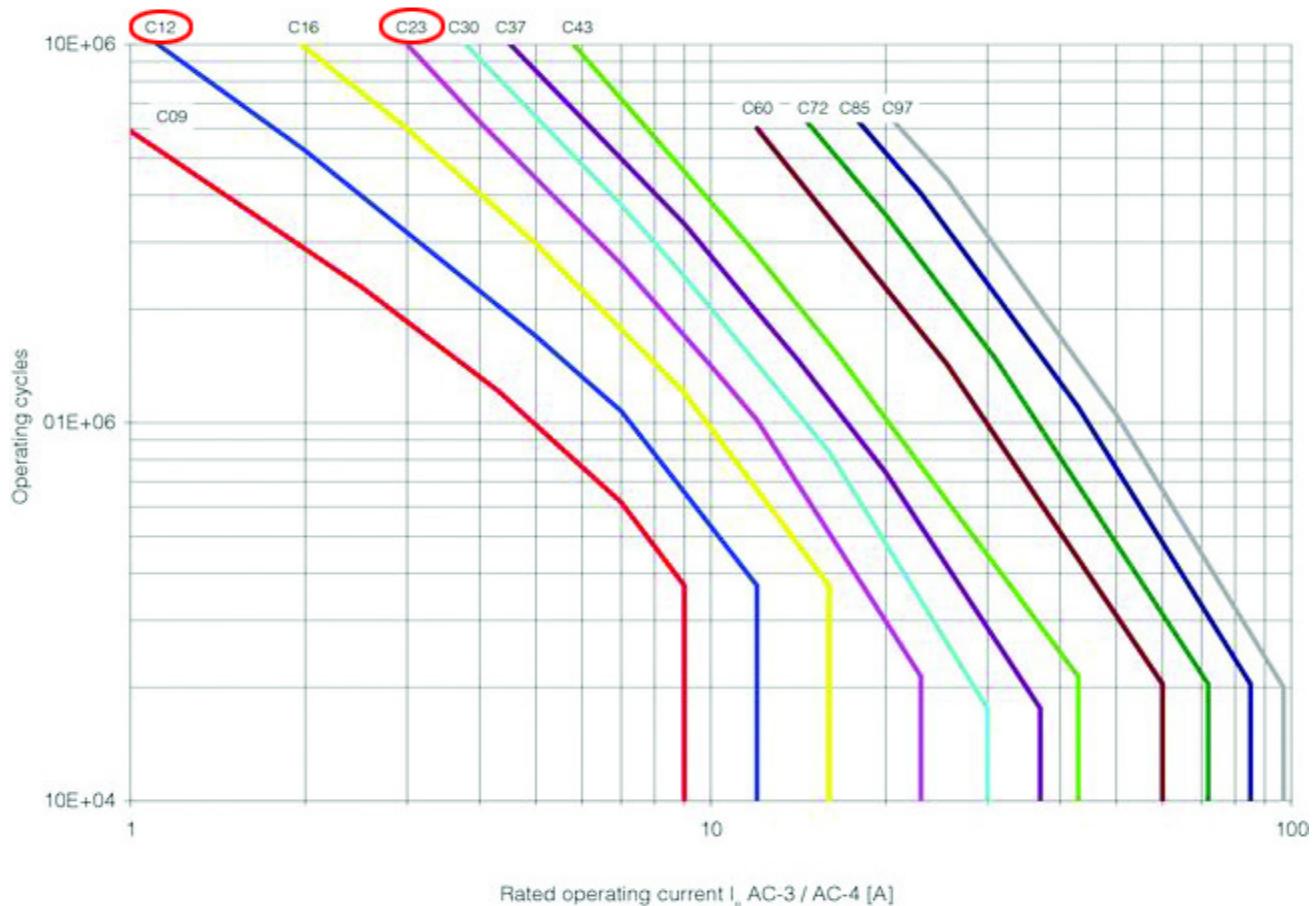

Life Load Curves:

AC-3 Switching of squirrel-cage motors while starting

$U_e = 230 \dots 400 \dots 460V$

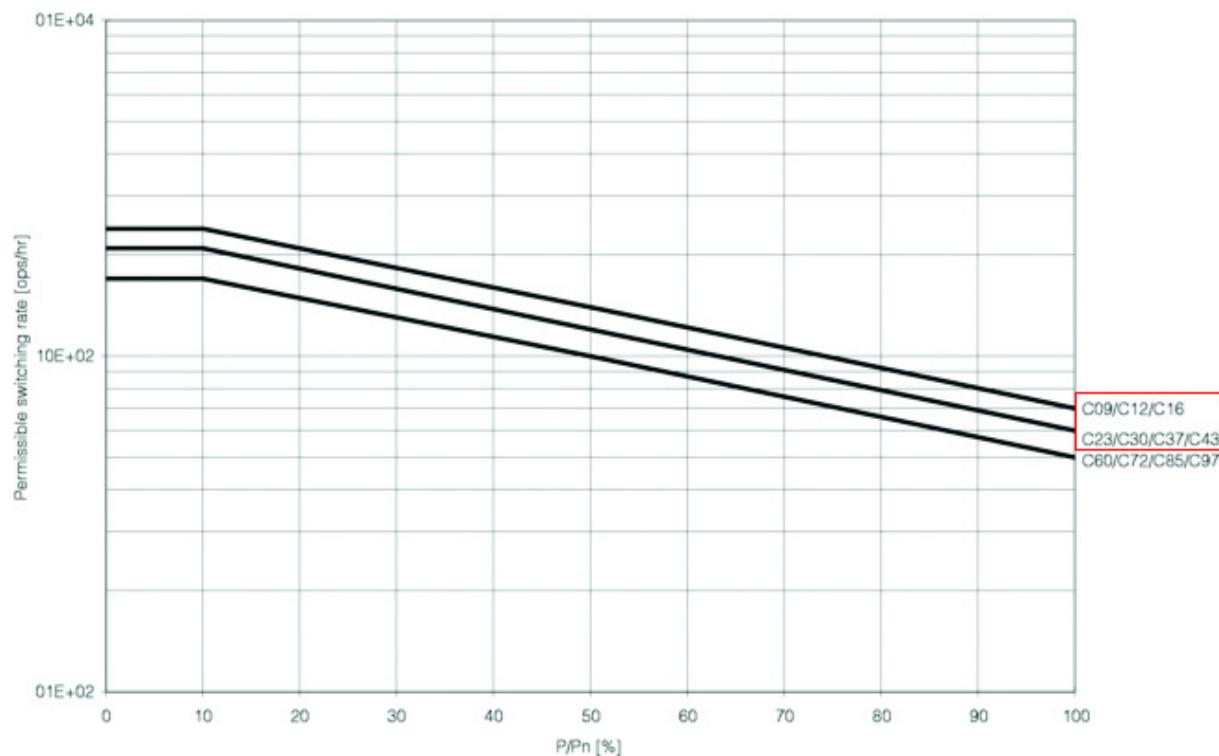

AC-3 & AC-4 10% AC-4 Mixed operation of squirrel-cage motors
 $U_e = 400 \dots 460V$

Maximum Operating Rates:

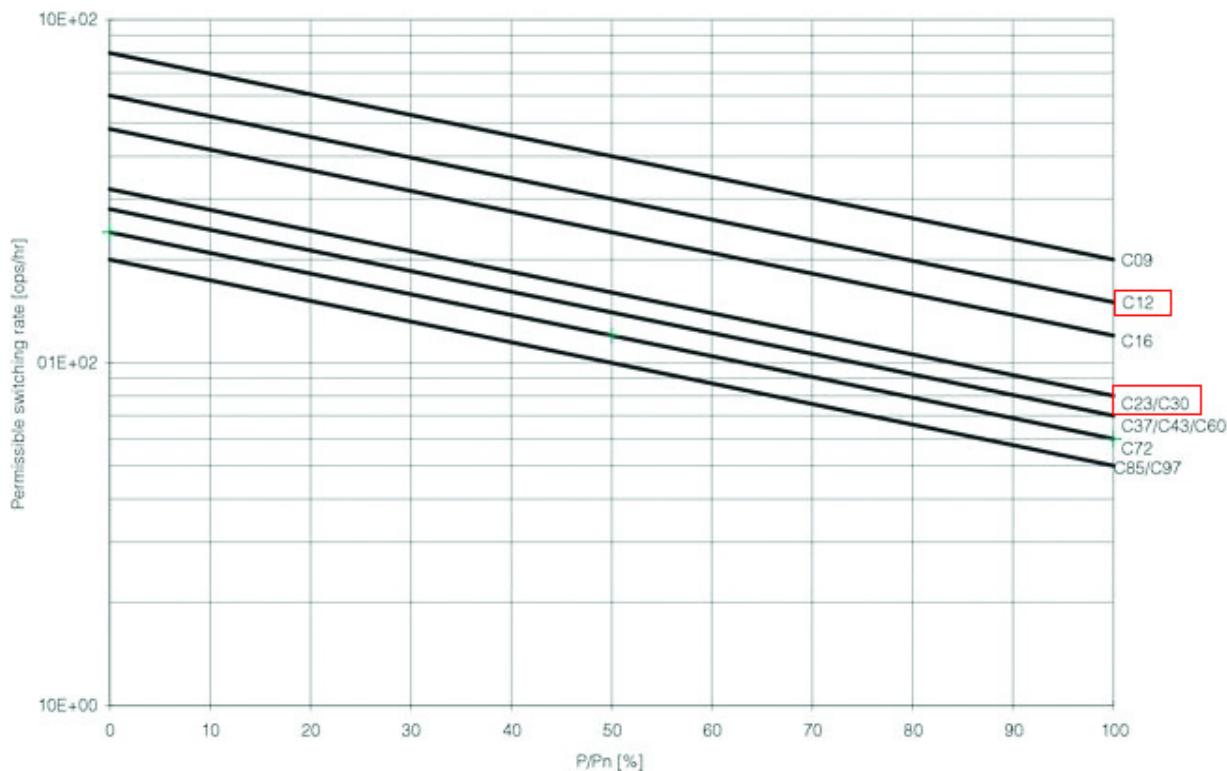

AC-3 Switching of squirrel-cage motors while starting

$U_e = 230\ldots460V$, Relative operating time 40%, Starting time $t_A = 0.25 s$

AC-4 Inching of squirrel-cage motors

$U_e = 230\ldots460V$, Starting time $t_A = 0.25 s$

(1) ArmorStart safety controller used in combination with ArmorStart safety-related parts.

Motor Overload Trip Curves

Motor OL Current parameter provides Class 10 overload protection. Ambient insensitivity is inherent in the electronic design of the overload.

284E Overload Trip Curves

Altitude Derating

Altitude Rating for Bulletin 281E

- No altitude derating up to 2000 m (6562 ft)

Altitude Rating for Bulletin 284E

- **0.5 Hp:** No Derating up to 3000 m (9843 ft)
- **1 Hp:** No Derating up to 3000 m (9843 ft)
- **2 Hp:** Derate 1% per 100 m (328 ft) above 1000 m (3281 ft)
- **3 Hp:** No Derating up to 3000 m (9843 ft)
- **5 Hp:** Derate 1% per 100 m (328 ft) above 1000 m

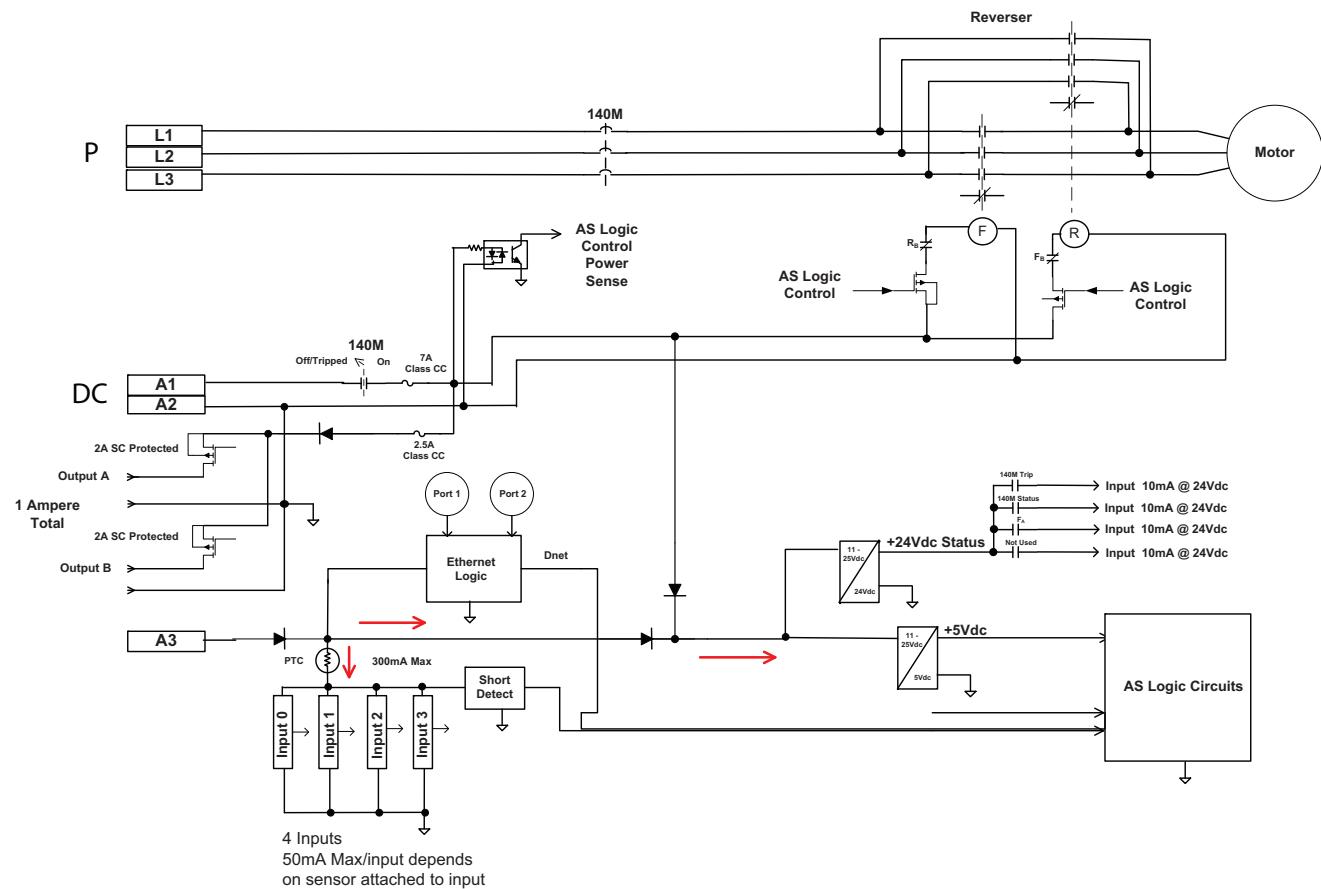

Example: Application requires 2600 m for a 5 Hp ArmorStart

- 2600 m - 1000 m = 1600 m
- $1600/100 = 16$
- $16 * 1\% = 16\%$. Derate output amps by 16%
- $(1 - 0.16) * 7.6 \text{ A} = 6.4 \text{ A}$

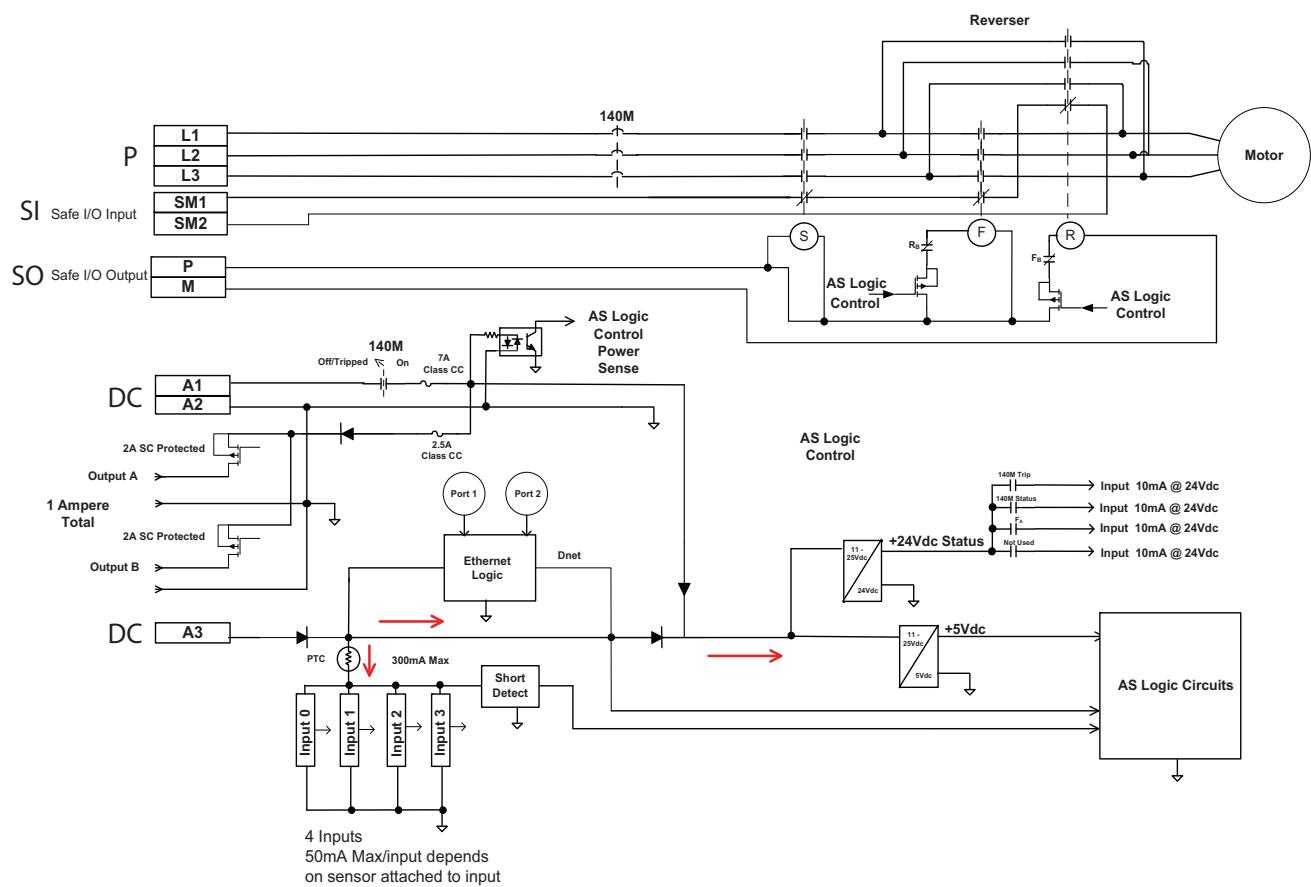

It is possible to extend the operational range of the units if the ambient temperature is lower than 40 °C (104 °F), or if line reactors are used.
